From Cincinnati, Ohio: Breadstuffs have been without animation, and lower prices have ruled for all cereals. Wheat closes less active but steady; receipts have been liberal, but scarcely equal to half the arrivals for the corresponding week a year ago. Corn closes heavy and dull. Oats irregular. New oats are arriving, and have materially weakened the market for old. Rye has been easy and slow. New wheat family flour is already in market, and with fresh-ground old has monopolized the demand. Old family and the lower grades are dull and weaker.

From Chicago, Ill.: Wheat is firmer. The strength is due to manipulation of the bulls, who wish to unload. There is scarcely any shipping demand. The prospect is that the receipts will equal the shipments. The quality of new wheat is very good. The demand is chiefly to cover shorts. Corn is firm; the strength is due to buying by shorts who, anticipating a temporary decrease in receipts, are covering contracts; there is very little export demand. Oats strong; demand to cover shorts.

From Louisville, Ky.: Wheat receipts are moderate. Prices are $1@$1.04, delivered. Farmers are stocking considerably and holding for better figures, while dealers quote the market easy

From St. Louis, Mo.: The wheat movement is heavy and stocks are accumulating. The market is unsettled. Corn is weak and a little downward. Oats are in big receipt and active, with firm values.

From Minneapolis, Minn.: Very little wheat is moving. The market firm. Flour is quiet. There is only a moderate demand at unsatisfactory prices.

From Topeka, Kan.: The wheat market is weak. Corn fair. The flour trade is brisk.

From Baltimore, Md.: An active inquiry continues for new stock flour, and the supply is small. Prices under the circumstances rule firm. The wheat market has quieted down some, but prices remain steady. The market for oats is quoted firmer.

From Wilmington, N. C.: Grain is firm. Breadstuffs are steady.

From Savannah, Ga.: The stock of grain is not as full, and the demand for good lots continues steady. The flour market has not fully opened.

From New Orleans, La.: Bulk corn receipts are increasing.

From Nashville, Tenn.: Flour is in active demand. For good wheat the demand is small and the market dull. Corn is active and firm.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Indianapolis, Ind.: The corn crop promises to be very heavy.

From Evansville, Ind.: The growing wheat will fall short of last year's crop about one-third.

From Peoria, Ill.: Crop prospects still favorable.

From Detroit, Mich.: Advices from the interior are that the fine weather prevailing will secure the crop in generally good condition, and a better feeling exists.

From Des Moines, Iowa: The harvest is progressing; weather seasonable.

From Minneapolis, Minn.: The weather has been all that could be desired by the wheat growers during the last two weeks, and the condition of the crop in northern Minnesota and Dakota has improved 10 to 20 per cent. from former reports. In southern sections the crop promises to be very good. The harvest will commence this week. In the north it will be one or two weeks later. Corn is looking well, but is a little late. Barley and rye harvests are in progress; there will be a fair crop.

From San Francisco, Cal.: New wheat is coming forward slowly, owing to the scarcity of hands to handle the crop. Prices are steady, with an upward tendency.

PROVISIONS.

The market for provisions opened dull and fractionally lower on Saturday. Each side of the market appeared to be afraid of the other, and the speculative transactions were limited and featureless. Several days' receipts of hogs at western points during the week have been so abundant, so much in excess of receipts at corresponding dates in 1882, that the bears plucked up courage enough to sell some, and prices began to move downward. By Wednesday pork and lard had scored quite a loss, and there was no prospect of a recovery. The legitimate demand is quiet with a limited call for the staple products. The shipments are reported to be large, in fulfilment of old orders or on consignment. Packers are well situated as to stocks, and will probably be able to make their own ends meet which ever way the market goes within sixty days to come. During the earlier part of the week Liverpool cables reported a slight advance on leading hog products, but on Wednesday they were aloff once more. The reports of leading hog products from the principal Atlantic and gulf ports for the week ending July 28, with comparisons, were as follows:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	3,640	3,622,784	6,302,057
Boston	296	753,222	1,831,526
Portland	..	....	...
Montreal	3,455	3,858,000	747,555
Philadelphia	256	1,405,600	267,875
Baltimore	8	258	381,605
New Orleans	..	....	2,500
Totals	7,655	9,630,864	9,613,118
Previous week	4,385	7,082,669	14,260,161

The total quantity of hog product exported from the above-mentioned places from November 1, 1882, to July 28, 1883, was as follows:

	1882–83, pounds.	*1881–82. pounds.*
Pork	35,917,600	39,716,400
Bacon	312,338,972	316,903,733
Lard	202,731,173	197,754,015
Totals	550,789,745	551,376,148

Prices of lard and mess pork at New York, during the week were as follows:

	July 28.	*July. 30*	*July 31.*	*Aug. 1.*	*Aug. 2.*	*Aug. 3.*
Lard, Aug.	9.03c.	8.90c.	8.87c.	8.80c.	8.63c.	8.68c
Pork, spot mess	$16.00	$16.00	$16.00	$15.75	$15.50	$15.50

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There is a brisk jobbing trade in hog products, but few round lots are changing hands. Pork and lard are lower, in sympathy with the decline in the west, but meats generally have ruled steady. Hams are scarce and wanted.

From Cincinnati, Ohio: Notwithstanding the light stocks of provisions here, a weaker tone has prevailed, with the exception of sugar-cured hams, for all articles; hogs have sold well for shipment mainly, but the market closes dull and weak.

From Chicago, Ill.: Pork, lard, short ribs and sides are steady. There is very little confidence shown, and trading is chiefly confined to local speculators. Other meats are in fair shipping demand. The estimated receipts of hogs for the week are 110,000; the quality is extra good. All packing points in the west show an increase this week.

From Louisville, Ky.: Provisions are weak and irregular. The hog market is moderately active and lower.

From St. Louis, Mo.: Provisions have been active but are weak and dull. Hogs are slow at the decline. Cattle are advancing and buoyant.

From Des Moines, Iowa: The provisions market is weak.

From Kansas City, Mo.: Live stock receipts are heavy and increasing steadily. Cattle are active and firm. Hogs are active, but much lower and irregular.

From Topeka, Kan.: Provisions are in good demand. Live stock very dull; shipping steers not offering, owing to low prices and abundance of food.

From Nashville, Tenn.: Cattle are in fair demand and firm.

From Wilmington, N. C.: Meats are lower.

PRODUCE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Fancy dairy produce is selling fairly, but stocks of other kinds are excessive and sellers are anxious to realize.

From Cincinnati, Ohio: Country and dairy produce is abundant and easy.

THE NEW YORK DRY GOODS MARKET.

The volume of business transacted for the week is reported of very fair proportions. A conservative feeling still seems to prevail, but sales, nevertheless, are steadily increasing. The cotton goods market is rather dull, owing doubtless to the late extensive auction sale. In woolens, hosiery and dress goods business is reported as brisk. Silks and satins are rather quiet, the demand being mainly for low grades. City jobbers and retailers are doing but a moderate business. Thursday's rain made itself felt in more ways than one, as the day was a very poor one for business generally. Good business is looked forward to for next week, though the present attitude of the banks toward single-name paper will doubtless have a depressing influence.

THE BRITISH DRY GOODS MARKET.

[By Cable to BRADSTREET'S.]

From London: The Manchester cotton goods market is dull. Concessions are obtainable by buyers. There is rather more business in export yarns. Prices are steady, and spinners are in a better position than other manufacturers.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The dry goods trade is fair for the season.

From Providence, R. I.: The print cloth market is quiet and steady, the amount of sales being small; 64s are worth 3½c. and 56x60s 3 1/16c. There are about 150,000 pieces on hand.

From Boston, Mass.: Jobbers have begun to receive some orders from western salesmen and the outlook is encouraging. Agents have not been doing much the past week, as buyers supplied themselves for the time being when fall styles were first opened, but they are well satisfied with the situation. The trade sale has had a beneficial effect, and the general opinion is that cottons will move quite freely when the season is a little further advanced. Woolens showed slight improvement, but no movement of importances.

From Rochester, N. Y.: Dry goods jobbers report no material change in the trade, which is very quiet.

From Philadelphia, Pa.: There is a better and more general demand at first hands for men's wear woolens and certain fabrics adapted to the fall trade. The tone of the cotton goods market is stronger but demand, as a rule, is for near requirements, and sales are mostly in small lots. The jobbing trade rules quiet.

From Pittsburgh, Pa.: Trade in dry goods is fair for the between seasons period. Collections also reported fair.

From Cleveland, Ohio: Dry goods trade is fair for the season.

From Cincinnati, Ohio: The distribution of dry goods and the placing of orders for future delivery have not been attended by vitality, but there is a fair movement in the aggregate. White goods, which are now out of season, are offered at tempting prices. The demand for blue prints and Kentucky jeans is the feature of the market.

From Columbus, Ohio: The trade in dry goods declined some last week, owing to local causes, but has improved during the present week, and is now in excess of the corresponding week last year. Collections are fair.

From Toledo, Ohio: The dry goods trade of Toledo for the six months ending June 30, 1883, shows quite an increase over the corresponding months of last year, and the outlook for the fall trade is encouraging.

From Indianapolis, Ind.: In dry goods business picking up some, but collections are only fair.

From Chicago, Ill.: Dry goods, notions and collateral lines more active on country orders. The week's sales will show an increase over the preceding one.

From Louisville, Ky.: Dry goods are moving fairly, and the fall business is increasing on orders and personal selections.

From St. Louis, Mo.: The dry goods trade quite fair, and buyers from the southwest are selecting full stocks.

From Kansas City, Mo.: The fall trade in dry goods opens about the middle of August, meanwhile sales are inconsiderable and chiefly confined to sorting orders. Jobbers have unusually heavy stocks in anticipation of largely increased fall business.

From Topeka, Kan.: The usual quiet summer trade in dry goods.

From Burlington, Iowa: The dry goods trade has been good for the season, and orders cover a general line.

From Baltimore, Md.: Dry goods sales have been larger than in any previous week for a month or so, and jobbers are busy assorting stocks for fall season. Commission men are doing a fair business, and retail dealers express themselves satisfied with the present volume of trade.

From Norfolk, Va.: Dry goods jobbers are completing stocks for the fall business, but are not anticipating an extensive trade.

From Wilmington, N. C.: Dry goods are inactive.

From Galveston, Tex.: The dry goods trade is more active.

From Waco, Tex.: The wholesale dry goods trade report sales inactive and collections dull. Money commands 12 to 15 per cent., and exchange on New York at par.

CLOTHING.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The fall trade in clothing has started with some force, and manufacturers say they are agreeably surprised at orders that have been received so far from the west. Salesmen report a very satisfactory condition of affairs in the interior, and feel confident of a large distribution.

COTTON.

The market for spot cotton at New York for the week is higher. Quotations for spot middling uplands remained unchanged until Thursday, when they advanced a point and also another on Friday, closing last night at 10⅛c. The sales for the week have been as follows: For export 8,595 bales and for consumption 2,880 bales. The total sales foot up 11,475, against 4,121 last week. Deliveries on contract amount to 9,600 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	7 7-16c.	7 1-16c.	10 11-16c.
Strict ordinary	7⅛	7⅛	11⅛
Good ordinary	8 11-16	8 15-16	11 15-16
Strict good ordinary	9¼	9	12⅜
Low middling	9 11-16	9½	12¾
Strict low middling	9 15-16	9 13-16	12 15-16
Middling	10⅛	10	13 1-16
Good middling	10½	10⅜	13 7-16
Strict good middling	10¾	10⅝	13 11-16
Middling fair	11¼	11⅛	14 3-16
Fair	12	11⅞	14 15-16

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	6⅞	6½	10 5-16
Strictly good ordinary	7 11-16	7 5-16	11⅛
Low middling	8⅜	8	11 13 16
Middling	9⅜	9⅛	12 13 16

The future market for the week shows a decided improvement. The market took an upward turn on Thursday, advancing some 16 points, and prices on Friday were very well sustained. The shipments of cotton have been very fair for several days past. Quotations show an advance from closing price last Friday of 15 points for near months and 11 points for later ones. The week's sales foot up 468,700 bales, against 348,100 bales for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
August	10.24	10.06	13.02
September	10.21	10.09	12.61
October	10.06	9.96	11.94
November	9.99	9 91	11 73
December	10.00	9.93	11.74
January	10.08	10.00	11.84
February	10.19	10.11	11.97
March	10.31	10.22	12.09
April	10.42	10.33	12 22
May	10.53	....	12 33

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
Galveston	226	9⅝	12⅜
New Orleans	8,400	9 11-16	12⅜
Mobile	100	9½	12⅜
Charleston	225	9¾	12¼
Norfolk	931	9¾	12½

The total receipts of cotton at the ports since September 1 are 5,921,413 bales, against 4,630,938 last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	838,813	423,193
New Orleans	1,664,897	1,174,203
Mobile	311,238	263,227
Savannah	810,706	725,712
Charleston	566,080	495,958
Wilmington	128,823	133,385
Norfolk	795,529	607,376
Baltimore	82,676	35,046
New York	151,887	171,547
Boston	196,992	231,438
Philadelphia	98,679	81,530

Below will be found the receipts for each day of the week ending Friday, August 3, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	349	143	417	374	56	104
New Orleans	164	503	576	40	230	444
Mobile	37	15	1	....	38	19
Savannah	132	6	11	3	25	13
Charleston	88	33	26	33	50	102
Wilmington	....	14	1	1	....	1
Norfolk	29	42	12	74	2	16
Baltimore	104	....	424	740	214	191
New York	....	....	....	8	10	76
Boston	206	51	90	....	....	36
Philadelphia	....	....	79	....	162	189
Totals	1,109	807	1,637	1,285	787	1,226
This day last week	1,029	1,633	1,503	1,365	1,037	1,615
This day last year	434	734	635	486	535	968

The total receipts at the ports for the week were 7,010 bales, against 8,307 last week and 4,107 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 2,153 bales, against 2,665 bales last week and 1,425 bales for the corresponding week last year. The shipments for the week were 5,380 bales, against 4,984 bales last week and 3,999 bales for the corresponding week last year. The stocks for the week were 43,403 bales, against 53,774 last week and 22,241 for the same week last year.

The market at Liverpool for prompt delivery uplands has been firm with a moderate inquiry, which was freely supplied. Quotations have advanced 3 points from last week, closing Friday night at 5⅝d. The future market has been steady and quiet, and closed an average of 5 points higher for near months, and 4 points for later ones.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
August	....	5 29-64d.	7 1-64d.
August-September	5 38-64d.	5 31-64	7
September-October	5 38-64	5 32-64	....
October-November	5 37-64	5 33-64	6 45-64
November-December	5 36-64	5 32-64	6 41-64
December-January	5 36-64	5 33-64	....
January-February	5 38-64	....	....

The sales for the week at Liverpool were 62,000 bales (of which 46,000 were American), against 59,000 (of which 41,000 were American) last year. The sales for export were 3,100 bales, against 6,500 bales last year. The sales for speculation were 1,820 bales, against 5,700 bales last year. The amount forwarded was 7,300 bales, against 6,100 bales last year. The stock in port is 927,000 bales (of which 673,000 are American), against 701,000 bales (of which 394,000 were American) last year. The total imports for the week were 40,000 bales (of which 26,500 were American), against 24,500 bales (of which 9,400 were American) last year, and the amount afloat 202,000 bales (of which 34,000 are American), against 219,000 bales (of which 26,000 were American) last year.

The Manchester market closed firm.

The Havre market closed firm.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Demand is sluggish and unsatisfactory, but prices are unchanged.

From St. Louis, Mo.: New cotton is arriving on a stagnant market.

From Wilmington, N. C.: Cotton is steady.

From Baltimore, Md.: There is a decided improvement in the cotton market. Inquiries are coming in quite freely and holders are insisting on full prices for stocks, which are small.

From Providence, R. I.: The cotton market is quiet and firm and sales are fair. Middling uplands are worth 10⅜@10½c. and middling gulfs 10¾c. The stock on hand is light.

From Cincinnati, Ohio: Cotton has sold here for domestic spinning and the market closes stronger.

From Louisville, Ky.: Cotton is dull and steady.

From New Orleans, La.: Under the influence of manipulation, based on more drouth reports from sections, cotton was sharply pushed up this week compared with last. On Thursday spots were ⅛c. higher, and futures show the following advance: Augusts, 39 points; Septembers, 26; Octobers, 31; Novembers, 33, and Decembers, 34. The bulls are more frisky; the bears are quiet and reserved. The movement in spots was moderate, but fair in futures.

THE GROWING COTTON CROP.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Weather changeable and cloudy, with local rains. Crops are refreshed and improving. The cotton crop is reviving from wilt and looking better; may recover under repeated showers.

From Galveston, Tex.: The weather still continues hot and dry. The growing cotton is very much in need of rain.

From Waco, Tex.: News from all parts of central Texas says the weather is hot and dry, in some cases being damaging to the cotton crop. The cotton picked and marketed thus far is reported as being inferior to the first picking last year.

WOOL.

The consumptive demand for wool has continued active during the past week, and in Boston and Philadelphia large lines of stock have been bought by manufacturers at very steady prices. Encouraged by the evident interest of buyers, some holders have attempted to realize a slight advance, but in nearly all cases efforts of this kind have proved unsuccessful. In one or two instances comparatively full rates have been paid for small lots of choice worsted fleeces, but there has been no general improvement in values. The best that can be said of the position in this respect is that it is steadier and that there is less pressure to sell. In the country markets buyers are still paying relatively high prices, either with a view to a better market later in the year or to quick sales at the very small margin over cost that may be afforded by present selling prices on the seaboard. It is doubtful if current quotations in the eastern markets will cover cost and commissions on many of the recent purchases of operators in the west. There is in general a better feeling in all branches of the trade, but nothing to indicate any immediate reaction in values.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There has been a good demand for wool the past week, but sales are not so large as for the two previous weeks, when some 8,000,000 pounds were taken. There is no change in prices. Higher prices in the interior do not appear to have any influence on the market here, and it is evident that any advance would check business, as manufacturers hesitate to buy to any extent while the demand for manfactured goods is so unsatisfactory. The sales of Ohio and Pennsylvania fleeces have been at 36@37c. for X and 37@38c. for XX, with choice selections higher. Michigan fleeces are selling principally at 34c. for good average, and some lots have been sold at 33@33½c. per pound. Combing and delaine fleeces are in demand and meet with a ready sale as fast as offered. Fine Michigan and Ohio delaine have been sold at 38@40c., and fine and No. 1 combing at 42@44c. per pound. Unwashed wools have been in demand and Texas is particularly sought after; the sales have been large, principally in the range of 23@28c. per pound for fine and medium grades, with choice lots of medium at 30c. California wool has been quiet, with sales of 100,000 pounds new spring at 25c. and other small lots at a wide range of prices. Pulled wool has been in steady demand, and prices range from 40@42c. for choice eastern and Maine super and 20@38c. for common and good. The foreign wool sales were 30,000 pounds of New Zealand at 40@41c. per pound. Carpet wools continue quiet and no sales of importance. The entire sales of the week amounted to 3,100,000 pounds.

From Philadelphia, Pa.: The week's sales aggregate 1,700,000 pounds, and the market closes firm, with a continued good demand and some tendency to hold for better prices, but there is no quotable advance.

From Cincinnati, Ohio: Local and other western mills have bought quite liberally of wool during the week, and with a fair inquiry from eastern manufacturers a little firmer tone has prevailed, but the supply is large and prices unchanged.

From Chicago, Ill.: Wool is steady, and in fair demand at low prices.

IRON.

There is little change to note in the condition of the iron market at eastern centers during the past week. Pig continues firm at unchanged prices. The demand is not noticeably larger, but many inquiries are making and dealers are confident that the early fall will witness a marked activity. The arrivals of Scotch pig iron are maintaining about the level previously reported from week to week, and will aggregate about 1,000 tons at New York, mostly sold to arrive. The sales made during the week have not been large, and in all probably do not exceed the quantity which has arrived. Stocks here are very light, and the receipts about keep pace with the hand-to-mouth demand with which they are met. Freights from Glasgow to New York on pig iron have experienced no change during the week. Steel rails have been subject to moderate transactions only. The mills are fairly well filled up with orders, and there is no pressure to sell. Quotations are made at $38. Bar iron is more quiet than was expected, and mill-owners are rather more anxious to sell. Prices, however, are unchanged at $1.90@$2 for refined. Scrap iron presents no new features worth chronicling. At western iron centers some of the renewed firmness and better realizations on higher figures are reported. These markets apparently have just begun to feel the renewed life and indisposition to sell under the market price which has been present at eastern centers for nearly a month past.

THE BRITISH IRON AND OTHER INDUSTRIES.

[By Cable to BRADSTREET'S.]

From London: The iron trade is perhaps a shade steadier, but prices are no higher. Shipments are fair. The engineers and ship-builders are well employed.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig holds steady, but transactions are only for present requirements. Merchant iron is weakening on account of western competition, and buyers are postponing fall orders in the belief that prices will go lower when the mills will be working to their full capacity. Nails are strong and active; stocks are light. Construction iron is in steady demand for 100 to 300 ton lots. Steel rails are selling in 500 and 1,000 ton lots for November and December at $38.50@$39. Winter requirements are being placed slowly, as buyers want lower rates.

From Pittsburgh, Pa.: Pig iron is firmer with considerable inquiry for standard brands. The indications point to a healthy fall trade in all kinds of iron.

From Chicago, Ill.: Staple and miscellaneous hardware is in fair order request. Bar and all classes of structural iron are meeting a satisfactorily sale at steady prices. Nails are jobbing freely in small lots.

From Cincinnati, Ohio: The demand for pig iron has been fair for present and near future delivery, mainly to be utilized in the manufacture of agricultural implements.

From Cleveland, Ohio: In iron the general conditions governing the trade are much the same as during July. There is said to be a somewhat increased demand for some of the higher grades of ores, but no improvement in prices ruling throughout the season.

From St. Louis, Mo.: The brisk demand for pig iron continues, with values firm and advances expected. The supplies of pig iron here are quite small. Manufactured iron is active at strong rates.

From Nashville, Tenn.: Iron is steady and in fair demand.

COAL.

There has been an improvement in the demand for anthracite coal, though not enough to call for anything more than passing notice. There will be no advance made in prices for August delivery. This is regarded by many as a wise policy. Contracts at June prices are not all filled yet, although the same are in force under July rates, nominally. The interior and western trade is in excellent shape, and the quantity distributed is in excess of 1882. The production of anthracite for the week ended July 28 and for the year to that date, as compared with like periods in 1882, is as follows: The week ending July 28; 1883, 766,647 tons; 1882, 716,459 tons; January 1 to July 28, 1883, 16,613,790 tons; January 1 to July 28, 1882, 15,446,124 tons. The excess production in 1883 to July 28, therefore, was 1,167,666 tons. Full working time at the mines is in force, which will appear in the continuance of the excess first noted, as long as it lasts. Special dispatches to the daily papers during the past week have contained the startling announcement that a syndicate composed of prominent Pittsburgh and New York capitalists, including W. K. Vanderbilt, has been formed for the purpose of obtaining control of the coke productions of the Connellsville region. The object is said to be the establishment of an arbitrary selling rate for coke, and also to divert the business of the region to the Vanderbilt lines. Options on a large quantity of valuable coke property have been already secured. The bituminous coal trade exhibits no features of note. The output is of a full average and is placed on contracts made earlier in the season.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal market is quiet and sales are small. Prices remain unchanged. The stock on hand has increased since last week, but is light for this season of the year.

PETROLEUM.

The feature of the week in speculative petroleum circles has been a bearish monthly report where one of an opposite character was confidently expected. And perhaps quite as noticeable also has been the strength of pipe-line certificate quotations in the face of this unlooked-for record of additional exploitation. Oil has fluctuated with wild and erratic course during the week, but has maintained a fair average well above the dollar mark in spite of the various new wells, with all sorts of wonderful productions, and the July bear report, which was a surprise. This report of operations in the regions during the preceding month, with comparisons for each month during the current year, is as follows:

	Wells completed.	*Wells drilling.*	*Rigs up and building.*	*New product'n, barrels.*
January	124	126	131	2,789
February	131	150	153	1,993
March	146	211	205	4,113
April	215	206	212	4,583
May	235	197	176	3,676
June	231	230	145	3,405
July	261	262	232	3,842

The new production in July is thus shown to amount to 437 barrels daily more than in June. It must not be overlooked, however, that the locality of the greater part of this increased production, the new wells drilling, and other apparent evidences of renewed life, is in a region of which the limits are known, and where a temporary spurt in

production, due to excessive torpedoing or other reasons, can have no vital relation to the question of supply and demand. The average production per well, it must be noted, in July continues unchanged. The record has been: January, 22½ barrels per well; February, 15 1/5; March, 28 1/6; April, 21½; May, 15⅝; June and July, each 14¾ barrels per well. The buying during the week has at times been spirited, and, in fact, operators now seem to guage their actions more upon the manipulations or movements of this or that oil interest on the floors of the exchanges than they do by every rumor which comes over the wire about a new well being dry, or a gusher.

On Friday the market for pipe-line certificates opened at $1.07½ bid, and under free offers to buy mounted steadily up, closing at noon at $1.08¼ offered. This was also the opening price in the afternoon session. At the close the price was $1.08 against $1.08¾ on Friday evening of last week, a loss of ¾c. on the week. At the close the market was quiet, the trading being local owing to absence of outside orders.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, July 28	1.08½	1.09⅝	1.07	1.0
Monday, July 30	1.06⅞	1.09	1.05⅞	1 07¾
Tuesday, July 31	1.07¼	1.09½	1.06¼	1.06⅝
Wednesday, Aug. 1	1.06¼	1.07⅜	1.05¼	1.06⅝
Thursday, Aug. 2	1.06⅞	1.07⅜	1.06⅛	1.07⅛
Friday, Aug. 3	1.07½	1.08½	1.07½	1.08

Refined oil was reduced a fraction on Saturday to correspond with the decline in crude, quotations being 7⅜c. for 110°, and 7½c. Abel test. At these rates the market continued quiet and tame until Wednesday, when, owing to the unsettled character of the market for crude, prices were again reduced to 7¼ @7⅜c. respectively for the two grades specified. The refined market continued firm at these figures. After several days' dullness for crude there was some demand from France.

	July 6.	*July* 13.	*July* 20.	*July* 27.	*Aug.* 3.
Certifi's, crude	1.14⅜	1.08	1.06	1.08¾	1.08
Refined, 110°	7¾	7⅜	7⅛	7½	7¼
Refined, 70°	7⅞	7½	7¼	7⅝	7⅜
Crude, in bbls	7@7¾	6¾@7½	6⅝@7⅜	6½@7½	6⅝@7⅜
Case, plain	9⅞	9⅛	8¾	9⅛	9
Naphtha	5¼	5¼	5⅛	5	5

The exports of petroleum from the United States, crude equivalent, for the week ending July 28, was 9,858,378 gallons, against 13,743,695 in the preceding week. The total export from the United States since January 1 was 350,207,068 gallons, against 377,856,825 gallons in the corresponding portion of 1882, a decline in the current year of 27,649,757 gallons. The total exported from New York city during the week ended July 28 was 7,648,534, and during the year, to that date, 288,555,231, against 299,869,521 gallons in a like portion of 1882. The decrease in shipments in the year from New York alone, as compared with 1882, was 11,334,290 gallons (crude equivalent), or about 36 per cent. of the total decline recorded thus far in the year.

OCEAN FREIGHTS.

There has been more activity in the ocean freights markets during the past week than for some time past. Petroleum charters have been most conspicuous, so far, since the opening of the year. The scarcity of charters for spot loading has induced a lively trading in charters to arrive, and in this way business has been quite active. The cargoes of oil are mainly to go to north Russian ports, to the United Kingdom and to the continent. Some charters of case oil have been engaged for the Dutch East Indies and the Asiatic Pacific coast. Grain has gone abroad mainly per steamer in small lots. Philadelphia reports a number of petroleum charters, and Baltimore a notably large shipment abroad of grain, which is being brought to the east by the Baltimore & Ohio Railroad. In consequence of the comparative activity shown rates have ruled firm.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There has been a good demand for oil tonnage, and rates have ruled strong with an upward tendency. Vessels are scarce. Grain tonnage has continued in light supply and firm, but inquiry has been very moderate.

From San Francisco, Cal.: Ocean freights are abundant, with few engagements.

From Savannah, Ga.: Ocean freights have declined for the week.

From Wilmington, N. C.: Freights, foreign, are firm; tonnage is scarce; coastwise nominal.

From New Orleans, La.: Freights are dull and unchanged.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Aside from the excitement attending the failures, there is a satisfactory feeling in the shoe trade so far as the volume of business is concerned. All claim that the profits are very small, and it is only by good management that manufacturers can come out whole. But this is an old story, and has been told several times. Shipments continue on a large scale.

From Chicago, Ill.: Boots and shoes and leather are slow. Hides are arriving more freely. Prices are rather weak, and there is no demand for round lots.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Whiskies are easy and very quiet.

From Cincinnati, Ohio: Whisky has continued steady with a fair current demand at $1.13 per gallon.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: There has been some improvement in the quality of the offering of leaf tobacco, and higher prices ruled, but except for fine grades little animation was shown in the trading. There is little improvement in the demand for manufactured tobacco.

From Louisville, Ky.: Leaf tobacco generally firm, and the dark grades have slightly advanced. July shipments are thus far exceeded. Receipts are 1,400 hogsheads.

From St. Louis, Mo.: Tobacco is still very dull. The crop is improving some in the state, but the acreage is unusually small.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Lumber is dull and the demand slim except for local wants.

From Minneapolis, Minn.: The lumber market rather quiet but steady. The lumber mills are running at their full capacity.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine is higher. Rosins, tar and crude, are steady.

SPECIAL LOUISIANA TRADE REPORTS.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar is quiet, but steady. Molasses is dull. Cane crop prospects are reported nearly one-sixth under last season's. Rice is steady; fair to prime 5½c. to 6⅛c. Coffee is hardening and the demand is increasing; fair 9c. Cottonseed oil plentiful and dull; prices uneven, owing to the near approach of the new crop; crude 32@33c.; refined 41@43c. The mill stock through the south reported fully 100,000 barrels. One carload new cottonseed is already consigned here from Texas.

SPECIAL PACIFIC COAST TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: Barley is in liberal supply. Hogs are dull at lower figures. Salmon fishing in the Columbia river closed July 31 with a catch of 650,000 cases, being 75,000 cases over that of last season.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, August 1.—The monthly settlements on change caused a little more demand from operators in grain and provisions from operators who were receiving such property on August contracts, but the money thus advanced to one customer was returned by another, hence there was no real absorbtion of funds, and the money market maintains its previous easy position at 5@6 per cent. There is a slight increase in the movement of grain from the interior, but it has not as yet assumed sufficient proportions to cause any change in the position of the bank deposits by causing a flow of money to the agricultural districts, and no change in that direction can be looked for before the middle of next week, and possibly not before the 15th inst., as wheat will come out slowly so long as the premium on future months' delivery is sufficiently large to pay carrying charges, as country dealers will fill their storehouses and sell the grain for a succeeding month, hence only the low grades not deliverable on contract will come out with much freedom in the near future. The jobbing trade in dry goods shows a slight improvement over the opening days of the preceding week, the increase in the demand for some lines being quite marked; and, on the whole, the volume of goods distributed is as large as the customary average at the opening of August. The movement, however, is not such as to attract attention, and the goods are mainly such articles as country retailers are absolutely compelled to order previous to selecting fall stocks a fortnight or month hence. The millinery, clothing, boot, shoe and hat houses are scarcely doing sufficient to merit attention. There is an average summer trade in staple hardware, and a satisfactory volume of orders for refined iron and nails, and the assortment of the latter is less complete than at the opening of the previous month, yet stocks are sufficient for current wants, and no uneasiness is indulged regarding supplies in the near future. Pig iron is meeting a fair jobbing trade, yet the old story is repeated, *i.e.*, workers show little anxiety to secure stock in advance of their current necessities. Hard coal is arriving freely, and some dealers express surprise at the indifference manifested by city consumers in making contracts for winter stocks. This is no doubt due to the distrust with which a large portion of the business community regard the general commercial situation. The fact that the best houses in all branches of trade say that their profits so far the current year have not been commensurate with the amount of business transacted, in connection with a marked increase in the number of large failures in different parts of the country, renders prudent people more than usually cautious. But in spite of the gloomy predictions regarding the future the business situation is steadily being strengthened by a daily improvement in the crop prospects. That the present wheat crop, in addition to the old stock carried over, will furnish an ample supply for home use and export may be regarded as almost an assured fact. The oats, rye, barley, hay, flaxseed and potato crops are so far advanced as to insure the largest yield in the country's history. The present condition of the corn crop safely justifies an estimated yield of 1,800,000,000 bushels, and the present large stock of hogs and beef cattle insures a larger exportable surplus of beef and hog products than it was possible to supply during either of the two preceding years. The production of dairy goods will also be much larger, hence prices are likely to be kept at figures that will enable a free export movement. Hence the outlook for legitimate trade is much better than at any time during the past two years, but speculative transactions are likely to be curtailed, for the reason that the abundant supplies of all articles of food will remove the incentive to speculate in them. This however is a matter for congratulation rather than regret, as legitimate trade will be more healthy as speculation diminishes. The receipts of wheat are gradually increasing, the first arrival of new spring being reported to-day, and it is expected that liberal arrivals will be reported in the near future, as it is understood that free sales were made by country operators for this month's delivery, and the prospect of increasing receipts, coupled with the large stocks here and the absence of any considerable demand from shippers, has a depressing influence on values; the closing prices to-day are 3c. per bushel lower than at the date of my last letter (July 25), and were it not for the exertions of speculative manipulators, who are holding prices with the apparently vain hope that by making a show of confidence they will induce outside lambs to come in and take their load, prices would now be much lower. It scarcely seems possible, however, that they can hold prices much longer, as all the influences are adverse to a bull movement. Corn is meeting a fair shipping demand, but the market situation is materially weakened by heavy receipts, splendid crop reports and lower prices in foreign markets, which have curtailed the export demand. The provisions trade is weak, and closing prices to-day show a decline of 90c. per barrel on mess pork, 55c. per 100 pounds on lard and 60c. on short-rib sides. There is little apparent demand from strong buyers to hold, and the situation is steadily being weakened by an increasing supply of hogs that in point of quality compare well with the best average ever received at any corresponding period in former years. The following shows the stocks of grain in Chicago on the dates named:

	July 28, 1883.	*July* 29, 1882.	*July* 29, 1881.	*July* 30, 1880.
Wheat, bushels	5,670,000	1,795,000	4,206,000	2,459,000
Corn, bushels	1,777,000	1,685,000	1,840,000	3,124,000
Oats, bushels	638,000	125,000	2,443,000	210,000
Rye, bushels	381,000	78,900	101,000	108,000
Barley, bushels	20,000	4,000	24,000	63,000
Total bushels	8,485,000	3,698,000	8,620,000	5,963,000

Receipts and shipments of hogs during the months of March, April, May, June and July in the past two years:

	1883		1882	
	Received.	*Shipped.*	*Received.*	*Shipped.*
March	269,656	130,807	380,055	199,903
April	240,969	95,316	461,702	189,804
May	370,706	64,662	546,944	207,045
June	396,015	85,735	428,902	175,129
July	351,820	106,841	335,464	160,585
Totals	1,629,176	483,361	2,153,667	932,466

The average weight of the hogs received during July was 244 pounds, against 216 pounds for the corresponding month last year and 233 pounds in July, 1881.

The following shows the monthly movement of flaxseed at Chicago since January 1, 1883:

Receipts from January 1.	*Bushels.*	*Shipments from January 1.*	*Bushels.*
January	143,455	January	103,839
February	105,000	February	53,000
March	116,000	March	104,000
April	120,000	April	322,900
May	47,500	May	62,378
June	54,500	June	10,450
July	37,500	July	92,309
Total	623,955	Total	757,785

The receipts from August 1, 1882, to August 1, 1883, were 4,414,955 bushels, and the shipments were 3,973,348 bushels.

In store August 1, 1883, 7,000 bushels; July 1, 67,645 bushels, and June 1, 48,924 bushels.

THE BUFFALO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Buffalo, August 2.—Fall business in most lines has not yet fully commenced, and the general state of trade is still quiet. A fair order business for reassortment in most lines and a steady consumptive demand for necessaries bring the volume up to the midsummer average. Such houses as have their travelers out report satisfactory orders for fall dating, and feel encouraged by the start. Collections generally are very fair.

The lumber trade for the past month has been very quiet, although we cannot learn that any strong concessions in prices have been made in this market, for the fact that prices at producing points would not warrant it. Coarse lumber is a trifle weaker, but good stock holds its own, and the demand for it is fair. Dealers generally are sanguine as to the fall trade.

Anthracite coal is quiet, the market presenting no features of special interest. Lake shipments have fallen off somewhat during the past week, but are still considerably in excess of last season, being 547,072 tons, as compared with 529,608 tons in 1882 and 356,420 in 1881. Freights are unchanged.

Provisions are in somewhat better demand, with prices steady and unchanged.

Dry goods for July show a gain of about 10 per cent. over last year, and in retail departments are quite active for the season. The fall jobbing trade has scarcely commenced yet, and so far has been confined to state and near-by orders.

Clothing houses have had their travelers out for two to three weeks, and report very satisfactory western orders for October dating.

TRADE EMBARRASSMENTS.

There were 155 failures in the United States reported to BRADSTREET'S during the past week, 13 less than the preceding week, 46 more than the corresponding week of 1882, and 80 more than the same week of 1881. Compared with the previous week the middle states had 32, a decrease of 4; New England states 27, a decrease of 6; southern states 23, a decrease of 3; western states 36, a decrease of 4; Pacific states and territories 37, an increase of 4; Canada and the Provinces 32, a decrease of 1. The important failures were F. Shaw & Brothers, hides, leather, etc., C. W. Copeland & Co., manufacturers boots and shoes, W. E. Plummer, hides, etc., Macomber & Greenwood, manufacturers of boots and shoes, John T. Mills, hides and leather, Boston, Mass.; Charles H. Wood & Co., boot and shoe manufacturers, Farmington, N. H.; C. B. Tevis & Co., manufacturers of boots and shoes, Natick, Mass.; The United States Patents Co., Boston, Mass.; S. C. & J. G. Phinney, boot counter manufacturers, Stoughton, Mass.; Hofheimer & Co., wholesale boots and shoes, Norfolk, Va.; Toler & Co., wholesale boots and shoes, Baltimore, Md.; Stedman & Co., wholesale boots and shoes, New York; Lancaster Watch Company, manufacturers of watches, Lancaster, Pa.; James Pratt, boots and shoes, Chicago, Ill., and J. W. Morrill & Co., wholesale saddlery, Louisville, Ky. In the principal trades they were as follows: Grocers 36; general stores 30; boots and shoes 15; manufacturers 15; liquors 10; hotels and restaurants 10; dry goods 9; hardware 7; clothing 5; bakers and confectioners 4; drugs 4; grain 4; produce and provisions 4; butchers 3; coal 3; hats and caps 3; jewelry 3; leather and harness 3; tobacco and cigars 3; bankers 2; cotton 2; fancy goods 2; furniture 2; lumber 2; millinery 2; oil 2; commission 1; paper 1.

ARIZONA.

HACKBERRY.—Asher & Wallenberg, general store, have been attached.

TOTAL WRECK.—Salsig & Lifford, general store, have assigned.

TUCSON.—Marcus Katz, general store, has been sold out and attached.

ARKANSAS.

MAMMOTH SPRING.—T. B. Lindley & Co., general store, have been attached.

WALNUT RIDGE.—Boas & Co., railroad contractors, have been attached.

WALNUT RIDGE.—E. Krom & Co., general store, have been attached.

CALIFORNIA.

ALAMEDA.—J. Edwards, saloon, has applied for relief in insolvency.

CEDARVILLE.—William P. Gaby, saloon, has been attached.

LEMOORE.—C. Vermason, hotel and saloon, has been attached.

LOS ANGELES.—Jayaux & Tromboni, general store, have assigned.

LOS ANGELES.—G. A. Vignol, grocer, has been attached.

OAKLAND.—James Smith, hotel, has applied for relief in insolvency.

PORT COSTA.—Fred. Voss, varieties, has been attached.

QUINCY.—C. Lee & Sons, general store, have been attached.

SAN FRANCISCO. — William Boedefeld, groceries and liquors, has been attached.

SAN FRANCISCO.—G. Canes, butcher, has been attached.

SAN FRANCISCO.—Frank G. Edwards, carpets, etc., has assigned, with liabilities of $75,000, and assets of $60,000 to $70,000.

SAN FRANCISCO.—Adolph Greenburg, merchant, has applied for relief in insolvency.

SAN FRANCISCO.—L. Griffin & Co., formerly commission, have been attached.

SAN FRANCISCO.—C. H. Hancock, contractor, has been attached.

SAN FRANCISCO.—M. Litchenstein, manufacturer ladies' underwear, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—McDowell & Baldwin, carpet beaters, have applied for relief in insolvency.

SAN FRANCISCO.—Rosengarm Brothers, saloon, have been attached.

SAN FRANCISCO.—Edward C. Schnabel & Co., beer bottlers, have failed.

SAN FRANCISCO.—Warren & Tuttle, Artesian Water Works, have been attached.

SANTA ROSA.—E. F. Gillett, sewing machines, etc. Application has been made to force him into insolvency.

WOODLAND.—J. T. Gratz, cigars and tobacco, has been attached.

COLORADO.

GUNNISON.—M. Jacobs, clothing, has been attached.

LEADVILLE.—Fryer Hill Mining Company has been attached.

CONNECTICUT.

BARKHAMSTEAD.—Lysander Blackman, butcher, has assigned.

DANBURY.—William E. Wright (agent), grocer, etc., has assigned.

GREENVILLE.—John H. Cochrane & Co., carpenters and builders, have assigned.

MERIDEN.—Newton A. Roberts, grocer, who assigned July 21, has assets estimated at $3,500 and $12,000.

NEW HARTFORD.—W. B. Loveland & Co., clothing, has failed and is offering to compromise at 50 cents.

NEW HAVEN.—Newton C. Smith, painter, has assigned.

PINE MEADOW.—A. E. Moore Machine Company. A receiver has been appointed.

DAKOTA.

FARGO.—C G. Jewett, clothing, is closed by attachment.

MALLEY CITY.—J. Weiser, general store. A meeting of creditors has been held.

PIERRE.—McMahon & Co., wholesale and retail grocers, with a branch at Blount, have been closed by their creditors.

DISTRICT OF COLUMBIA.

WASHINGTON.—Lew Newmeyer, clothing, has assigned.

GEORGIA.

ATLANTA.—Judson, Dunlap & Co., printers, have assigned, with liabilities of $5,000 and assets of $9,000.

ROSWELL.—W. C. Watson, general store, has had a mortgage foreclosed.

SAVANNAH.—R. Kurnitzke, patent medicines, has been closed by the sheriff.

SAVANNAH.—Charles Salzer, baker, has been attached.

ILLINOIS.

BLOOMINGTON.—E. J. Moore, linseed oil manufacturer, has failed.

CAIRO.—John A. Bowers, saloon, is reported to have left town. He has been attached.

CHICAGO.—A G. Battersby, printer, has had chattel mortgage foreclosed.

CHICAGO.—Joseph Pratt & Co., manufacturers of boots and shoes, have assigned, with liabilities estimated at $75,000 to $100,000, and assets at $30,000 to $50,000.

CHICAGO.—Stiles, Goldy & McMahon, grain and provisions commission, who assigned recently, are offering to compromise at 50 cents.

CHICAGO.—Louis Van Osten, hats, etc., has assigned to Henry Cohn. Assets $1,500; liabilities $2,500.

LA SALLE.—Jacob Knapp, harness, has been closed by the sheriff.

STONE FORT.—J. C. Horn, grocer, has failed.

UTICA.—A. B. Fetterer, general store, has been closed on judgment.

INDIANA.

COLUMBUS.—P. F. Webber & Co., hats and millinery, have assigned.

INDIANAPOLIS.—B. W. Cole, dry goods, has failed, with assets of $45,000 and liabilities of $35,000. He confessed judgments for $10,000.

INDIANAPOLIS.—Unthank Plow Co., (F. A. Coffin president, W. E. Coffin treasurer, H. I. Barnes secretary), manufacturers of agricultural implements, gave realty and chattel mortgage for $25,000, and failed. The firm claims to have lost some $30,000 this past season.

RICHMOND.—J. T. Elliot, boots and shoes, has been closed by the sheriff.

IOWA.

ATLANTIC.—Belderbeck & Foster, publishers, have been protested and are closed.

CHEROKEE.—A. Meeker, harness, has been closed by the sheriff.

GUTHRIE CENTRE.—Houghton, Everett & Houghton, lumber, etc., have been attached for $8,753.

MASON CITY.—H. M. Harding, furniture, who failed July 20, has liabilities of $2,000; preferred claims $1,000; assets $1,500.

VILLISON.—J. W. Ravencroft, grocer, has been closed by mortgagee.

KANSAS.

TOPEKA.—A. F. Leiss, sewing machine agent, etc., has been closed out under chatter mortgage and stock taken.

TOPEKA.—Vanderveer & Tate, grocers, have been closed by the sheriff.

WYANDOTTE.—W. J. Burns, grocer, has been attached for $220 and is reported to have left town.

KENTUCKY.

DENTON.—J. D. Williams, general store, has assigned.

LOUISVILLE.—James A. Hart, 5 and 10 cent store, who assigned on the 9th ult., is offering to compromise at 40 cents.

LOUISVILLE.—R. W. Lockwood, produce, has been attached.

LOUISVILLE.—J. W. Morris & Co., wholesale saddlery, who failed recently, have compromised at 60 cents.

LOUISIANA.

ALBEMARLE.—E. Acoste, general store. He was burned out June 22 and received $1,500 insurance; is now offering to compromise with his creditors at 25 cents, payable 10 cents cash and 15 cents on February 1, 1884.

NEW ORLEANS.—J. F. Sarrazin & Co., manufacturers of tobacco, have sued their creditors for respite. Liabilities $18,530; assets $22,206.

MAINE.

BANGOR.—A. M. Devereaux, organs, who recently failed, has liabilities of $4,409; nominal assets $100.

BOOTHBAY.—W. C. Clisby, livery, who recently failed, has liabilities $6,600, and actual assets about $1,500.

BOOTHBAY.—John O'Brien, coal, etc., who failed recently, has liabilities $3,086, and assets about $700.

LEWISTON.—D. M Garcelon, grocer, has failed, with liabilities $2,300, of which $1,700 is secured by mortgage on stock. No unincumbered assets.

PORTLAND.—A. M. Noyes & Son, stoves, etc., are in insolvency.

PORTLAND.—Widber & Bacon, lumber. A meeting of creditors has been held. The liabilities are $35,000 and nominal assets $20,000, but not pledged and available only about $12,000. The firm made no offer, but the creditors voted to accept 35 cents. No decision was arrived at.

SACCARAPPA.—Isaac N. Chase, laundry, has been attached for $300.

SPRINGVALE.—Springvale Mill Company, cotton manufacturers, have suspended.

VASSALBORO.—W. C. Whitney, general store, has failed, with liabilities of $4,000, and assets about $500. Offers 30 cents.

WINTHROP.—Henry Woodward & Co., dry goods and millinery, have been attached for $1,000.

MARYLAND.

BALTIMORE.—W. N. Toler & Co., wholesale boots and shoes, have given a bill of sale for $14,000 to W. R. McKay, of Boston, covering his stock, which was removed to an auction house.

MASSACHUSETTS.

ABINGTON.—W. T. Wales, shoe manufacturer, has been attached.

BOSTON.—Baines & Son, groceries and provisions, have failed.

BOSTON.—Brady & McMorrow, grocers, have compromised at 25 cents.

BOSTON.—Charles W. Clement, boots and shoes, is said to be more or less involved through the failure of F. Shaw & Co., F. Shaw being a special partner to the amount of $50,000.

BOSTON.—George S. Cole, grocer, has failed and is offering to compromise at 30 cents.

BOSTON.—C. W. Copeland & Co., boot and shoe manufacturers, etc., failed on July 30, with direct liabilities of $1,000,000; contingent $500,000; assets not stated. The firm claim that there will be a surplus of $200,000, but this is thought to be a very high estimate. They recently made a private voluntary statement, showing $674,000 assets, $400,000 liabilities and $25,000 outside means. Their failure is said to have been due to the embarrassment of F. Shaw & Brothers. Mr. Copeland states that his firm hold the notes of Shaw & Brothers to the amount of $400,000, which they advanced them for merchandise to be delivered when called for, and that the failure of F. Shaw & Brothers to respond to their demands caused them to call a meeting of creditors. The business has been established a number of years. The present firm dates December, 1882, succeeding C. W. Copeland, who in turn succeeded R. & N. Copeland, his father and uncle, in 1879. The firm had factories at North Abington, Medway, Natick and Brockton. What they will be able to pay will depend largely on what they realize from F. Shaw & Brothers. Attachments have been sued our by J. W. Hoyt & Co., and others, for $2,780, and one by T. W. Hall for $5,000. These are said to be on notes and for goods sold.

BOSTON.—Ira Hill, provisions, has failed and is compromising at 15 cents.

BOSTON.—John J. Hillman, gold and silver plater, has been attached on action of contracts for $400.

BOSTON.—Andrew McArthur, baker, has failed and sold out. He will settle in insolvency.

BOSTON.—Macomber & Greenwood, wholesale boots and shoes, have failed and assigned. The business was commenced as above in January, 1883. The firm was formerly Wallace & Macomber; Wallace withdrew, but left $50,000 as special capital with Macomber & Greenwood. They are thought to be involved in amount from $100,000 to $150,000. Assets are not estimated. Their failure is thought to be due to the failure of F. Shaw & Brothers. The firm ran two mills, one at Medway and one at Medford.

BOSTON.—John F. Mills, hides and leather, has failed and assigned. Liabilities not known. He had been considered worth from $35,000 to $50,000 by the trade.

BOSTON.—E. D. Nickerson, grocer, has failed.

BOSTON.—W. E. Plummer, hides, etc., has failed. The business was established in 1877, with a special capital of $25,000. He was interested in three tanneries, one-half in the Wells, N. Y., and one-third each with F. Shaw & Brothers in the St. Lawrence and St. Regis tanneries. Plummer managed the finances, but the stock is understood to have been bought by F. Shaw & Brothers. He was also treasurer of the Automatic Cotton Finisher Company and the United States Patent Company. He was rated worth at from $25,000 to $35,000. His failure is due to the embarrassment of F. Shaw & Brothers.

BOSTON.—F. Shaw & Brothers, hides and leather, assigned on July 30 to Ferdinand A. Wyman. Their liabilities are estimated at over $3,000,000, against nominal assets of $5,000,000, subject to heavy shrinkage. The business was established over thirty years ago. The present partnership is composed of the following members, viz.: Fayette Shaw, Brackley Shaw and the estate of William Shaw, deceased, and dates from January 1, 1882, to run ten years. The firm owned tanneries at Forest City, Houlton, Vanceboro, Kingman, Jackson Brook and Grand Lake Stream, located in Maine, also at Wells, St. Lawrence, St. Regis, Arieta, Lincoln and Princeton, located in New York. The concern is also located at Montreal as Shaw Brothers & Cassills. They own large tracts of land in Maine, New York and Canada, extract works at Kingman, Jackson Brook and Houlton, and a large number of tenement houses and other property. They were said to have been the largest manufacturers of sole leather in the United States.

BOSTON.—William Simmonds, provisions, has failed

BOSTON.—United States Patents Company, Fayette Shaw president and William E. Plummer treasurer, has failed. The failure is due to the embarrassment of F. Shaw & Brothers and W. E. Plummer, the former being heavy stockholders in the concern. The company was organized in 1880 under Connecticut state laws, with an authorized capital of $500,000, and were engaged in the manufacture of various patent articles. They claimed on January 1, 1883, to have assets of $155,000, with liabilities of $88,764, $40,000 of which were in notes indorsed by F. Shaw & Brothers and W. E. Plummer individually.

BOSTON.—Charles H. Ward, boot and shoe manufacturer, has failed and assigned. The trade estimate his liabilities at $750,000; assets not known. The firm has been rated worth from $100,000 to $150,000. It is stated that F. Shaw & Brothers owe the firm about $200,000. In February, 1883, they claimed to have $160,000 invested in the business and to have made $32,000 in 1882.

GREENFIELD.—Greenfield Co-operative Manufacturing Company have liabilities about $30,000 and nominal assets $33,000, of which $27,000 is stock and $6,000 accounts.

HOLLISTON.—H. O. B. Nichols, shoe manufacturer, has been attached.

NATICK.—C. B. Travis & Co., shoe manufacturers, have suspended and been attached. Their stock was furnished by C. W. Copeland & Co. Travis carried no stock on his own account. His son formed the company.

NEW BEDFORD.—Z. A. Popple, grocer, has failed.

SALEM.—Ira H. Roberts, stables, has failed.

SALEM —Roberts & Bigelow, provisions, have failed.

SOUTHBRIDGE.—Alexander Lataille, baker, has gone into insolvency. Liabilities $4,974; actual assets about $2,000. He offered to compromise at 25 cents, which was refused.

SPRINGFIELD.—Hinsdale, Smith & Co., tobacco, have mortgaged real estate for $13,000, and Annie M. L. Smith conveyed real estate $10,000, subject in part to a mortgage of $13,000. H. Smith has been attached by the Sacowsic Woolen Company for $2,426.43 advances on consignments, which Smith, who was president of the company, guaranteed.

SPRINGFIELD.—John W. Hoyt, president of the Dwight & Hoyt Construction Company, has been attached.

STOUGHTON.—S. C. & J. G. Phinney, boot and shoe manufacturers, have failed. Liabilities and assets not known.

WOBURN.—H. G. Hall, general store, has failed.

WORCESTER.—E S. Perry, drugs, has given a chatte mortgage for $626 and been attached.

MICHIGAN.

BYRON CENTRE.—N. D. Marsh, general store, is offering to compromise at 80 cents.

CADILLAC.—J. W. Nelson, lumber, has been attached.

CADILLAC —A. W. Stickles, grocer, has assigned.

DETROIT.—Walker, Hopkins & Co., grain commission, have assigned to Charles M. Swift.

DETROIT.—Wilson & Hobel, builders, have suspended.

DURAND.—Walker & Fay, butchers, have assigned.

HILLSDALE.—H. M. Clement & Co, dry goods and millinery, have assigned to J. W. Donovan.

ST. IGNACE.—N. W. Goodwin, hotel, has failed.

MINNESOTA.

DULUTH.—John Camfau, saloon, has decamped. Creditors are in possession.

MONTICELLO.—C. M. Dittman, banker, has been closed by the sheriff on attachments to the amount of $3,000, but it is expected that the suspension will be raised at once and all of the depositors paid in full, as the backers of the bank are said to be good for ten times its liabilities.

MONTROSE.—Jacob Weschsler, general store. A meeting of the creditors has been held, but no offer was made.

ST. PAUL.—Louise Briedert, hardware and stoves. Attachment papers have been filed for $491.

ST. PAUL.—J. C. Simmonds & Co., furniture. has assigned.

WABASHA.—The creditors of J. H. Touissant, who assigned July 2, have accepted a composition of 25 cents cash.

MISSISSIPPI.

MERIDIAN.—W. B. Ramsay & Co., drugs, who assigned on the 9th ult., have assets of $1,500 against liabilities of $4,000.

MISSOURI.

ST. LOUIS.—Charles F. Anderson, manufacturer of furniture, has been attached.

ST. LOUIS.—James McNichol, tailor, has assigned.

ST. LOUIS.—Piper & Co., wholesale notions, who assigned on the 19th ult., are offering to compromise at 40 cents—5 cents cash and the balance on time.

NEW HAMPSHIRE.

CLAREMONT.—C. B. Gutterson & Co., shoe manufacturers, who recently failed, have liabilities of about $1,500, and nominal assets $2,000; actual assets estimated at $1,200.

JERICHO.—C. H. & Z. E. Gilbert, lumber manufacturers, have failed.

NEW JERSEY.

WORTENDYKE.—Wortendyke Manufacturing Company, Cornelius A. Wortendyke president, Abram Wortendyke secretary and treasurer, have given a chattel and real estate mortgage to Ammidown, Smith & Co. of New York city, their consignees, for $150,000. It is said that the mortgage was given last April, but has only recently been made public.

NEW YORK.

ALBANY.—Hudson River Tool Co., edge tool manufacturers, is in the hands of the sheriff.

BROOKLYN.—William Hubel, restaurant, has assigned to E. B. Lansing. Assets and liabilities not known; preferred $775.

BUFFALO.—R. L. Bertram, harness, has assigned to Robert F. Schelling.

BUFFALO.—Jacob P. Worth, dry goods, etc., has assigned.

DUNKIRK.—C. H. Smith, manufacturer of cigars, is reported insolvent. A judgment was entered against him a few days since for $870.

EAST RANDOLPH.—C. W. Mount, carriage maker, has assigned.

FAYETTEVILLE.—D. H. Graham, wagon maker, has assigned to Joseph L. Mathias, with liabilities of $1,610, of which $610 are preferred; assets are not known.

GENESEE.—E. A. Livermore, coal, has been closed by the sheriff.

LITTLE FALLS.—L. A. Marsh, grocer, has assigned to A. H. Green.

NEW YORK CITY.—R. H. Johnston, cigars, has assigned to Walter F. Reed.

NEW YORK CITY.—John McCoy, liquors, has assigned to Clarence D. Jones.

NEW YORK CITY.—William Meares, fancy goods, has assigned to Christopher E. Wilson, giving preferences aggregating $2,120.39.

NEW YORK CITY.—Ostheim & Stern, manufacturers of suspenders, have assigned to Herman Kahn, with preferments aggregating $2,435.15.

NEW YORK CITY.—Stedman & Co., manufacturers and jobbers boots and shoes, are closed up, and it is said they transferred the business several days ago to L. & C. Wise, to be sold for their benefit. Their embarrassment is attributed to the embarrassment of Copeland & Co., of Boston.

OSWEGO.—Thomas Brickell, grocer, has assigned.

OSWEGO.—Cain Brothers, grocers, have assigned.

OSWEGO.—The liabilities of Clark & Moore, upholsterers, who assigned on the 20th ult., are estimated at $16,553; the actual assets $8,758, and preferred claims $5,132, secured on goods in store.

ROCHESTER.—Thomas R. Boone, who assigned about July 17, has liabilities of $20,430, against assets of $4,912.

SILVER CREEK.—Ralph Pomeroy, upholstery and dry goods, has assigned.

TROY.—Lewis C. Hazard, grocer, has assigned. Several creditors have united and brought suit to have it set aside.

TROY.—Mary E. Van Arnam (Mrs. William A.), grocer, has assigned. Liabilities $750; nominal assets $300; actual assets $150.

NORTH CAROLINA.

TARBORO.—H. H. Shaw, general store, has assigned.

OHIO.

CINCINNATI.—Cincinnati Sulky Buggy Company. A meeting of creditors has been called.

CINCINNATI.—P. A. Pickerell & Co., brokers in grain, provisions, etc., gave chattel mortgage for $436 and have assigned.

FOREST.—R. C. Willey & Co., hardware, have assigned to R. S. Wilson, with assets of $2,000 and liabilities of $4,000.

NEW PHILADELPHIA.—H. A. Grimm, general store, has assigned to J. F. Diefenbacker.

NILES.—A. G. Bentley & Co., bankers, have assigned to H. T. Mason. It is reported that they held about $40,000 of the Ward Iron Company's paper, which concern assigned on the 26th ult.

NILES.—Dalzell & Co., grocers, etc., have assigned to M. R. Merrick.

OREGON.

ASTORIA.—A. Greenburg & Co., general store, have applie for relief in bankruptcy.

INDEPENDENCE.—E. Poppleton, general store, has assigned.

PENNSYLVANIA.

ALLEGHENY CITY.—W. H. Osmond, grocer. Executions have been issued against him in favor of J. L. Craig and Reed, Bently & Co.

ALTOONA.—C. R. Hauck, gents' furnishing, has failed.

CORRY.—C. Beavis, hats and caps, has been closed by the sheriff.

GENEVA.—C. H. McLean, drugs and groceries, has been sold out by the sheriff.

GREAT BEND.—G. W. Dunn, grocer, has failed.

LEIGHTON.—W. S. Wintermute, general store, who made an assignment July 23 to S. R. Gilham, has liabilities of $9,000; nominal assets $13,000, and actual assets $4,000.

NEW BRIGHTON.—A. F. Mercer, boots and shoes, has been closed by the sheriff.

PHILADELPHIA.—Enoch Blood & Son, manufacturers of hosiery, have assigned to James F. Hay, with liabilities about $2,800 to $3,000.

PHILADELPHIA.—Joseph Buckley, saloon, is advertised to be sold out by the sheriff on the 3d inst.

PHILADELPHIA.—Edward Gamble, manufacturer hosiery, has assigned.

PHILADELPHIA.—M. F. Koenig, saloon, is advertised to be sold out by the sheriff on the 4th inst.

PHILADELPHIA.—Francis W. Long, restaurant, is advertised to be sold out by the sheriff on the 4th of August.

PHILADELPHIA.—L. Sykes & Son, manufacturers bolts and nuts, have assigned. The estate has been reassigned, a compromise at 50 cents, 10 cent installments, six, twelve, eighteen, twenty-one and twenty-four months, being accepted.

PITTSBURGH.—Mary A. Lang, millinery, had a judgment entered and execution issued against her on the 27th ult. for $3,539 in favor of Joseph Horner & Co.; also judgment for $229 in favor of Porter, Donaldson & Co.

PITTSTON.—P. M. Barber, drugs, who failed July 16, and was sold out by the sheriff July 23, has liabilities of $2,000 against assets of $884.

READING.—Hiram C. Heffelfinger, picture frames, has been sold out by the sheriff.

READING.—John Keppelman, foundry, who failed July 15, has liabilities estimated at $18,500 and actual assets $14,000; preferred claims $12,800.

READING.—Sprecher & Babb, wall paper, etc., who failed about July 9, and were sold out by the sheriff, have liabilities said to be $2,300, and preferred claims of $750. Assets not enough to satisfy preferred claims.

VERMONT.

BERKSHIRE.—C. Goddard, tanner, is in insolvency.

VIRGINIA.

NORFOLK.—Hofheimer & Son, wholesale boots and shoes, assigned July 30 to T. S. Garnett, trustee. Preferred creditors to be paid pro rata, amount about $80,000, leaving general creditors about $35,000. Their assets are supposed to consist of stock about $50,000; notes and accounts receivable $60,000. A decision rendered on July 28, compelling them to refund to the creditors of D. Hofheimer & Sons some $25,000, for which amount they were made preferred creditors by the latter firm, who failed in 1881, and to this fact their failure is ascribed.

NORFOLK.—J. C. Maximos, cotton buyer. His effects have been attached in New York city.

RICHMOND.—C. Manning, stoves, etc., has given a deed of trust on stock and fixtures to secure his creditors.

RICHMOND.—Maurice Evans, grocer, etc., has given a deed of trust for benefit of creditors. His assets and liabilities are thought to be about equal.

ROANOKE —V. O. Willis, furniture, etc., has assigned.

WASHINGTON TERRITORY.

NEW TACOMA.—A. T. Beede & Co., liquors, have been attached.

NEW TACOMA.—J. N. Orchard, grocer, has been attached.

POMEROY.—G. T. Parks & Co., notions, have assigned.

PUYALLUP.—E. W. Black has been attached.

SEATTLE.—G. R. Finn, grocer, has failed.

SEATTLE.—D. A. Jennings, grocer, has been attached.

WEST VIRGINIA.

SIMPSON'S CREEK.—J. D. West, drugs, has been attached.

WISCONSIN.

KENOSHA.—Frank A. Manor, saloon, has assigned.

MILWAUKEE.—Miss Catharine McGrath, millinery, has been closed upon execution.

MANITOBA.

BRANDON (Northwest Territory).—T. D. McLean, jeweler. Stock has been sold by bailiff.

CARTWRIGHT.—T. S. Menary, general store. His store is reported to be closed.

EMERSON.—W. M. Wiltse, jeweler, has been sold out by bailiff.

MOOSE JAW.—J. Shupe, hotel, is reported to be in financial difficulties.

PORTAGE LA PRAIRIE.—Logan & Henderson, general store, will have to make some arrangements with creditors.

PORTAGE LA PRAIRIE.—H. S. Patterson, general store, is asking an extension.

PORTAGE LA PRAIRIE.—H. J. Woodside, jeweler, who assigned last May, has been sold out by bailiff.

ST. BONIFACE.—F. X. Collins, general store, has assigned.

ST. BONIFACE.—A. Duperoussel, hotel, has been sold out by the sheriff.

WINNIPEG.—Carter, Smith & Co., hotel, have assigned.

NEW BRUNSWICK.

FREDERICTON.—H. S. Carman, grocer, has assigned.

ST. JOHN.—A. W. Masters & Son, oils, etc., have assigned to William Kennedy and Charles H. Masters.

PROVINCE OF ONTARIO.

ALVINSTON.—H. S. Murray, general store. A meeting of creditors was held a few days since.

AMHERSTBURG —J. J. Auger, dry goods. Sheriff is in possession.

BRIGHTON (& Winnipeg, Man.)—J. T. Rolls, drugs, has assigned.

COLLINGWOOD.—Ed. Perry, dry goods, etc., to be sold out by bailiff.

DUNDALK STATION.—G. R. Middleton, general store, who recently assigned, is offering to compromise at 60 cents.

GUELPH.—Henry Loch, grocer, has assigned.

HAMILTON.—Harry Snowdon, restaurant, has had a chattel mortgage foreclosed.

HAMILTON.— McQueen, Pitcher & Reed, planing mill, have assigned.

LONDON.—C. H. Smith, fancy goods, is reported to have left town.

PEMBROKE.—The estate of D. Fraser, general store, has assigned.

STRATFORD.—J. M. Moran, publisher, has been seized under chattel mortgage.

TORONTO.—James Clark, grocer, has assigned.

TORONTO.—A. B. Flint, dry goods, is asking an extension.

TORONTO.—Charles Hickling, grocer, has held a meeting of creditors, and does not want to pay liabilities in full.

STERLING.—E. F. Parker, general store, who was burnt out in June, is offering to compromise at 40 cents.

TORONTO.—James Platten, grocer, has assigned.

PROVINCE OF QUEBEC.

ACTONVALE.—A. L. Desere, general store, has assigned.

MONTREAL.—James Lowe, Jr., grocer, has assigned.

MONTREAL.—John Mareil, grocer, has assigned.

MONTREAL.—H. F. Poirier, dry goods, has assigned.

MONTREAL.—P. Rivard, hotel, has assigned.

MONTREAL.—Shaw Brothers & Cassils, tanners and leather. Mr. Cassils states that the failure of F. Shaw & Brothers, of Boston, will not affect Shaw Brothers & Cassils, as the firms are entirely separate. The latter firm has not appeared to create any heavy liabilities in Canada.

ST. HELENA.—Auguste Labelle, dry goods, has assigned.

ST. THOMAS DE PIERREVILLE.—Ed. Rouillard, Sr., general store, has assigned.

THREE RIVERS.—Oliver Trudel, stationery and wines, is offering to compromise.

A GENTLEMAN, age 33, of thorough business experience, who is desirous of residing in Australia, wishes an appointment as representative or prospector by a first-class firm. Excellent references. Address E. P., care of The Bradstreet Company, 84 Newgate Street, London, England, or 279 Broadway, New York.

ADDRESS PUBLISHER OF BRADSTREET'S, NEW YORK.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, AUGUST 11, 1883.

NOTES OF THE WEEK.

The Boston failures caused a renewal of the selling movement in the stock market during the past week, and when the effect of these was wearing off the failure of the Vermont National Bank, and yesterday the suspension of two banks in Indianapolis, set the ball in motion again. Mr. Gould has protected his Western Union and Missouri Pacific as well as he was able, and in respect to the former seems to have proved to the satisfaction of the street that he can hold it at these prices. His Missouri Pacific has been less strongly held, and his other southwestern stocks have been quite abandoned to the tender mercies of the bears. The Villard stocks have received some very rough handling. The Vanderbilts have been comparatively quiet. There was a bad feeling in the street yesterday in the last hour of business in consequence of the bank troubles.

The New York Aqueduct Commission has promptly organized, Mayor Edson being elected president, and Mr. William Dowd vice-president. Commissioner Thompson has submitted a plan for a reservoir of 3,635 acres, having a capacity of 32,000,000,000 gallons above the level at which the water is to be drawn by the new aqueduct. The estimated cost of dam, reservoir and aqueduct is put down at $14,460,000, exclusive of land damages. The present and the new aqueduct will together have a daily capacity of 350,000,000 gallons. It is well that the metropolis is at last in the way of having its water supply enlarged. The present short supply is the main retarding influence in the way of the city's further growth and development.

A committee was appointed by the Treasury Department some time ago to consider the question whether it was intended by section 7 of the new tariff act to repeal the duties on all the coverings of imported goods, including the small packages containing them, or whether it was only intended to repeal the duty on the outside packages necessary for transportation and shipment. The committee was composed of seven experienced customs officers, including representatives from the most important ports of entry. The committee, after a prolonged consultation, has sent in two reports, each signed by three members. One of these reports is to the effect that the section in question contemplated that the outer covering of the goods only was exempt from taxation, while the other holds that it was intended to exempt all the coverings, and to assess duty only on the naked merchandise. One member of the committee did not sign either report. This result, as will be seen, leaves the question where it was before the committee began its labors, save in so far as the facts and arguments embodied in the reports will be of assistance to the Secretary of the Treasury or the law officers in arriving at a decision. The question will probably be submitted to the Attorney-General for an opinion.

It was to be expected that the extension of railroad communication between the United States and Mexico, which has been proceeding so rapidly of late, would result before long in the improvement of postal facilities between the two countries. The subject has been under consideration by the Postmaster-General, who has addressed a letter to the Director-General of Posts in Mexico calling his attention to the matter. Mr. Gresham, referring to the fact that mail communication by sea via Vera Cruz has been interrupted during a considerable portion of the year in consequence of the existence of yellow fever, suggests the desirableness of using railway facilities as early and to as great an extent as possible, and requests the Director-General to coöperate to that end by advising him when and where it may be possible to divert with advantage any of the correspondence now exchanged between the two countries from sea to overland routes, and by making such alterations in the interior postal service as may be possible and necessary to bring about the change proposed. The matter, it seems, has been pressed upon the attention of the Post-Office Department by citizens of the United States residing in Mexico and their business correspondents in this country.

In his annual address before the American Forestry Congress in session at St. Paul, President Loring stated that the clearings in the old settled parts of the country are being filled up with trees, so that in Ohio, Maine, New York and other states the acreage is growing constantly greater. In other states where the subject of forestry has attracted attention it is growing in regard, though further encouragement is needed in this direction. The forest acreage of the country is, it seems, less than one-fourth of the whole surface, a less portion than in the east, west and north of Europe. The quantity of pine lumber appears to be on the decrease, to such an extent, indeed, that at the present rate of consumption the supply in the northern states will be exhausted within a few years. In the near future the country must depend upon the pine forests of the gulf states for its lumber. Much timber, it appears, is being wasted by burning and cutting. Mr. Loring indorsed the suggestions of the Land Commissioner, in his report of 1882, recommending the passage of some general and comprehensive law stating who may cut timber on government lands, for what purpose it may be cut, and providing a penalty for unlawfully destroying forests. The opinion was expressed that the United States, which had been so busily engaged in lumbering for the past forty years, should now devote itself to forestry.

In common with most of the political platforms adopted recently the resolutions of the Minnesota Democrats address themselves with more or less definiteness to questions of present interest. Of course, they, like most others, recur to "honored maxims," and put forth some of the glittering generalities which supply the resonant portions of such instruments, but these are much less obtrusive than formerly. As usual, the tariff question is touched upon. The Minnesota convention favors "such a thorough revision of the present tariff laws as will remedy existing evils and result in the establishment of a tariff for revenue only as the permanent commercial policy of this country." This is a distinct declaration upon the tariff issue, and indicates that the Minnesota Democrats are free from the conflict between interest and principle which resulted in such remarkable resolutions adopted by members of the same party in Ohio, Virginia and Pennsylvania.

The most recent expression of official opinion upon passing events in England was Mr. Gladstone's speech at the Lord Mayor's banquet on Wednesday evening last. The Premier said that the government had gone to Egypt in an unselfish spirit, and desired simply to accelerate reform there. It was thought that too much haste might spoil the work; but when the views of the government were accomplished the British would disappear from the country. The great object of the ministry was to secure an early and successful accomplishment of the grand movement toward reform in Egypt. Recent advices from Madagascar confirmed the hope that no difficulty existed in that quarter which could not be solved by generous and honorable dispositions between France and England. The speaker said that he felt even sanguinely confident that nothing would now arise to disturb the long accord of the two nations. The great change in the condition of affairs in Ireland was referred to, and Mr. Gladstone expressed gratification that the authority of the law had been reasserted there, and that peace and security prevailed. He believed that the end of the present session of Parliament would show that a fair amount of work had been achieved. The government, he said, hoped much in the future from its system of grand committees.

Notwithstanding the dullness of the season, life in Europe has not been entirely uneventful during the past week. In Spain several outbreaks occurred among the soldiery, but proved abortive, owing apparently to the want of concert among the insurgents and to the absence of popular sympathy with them. The object of the insurrection, according to the declaration of participants therein, was the establishment of a republican constitution, but it has been asserted that the real purpose of the conspirators was to conceal a robbery of public money, and in some quarters the charge has been made that the movement was only a part of the programme of a gigantic stock-jobbing operation conducted by a clique which has been for some time making extraordinary efforts to destroy the improving credit of Spain. However that may be, the movement succeeded in thoroughly alarming the government, and as a result a royal decree has been issued suspending constitutional decrees and declaring the country in a state of siege. In anticipation of future trouble, the furloughs of all officers in the military service have been canceled. In some well-informed quarters the situation in Spain is regarded as very grave, and the belief is entertained that the outbreaks are only symptoms of widespread discontent, particularly in the army. The reports are conflicting, however, and it is difficult to judge as to the correctness of these opinions. That official statements in regard to the situation cannot be implicitly relied upon is, however, clear from the fact that rails and bridges have been destroyed in places where according to official assurances there has been no disturbance.

CHANGES IN PROTECTIONIST OPINION.

We have heretofore, as occasion seemed to suggest, endeavored to make clear to our protectionist friends that the true commercial policy of the United States for the future must lie in the direction of greater freedom of exchange, and that the true and wise solution of the tariff controversy will be found in the adoption of a plan looking to the gradual reduction of duties on a sliding scale extending over a period of years. While admitting that the vested interests which have grown up and have been fostered under the tariff policy of past years are entitled to large and generous consideration and should not be arbitrarily and suddenly interfered with, we have been careful to remind those in favor of maintaining the existing system that by resisting moderate reforms they are likely to provoke the enactment of radical and inconsiderate measures in the not very distant future. Our position in regard to the tariff difficulty, while such as to commend itself to temperate and judicious men of all shades of opinion, naturally did not fall in with the extravagant views of the more extreme adherents of the protective system. This was not to be expected, nor did it occasion surprise that the utterances of journals published in centers of protectionist effort and dependent upon protectionist support should continue to advocate the maintenance of protection as a permanent policy.

Of late, however, there have been some signs of a change in this respect. Some weeks ago the Philadelphia *American*, disclaiming the idea that it was in favor of the tariff as a permanent institution, declared that it could conceive of circumstances in which the tariff would cease to be required as a means to the industrial independence of the nation, and that in such a case it would favor the reduction of duties to the revenue basis. This, however, while in some sense a concession, considering the quarter from which it came, was still hypothetical and only dealt with the matter in the abstract. A much more significant declaration—perhaps the most significant that has been put forth upon the tariff question of late—is contained in a recent article in the Pittsburgh *Leader*. That journal, commenting upon Mr. Wharton Barker's scheme for distributing the surplus revenue among the states in order to save the war tariff, says: "We may as well look the matter in the face, gentlemen of Philadelphia; by no such artificial scheme as this can the inevitable be shunned, and the inevitable is just this: unless there is another war or such a prodigal expenditure of public money on rivers and harbors and public works, and Mexican and Confederate pensions, and workingmen's homesteads, etc., such as the world has never yet seen, the tariff must go, not suddenly we hope, not disastrously if we properly prepare ourselves for it; but as certain as this country is to grow in population and wealth, good sense dictates that we Pennsylvanians should not fight this result with wild projects and fanciful dreams like the Barker scheme, but should give our best thought and patient endeavor to found our industries while we have yet time on such a solid basis that they can undergo the coming change without shock, and blossom out into new prosperity when they stand no longer on government props but on their own merits."

The interest of the paragraph quoted is, as will be seen, by no means of an abstract nature. Its significance lies in the fact that it discusses the tariff controversy in the concrete in the light of actual present circumstances and of the inevitable future. The conclusion reached by the *Leader* is but a recognition of a fact long since apparent to most persons whose opinions have not been unduly warped by their interests. The publication of the article in the city of Pittsburgh, where unanimity of sentiment upon the tariff question has hitherto been understood to prevail, is indeed a matter of more than passing interest. It goes to show that the change which has been gradually coming over public opinion throughout the country has at length begun to affect the strongholds of protection itself. Sooner or later this was certain to happen. The workers in protected industries could not forever blind themselves to the fact that the overproduction from which their several branches suffer has been mainly due to the artificial encouragement afforded by the tariff, which, while stimulating production at home, naturally operated to deprive them of a market abroad. As we have shown, a foreign market becomes more and more necessary as productive operations expand, and yet, by prohibiting importations, we are doing our utmost to prevent the growth of an export trade. The advice given by the Pittsburgh journal to its protectionist friends is judicious and in every way worthy of their most careful consideration. We do not even hesitate to say that the *Leader* is much more truly a conserver of the interests of the protected industries than those who, by blind opposition to the progress of public opinion, invite sweeping, and perhaps temporarily destructive, changes in our industrial relations.

THE TRADE IN HOME AND FOREIGN TEXTILES.

The conservative spirit that has come to mark the dry goods trade, indicated by the disposition of jobbers to confine themselves to needed assortments, leaving surplus stocks in the hands of manufacturers and commission agents, and also by the buyers for the fall trade purchasing only for immediate requirements, indicates, at all events, a healthful state of business. The exclusion of those disturbing speculative elements which encourage the artificial enhancement of prices and are unfailingly followed by injurious results is certainly some solace for the decline in values along the whole line of goods. This year's fall trade with buyers from a distance set in earlier than usual. There is now the customary lull, jobbers being engaged in supplying the near-by trade. The southern trade has been particularly active, buyers being encouraged by the favorable prospects of the crops in the south. From all indications trade promises to be active in that quarter. A large bulk of goods has been taken by San Francisco merchants, and the Pacific trade generally promises well. At the present time, and in pursuance of a now established policy—that of not carrying stock over to another year—commission houses are inclined to make important concessions in a considerable range of staple goods.

Owing to the extension of organization at the distributive centers in the west and northwest, and the large scale of purchases made by leading jobbers in Chicago and Cincinnati, the smaller buyers in those sections no longer visit the New York market. The early date at which western buyers arrive here makes of no account the time involved in shipping goods to their destination by the Erie canal and lakes, and a host of dealers at a distance are supplied from those cities with all necessary promptitude, thus saving a week or more by not ordering from New York unless the goods are sent by rail. The dry goods trade is familiarized to changes in fashion. Some of these can be anticipated, others come with all the effect of a surprise. The latter is illustrated in the costly velvets now in demand, some descriptions of these being quite scarce, whereas last winter they could scarcely be given away. Lace is always fashionable, but the wear has seriously declined, and Calais, Brussels and Nottingham laces may wait years for a revival. In staple goods may be cited the gradual decline in the use of flannels, which are not nearly as much worn as two or three years ago. On the other hand, with even increased consumption of other staples, prices will be depressed, as now in cottons and woolens, through overproduction, an event from time to time inevitable through the absence of concerted action among manufacturers. And here it may be remarked that the temporary stoppage of some important woolen mills is likely to have little influence on current prices, inasmuch as this stoppage was occasioned by the fact that the goods of those mills were not of a texture, style and finish to suit the wants of the fall buyers. It may be noted that as the wealth, and consequently the purchasing power, of the community increases the demand sets more strongly in for finer grades both of dress goods and underwear. With a large class of the former the proportion of sales in different descriptions depend quite as much on patterns as texture. The variety of colors and patterns of dress goods now in the market was never equaled; the course the public taste may take is undecided, but the greatest novelties follow the Persian designs, the Indian palm-leaf and an endless range of flower effects. The forms and modes of the expression of fashion only gradually make themselves apparent. Among other designs may be mentioned Jacquard effects, which can hardly be described as either plaids or stripes, but rather such a blending of the two as produces a very striking and elegant result.

The amendments of the tariff bearing on dry goods are not calculated to affect in any important degree the imports of textile fabrics. Where the tariff has probably dealt most sharply is with all-wool dress goods, which form so important an item in French importations, as being unrivaled for flexibility and elegant finish. The extent of the alteration of duty is from 6 cents per square yard and 35 per cent. ad valorem to 9 cents per square yard and 40 per cent. ad valorem. There was a large importation of these goods in the spring, and the circumstance of the import houses being in a position to take these goods out of bond previously to July 1 has created a feeling in the trade that purchases at this time are safe, as retail stocks throughout the country are low, and they are not likely to be replaced at the same price. Silks come in with a reduction from 60 to 50 per cent. ad valorem, making a difference of 5 to 7 per cent. in cost. The foreign importation, in view of the progr » of our own manufacture of piece goods, ribbons, etc., which consumes upward of $10,000,000 worth of raw silk annually, is destined to decline, the purity of our domestic silks and the excellence of their make being in their favor. Linen is now 35 cents all round; the duty on the finer grades, which was 40 per cent. ad valorem, being reduced to that figure. Our own manufactures in linen being confined to crashes and towels, the foreign linen trade has here free scope. In these importations Germany has begun to advance on the Scotch productions, German manufacturers showing the same aptitude in mixing yarns which has given the Scotch such commercial success in their specialities of damasks, towels and diapers, and these at cheaper rates.

BRITISH EMIGRATION.

A correspondent at London writes as follows:

"The shipping of paupers to the United States has helped to make emigration a prominent topic at London. English farmers complain that some of their best labor has gone abroad. Politicians are reminded that the outflow of population from Great Britain has for some time been considerable. Further, the agents of the Australian colonies and of the Dominion of Canada are urging all the world and his wife to go abroad and become rich and happy. A few figures will suffice to show the present position of Irish emigration. By the parliamentary statistics it appears that from the 1st of May, 1851, to the 31st of December, 1882, the total emigration from Ireland was 2,838,949, and all those emigrants were natives of Ireland save 34,209. That is an enormous outflow since the estimated average population, the estimates being founded on the decennial census returns, is 5,736,214. The following table applies to the last five years:

	Total Emigration	*To United States.*
1878	41,124	14,720
1879	47,065	23,361
1880	95,517	74,035
1881	76,417	61,459
1882	89,136	65,962

"In 1878, '79, '80, the emigration was on a census population of 5,412,377, and in 1881, '82 on a census population of 5,194,836. The total emigration in the ten years from 1871 to 1880 was 623,913, and the total decrease of population according to the 1881 census was 337,541, that is to say, the diminution of emigration was recouped by the excess of births over deaths to the extent of 286,372; and bearing in mind the hard times included in the decennial period, the figures show that the fecundity of the Irish race is unimpaired. During the last three years the excess of births over deaths has not compensated for the emigration. Mr. Giffen (of the Board of Trade) says: "For several years before 1880 the emigration was rather less than the annual excess of births over deaths, but during the last three years it may be considered that the population of Ireland has been steadily declining in consequence of the emigration." For the six months ending June 30, 1883, the total Irish emigration was 79,959, against 57,163 for the same period last year, and of these emigrants 59,722 went to the United States in the six months of the present year and 48,195 in the same period in 1882. It is also desirable to cite the separate returns for the last month. In June, 1883, the total Irish emigration was 16,296, against 9,282 in June, 1882, and the Irish emigration to the United States was 12,179 in June, 1883, against 7,421 in June, 1882. The Board of Trade returns are used, in which the emigrants are classed according to their nationalities, and therefore the Irish emigration includes Irishmen leaving any port of the

United Kingdom for places out of Europe. If we are to take the emigration figures as the gauge of the distress in Ireland we are forced to the conclusion that the distress has not abated and is not abating. We may be told that the emigration of 1883 is partly emigration by the agency of the government. That is so, but then the Irish executive has been intent on sending abroad people who are in such dire poverty that they have to choose between refuge in the workhouse and emigration. We may then take the latest emigration returns as a very accurate indication of Irish distress, and politicians who hold that distress and political contentment are incompatible ought not to be surprised that the conciliatory legislation of Mr. Gladstone has so far proved abortive, that even in the time of coercion the National party holds its own, and perhaps makes some headway. The Irish grievance that urgently calls for redress is not sentimental, but the very substantial grievance of want. Perhaps emigration is the only remedy, but, however that may be, certain it is that so long as the grievance continues it will breed and foster political discontent.

"In turning to the English and Scotch emigration, one or two important points in the Board of Trade report on the emigration and immigration from and into the United Kingdom in 1882 are worth attention. It says the excess of emigrants in 1882 "was unprecedentedly large. The excess of total emigration is 335,000, or very nearly 1,000 per day, and the excess of emigrants of British and Irish origin only is 228,767, which is 38,000 more than in the previous year, and enormously greater than the figures in some of the years before that. The loss of population to the United Kingdom last year was very nearly one-half the total excess of births over deaths. The loss must be more largely felt than it was thirty years ago, a loss of English and Scotch as distinguished from Irish population. The Irish emigration continues large in proportion to the population of Ireland, but the amount is smaller than it was thirty years ago, while the amounts in the case of the English and Scotch population have increased." Was there any immediate cause for the abnormal outflow? Mr. Giffen says that the coincidence of a large emigration with a revival of trade succeeding a prolonged period of depression is usual, and suggests that the check to the revival at the close of last year will, if sufficient, produce a decline in emigration. What has really happened strongly supports Mr. Giffen's assumption. Since he made his report in March last, we know that the check to the revival of trade toward the close of last year—I do not here discuss the point whether it was more apparent than actual—was only temporary, and we have evidence that trade has so far revived that the improvement is felt industrially. The last revenue returns show that the downward movement in the excise revenue has been stopped, and there is a marked increase. The consumption of drink is an accurate test of the prosperity of the working classes, and the recent increase in consumption is all the more significant if we take into account the efforts of the temperance "armies." Probably, however, the "millions" who forswear alcohol when they have no money to buy drink break their pledges as soon as they can purchase their favorite beverage. Now, according to the proposition of Mr. Giffen, since trade is improving after a prolonged period of depression, there ought not to be a decrease, but an increase, of emigration. Now, for the six months ending 30th June last the English emigration was 88,604, against 80,797 in the same period of 1882, and the Scotch figures are for the two periods 16,595 and 17,927. The Scotch, indeed, shows a decline, while the English increase is very marked, and we have also to be mindful of this fact, that the six months ending June, 1882, was a period of revival after a prolonged period of depression; so that the extra emigration due to that cause must to some extent have been worked off this time last year. Probably, however, there will be a considerable emigration from England for some time to come because men who have a little capital find that a little capital does not in this country enable a man to farm or trade on his own account, and so they go abroad. For example, of 227,401 emigrants of British and Irish origin in 1882 there were 4,866 farmers and grazers, 13,401 professional men and merchants, and 22,728 males of no stated occupation, and the emigrants who do not state their occupation are generally men of some means.

"The total English, Irish and Scotch emigration for the six months ending June 30, 1883, was 179,168, and the destinations of the emigrants were:

	United States.	*British North America.*	*Australia.*	*Other places.*
English	46,535	15,425	21,255	5,409
Scotch	8,505	2,974	4,889	427
Irish	59,732	9,531	4,546	240

"Thus even of English emigrants the United States received more than all the British colonies and other places combined. There is now a great deal of talk about fostering emigration to British colonies, but it will require very much fostering to counterbalance the attractions of the nearness and the ready resources of the United States. The colonial governments may and ought to do something more than they have done for immigrants on their arrival, but this is quite another matter from diverting the natural current of the overflow of British population."

THE HARDWARE TRADE.

The moderate volume of the wholesale trade in hardware is somewhat disconcerting, but the situation is not wanting in reassuring symptoms. The retail trade throughout the country in seasonable goods is of fair proportions for this season, but dealers, as a rule, are disposed to carry light stocks, knowing that these can be readily replenished, and this policy is encouraged by the absence of apprehension of any material advance for the present in the prices of goods subject to fluctuations. An early and brisk fall trade is looked for by our wholesale men as a compensation for prolonged dullness; a prospect largely dependent not only on the grain harvest, but on prices, and a renewal of the export demand for provisions. Along the whole line of hardware products there has been a yielding of prices this year, in some instances very material, and the business done has fallen below the average of the corresponding periods of 1882 and 1883. The most potent influences that operated to this end have been of a general character, and as regards a number of hardware branches, the long-delayed and inclement spring had much to answer for. Among other though not primary causes, tariff uncertainties must be enumerated. The alterations in the tariff have on the whole been a cause of considerable dissatisfaction with the trade.

In no manufacturing business is the value of organization better appreciated than in the hardware trade, and in none, with the exception of certain branches in which the manufacturers hold the reins well in hand, is it more difficult to maintain established card rates by force of decree, owing to diverse local considerations and to extreme competition of retail dealers. Certain branches, as for instance that of nails, have dual associations representing respectively the east and west, and formally acting independently, though the course of either one aids, in nautical phrase, in determining the bearings of the other. Whilst some associations include the whole body of makers in their special lines, others, like the Table Ware Cutlery Association, are composed of a few leading manufacturers, adopting tactics designed among other objects to fetter and embarrass the more numerous or smaller makers. The five or six members of this association do not quote by list prices nor yet by discount, but make net prices to suit requirements of customers. One function exercised by a few of these associations is the occasional stoppage of factories, partially or completely, to check overproduction and so maintain prices. The Western Nail Association adopts these tactics, but was out-manœuvered this year, its suspension of works from January 15 to February 10, and again for two weeks in March, to "keep supply equal to demand," causing eastern makers to make large and profitable shipments to the west, a course that compelled the western association to reduce its rates. At times the prompt action of hardware associations has furnished the corrective for unwarranted prices; at other times advances have been made in uncertainty as to whether results would justify them. The File Association lately made an advance of 10 per cent., trusting to compliance from the fact that this advance corresponds to increased import duty on foreign files, for it may be cited as one of those bodies which leaves individual members free to pursue their own course as to terms, its meetings usually partaking of the character of friendly business conferences. In such a diversified trade as that of hardware there will always be complaints of cutting in various branches, particularly at times when trade is sluggish or competition extreme. The disciplinary mode of meeting this evil by leading manufacturers whose names go with articles in special standard lines is, in the first instance, to refuse rebates to the offending parties, and in the event of persistence to cut off all further supplies. Precise adherence to prices is not looked for by many associations, an approximate approach being all that is needed. Even in the nail trade, in its present position, concessions are somewhat readily made on large and desirable orders.

The American hardware trade thrives on mechanical ingenuity. The machines and tools employed in turning out its immense and varied specialties have been so improved on with reference to speed and excellence of product, such an inventiveness has been displayed in originating useful appliances, and such the skill of manipulation by a host of intelligent artisans, that in hardware we lead the world. To unapproached lightness relatively to strength and serviceableness is added, wherever appropriate, artistic attractiveness of a high order both in form and finish, qualities which have an important influence in exciting demand. Our edge tools particularly have obtained a world-wide reputation, rendering it commercially profitable to place them on British and continental markets. In South America, Australia and elsewhere our cutlery, including butcher and carving knives, is making a serious inroad on that supplied from England. Even Sheffield manufacturers have thought it worth their while to place the trade-marks of our most reputable makers on their exported goods. Mechanical and artistic advancement, for which our manufacturers are continually striving, is signally represented in the wide range of builders' ware, the variety, utility and beauty of which, in articles that pertain to interior house decorations, has vastly expanded the business, even to the superseding for many purposes of other material. Embossing, electro-plating, burnishing and enameling are employed for greater effectiveness, and by acids and heat all desirable colors or changes on surface texture of metal are produced, whilst construction in locks, knobs, door pulls and door-hanging contrivances, and all articles in which easy action is required, are produced in unexcelled excellence, including form and finish. In short, the uncouth hardware workmanship of former days has been banished from even the cheapest grades of hardware articles. Escutcheons and various ornamental attachments and mountings in bronzed iron and brass approach in external character to wrought-iron work. The fact that elaborate and attractive hardware features materially enhance the value of house property for renting purposes has given an important impulse to this branch of trade, in which the better grades are in demand for the greater proportion of new buildings erected. In machinists' tools American makes excel in finish and working qualities, and in these improvements are continually proceeding. As a rule, if foreign tools excel in finish, they are wanting in wearing qualities, and if good in the latter they are apt to fail in the other. Our medium makes of tools find their best sale in new sections of country. In the eastern and northwestern states, where the best customers are found, when times are at all prosperous the best descriptions are in demand, owing both to the improved intelligence of workmen and to the general requirement for superior work. The let-up in railway business has necessarily affected the sale of saw, carpenter and edge tools, but railway work is still on a scale creating a large, steady demand. The trade in tools is mostly carried on by commission houses. The manufacture of saws has been brought down to a perfected science; they go over the world wherever our hardware goes, and meet no competition in our home market. Carpenters', coopers' and ship tools, cleavers, choppers, molding and machine knives are exported. For a vast extension of our foreign trade in hardware, which is yearly growing, we but need regular steam communication with consuming countries, and the advantage of personal application in pushing sales instead of having to trust to a great extent to foreign agents. In the best class of English cutlery imported the entire trade done here runs on known brands, the same class of goods, however, being made by American manufacturers. Years ago, before our cutlery attained its present high state of excellence, there were some thirty-five cutlers and jobbing houses in New York who sent orders abroad for knife goods to be stamped with their own brand, and several got a good trade built up in this way, but with one exception the system has been abandoned. The duty imposed on foreign pocket knives is 50 per cent. ad valorem, and the duty on razors, the manufacture of which was commenced in this country three years since, has been raised from 35 to 50 per cent.

The file trade of the country has gradually developed to immense proportions, the making by machinery of files which average straighter than the hand-made, and with equal wear, contributing to this result. By the amended tariff a specific duty is imposed on files, regulated by length and description. Files are subject to a combination of some twenty firms, the largest of whom make nine hundred dozen and the smallest one hundred dozen per day. The number of files imported is very light to what it formerly was. Recent years have witnessed an enormous development of the trade in stamped goods both of tinware and iron. A standing complaint in the tinware trade is the low quality of imported tin-plates and the refusal of importers to sell under guarantees as to quality. It is charged that qualities that could not be marketed in Great Britain are loaded on American consumers, being palmed off on them as tin-plate. Many efforts have been made, but apparently without result, to get guarantees from importers of the purchaser receiving qualities as ordered. It is evident that the tinware, and we may add, the important canning interests, would be benefited by the American production of tin-plates, but the way to the successful manufacture of these is not yet clear. The tariff reduces the duty to 1 per cent. per pound on sheet iron tinned (tin-plates), while fixing 1½ cents on common black sheets, Nos. 25 to 29, and 2¼ cents on galvanized in the same ranges, an allotment of duties discouraging to investment of American capital in the business. It was apparently to afford such encouragement that the act of 1864 fixed the rate of tin-plate at 2½ cents per pound.

In the stove trade the disposition among dealers is to carry less stock, they having been rendered more cautious by their experience. They are encouraged in this policy by facilities of supply and by the circumstance of the light spring trade, which has left stocks in manufacturers' hands 12 per cent. greater than last year. The stove manufacturers, at their meeting at Niagara, and from whose detailed report the above estimate is obtained, held to the view that there is overproduction, but rather as an impression than a logical conclusion from any data before them, the ratio of consuming power to production in leading articles in general use being always uncertain, subject as it is to various modifying influences not always within the range of the business affected. The productive capacity of stove factories showed an increase in the official year of 15 per cent. for New England, 1 per cent. for New York, 5 per cent. for Pennsylvania, and 10 to 15 per cent. south of the Ohio river. The production in same time was 15 per cent. greater in New England, 10 to 15 per cent. less both in New York and Pennsylvania, and 10 to 15 per cent. greater south of the Ohio river, as compared with the corresponding period of 1881–82. The extensive introduction of gas and oil stoves has not interfered with coal and wood stoves, as, instead of superseding the latter, they are bought as supplemental appliances. Fashion in stoves, determined by what the public readily accept in changes of style—these changes having reference not merely to new

forms but increased convenience and economy—have an appreciable effect on sales. People with or without abundant means do not now wait till their stoves are worn out. Latterly a vast advance has been made in the supply of low-feeding stoves, made by all manufacturers in somewhat different types. Our stoves are exported in very considerable quantities. In England the conservative tendencies of the people who adhere, under manifold inconveniences and an utter disregard to economy, in maintaining open fire grates, interfere with the sale of our own productions, the superiority of which to those of English makers is evident, alike in the more intelligent application of the principles of combination, in external attractiveness and the absence of English clumsiness in make. For our stoves we have good markets in Australia and other colonies; they even go to Japan and China.

The effect of well-considered hardware novelties on sales is well known, and they make a great feature of the trade. The mechanical devices to compass purposes at less outlay or with greater convenience are endless. The many die out, the few survive, but ordinarily they have very distinctive features. A modification of make in some one branch will suggest its application to others, and thus a continued metamorphosis of standard articles is going on. It is a somewhat surprising fact that only a year and a half ago were steel nails brought out, nails that can be driven directly and easily without bending even into oak knots, and the adaptability of which for hard finish has caused them to be used extensively by car makers. And here we may remark that inventive genius in machinery alone renders possible the scale of trade in such branches as nails, screws, nuts and bolts. It is to be observed that in general hardware the west is becoming increasingly independent of eastern supplies. A number of eastern manufacturers, tempted by grants of land, offers of investments of stock, and by railway facilities for shipping their products to leading manufacturing marts, have transferred to Ohio and elsewhere their establishments, and there are many evidences that large additional manufacturing capital will continue to be invested in this form.

OCCASIONAL NOTES.

The Boston Clearing House Association held a special meeting recently to consider the subject of the collection of country checks. A proposition was discussed looking to the establishment of a clearing house for all the New England banks. Some opposition to the project was manifested, but it was favored by a majority of the members. A committee was appointed to consider the subject in all its bearings and to report thereon at a future meeting. It is expected that the committee will present an acceptable plan, and that the clearing house will be established. There can be no doubt that the general adoption of a system such as that proposed would go very far to meet a real need. The business of collecting country checks is in a very unsatisfactory condition indeed. Large numbers of such checks are sent from one bank to another to escape the payment of a small collection charge in cases where the banks first receiving them have not charged their customers anything. In some instances there is danger that checks will be out a week, or even longer, before they are presented. A forcible illustration of the evils of this practice was given some time ago in the Cincinnati *Gazette* in the case of a check for $25, which it appears had been sent back and forth for nine days before reaching its destination in a town only twenty miles from the place of its departure. The mere statement of the facts in such a case renders all comment superfluous. The desire of customers to save the cost of collection and the competition among metropolitan banks seeking country deposits do much to increase the perils and inconveniences of this mistaken system. Bankers in large cities offer by way of inducement to collect all sorts of checks for country banks, and as a result often receive checks and drafts on places where they have no correspondent. If they send the paper on for payment they will be obliged to pay the charge for collection—a clear loss to them. To secure free collection they send the paper on to some correspondent bank of theirs nearer the point to be reached. All this goes to prove that there exists a wide and growing field which might be advantageously occupied by a general clearing house system for country banks. We shall await with interest the result of the Boston committee's deliberations.

The United States Senate Committee on Education and Labor has been investigating the condition of laboring people in the city of New York during the week. The committee is to make a report on the relations between capital and labor and to recommend such remedial legislation as it may deem beneficial in improving the condition of workingmen and in adjusting the differences between capital and labor. The members of the committee have been surprised at the extent to which foreigners, usually regarded as unassimilative, have adopted the customs and habits of the country. They have also been struck with the general level of health among the population of the crowded tenement districts. Inhabitants of the city will be mildly surprised to learn that in the opinion of the senators the streets look clean and that a good deal of credit must be due to the Health and Street-cleaning Departments. The committee were astonished to learn that in spite of the general facilities offered for educating the poor there were thousands of children who were unable to gain admission to the public schools for lack of room. A considerable amount of information in regard to the methods of life of the workingmen and the cost of living is being collected by the committee. In New York the senators will find a very inviting and instructive field of labor. They have entered upon their investigation at an opportune time, too, while the struggle between the telegraph companies and the operators is at its height. They will have a chance to weigh the merits of the controversy and to elicit facts which will be of the highest importance in relation to the object of their mission. The results of their investigation will be awaited with no little interest.

The first of the present month saw the introduction of the parcels post in England. This is one of the most important administrative schemes that has been undertaken in England during recent years. It is regarded as in some respects a more difficult undertaking than was entered upon by the government when it took control of the telegraphs. In that case, systems already in working order were transferred to the post office, which availed itself of the experience of those who had actually been employed in the telegraph service, whereas in the case of the parcels post the entire machinery has had to be created and that in the absence of data upon which an estimate of the requirements of the service could be reasonably founded. It is too early yet to arrive at any definite idea of the amount of business to be done or of the extent to which the facilities offered to the public will develop new business, so that the project may be said to be as yet in the experimental stage. In London, where the pressure of business is expected to be greatest, the whole work of parcel collection and distribution is to be divided among twelve central depots, most of which will be set up in the vicinity of the railway termini. These depots will be for the parcel system what the district stations are for the letter post, namely local centers to which all the parcels of their locality will be conveyed, where they will be sorted, and whence they will be sent to their destination. In order to avoid as far as possible the friction incidental to the initiation of the system, new hands have been practiced in the making up and sorting of parcels, and in fact in doing everything that will be required in actual service except the dispatching. In London parcels will be collected and delivered by means of wagons. It is expected there will be from three to five deliveries in the metropolis during the day, three in some parts of the city and five in others. Each post town in the United Kingdom is charged with the responsibility of elaborating a delivery and collection machinery for itself.

An abstract of reports made to the Controller of the Currency indicating the condition of the national banks in the United States at the close of business on June 22 shows that the number of such banks on the date mentioned was 2,417. The total resources of all the banks amounted to $2,364,833,122. Of this sum $1,280,450,298 was in loans and discounts, $354,002,900 in United States bonds to secure circulation and $17,116,000 in United States bonds to secure deposits. United States bonds on hand were valued at $16,978,150 and other stocks, bonds and mortgages amounted to $68,552,073. The real estate, furniture and fixtures were valued at $47,502,163 The amount of specie was $115,354,394, of which $44,863,816 was in gold coin, $32,791,590 in gold Treasury certificates, $27,369,000 in gold clearing-house certificates, $7,208,858 in silver coin and $3,121,130 in silver Treasury certificates. The legal tender notes amounted to $73,832,458. Under the head of liabilities are included the following items among others: Capital stock paid in to the amount of $500,298,312, a surplus fund amounting to $138,531,902, national bank notes issued to the amount of $317,431,450, and individual deposits amounting to $1,042,937,763. United States deposits amounted to $10,130,757 and deposits of United States disbursing officers to $3,743,326. The amount due to state banks and bankers was $84,744,666.

The number of national banks in the city of New York on the same date was forty-eight. The total resources of all the banks in the city amounted to $467,123,583.65, of which $243,950,868.28 was in loans and discounts, $18,867,500 in United States bonds to secure circulation, and $320,000 in United States bonds to secure deposits. United States bonds on hand were valued at $4,028,550, and other stocks, bonds and mortgages amounted to $13,102,841.95. The real estate, furniture and fixtures were valued at $10,616,764.23. The total amount of specie was $56,836,504.22, of which $6,541,803.88 was in gold coin, $26,477,760 in gold treasury certificates, $22,139,000 in gold clearing-house certificates, $457,310.34 in silver coin, and $1,220,630 in silver Treasury certificates. Legal tender notes amounted to $20,671,131. Among liabilities, the capital stock paid in amounted to $50,350,000, the surplus fund to $23,492,502.14, and other individual profits to $12,567,310.16. National bank notes issued amounted to $16,557,655. Individual deposits reached the sum of $226,429,204.98, United States deposits amounted to $417,526.12, and deposits of United States disbursing officers to $220,594.89. The amount due to state banks and bankers was $37,833,546.72, and the amount due to other national banks was $99,416,926.57.

SPECIAL CORRESPONDENCE.

AFFAIRS AT BERLIN.

Berlin, July 21.—Though of course political and economical life is not quite at rest at present, its pulsation is so weak that it seems more than half dead. Not only Parliament—the center of the political activity of the nation—is closed, but the emperor and his chancellor, the leading stars of political life, are now enjoying their well-earned repose and recreation in watering-places. Several ministers and their counsellors, too, have left the residence, not to mention the number of officials of all grades and vocations in the government of the empire who have also gone on leave of absence. The law courts, even, are restricting their proceedings to the most urgent cases.

As in politics, so commercial energy and activity is reduced to less than half its former extent. The stock and corn exchanges in the metropolis and the other important towns of Prussia and the rest of Germany are not the only places half deserted or carrying on a fictitious rather than a real existence, but in many districts manufactories and workshops are keeping, partly at least, holiday; traffic is considerably decreased, and the retail trade in particular is reduced to a minimum. Energy and life is shown only in one, it is true, of the most important branches of human industry, in farming. Millions of hands are at this moment employed in the fields in reaping and gathering the corn. Whether the harvest will be a good and productive one cannot yet be decided. The rye harvest this year began, as usual, early in July, but not under favorable circumstances. Not that the rye crop, by far the most important food of the German people, has failed; on the contrary, owing to the enormous heat throughout nearly the whole of June and beginning of July, the corn stood well in the ear, especially in rich or well-manured ground, so that a good yield was looked for. Expectation, however, has been lowered by violent thunderstorms cooling the temperature considerably, and continuous rains during the harvest. Reports differ, according to the locality and exactitude of the observations, about the degree of damage done by the storms scattering the loose grains from the ripe ears, and the deterioration caused to the corn by the incessant rain. There is no denying that damage and injury has been caused by this change of weather at such a critical moment, but competent judges nevertheless opine we may reckon on an average good harvest. It is, of course, yet more difficult to predict the effect of the change of weather on the corn still in the ear. Wheat will not be reaped until the end of this month; barley, oats, and the small amount of maize cultivated in Germany, of course, still later. Regarding these crops, however, a good average may be also counted on. Our corn exchanges seem to share this opinion, for from the rise during the rainy period they fell to prices which had been prevalent when a good harvest had been looked for. It is likely that, besides the better expectation of a good harvest in Germany since the coming in of warmer and more congenial weather, the favorable news from the rest of Europe and America have rendered the exchanges more steady. The certainty that the meadows which, in consequence of the dryness of June, yielded but a small quantity of hay, now promise a rich second crop, has tended to raise a hopeful disposition. Add to this another important item, that bulbous roots have prospered, owing to the long rain. Next to rye, the most important article of food for the poorer classes in Germany is the potato. When potatoes are good and cheap the workman, laborer, and even the tradesman, feels easy in his mind. The potato, too, is of importance for the farmer, whether small or great, as food for the cattle; not forgetting that the whole profit from the distilling of spirit, which is largely practised by the great farmers in the north of Germany, depends entirely upon the success of the potato crop, for they are far more used for distilling than rye. Thanks to the rain, the beets, too, as well as potatoes, have greatly increased in size and quality. Those who know how large an area of land, especially in north Germany, and latterly other parts of the country, is planted with this root, what a number of manufactories have been established during the last twenty years for the production of beet-root sugar for home consumption and extensive exportation, and what a high profit its fabrication yields, will be able to judge what gratification is caused by the prospect of a large and good crop of beets. This satisfaction is not confined to those only immediately interested, for, as by the increase of the production of spirit, which is subjected to a pretty high tax, government likewise has a considerable profit in the manufacture of beet-root sugar, for each hundred-weight of beet-root destined for sugar has to pay a tax of about 20c. The shady side of this favorable picture is given by the unanimous report of the poor yield expected from the oil-plant. Prices have on that account risen.

However vague these estimates, still subject to coming changes, may be, they offer a certain hold for judging of the capacity of the country for subsisting on its own products, and give a handle to speculation which, though not very active, is not quite asleep. A medium harvest of cereals is not sufficient for the support of the population of some forty millions of the German empire; an addition from Austro-Hungary, Russia and America is indispensable. The amount to be imported depends upon the definite result of the harvest, which can now only be roughly estimated. But the above-mentioned countries will be able to furnish this necessary supply, at what price is not yet determined, and it is, therefore, a comfort to know that there will be no lack of cereals. The question is, shall we be able to obtain the means required to pay for the products that must be introduced and the other necessaries, a great part of which is likewise to be imported from abroad? Will our diligence, our experience, our skill in all branches of trade and commerce find sufficient work, sufficient scope during the new year beginning with the close of the harvest? Who can answer these questions with full certainty? Unlike your country, we have to be careful whether it will please our neighbors to let us do our work undisturbed and let us enjoy its fruits. The East may move now and then, but without greatly influencing Europe, least of all Germany, which does not even feel any effects from the French expeditions to Madagascar and Tonquin. There is no prospect of impending war to hinder the natural course of industrial and commercial development of Germany. Political strife at home is undeniably bitter enough. The conflict between the absolutism of government, their bureaucratic desire of power in every branch of political life, and the constitutional demands and claims of self-government, is as strong as ever; nay, even stronger. No less is the excitement about the preference shown the nobility in most of the higher positions of life, above all in the army, and against the privileges granted to the great land-owners and large manufacturers. But, however much the opposing parties may dispute in newspapers, public meetings and the different parliaments, we need not fear any violent outbreak. Both of the two great opposing parties, the Absolutists and the Constitutionalists, as they are called for short, however they may contrast from each other, have sufficient self-knowledge to shrink from violent change. The Social Democrats might be more disposed to extreme measures. The feeling of weakness, however, against the power of government, which would be considerably increased by the almost unanimous support of the Constitutionalists in case of an open break with the common enemy, prevents the Social Democrats from active resistance—from taking energetic steps to carry out their projects. Therefore discord at home will not disturb either the development of industry or commerce. Overproduction, overspeculation, exaggerated and unsound enterprises which from time to time injure commerce and industry and have done great harm in Germany, seem to have disappeared now entirely.

The remembrance of the damage which has been experienced is still so fresh in everybody's memory as to make them afraid for a period of a repetition of such manipulations as were practiced from the year '71 to about '75, or of an attempt of such wild, hazardous proceedings. Even if some frivolous people should be thereto disposed, there is not the least opportunity for exorbitant speculation. There is every reason to expect a sound and solid course of trade and industry. The only dark point in the future, as well as at the present time, is the new financial and economic policy inaugurated by Prince Bismarck. Germany is no longer an especially agricultural country. The duties upon corn, cattle and meat, lard, butter and eggs, the most essential articles of food, are an anachronism, injuring the majority of the population, more particularly the lower classes, the laborers and workmen, and are only advantageous to the great land-owners. Germany has become an industrial country, which must make its products profitable by extensive exportation. But how is Germany successfully to compete with other industrial countries of Europe if the materials necessary for fabrication brought from abroad are heavily taxed? A part of our industry has to fight hard against these newly-created difficulties. The chancellor is not a man to give up a position once attained; industry, therefore, cannot expect soon to overcome all the impediments laid in its way. Commercial men must make up their minds to put up with the existing state of affairs and work with double ardor till the ruling powers, taught by experience, retrace their steps. Taking all in all, however, we may with confidence face the future as far as commercial interests are concerned.

In my next letter I will try and give more details, having taken a general view of matters to-day. In conclusion I will only add a communication with regard to the import of petroleum from Russia, which, I am sure, will interest you. The annual report of the Board of Trade of Breslau prognosticates that very soon Russia's petroleum will carry the day in the eastern part of Germany. The report says, referring to petroleum:

"Russia, purveying her own country entirely with the oil from the Caucasus, endeavors to get a firm footing in Germany, and not without a chance of success, because the quality offered by the refinery of Noble, in Baku, is by no means inferior to the oil exported from America to Germany, while it yields more light and is less inflammable, as proven by Abel's apparatus. The present price of this oil in Breslau, including the entrance duty, is already 8 per cent. of the value lower than American petroleum, and the difference in price will be still greater in favor of the Russian oil as soon as the Tiflis-Baku and the Ssamtreti-Batum line of railway, already finished, is opened, and the tariff question as well as the method of taxation has been settled. The latter must be specially arranged for the new article, because the Russian refineries do not forward the petroleum in barrels, but in vessels placed upon carriages built for the purpose as far as the frontier, where it is filled into barrels. Considering that the value of the raw product, according to the statement of the refiner in Baku, is 12 reichspfennige (3c.) per kilogramme, that the purchaser has not to pay the expensive barrels, and that he gets cheap freight, we may expect a further diminution of price and a speedy introduction of the article into Germany."

In Koenigsberg, the capital of East Prussia, they are likewise getting accustomed to the idea of drawing their supply of petroleum from Russia, who herself, till some few years ago, imported large quantities of American petroleum from the east German ports. The first transport has already arrived in Eydtkuhnen, the frontier station between Russia and Prussia. L.

BRAZILIAN COMMERCIAL AND FINANCIAL AFFAIRS.

Rio Janeiro, July 14.—In any consideration of Brazilian affairs it is essential that American readers should always bear these few facts in mind: 1. That Brazil is a country settled by a Latin people, characterized by Latin civilization, and governed by Latin jurisprudence and institutions, all of which are radically different from those existing in Anglo-Saxon countries. 2. That she is in most respects far behind the age, a circumstance which has an important influence upon her political and commercial policies. 3. That her political, financial, industrial and commercial affairs are so interdependent that no accurate opinion can be formed of any one without considering all of them. 4. That no accurate statistics exist as to the general production and trade of the country, and that the only way in which an approximately correct opinion can be formed is through the combination of the special records kept by private business houses. All these things are just so many obstacles in the compilation of a general commercial report, and often render it vague and unsatisfactory in many respects.

The present state of affairs in Brazil is critical to the last degree, and has been so for some time past. In a political sense, the country is badly and expensively governed, dissatisfaction exists everywhere, and even the Emperor is rapidly losing the confidence and respect of his people. Sweeping as the assertion may seem, there are probably not a dozen politicians in the country whose records are not tainted with jobbery and venality. Brazil is unquestionably one of the worst-governed countries in the world. All the weaknesses and vices of the mother country are hers, and a multitude of others growing out of the old colonial system and the heterogeneous mixture of races which followed the settlement of the Portuguese in America and the introduction of African slavery. Representative government here is an imitation rather than a reality, and the struggles between the two existing political parties is for the honors and spoils of office rather than for the supremacy of any policy or principle of government. To-day, however, a new issue is steadily forcing its way into Brazilian politics, and will at no distant day form a disturbing factor of vital importance to the country. Thus far there has been no abolition party, and no division between the old parties on that question. Since the beginning of the present year a new movement has set in which promises to change all this. In the northern provinces, especially in Ceará, the popular sentiment in favor of abolition has been worked up to such a pitch that the people are voluntarily emancipating their slaves. Ceará has already liberated some six thousand slaves, and may free all before the close of the year. As this movement is principally confined to the northern provinces, it is not improbable that the emancipation of slavery in Brazil will be transformed into a sectional issue at no distant day, and that it will lead to troubles which will have an important influence upon the future of the country.

In financial matters the present situation of Brazil is no less critical, and the danger is even more imminent. Her public indebtedness has been steadily increasing until it is now much greater than her income warrants, and her expenditures are largely and regularly in excess of her revenue. Owing to the vices of her government there has not been a single annual surplus since 1856–57, only two since 1846–47, and only four since 1836–37—a period of forty-six years. According to an abstract of the national budgets during the period between 1827 and 1879–80, inclusive—a little over half a century—the aggregate of these deficits amounts to about $350,000,000. The interest charged upon her funded debt is now nearly two-fifths of her total revenue. In view of the fact that the country is already burdened with taxation, that her industries are actually declining, that the masses of the people are excessively poor and apathetic, that an increase of revenue is at present impossible without verging upon the confiscation of private property, and that no steps whatever are being taken toward reform and economy—in view of all this, it will be seen that the financial outlook for Brazil is anything but hopeful.

These statements will, of course, excite surprise abroad, simply because of the high credit which Brazil enjoys in the London market. It is well known that the Brazilian government is scrupulously careful to meet the interest charges on its foreign debt promptly and fully, for which reason its funds are quoted high and excite no distrust. To do this, however, new loans have been floated, apolices (bonds) of internal indebtedness have been issued, taxation has been increased, and local creditors have been compelled to wait years for the payment of their accounts. And then, too, these loans and investments in London are nearly all in the hands of a small circle of capitalists, known as the "Brazilian ring," at whose head is the famous house of Rothschilds; and this ring is very careful not only to place their investments on the market to the best possible advantage, but also to rigidly suppress every item of information detrimental to Brazilian credit. To this end journals and journalists are subsidized (a deficiency credit is now actually under discussion in the Brazilian legislature in which two subsidized London journalists are specifically mentioned), flattering articles are published in the newspapers and reviews, and everything is made easy and comfortable for all the parties concerned. London is no place for a "doubting Thomas" on Brazilian affairs, as more than one writer can affirm. With its powerful ring of capitalists and its subsidies, and through its shrewd policy of paying its interest obligations promptly, it is not to be wondered at that Brazilian credit is so high, and that so many believe firmly in the prosperity and good standing of the country. The truth is, however, that the credit of Brazil is a mere bubble which any unexpected event, like a total crop failure or a slave insurrection, may dispel.

CINCINNATI'S INDUSTRIES.

Cincinnati, August 6.—Cincinnati as an industrial center is largely indebted to its geographical position. It is situated on the banks of the Ohio, within a few miles of the center of population of the country, in a region rich with wheat and corn, abounding in bituminous coal and iron, and within easy access of the products of the lumber districts of the northwest. Its natural position is fortified by a network of seventeen railroads, giving employment to over 18,000 persons and having an earning capacity of over $25,000,000 annually. Its watercourse is utilized by about 325 steamboats, with a tonnage in round figures of 85,000; it is connected with the great lakes by the Miami & Erie canal, the longest in the United States; is well provided with means for the speedy distribution of produce and merchandise, and is in a central position for the exchange of domestic commodities, while enjoying a limited but growing foreign trade.

This city, in the first internal revenue district, has, during the past ten years, furnished the national government with from ten to twelve million dollars of internal revenue annually, more than any other district in the United States, the money being derived mainly from the tax upon tobacco and distilled and rectified spirits. The annual sales of leaf tobacco, private and auction, at Cincinnati, vary in value from eight to ten million dollars annually. During the year ending January 1, 1883, the total warehouse sales aggregated 49,636 hogsheads. Cincinnati manufactures from two to three and one-half million pounds of fine-cut and smoking tobacco, from one-half to one and one-half million pounds of plug tobacco, over 100,000,000 cigars, subject to a tax of about $700,000, about 20,000 pounds snuff and from one-half to six million cigarettes annually. No other city manufactures such quantities of spirituous and malt liquors. There are produced here annually from nine to eleven million gallons of distilled spirits, from ten to eleven million gallons of rectified liquors and from twenty to twenty-three million gallons of beer. It may be well to state that during the past year or so the manufacture of these goods has been adversely affected by the agitation of the subject of state taxation, by fanatical crusades and political squabbles; and while these interests were contending with the evil of overproduction, for which Congress refused to grant relief (by authorizing the extension of the bonded period for whisky), the Peoria, Ill., internal revenue district took the lead in the amount of revenue collected. But now that overproduction has been mitigated, the taxation question eliminated by the passage of judicious laws regulating the traffic, and that there is less altercation provoked by fanatics, the prospect is encouraging for Cincinnati to resume its position as first among the internal revenue districts. There are 11 distilleries, 28 malt-houses and 60 rectifying establishments situated in Cincinnati.

The provisions interest is a prominent and important industry here. Cincinnati is surpassed by but two cities in the number of hogs slaughtered and packed during the winter season, and even the summer business is of fair proportions. While Chicago and Kansas City pack a larger quantity of pork than Cincinnati the superiority of the meats packed, cured and smoked at Cincinnati is recognized by many consumers, and at the same price Cincinnati meats usually receive the preference in the eastern and southern markets, making due allowance for the difference in freight. Increased railroad facilities have brought Cincinnati nearer the south, and the distribution made upon orders by the 173 establishments, which employ 1,900 persons and occupy real estate estimated at $2,750,000, has been considerably increased since the building of Cincinnati's Southern Railroad, which, since leased, is known as the Cincinnati, New Orleans & Texas Pacific Railway. The cash capital invested in the pork-packing industry is upwards of four million dollars, and the value of the production varies from twelve to fourteen million dollars.

As a milling center Cincinnati is conspicuous, manufacturing over half a million barrels of flour annually, to which may be added over three-quarters of a million barrels received each year for consumption and distribution.

The rich pasturage of the surrounding country fosters the raising of large numbers of sheep and cattle, and the facilities which Cincinnati possesses for handling, protecting and shipping draw large numbers of live stock to this market. The annual transactions in this branch of business range from $20,000,000 to $25,000,000.

There are here 5,520 manufacturing establishments, occupying real estate valued in round numbers at $44,000,000. These furnish employment to over 100,000 persons. The cash capital invested is approximately $78,000,000, and the value of the goods produced about $195,000,000.

Considering the manufacture of boots and shoes from an industrial standpoint, Cincinnati is second to no western city, and surpassed by but few eastern cities in the magnitude of this industry. The excellence of the material used, the special attention given to the cut and make, form distinctive characteristics which insure a ready acceptance of this class of goods. Their peculiar adaptability to western wear results in a steady consumptive demand from the adjacent territory.

In few of the industries of the city has such rapid progress been made as in that of the manufacture of furniture, yet during the past few years there has been a diminution in the amount of capital invested in this manufacture. Black walnut, long the prevailing hardwood used, is gradually being superseded by cherry, mahogany and ash, especially the first two. About 4,000 hands are employed by 130 establishments in this branch. The success attending the manufacture of carriages and wagons during the past three or four years has resulted in the doubling of the capital invested in those enterprises.

In addition to the large consumption of pig iron by the local mills and foundries, Cincinnati is an important distributive point for the product of the southern furnaces. The local mills are well employed supplying manufactured iron to local industries. The product of these dependent branches will probably reach $7,000,000 annually. The number of hands employed in the manufacture of iron and in the iron industries here is about 13,000, and the value of the product varies from twenty to twenty-five million dollars annually. For manufacturing and other purposes Cincinnati consumes about a million bushels of coal weekly.

There are thirty-four establishments engaged in the manufacture of candles, soap and oils, employing 1,500 persons, and having an annual product of nearly one million dollars.

The manufacture of burial cases and coffins includes nine establishments, with a cash capital of $900,000, employing 917 hands and producing articles valued at $1,800,000 per year.

There are thirteen factories utilized in making white lead andpaint, and nine in the manufacture of drugs and chemicals. Cincinnati manufactures more of the chemical article glycerine than any other city in the world.

Large quantities of leather are made and consumed in Cincinnati. There are forty tanneries which furnish sole and harness leather. The cash capital invested in this industry is $1,850,000, and employment is furnished to 910 persons. The value of the products reaches about $4,500,000.

A discrimination has doubtless been made against Cincinnati, in the matter of shipping cotton north, in favor of interior points. It is cheaper to ship direct from such points to Liverpool and the continent, as well as to many Canadian and American mills. The through movement of cotton at Cincinnati is large. There are five cotton mills here, with a capital of $395,000, occupying real estate valued at $350,000, employing 450 hands, and producing cotton goods annually varying in value from $700,000 to $800,000.

This is the center of a valuable wool-growing district. Large quantities of washed and unwashed fleeces are bought directly by local dealers in Ohio, Indiana, Kentucky, and some in Illinois, while liberal consignments are received on commission from the same region. A large number of western mills are supplied from the stocks accumulated here, while heavy purchases are made by eastern manufacturers. There are three woolen mills in Cincinnati, employing about 225 persons, and producing goods varying in value from $300,000 to $400,000 annually.

During the year ending January 1, 1883, the direct importations of foreign merchandise entered at the port of Cincinnati for immediate consumption were valued at $1,644,353, subject to a duty of $700,101.89, while the withdrawals from bonded warehouses for consumption during the same time amounted to $231,294, subject to a duty of $111,468.65. The total leading articles received at Cincinnati for the year ending January 1, 1883, aggregated $295,605,258, while the shipments during the same time amounted to $294,719,798.

The value of real and personal property in 1882, according to the tax duplicate, was $166,986,105. The rate of tax levy was $2.38 on $100.

POINTS OF INTEREST FROM THE PACIFIC COAST.

San Francisco, August 1.—Last month's trade was strictly conservative, with credits well sustained. Speculation was almost unknown, except in the grain trade or in special commodities, such as opium, for which the tariff was a straight pointer. The spirit of gambling is being developed among produce men, and we may anticipate steady progress in that direction, with occasional breaks, but up to the present matters have gone along pretty smoothly.

The attention of grain-growers is being directed to the steady falling off in the productiveness of the soil. In counties where more than 40 bushels of wheat to the acre were raised twenty years ago 12 to 13 bushels are now a heavy crop. Continuous cropping, without fertilizing or change, is the cause. Land, however rich, becomes exhausted by an unbroken succession of wheat crops over a long series of years. The facility with which the gang plow may be used in our valleys and the cultivation of vast tracts by large land-owners has greatly tended to the deterioration of the soil of California; yet the land monopolists, who have skimmed the surface and bled the land for years, want a hundredfold more for the exhausted soil than it cost in its virgin state. As a rule, these men have done nothing toward the permanent improvement and settlement of the state, which, under more favorable conditions as to the purchase and ownership of land, would now have a producing population of at least 2,000,000 instead of 1,000,000 at the very utmost. The Mexican grants, garnished by frauds innumerable and held as a bar to actual settlement, have been the curse of California, as they will in time prove to be in the case of Arizona and New Mexico.

Population is drifting steadily into the state, and the Central Pacific Railroad Company, by regrading its land and reducing the price in some instances, is endeavoring to meet the growing demand for farm sections. Its agents throughout the Union and in the United Kingdom and Europe are working to promote immigration; but big land-owners, who acquired their estate for "an old song," some of them by means far from legitimate, are doing nothing to that end. They hold on to their acres for higher prices, and while perfectly willing to pocket the "unearned increment," are remarkably loth to put their hands in their pockets to aid the Immigration Association of California to settle up the wild lands. Manipulating the assessment roll and evading taxes engross most of their attention. In many counties, before the new constitution went into operation, the assessors were owned, "body, bones and breeches," by the land-sharks, who were assessed at nominal rates, the small working farmers being excessively taxed. But the provisions of the new constitution afford some relief to the latter class, although not all the relief they should enjoy. Section 3, article xiii., of the constitution provides: "Land, and the improvements thereon, shall be separately assessed. Cultivated and uncultivated land, of the same quality and similarly situated, shall be assessed at the same value." It is exceedingly difficult to get around this section, but the men of many unimproved acres do manage it to some extent. And they declare that it is "rank communism" to tax their unimproved land at the same rate as cultivated land of the same quality similarly situated. They are the victims, in this sense, of "unjust discrimination," and society will probably rock to its foundations unless they get prompt relief.

The outlook for gold mining never promised better than it does in California. Important discoveries of the precious metal have recently been made at points very far asunder. The output from the hydraulic mines will not be as large as in former years, however, owing to the conflict between the farmers in the valleys and the mine-owners. If the latter resorted to drift mining there would be no objection to their continued operations, but to wash millions of cubic yards of soil and gravel into the mountain streams to be spread over the rich valley lands during freshets, destroying their productiveness, on the chance of obtaining a few ounces of gold, is what the agriculturists object to. There can be little doubt that the output of gold in this state might be greatly increased by adopting improved methods of saving it.

The development of the iron industry in Washington Territory will receive an impetus on the completion of the Cascade branch of the Northern Pacific Railroad. A party of twenty-five men, fully equipped, has started for Snoqualmie Pass to open up an iron mine, or rather "mountain," there. The ore will be shipped by the Cascade Railroad to Seattle, where smelting works are to be erected.

The new steamship Mariposa, built for the Oceanic Steamship Company of this city, of which Claus Spreckles & Sons are the heaviest owners, sailed for Honolulu on July 25, with $84,000 of merchandise, chiefly coast products. The second steamship built by the same firm for the Hawaiian trade is now on her voyage from the Delaware, and a third is to follow. These vessels would not have been built if it had not been for the Hawaiian treaty. When, therefore, a balance is struck showing the operations of the treaty, let the advantage it has conferred upon iron ship-builders and the iron trade of Pennsylvania not be forgotten. A small steam vessel of 150 tons, built at Puget Sound for the inter-island trade of Hawaii, is en route for this port. And here, let it be incidentally mentioned also, that an 800-ton steamer is being built on the Delaware for the Hawaiian and Tahiti trade from this port. A second steamship will be placed upon that line. Wooden ship-building is not prosperous just now; it will probably revive.

Hawaiian exports for the first half of 1883 amounted to $5,476,577, against $5,604,588 in the corresponding period of last year. This shows a decrease of $128,011, which is accounted for in the single item of sugar, the falling off on that head being 1,897,184 pounds. There was an increase in all other heads of export, notably rice, which exceeded the shipments of 1882 to June 30 by 155,800 pounds. Wool export increased by 92,729 pounds.

Our exports to China, including Hong Kong, for the first half of 1883, gave a total of $2,342,433, being $70,490 less than for the same period of 1882. There was an increase of 30,694 barrels flour and a decrease of 401 flasks quicksilver. The export of treasure to Hong Kong in the first six months of 1883 was $4,801,789, of which $2,700,487 was refined silver, $1,945,415 Mexican dollars, and $155,877 gold coin and dust. This is the largest half-yearly shipment since 1878. During the period under review we imported $5,889,660 merchandise and $190,576 treasure, showing an increase of $2,400,566 over the corresponding months of 1882. Deducting the value of merchandise exports from imports there was a balance against us in the China trade of $3,547,277 for the half year ended June 30, 1883. The treasure shipments from San Francisco during July aggregated $411,151, of which $41,100 went by rail to New York. Of this $29,600 was gold coin, the balance being silver bars and coin and $500 currency.

The merchandise exports to Australia and New Zealand are on the increase. Heavy shipments of canned salmon, barley, hops and drugs went by mail steamer; also merino sheep worth $37,200. A bark with a full cargo of lumber and merchandise sailed from San Francisco for Sydney last week and from ten to a dozen vessels are loading timber at Puget Sound for the Australasian colonies. The following exhibit for July will illustrate the set of our export trade by sea:

Great Britain	$776,430	New Zealand	$18,867
New York	437,985	Panama	14,144
Hawaiian Islands	223,280	South America	5,081
Australia	201,566	Society Islands	4,515
China	193,144	East Indies	4,066
British Columbia	140,683	Marquesas Islands	2,680
Mexico	89,462	Fiji Islands	395
Central America	76,907	France	155
Belgium	47,200	Germany	82
Japan	20,128		

These figures are very instructive, more especially as showing the dependence of this country upon the Anglo-Saxon race for a market for its surplus products. If the Puget Sound exports were included, the Australian trade would come close up to that with New York. Spanish America cuts a poor figure, and France and Germany make a beggarly showing.

The eight savings and loan banks of San Francisco showed, on July 1, total assets of $53,400,718, which was balanced by liabilities. The paid-up capital, $1,649,880; reserve fund, $1.720,064; due depositors, $49,737,967; other liabilities, $293,307. The assets are: Bank premises, $507,705; real estate foreclosures, $4,283,817; invested in stocks and bonds, $17,149,550; real estate loans, $25,857,199; loans on stocks and bonds, $4,005,591; loans on other securities, $10,200; cash, $1,021,503; money in other banks, $229,440; other assets, $335,712. The Bank Commissioners report this exhibit as satisfactory. It is so, doubtless, while there is a plethora of money, but if there was a necessity to realize, what then?

LETTERS TO THE EDITOR.

TIN-PLATES AND THE TARIFF.

To the Editor of BRADSTREET'S.

SIR—The "American Tinned Plate Association" is indebted to you for the "Tin-Plate" article of your issue of July 28. We regret to find it necessary, however, to request publication of these advices to correct the statement that "the Tin-Plate Association has shown in detail a *protection* of nearly $11,000,000 on 240,000 tons imported during 1882." A more careful consideration of this subject will convince you that it is not true, and that you and others were deceived by what appear to us now to have been the malicious and intentional misstatements and absurd ignorance of the New York *Herald*.

While it is manifestly true that the freights, insurances, interest, British agents' commissions and importers' and jobbers' expenses and profits are, as we stated, "necessarily added to the cost of British products to American consumers," it is not true that these items constitute a "protection" to American manufacturers, as stated, for the following reasons:

1st. The freights from American iron manufacturing centers to Boston, New York, Philadelphia, New Orleans, San Francisco and other trade centers will average much higher than from Liverpool.

2d. American manufacturers must and do also employ sales agents, whose commissions offset the charges of agents for British makers.

3d. American manufacturers must, of course, be enabled to sell their products to those who now import or to other merchants who compete with them, which fact forbids calculating importers' "profits" as "protection," and, of course, their "expenses" on material handled are the same whether made in the United States or Great Britain.

These facts wipe out $6,000,000 as "protection," but do not disturb the fact we stated, that the American consumer must pay such profits and expenses when buying foreign goods.

The fact that not a pound of these readily made products of steel and iron chiefly is made in the United States would seem to be proof enough that no such protection exists. Is it reasonable to suppose that, "if nearly 69 per cent. protection" really existed, and with "tin" and "lead" practically as cheap as in Europe, American ironmasters would have permitted their foreign competitors to supply the whole American demand?

The average price of British "tin and terne plates" at Liverpool during the past ten years has been about 5c. per pound. The present lower prices represent overproduction and bankruptcies in Great Britain (with their highly recommended but suicidal policy of "free trade and a foreign market"), and the poverty and degradation of the laborers engaged in the business. We ask 2½c. per pound duty, as equivalent to 50 per cent. ad valorem, on the average Liverpool cost as stated, corresponding to the protection accorded for the successful development of other forms of iron and steel making in the United States, and essentially necessary to justify investments of capital and enable the payment to American workingmen of the higher wages needful and desirable in the United States.

We inclose herewith a statement of the "necessity and purposes" of the association, and shall confidently expect your assistance in the effort to overthrow a foreign monopoly hurtful to the American people and directly the result of governmental discrimination and injustice.

Most respectfully, E. P. WILLIAMS,
Vice-Pres. The American Tinned Plate Ass'n.
New York, August 7.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

Where, on a sale for cash, the property being delivered, the vendee failed to pay on demand, and the vendor thereupon took out an attachment against his property for the price of the article so sold, the Supreme Court of New Jersey recently held (Heller vs. Elliott) that the acts of the vendor amounted to an affirmance of the sale and a waiver of the condition of payment before the vesting of the title.

The Supreme Court of Alabama recently held, in the case of The Alabama Great Southern Railway Company vs. Little, that a common carrier may by contract stipulate for immunity from liability as an insurer, but not for negligence, and that the burden is on him to show absence of negligence. Such a limitation of liability, the court held, may extend not only to the risks or accidents for which the carrier will be answerable, but to the amount of damages for which he is to be liable in the event of loss or injury when the purpose appears to be to secure a reasonable and just proportion between the amount for which he is to be liable and the freight which he is to receive.

A recent decision by Judge Cooley has a singular appropriateness to the season. In the case of the People vs. Weithoff, decided by the Michigan Supreme Court on the 2d ult., the judge held that a room where pools were sold on the result of base-ball games and horse-races was a "gaming-room" within the meaning of an act rendering the keeping of such a room a criminal offense. The fact that the games upon which the wagers were laid did not take place in the room, but at a distance, was held to be immaterial, it not being necessary that persons should be present at the place of game or contest in order to participate in the evils of gaming.

In an action against a railroad company plaintiffs' complaint alleged the delivery to the company for transportation of a certain number of barrels of commercial fertilizers, and that through the negligence of the company a portion of the property intrusted to it was never delivered, but was lost or destroyed. The defendants moved for an order requiring the complaint to be made more definite and certain by stating on what day or days the property alleged to have been lost was delivered to the defendant. This motion was denied by the circuit judge who tried the case, Dunbar et al. vs. The Port Royal & Augusta Railway Company, and this decision was upheld on appeal by the Supreme Court of South Carolina, which held that it was not material for the plaintiffs to state on what particular day or days the property in question was received by the defendants, for the reason that it was not practicable for them to do so. After the articles were delivered to the defendants they had the entire control of them, and were responsible for their safe delivery.

The case of Russell vs. Berkstresser, decided recently by the Supreme Court of Missouri, was an action on three promissory notes executed by defendant to plaintiff, being the purchase money of a tract of land which plaintiff sold to defendant, who at the same time executed a mortgage to secure their payment. Under a power of sale contained in the mortgage the plaintiff, after the note became due, advertised and sold the property, and had it bought in for his benefit. It was afterward agreed between the parties that if defendant would surrender the possession of the property to plaintiff he would cancel the notes and release defendant from any further liability. The defendant, in pursuance of this agreement, permitted plaintiff to take possession of the land, and waived his right to reclaim from the sale under the mortgage. The defendant had judgment in the court below. The Supreme Court, on appeal, affirmed this judgment, holding that when a parol agreement was executed courts would not inquire into the consideration nor disturb the condition in which parties had voluntarily placed themselves, and that where the property was surrendered under an agreement canceling the prior contract the same was at an end, and the formality of a written release was not necessary. The court further said that the effect of an executed agreement is the same whether the contract be sealed or otherwise.

The case of Bryant et al. vs. Palmer et al., decided recently by the English Court of Appeal, presented some points of interest in trade-mark law. The case arose upon the objection of the appellants to the registration of the words "Braided Fixed Stars" as the trade-mark of the defendants for cigar lights of a particular make. The chief ground of the application was that the term "fixed stars" was an old term in the trade to denote cigar lights in which the head was fixed to the stem by a wire or some similar method, and that "braided" was merely a descriptive word, indicating the manner in which the head was attached to the stem. The application was refused by Mr. Justice Chitty, who thought that the term "fixed stars" had not become a common term in the trade. The decision of the Court of Appeal reversing the decision of Mr. Justice Chitty was pronounced by Lord Justice Baggallay. He said that, in his opinion, the words "braided fixed stars" were not special and distinctive words used as a trade-mark before the passage of the Trade-Marks Registration act of 1875. The term "fixed stars" meant cigar lights, and the term "braided" described the method of preparation. Since cigar lights of which the heads would not drop off had been known as fixed stars, different modes were adopted to prevent the heads dropping off, and wire, porcelain and glass stems had been used, but all were called fixed stars. A patent had been obtained for the invention of braiding cigar lights so as to prevent the heads from dropping off. The respondent had acquired that patent, and while it lasted no one else could make braided fixed stars; but if after the expiration of the patent that description could become a trade-

mark the patentee would in effect obtain a patent forever, and that would be contrary to the intention of the legislature. The court, therefore, ordered the removal of the trade-mark from the register.

BUSINESS NOTES.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* (London) for the week ending July 21, was 207, against 226 and 217 respectively in the corresponding weeks in 1882 and 1881. England and Wales had 189 in the week ending July 21 last, against 207 and 201 in each of the like weeks in the preceding years. Scotland had 14 against 19 and 14, and Ireland had 4 against none in the third week of July, 1882, and 2 in that week 1881.

The completing rail on the line of the Northern Pacific Railway will be spiked in position on September 8, according to existing arrangements, about fifty miles west of Helena, the capital of Montana. Plans have been made for a large and distinguished party of excursionists to be present. From abroad several members of the British Parliament and of the German Reichstag are expected. On August 29 excursion trains will be run from leading eastern cities to convey the guests to the far northwest. It is reported that Hon. Wm. M. Evarts will deliver an oration on the occasion.

The *Artist* (Boston) gives considerable space to the art collection to be shown at the Foreign Exhibition to be held at the Mechanics' Fair building in the New England metropolis, which will open September 3. This date is the centennial anniversary of the signing of the treaty of Paris. It is expected that the exhibit will be continued until February 22, 1884. Between 200 and 300 pictures have already been received and many more are on their way. The *Official Gazette* of the Boston Foreign Exhibition has likewise come to hand. It is an elegantly prepared work, being printed in a style and on paper to rival leading art publications of the country.

The managers of the New Orleans World's Industrial and Cotton Centennial Exposition have finally prevailed on Major E. A. Burke, of the *Times-Democrat* of that city, to accept the position of director-general of the great fair which is to draw exhibits and visitors from all quarters of the globe. Mr. Burke has shown himself to be a very capable and energetic business man, and will undoubtedly prove to be the right man in the right place at the head of this enterprise. In accepting the appointment he subscribed the amount of the salary, about $15,000, to the stock of the exposition and donated the stock to the Agricultural and Mechanical College of Louisiana.

The Philadelphia *Industrial Review* has shown some enterprise by promptly preparing and issuing a "Souvenir of the Southern Exposition and of the City of Louisville." The exposition and the city where it is being held receive full treatment at the hands of D. E. Sullivan, managing editor of the Louisville *Courier-Journal*. Mr. Charles R. Miller, editor of the New York *Times*, treats of "The Mississippi River," the growth of its commerce and possibilities for extending the same, and Henry W. Grady, of the Atlanta *Constitution*, discusses "Cotton Manufacturing at the South." Other able articles on the industrial and agricultural development of the south also receive attention.

The statement is current that some 75,000 commercial travelers in the United States, most of whom are members of some commercial travelers' association, have resolved to declare war against the licenses which they are required to pay in order to solicit trade in certain states, counties or towns. A bill looking to the relief desired was introduced at the last meeting of Congress, but, like most other efforts at business legislation at that session other than those concerning the tariff, it was buried. The agitation in Congress will be revived next December, and reinforcements for relief from the tax specified have already been secured. One of the objects of the commercial travelers' convention held at Cleveland, recently, was to form a national association to deal with this question. The New Orleans *Times-Democrat* states that the only southern states which do not tax commercial travelers are Kentucky, Mississippi and Missouri.

It is noted in London *Iron* that three-fourths of the pig iron produced comes from England, America and Germany. The countries which contribute the remaining fourth are France, Belgium, Austria, Russia, Sweden, Spain, Turkey, Italy, Australia, Japan, Switzerland, Canada, and Mexico. A few other countries produce a very small quantity. In 1882 the production of pig iron in England rose to 8,493,287 tons, in America to 4,623,323 tons, and in Germany, including Luxemburg, to 3,170,000 tons. The production last year of these three countries was 16,286,610 tons, and that of the whole world 21,000,000 tons. Great Britain contributed about 40 per cent., the United States about 22 per cent., and Germany about 15 per cent. The American product equaled 54 per cent. of the German and 37 per cent. of the English. In 1877 the quantity of pig made in the three countries was 10,490,858 tons. This shows an increased production in England, the United States and Germany of 1,000,000 tons per annum since 1877.

The British labor market for the week ended July 25, as reported by the London *Labour News*, was somewhat unsettled in several districts, owing to industrial disputes. In fact, the epidemic of great and small struggles between employer and employé, which has characterized the industrial situation in the United States for the past year, has been reflected by like disturbances, but of less virulence in both the United Kingdom and France. The Staffordshire colliers, on the date named, had not concluded their strike, but the ironworkers' stoppage had been overcome, and the men had gone to work at the old rate after a revision of the sliding scale of wages. Ship-building and engineering maintained their previously noted activity, and building operations and street railway construction was very active. Manufactured iron goods were in fair demand only. The cotton and woolen industries were quiet, although in a few districts machinery was running regularly. The boot and shoe trade was suffering from overproduction. In country districts industries of all kinds were active. Emigration was on the increase.

A recent report made by the State Superintendent of Canals at Albany, covering the business of Erie canal during three months of the season, as compared with a like portion of last season, is regarded as strong evidence in favor of the wisdom of making that waterway free. The increased tonnage during the period noted, in 1883, as against 1882, is given at 202,164 tons, largely due to excess shipments of wheat, rye, corn, oats and other western produce on which toll was charged last year. The following is a report of three months' tonnage on the canal for the years named:

	1882.	1883.
May 14	147,104	224,772
May 22	195,275	2.5,492
May 31	220,817	198,902
June 7	154,402	188,842
June 14	165,098	199,453
June 22	189,914	171,237
June 30	194,018	246,085
July 7	143,615	171,112
July 14	147,787	162,737
July 22	191,750	175,356
July 31	217,550	223,425
Totals	1,967,289	2,169,473

The canals opened three weeks later this year than last. Navigation will continue nearly four months yet. It is expected that the season will show a gain of half a million tons over the tonnage of 1882.

The total value of importations of silk goods at New York during July, as reported by the Silk Association of America, was $4,112,209, against $3,281,498 in July, 1882; $2,691,088 in July, 1881, and $3,181,358 and $2,232,824 respectively in July, 1880 and 1879. This shows a gain of $830,711 on the value of imports in July last, as against those of July, 1882. The increases may be observed in the following comparison of those two months:

	July, 1883.	July, 1882.
Silk, piece goods	$1,991,151	$1,598,854
Satins	14,030	8,320
Crapes	84,481	57,628
Pongees	197	...
Plushes	214,977	143,021
Velvets	461,139	243,302
Ribbons	320,855	222,603
Laces	214,526	391,021
Shawls	2,312	365
Gloves	32,011	9,433
Cravats	4,298	16,750
Handkerchiefs	4,817	8,091
Hose	40,866	16,452
Threads and yarns	19,788	2,029
Braids and bindings	189,918	91,093
Silk and worsted	17,332	15,271
Silk and cotton	498,854	450,402
Totals	$4,112,209	$3,281,498

The total value of the imports of July last entered for consumption was but $2,837,739, and of those warehoused, $1,274,470. The value of those withdrawn from warehouse was $2,419,057, and the total value of the silk goods placed on the market was $5,256,796.

The following national bank has been organized: The First National Bank of Independence, Kan.; capital $50,000; W. S. Brown president; William E. Otis cashier. The following changes have been made in the officers of national banks since last advices: The Aurora National Bank, Aurora, Ind.; no president in place of Francis Wymond, deceased; Will F. Stevens vice-president; J. C. Wymond assistant cashier. The Suffolk National Bank of Boston, Mass.; David R. Whitney president, in place of A. L. Edmonds. The Conway National Bank, Conway, Mass.; Carlos Batchelder president, in place of E. D. Hamilton. The First National Bank of Crete, Neb.; Samuel Waugh cashier, in place of John P. Clarey. The Merchants' National Bank of Des Moines, Iowa; Thomas Mitchell president, in place of H. J. Ransom; C. H. Ward vice-president; H. J. Ransom cashier, in place of Rufus L. Chase. The First National Bank of Huntingdon, Pa.; William Dorris president, in place of Thomas Fisher; D. P. Gwin vice-president. The Third National Bank of Nashville, Tenn.; Frank Porterfield assistant cashier. The Citizens' National Bank of Peru, Ind.; C. H. Brownell president, in place of D. C. Darrow. The Fallkill National Bank of Poughkeepsie, N. Y.; Henry D. Myers vice-president, in place of G. H. Tompkins. The First National Bank of Storm Lake, Iowa; J. Sampson president, in place of James Harker. The Wickford National Bank, Wickford, R. I.; Thaddeus W. Hunt cashier, in place of N. N. Spink.

The national convention of delegates of the Amalgamated Association of Iron and Steel Workers was opened in Philadelphia on the 7th inst. It is expected to continue through next week. The president, Mr. John Jarrett, well known through the recent industrial disturbances in the iron trade, formally opened the convention. In his address he spoke of the gathering as one of representatives of the hard-handed laboring class, that should satisfy the whole country that they were gathered together, not for purposes of display or effect, but to secure justice and to maintain the freedom and independence of true workers. The regular sessions were held with closed doors. Resolutions were adopted extending "sincere wishes for victory" to the striking telegraph operators, the reading of which called for enthusiastic applause. On Wednesday a number of resolutions from subordinate lodges bearing vitally upon trade matters were read. Their discussion and action upon them will take up much time. One resolution, which will probably excite prolonged debate, provides that only 3 per cent. of apprentices to the trade, computed on the forces employed, shall be allowed in any factory, and these must be members of the Amalgamated Association in good standing, and at least 21 years of age. They are to be appointed by a committee of nailers. An exception is made in favor of nailers' sons. Another resolution advocates the election of national lodge officers for four years, and the adoption of a scale of prices for labor for a similar period. Another requires that the mills shall be idle during July and August of each year, in order to prevent the overstocking of markets and consequent reduction of wages.

On the ultimate action of the association respecting these points differences with employers are not improbable. But farther than the suggestions contained in the above the delegates propose to go into trade matters and arrange hours and work. The suggestions are: That the prices at mills running three hours be 10 per cent. above the regular scale; in case metal requires more work than one and one-half hours in a puddling furnace, the committee of the mill shall shut the mill down within 12 hours after informing the boss thereof, if the mixture is not changed. When the scale is presented in June, 1884, that it be for a term of four years instead of one. Anything in the constitution and by-laws having reference to the payment of benefits to be stricken out, and sub-lodges to be permitted to take care of their own members on any strike; that when the nailers' scale is presented next year, it be signed from June 1, 1884, until March 1, instead of on June 1 each year.

In an article concerning some of the industries of the Pacific coast the San Francisco *Chronicle* laments the decadence of the ship-building interests which have flourished at that city, and points out that the vessels recently built at Chester, Pa., and elsewhere in the east, for the San Francisco and Portland trade should be constructed on the Pacific coast. Happily for the San Francisco mechanics work has been re-begun on some of the old naval hulks which have been dozing on the mud banks of Mare's Island, and nearly one hundred shipwrights have found work there. The iron industry has made some notable strides in California of late years. The number of machine shops and foundries has grown surprisingly, and capital is still seeking investment in this direction. Heretofore one trouble has been to obtain raw materials cheap, but the recent discovery of coal and iron ore deposits in the slope is meeting the difficulty. California is peculiarly well situated for supplying, as the *Chronicle* puts it, "one-half the world" with the products of its foundries, forges, and shops. The prosperity of the industry at present is reflected in the following rate of daily wages paid San Franciscan ironworkers: "Molders can make from $3 to $4, blacksmiths from $3.50 to $4.50, machine hands from $4 to $4.50, and helpers from $2 to $2.50. Not less than 5,000 men are employed in the various establishments. The present condition of the "wage-earning class" in San Francisco is said to be very satisfactory to themselves, for there is plenty of work and wages have advanced since last year, while the cost of living has not increased. While wages may be regarded as "a little inflated," there is a scarcity of labor in certain lines. The *Chronicle* pertinently adds its ideas on the above in connection with the restriction of Chinese immigration: "The loss of Chinese cheap labor occasioned by the stoppage of the immigration does not seem to be felt, except, perhaps, in certain manufacturing branches. So far no one seems to have seriously missed the coolie."

BANKING IN AUSTRALIA.

The *Pall Mall Gazette* (London) has the following:

"A book on banking in Australia is published by Messrs. Blades, East & Blades. It summarizes the statistics and traces the growth of banking in the Australian colonies in a very useful manner. The author, who is evidently acquainted with the interior of the working of at least one of the banks concerned, speaks very well of those which have survived and prospered, as most of them have. The original idea of Australian banks was to employ the capital which seemed overabundant in England in Australia, where it was deficient. On the whole, it has been a practical success, but at first there were great risks; and even now the state of banking, and indeed of other business in Australia, varies widely every few years. The author avers that, as a rule, losses have been faced and not hidden, and that the banks are now reaping the fruits of a long course of judicious management. He even states that the losses they have incurred are quite small when compared with the losses sustained by banks in London, the provinces or Scotland, and finally he states that the history of the eastern banks cannot stand comparison with the Australian, as only a few of the eastern banks now survive out of sixteen or seventeen established. It will not be forgotten that Australia and Australian banks have respectively produced and dealt in an appreciated article—gold—and have been lucky in so doing. That they have avoided ruinous lock-ups in wool, land, etc., is due to caution and skill."

THE WHEAT CROP IN ENGLAND.

The London *Economist*, July 28, says:

"Though we are close to the commencement of the harvest, at least in the half of England south of the Trent, the proverbial uncertainty of the weather prevents the formation of any confident prediction as to its absolute outcome, especially as regards the wheat crop. People think of the old days when the British harvest really fed the British people. Now we have to go farther afield. A good wheat harvest is still as much needed as ever to feed our closely-packed population. But it is the harvest already turning brown in the scorching sun of Canada and the western states, the wheat already ripe in India and California—not the growth alone of the eastern counties and of Lincolnshire—that will be summoned to feed the hungry mouths of London and Lancashire. The population which has to be fed has increased. The extent of the surface of the British islands employed for the growth of wheat has decreased. Within fourteen years the wheat harvest of the United Kingdom has shrunk fully a fourth. The following figures give the acreage under wheat in the United Kingdom during the last six years:

	Acres.		Acres.
1882	3,163,000	1879	3,050,000
1881	2,976,000	1878	3,381,000
1880	3,065,000	1877	3,321,000

In 1869 the corresponding acreage was 3,982,000 acres. The largest estimate of the acreage this year places it fully 10 per cent. below that of last year, while some think it as much as 15 per cent. The yield last year was estimated as fully 10,000,000 quarters. It will be safe to suppose that the crop this year will be 10 per cent. less. We seem likely to require as large imports this year as last, the only counteracting point being that an unusually large supply is believed to be held in store at the present time."

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

It is quite unnecessary to say that the stock market is depressed, and Wall street generally in a fit of the blues, because all the papers are filled with it and with discussion of the causes. They have been discussed in these columns more than once, and there is nothing to add now. The market during the past week has been declining by spells, the intervals being periods of extreme dullness; but there has, taking the week through, been far more business done than last week, when the transactions for the whole week were scarcely larger than have been done in one busy day in the busy times of two years ago. Last week the opposing parties of bull and bear operators seemed to be doing little more than watching and waiting, the former protecting their stocks by sustaining orders, the latter waiting for something new to turn up which should furnish the occasion for and point the way to a fresh onslaught on the market. This was furnished by the series of commercial disasters in New England. What hurts Boston and New England generally hurts Wall street severely; for a great many properties whose stocks are listed on this market are supported mainly by New England capitalists. But the first blow fell on the Gould southwestern stocks, which on Monday last seemed struck as by a tornado, and Wabash particularly was very roughly handled. The common fell to 19, recording a decline from the closing price on Saturday of 5½ per cent.; the preferred fell to 34½, a drop of 3⅞ per cent. Rumors were rife of a big decline in the earnings of this company for the last week in July, and when the report for the week was published on Tuesday (it should have come out the previous Saturday) it was found that the earnings for the week showed a decrease, as compared with the corresponding week last year, of over $100,000. After the worst is known in Wall street the price of the stock affected usually rises, for the selling has been done beforehand by those who have the information, and on its being made public they cover. This was the case on this occasion. Wabash common rose somewhat on Tuesday and has held up since; but the preferred stock, which is scattered more than the common, has continued heavy. Texas Pacific and Kansas & Texas also felt the effects of Monday's storm, and declined in company with Wabash, though not so much. Here, by the way, we may correct an erroneous statement made last week, to the effect that the Texas Pacific road is still in process of construction. It is completed, and was carried across the Staked Plains of Texas to a junction with the Southern Pacific some months ago. It would therefore be proper to say that the farther it went the worse it was off until it reached the point of junction, and not that the farther it goes the worse it is off. This applied only to the period of construction. When it reached the Southern Pacific it was, of course, in a position to give and take all the traffic which a connection with that line affords. This, however, has been much less than was expected or was anticipated when the road was planned by Mr. Gould; for the idea was that all the business of the Southern Pacific would be poured over the Texas Pacific, and so over the Gould southwestern system to St. Louis and thence north over the Wabash. In this matter the two giants in railroad construction, Gould and Huntington, have come into collision. Huntington and his Central Pacific syndicate opened their Southern Pacific to a direct connection with New Orleans, and completed the route by the purchase of the Morgan line of steamers plying between New Orleans and this port. All their money has been put into the development of this route, and naturally they send over it every ton of freight they can get. The Texas Pacific and the other roads in the Gould system are thus cut off from a large traffic they were expected to get, and the interests of Mr. Gould and Mr. Huntington are now in great measure antagonistic. Some knowledge of how affairs stand between the two railroad magnates may have disposed the members of the pool who had Texas Pacific to sell out, and this may account for the steady decline in that stock which has been going on for many weeks.

After the southwestern stocks had had their bad time, the Northern Pacific and Oregon Transcontinental were attacked. They have been under the hammer for a long time, and the sentiment of the street generally has been and still is very bearish toward them; but they were held up stubbornly, though the stock last named yielded somewhat. On Wednesday there was a regular onslaught on them. For what reason it was made at that particular time it is hard to say. Some connected it with Mr. Gould's return to the city that day. Anyhow the attack was very much like one of his in its boldness and force. Oregon Transcontinental was smashed down, as it were, by continuous blocks of stock thrown on the market, 4½ per cent. An attempt seemed made to hold it at the start, but the supporters found themselves getting more stock than they could take care of and dropped out. Then it went down with a rush. At one time three separate sales of 100 share lots forced the price down 1 per cent., the first lot going at 71, the second at 70½, and the third at 70. From this there was some recovery. Northern Pacific preferred, the other stock attacked, did not fare so badly; but it was considerably weakened. Thursday the market remained comparatively quiet. Mr. Gould has sustained his Western Union and Missouri Pacific as well as he could, the first only moving between 78½ and 80; but the second has been forced as low as 96½, though it has averaged about 98. The Vanderbilt stocks have been rather quiet, and on the whole firm. The market seems to be getting down to where a reaction will be in order; but if more heavy failures come the reaction may be indefinitely postponed, and the occurence of two large bank suspensions yesterday gave another blow to prices.

The loan market has continued in its almost phenomenal condition of plethora, money being offered in any amount at 2 per cent.; but the banks are extremely chary of lending on anything but the best stocks, and probably there have been few periods when money was plentiful when it was harder to get it on anything but the best securities. In London the Bank of England maintains its rate at 4 per cent., which has its effect in keeping up the rates of of exchange here. The posted rates continue at $4.84½ and $4.88. The government loan market presents no new features. The following were the closing quotations yesterday:

	Aug. 3, *bid.*	—*Aug.* 10,— *bid.*	*asked.*
U. S. 5s extended (3½ p. c.)	..	..	..
U. S. 4½s 1891, registered	112	112	112⅛
U. S. coupon	113	113	113⅛
U. S. 4s 1907, registered	119⅛	119⅛	119¼
U. S 4s 1907, coupon	119⅛	119⅛	119¼

The bank statement of Saturday showed few changes. There was a slight decrease in the loans, and the nominal decrease of $93,350 in the surplus reserve, which is now $9,246,375, or $6,561,950 more than at the corresponding date last year. The following are the comparative totals of the statements of July 28 and August 4:

	July 28.	*Aug.* 4.	*Differences.*	
Loans	$327,250,300	$326,822,000	Dec.	$428,300
Specie	63,136,000	63,188,400	Inc.	58,400
Legal-tenders	27,103,700	26,981,200	Dec.	122,500
Deposits	323,575,900	323,692,900	Inc.	117,000
Circulation	15,378,600	15,640,900	Inc.	262,300

The proportion of total reserve to liabilities is now 27.86 per cent., against 25.84 per cent. in the same week of 1882.

AMERICAN SECURITIES AT LONDON.

[By Cable to BRADSTREET'S.]

From London: American securities are affected entirely from your side.

In a recent article in BRADSTREET'S on the West Shore Railroad Company it was stated that the company did not own its terminal facilities at Hoboken and elsewhere, and that the rental for the use of these would be an additional charge on it. Upon this subject the following appeared in the *Evening Post* of Thursday:

Erroneous impressions having been created by rumors about the issue of terminal bonds by the "West Shore & Ontario Terminal Company," and reports that the interest on such bonds would be an additional charge upon the West Shore & Ontario Railway Company, the officers of the railway companies interested in the property state that the two railway companies own absolutely all their New York terminal property by owning each one-half of the stock of the terminal company, this company having very valuable privileges granted by charters from the state of New Jersey for doing business which railways are not authorized by their charters to perform.

* * * * * *

The terminal bonds can be issued from time to time only for actual properties acquired or created. The total issue can never at any future time exceed $12,000,000 of 5 per cent. bonds. There was certainly much foresight in this financial plan, as it will enable the terminal facilities to keep pace with the growing business of the railway companies, and prevent the necessity of getting outside parties to do the terminal business and reap all its large profits. There are few railways entering any of our large cities that have retained such absolute control of all their terminals and made such ample provision for future requirements.

The idea conveyed to the reader by the above is that it is an "erroneous impression" that the West Shore Company will have to pay for the use of its terminals, while the actual fact is that it has guaranteed, in conjunction with the Ontario & Western Company, the interest on the $12,000,000 of bonds referred to. The railroad company is one corporation, the terminal company is another. Each has its own bonds out on the property it owns. The "control" of the terminal company is lodged in the railroads by ownership of the stock; the interest on the bonds of that company will be paid by them. The *owners* of the terminals will be the holders of the terminal bonds, and should the railroad company be unable to pay the interest the bondholders would, or could, foreclose their mortgages and wipe the stock out of existence. But it may be said that the terminal company will do a business of its own, and earn its interest without calling on the guarantor. Who is it to do business with and earn money from except from the users of the property? The users are the two railroad companies. The rental they pay for their use is the interest on the terminal bonds. No ingenious mixing up of the two distinct facts of *ownership* and *control* can disguise the relations of the terminal company and the railroad company.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

The general trade situation of the country cannot be regarded as in any degree better than at the close of business on Friday of last week. But on the other hand there is no reason to consider it any worse. Special telegrams from leading cities to BRADSTREET'S show that general business is still under the influence of midsummer dullness. At the cities most involved the effect upon the commercial community is in an extra amount of caution in granting credits and, on the part of the banks, in extending their discounts. Leading merchants express their belief that not only the boot and shoe and leather business but other lines of trade are the better enabled to do a healthful fall business by reason of the enforced liquidation noted. Western centers report that the demand for money from the country is beginning to be felt, and that rates for the use of the same are showing considerable animation. This is regarded as the first sign of the awakening of fall trade. It must soon be reflected by more animation in the money market at New York. This will depend, of course, largely upon the disposition of farmers to let their new wheat come forward. Thus far they have been loth to do so, and that which has come into western centers has been readily taken up by local millers. The recent spurt in prices of wheat, if maintained, promises liberal receipts of wheat. This cereal advanced about 3½c. per bushel on the week, and corn about 2¾c. This was due to a higher market abroad, where there has been unfavorable weather and renewed buying by importers. Provisions have been stimulated a little in sympathy, but there is little appreciable demand for the latter, and the fluctuations in the same are mainly the result of manipulation. Petroleum has been in better request, both for crude and refined, and has advanced accordingly. Ocean freights have been firmer, and exports of grain have visibly increased, notably from Baltimore. Trade in wool has continued good, but has not been so active as in preceding weeks, as some of the larger buyers have supplied near wants and withdrawn from the market. There were 168 failures in the United States reported to BRADSTREET'S during the past week, 13 more than last week, 73 more than in the corresponding week in 1882, and 62 more than in the like week in 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: General trade is fair, but not large. Business of all kinds rather quiet. Money is easier.

From Boston, Mass.: The financial disturbances have interfered to some extent with the progress of the fall trade, but not nearly as much as might be expected, and in most of the leading branches there has been some improvement over last week. More caution is exercised in regard to credits; but in other respects there is a confident tone, and in another week the effects of the failures will probably entirely disappear. No depression or discouragement is visible, and all the principal industries are making preparations for an active fall business. The boot and shoe trade is running considerably ahead of last year, and in such a large interest the closing up of a few houses is not likely to have any injurious effect on the general situation. The wool trade is not in the least disturbed by the failure of Messrs. Wright, Woorster & Co., as it is now generally believed that their troubles were caused by outside speculations. The money market continues easy for legitimate borrowers, and merchants in good standing find no difficulty in getting the usual accommodations.

From Troy, N. Y.: Trade in general remains quiet. There is no indication of immediate improvement.

From Philadelphia, Pa.: Wholesale trade shows increasing activity, but operations are on a very conservative basis in all lines. Merchants regard the situation as sound financially and full of promise as to the future of trade and industry, but are nevertheless swayed by a vague feeling of uneasiness, caused by the recent failures and labor troubles, and are trimming sail with a good deal of caution both as regards stocks and credits.

From Cleveland, Ohio: The general trade for this season of the year is a trifle quiet, although a fair to good fall trade is expected. Country collections are reasonably fair.

From Cincinnati, Ohio: The cold weather of the past week has not been without effect upon the trade movement in this locality, and the lack of animation marks nearly every line.

From Columbus, Ohio: Business as a whole is not quite so active as anticipated, but fairly satisfactory.

From Toledo, Ohio: Groceries, hardware, boots and shoes are satisfactory. Collections are fair.

From Chicago, Ill.: Money is easy at 4@6 per cent. The demand is small and supply large. Exchange is at a premium. Collections are fair. Groceries and salt fish are in good request. The consumption of sugars is large and stocks moderate. Other branches of the jobbing trade are fair for the season.

From Peoria, Ill.: There are no new features from a business point of view. Trade is fair in staple goods, with a more confident feeling for the future.

From Indianapolis, Ind.: Trade is quiet and collections are slow. Money matters are close. The First National Bank and the Indiana Banking Company both failed to open their doors to-day, and unless speedy arrangements are made to resume it will very much hamper business, as they had a very heavy line of deposits.

From Detroit, Mich.: General trade is very fair. Collections have not improved much, but will be better as soon as farmers can ship their grain.

From Louisville, Ky.: The business situation here is regarded as healthy, and promising unusual activity in the next three months. The fall trade opened early and is developing satisfactorily. Money is easy and the demand not large. The amount employed in moving grain is still very light. Exchange is lower at par to 50c. premium.

From St. Louis, Mo.: Money is more active. Cotton and grain men are the largest borrowers. Rates are 7 to 8 per cent. New York exchange is 50c. premium; prime commercial bills are at par.

From Kansas City, Mo.: Increased activity is manifest in all kinds of trade. Collections are reported good. All indications point to heavy fall business.

From Burlington, Iowa: There are no special features in general trade. The city trade is fair and jobbers report an increasing demand with indications of a good fall business.

From Des Moines, Iowa: There is no special change to note in the condition of general trade. Money is quoted firm.

From Minneapolis, Minn.: Business generally quiet but improving. The money market is close at full quotations. Should the crops turn out as well as is now anticipated the fall trade will be large. There is a fair trade reported at jobbing houses. Wholesalers could sell more goods if they desired to, but are not pressing goods. All report trade healthy, and thus far the year's business satisfactory and much larger than the previous year. Fall stocks are being renewed.

From Topeka, Kan.: General trade is quiet. Collections are fair.

From Lawrence, Kan.: General trade remains unchanged and quiet, and will probably continue so through this month. Rates for money are higher and funds scarce.

From Omaha, Neb.: Collections are reported only fair, and general trade is quiet. A favorable change is looked for as soon as wheat moves.

From Baltimore, Md.: General trade continues to improve, and merchants and manufacturers now regard the prospects for an active fall trade more encouraging. Money is easy, and stocks are dull.

From Norfolk, Va.: Wholesale grocers doing their usual summer business. All other branches moderately active. Weather more pleasant. Collections fair. Money is easy.

From Wilmington, N. C.: General trade is quiet, the river being very low. The peanut crop is favorably reported.

From Savannah, Ga.: Most lines of trade are doing fairly, without special activity. Business is regarded as healthy and encouraging for the fall opening.

From New Orleans, La.: There is nothing new in financial circles, except that time paper is hardening, and that pressure is expected soon in all lines. Trade reduced to summer basis.

From Galveston, Tex.: General trade is dull.

From Memphis, Tenn.: Trade in general is quiet, though fairly active for the season. The fall trade is expected to open up in about ten days. Money 6 per cent.; exchange ¼ per cent. premium.

BREADSTUFFS ABROAD.

The British wheat market on Saturday and during the earlier portion of the week was cabled steady; but on Wednesday more firmness was reported on account of showery weather and renewed signs of damage to and shortage of the English crop. The London *Times* in reviewing the situation estimates that the harvest of English wheat will be below the average, and another authority places the discrepancy, as compared with the standard average per acre, at 8½ per cent. The recent cool and showery weather abroad, in addition to that reported in the latter half of July, will be very likely to encourage British holders of stocks of their own and of foreign grain and give more strength to the market in Mark Lane. In Germany there was an excessive rainfall during the latter part of July and the temperature was very low for the time of year. Harvest prospects therefore have retrograded, and prices at country markets made generally advances. In Russia the crops promise well, especially in the south and in the Polish provinces. Business at Odessa has been restricted, prices being rather lower for poorer sorts of wheat. The trade of Nicolaieff has been inactive. In Hungary the wheat and rye crops will give generally an average yield. In portions of Prussia harvesting has been going on for some time, and the result, on the whole, promises well, especially in the northeast. In France harvesting is progressing in the south, but the straw is said to be short. In the north and northwest the temperature has been low, but has since improved. Another element of strength to the English and other foreign wheat markets has been found in advices recently supplied to London East India houses. India is reported to have had a good wheat crop this year, but continued exports of the same it is believed will be small, at least from Bombay and Kurrachee, where heavy inundations have interrupted railway traffic. Repairs will require some six weeks, during which time limited if any supplies can come forward. The difficulties of quarantine, in consequence of the cholera, are also believed to have offered already some obstacles to imports. In reference to supplies, also, the London *Miller's Gazette* has the following: "In the Black Sea ports the stocks are small, and prices have latterly kept most unreasonably high. Upon inquiry of the houses connected with Odessa and Nicolaieff, it seems to be their belief that in the event of a decided rise in England, moderate, but not very large, shipments may be expected to commence in another month or so, but that without any such stimulus the period of activity would only begin later." Advices from the Azov ports are that wheat-exporting houses there do not expect any extensive outward movement until October. These views will unquestionably account for recently renewed orders to buy received in the United States from abroad. In reference to foreign views of the wheat crop in this country for 1883, it appears that a change of opinion has been experienced. The London *Miller* now says: "The 100,000,000 bushels deficiency on 1882, generally believed a month ago, is now largely discredited." The *Mark Lane Express* says: "Considerable progress has now been made in some of the states with wheat harvest, and the result is generally spoken of as being better than was expected."

The quantity of grain on passage for the United Kingdom and continent, August 9, as reported by cable, was as follows:

	Wheat. Qrs.	*Maize. Qrs.*
To the United Kingdom	1,675,000	290,000
To Continent	460,000	110,000
Total quarters	2,135,000	400,000
Equal bushels	17,080,000	3,200,000
Compared with the previous week:		
To the United Kingdom	1,625,000	270,000
To Continent	430,000	100,000
Total quarters	2,055,000	370,000
Equal bushels	16,440,000	2,960,000
Increase, bushels	640,000	240,000

AMERICAN WHEAT MARKETS.

The bulls in wheat have enjoyed themselves during the past week. Saturday was very dull indeed and no trading of special moment was recorded, in fact prices of August and September went off ⅛c. as compared with Friday evening, August 3. Monday was not much better. Increasing western stocks depressed the markets there, but the absence of a corresponding movement to the ports showed at the east in the form of declining stocks and higher prices. In addition to this unfavorable weather abroad was cabled. At the close on Monday the price of August in this market was ¼c. higher, and of September wheat ⅜c. higher than on Saturday. Tuesday showed a decided improvement, and the bulls in wheat once more came to the front. Activity characterized the market and prices advanced, net, on the day, as against the closing on Monday, 1½c. per bushel for August and ¾c. for September. The marked spurt in buying at the west, notably at Chicago, as well as a renewed influx of foreign orders at Baltimore, toned up all wheat markets and prices went ahead. The new wheat received is still limited in amount, farmers being inclined to wait for an advance. That which has come into market has been largely appropriated by western millers. On Wednesday the demand from abroad for wheat increased. Buying from the some-time absent public set in, outside speculators telegraphed orders to buy both here and at Chicago, and, inasmuch as the telegraphic service furnished the grain exchanges was more efficient, the market was at once characterized by a marked advance in prices. The gain on Wednesday as compared with the closing price of August wheat on Tuesday was 1⅞c. per bushel, and on September it was 1⅝c. The short element naturally enough showed its disapproval of this turn to affairs by promptly buying to cover, and this further stimulated quotations. On Thursday the market continued firm and prices closed at $1— against $1.17⅛ for August on Wednesday. On Friday prices fluctuated considerably, but a renewed export demand near the close toned prices up, and they closed fractionally above those of Thursday.

The weather throughout the grain-growing regions during the week has for the most part been very favorable. Advices from that portion of Iowa centering at Des Moines state that the wheat yield is the largest known in that section for years. The statistical agent of the National Agricultural Bureau at St. Paul, Minn., gives the condition of the wheat crop in that state August 1 at 102 per cent. as compared with an average. Reports from the southwestern Minnesota counties are uniformly good, and but for the damage done by the July storm would send the average condition several points higher. Returns from the counties east of the Mississippi river, though favorable, are not so encouraging generally. They report less than an average in yield, though superior in quality, north of the Minnesota and west of the Mississippi rivers, and south of the north lines of Big Stone, Swift, Kandiyohi and Wright counties the returns are, with two exceptions, more than usually favorable for wheat, representing the yield either at or above an average. The Red river counties return an average of 87 per cent. as to condition. The wheat crop of California in 1882 was reported at 1,200,000 tons. The State Board of Agriculture reports 20 per cent. less for 1883, 1,000,000 tons, or about 33,000,000 bushels. "The best authorities" in San Francisco are reported as regarding the board's estimate as too low, and give 1,280,000 tons as the probable output, or about 42,250,000 bushels. The Manitoba crop bulletin dated July 26, issued by the Dominion Department of Agriculture, says that the reports from points throughout the whole province are very satisfactory and a large yield is fully expected. Though suffering from the extreme and prolonged dry weather in the early part of the season, still only in a few cases is absolute injury reported. A very bountiful wheat crop will no doubt be reaped, with the general yield above an average. W. I Chamberlain, of the Ohio State Board of Agriculture, in his report of August 1 writes: "I maintain the opinion advanced in April, and held more and more firmly month by month ever since, that the total shortage this year as compared with 1882 cannot be less than 120,000,000, and may go considerably above that amount;" or, in other words, he thinks that the crop will be fully as short as in 1881 and prices consequently quite as high. The latter point he infers from the cholera along the Suez canal restricting Asiatic and Indian exports to England.

The receipts of wheat at tide-water for the week ending August 4 increased to 1,798,708 bushels from July 28, when they were 1,148,675 bushels. The exports from the Atlantic ports for the week ended August 4 amounted to 895,552 bushels, against 894,003 bushels July 28. From September 1, 1882, to August 4, the exports of wheat from the Atlantic ports were 64,336,802 bushels, against 49,926,159 bushels in a corresponding portion of the preceding year, a gain of 14,410,643 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended August 4 amounted to 1,629,119 bushels, against 952,951 bushels in the preceding week, and the shipments to 894,341 bushels, against 555,336 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) August 4, as against the preceding week, showed an increase of 46,475 bushels.

The course of the wheat market at New York and Chicago during the past week, has been as follows:

	AT NEW YORK.				AT CHICAGO.	
	Aug	*Sept.*	*Oct.*	*Nov.*	*August.*	*Sept.*
Aug. 3	$1.14⅜	$1.16⅛	$1.18½	$1.20½	$1.01¼	$1.03
Aug. 4	1.14⅜	1.16⅜	1.18⅝	1.20⅝	1.01⅛	1.02½
Aug. 6	1.14⅝	1.16⅝	1.18¾	1.20¾	1.00½	1.01¾
Aug. 7	1.15⅛	1.17¼	1.19½	1.21⅞	1.00⅞	1.02⅛
Aug. 8	1.17¼	1.18⅝	1.21¼	1.23½	1.02½	1.04
Aug. 9	1.17⅝	1.19¼	1.20⅞	1.22⅞	1.02¼	1.03⅜

At 1 P.M. Friday, August wheat at Chicago was quoted at $1.02¾, and September at $1.04.

INDIAN CORN.

On Saturday last the market for Indian corn exhibited no features of interest, and was quite as dull and devoid of excitement as was that for wheat. On Monday, however, considerable strength was shown, and bidding became active in the absence of full receipts. Prices of August corn advanced a full cent per bushel, and September went up ⅜c. Arrivals on Tuesday were again limited, and a large portion of the stock of August was held by a few individuals. The situation quite suggested the idea of an attempt to corner corn, and that view of the situation was evidently discussed in all seriousness at Chicago, to judge from the tenor of the special telegraphic reports from that city published here on Wednesday. This view was, of course, backed by the advance of 4½c. per bushel scored on the 7th inst. Wednesday witnessed less animation in this cereal, and prices receded ½c. on the day. The demand here was largely from the shorts to cover. There was some demand for corn for export, and freight room was actively in demand. On Friday corn was again firmer and prices advanced on the strength of large orders for export.

The receipts of Indian corn at the Atlantic ports for the week ended August 4 were 1,419,932 bushels, against 1,436,457 in the preceding week, while the exports from the same points amounted to 1,149,839 against 1,016,622 bushels. From September 1 last to August 4 the exports of Indian corn were 43,769,767 bushels, against 25,564,346 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, August 4, had increased 376,065 bushels as compared with July 28. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending August 4, were 2,064,782 bushels, against 1,932,548 the week preceding, and the shipments were 2,816,936 bushels, against 1,259,548 in the preceding week.

The closing prices of Indian corn at New York and at Chicago at 1 p.m. for the past week were:

	—At New York.—			—Chicago.—	
	Aug.	*Sept.*	*Oct.*	*Aug.*	*Sept*
August 3	.60¾	.62⅞	61⅛	.50½	.49¾
August 4	.61⅛	.61¼	.61½	.50⅝	.50
August 6	.62	.61⅝	.61¾	.50⅞	.49⅞
August 7	.66½	.62½	.62⅓	.52⅜	.50⅞
August 8	.65⅝	.63¼	.63¼	.52⅞	.51⅝
August 9	.63½	.62⅛	.62⅛	.51½	.50½

Corn at Chicago at 1 P.M. yesterday was for August 50⅞c. and for September 50¼c.

The prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

THE BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The grain markets have been more active at advancing prices. Speculation has been chiefly in wheat, in which shippers are showing more interest. Actual business on foreign orders is light, owing to the steady upward movement of values on this side, but bids are following close and an increased movement is anticipated. There is not much foreign demand for corn. Old oats are getting scarce. Flour is firm, with a moderate home trade. New wheat flours are coming forward slowly.

From Chicago, Ill.: Wheat is firmer in response to higher markets in Europe. No shipping demand for spring, and buying is chiefly to cover contracts. Not much confidence is shown by strong buyers to hold. Corn is weak, due to large receipts and fair crop reports. There is a fair shipping demand. Oats are depressed by large receipts and prospect of increasing stocks.

From Cincinnati, Ohio: Flour is in fair consumptive demand, with little effort shown to sell. The market is firmer.

From Louisville, Ky.: Flour is firm and moderately active. Grain is quiet. Wheat is mostly held for a higher market.

From St. Louis, Mo.: All grains have been dull and weak, but are now active in sharp advances. Wheat receipts are increasing daily. No export movement of wheat, but some of corn.

From Topeka, Kan.: The prospects are for a large corn crop. The wheat market is fair and corn good.

From Minneapolis, Minn.: There is but little wheat moving. The market is firm. Receipts for the week are 175,000 bushels. Flour is more active and firmer. Shipments for the week are 63,000 barrels.

From Baltimore, Md.: Prices of wheat have ruled active and higher. Oats are in demand, particularly old stock, and prices quoted firm.

From Wilmington, N. C.: Breadstuffs are firm.

From New Orleans, La.: Flour in better supply for choice and fancy, which are in request. The stock is medium only, and low grades are moderate and dull. Receipts of grains are fair and the markets are quiet.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Minneapolis, Minn.: The weather continues perfect. Harvesting is progressing in central and southern Minnesota, and prospects for a yield in Minnesota and Dakota are for securing an average yield of from 12 to 13 bushels per acre. This, with the increased acreage, will give four to five million bushels more than last year. The increased acreage is mainly in Dakota—very little in Minnesota.

From Des Moines, Iowa: Harvest is progressing finely; all the crops promise well.

From Omaha, Neb.: The state has experienced very cool weather for two weeks past, and the corn prospects are thereby greatly lessened. The small grain is nearly all in and the harvest never was as heavy, but fears are entertained that frost may overtake corn unless exceptionally fine weather prevails for the next month.

From Wilmington, N. C.: The growing corn needs rain. The weather is cool.

PROVISIONS.

On Saturday and Monday the local as well as western markets for pork, lard, bacon, and other forms of provisions were dull and heavy, with a continuation of the features noted last week, including a slight falling away in prices. Tuesday revealed a reaction, not unnatural after so long a depression, which advanced quotations of pork and lard. The increased buying was, of course, largely due to the covering of shorts, but it may also be recorded that stocks have of late declined a little and that a few orders for consumptive demand have been reported. Still there is nothing in this line of trade that can be characterized as a revival. Receipts of hogs at the west continue very heavy and there has been as yet nothing in the favoring features noted to offset this drag to prices. Still, the movements of speculative prices and the tone of the option market have been governed almost entirely by the cliques here and at Chicago and elsewhere in the west. Inasmuch as they are holding the field to themselves their action is excessively cautious and less productive of marked changes than if operating upon a market where there was a good trade demand for the product, in addition to a speculatively inclined public to back them up. Toward the close of the week prices declined a little, but at the close on Friday were again higher.

The exports of leading hog products from the principal Atlantic and gulf ports for the week ending August 4, with comparisons, were as follows:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	3,955	5,341,871	6,788,266
Boston	428	910,000	1,933,189
Portland	..	....	....
Montreal	1,424	2,033,800	1,320,460
Philadelphia	..	1,020,000	....
Baltimore	252	11,345	593,450
New Orleans	98	2,800	1,540
Totals	6,157	9,319,916	10,645,905
Previous week	7,655	9,639,864	9,613,118

The total quantity of hog product exported from the above-mentioned places from November 1, 1882, to August 4, 1883, was as follows:

	1882–83, *pounds.*	1881–82. *pounds.*
Pork	36,951,000	40,655,800
Bacon	321,658,808	321,590,248
Lard	213,377,078	198,368,918
Totals	571,986,966	560,614,966

Prices of lard and mess pork at New York during the week were as follows:

	Aug. 4.	*Aug.* 6.	*Aug.* 7.	*Aug.* 8.	*Aug.* 9.	*Aug.* 10.
Lard, Aug.	8.56c.	8.45c.	8.54c.	8.60c.	8.60c.	8.55c
Pork, spot mess	$15.50	$15.50	$15.37½	$15.50	$15.50	$15.25

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The general drift of values has been in sellers' favor on meats, which are in good consumptive demand. Dairy produce is weakening under large supplies of all kinds of butter and inferior qualities of cheese.

From Chicago, Ill.: Provisions are weak and declining. Shipments are fair, but speculative confidence is lacking. The prospect is that shipments will decline and receipts of hogs increase.

From Cincinnati, Ohio: Provisions have been dull and inactive.

From Louisville, Ky.: Provisions have an improved tone, but dealings are small.

From St. Louis, Mo.: Horses and mules in demand and small in supply. Both hogs and cattle are active, with a fair supply about equaled by demand, and prices are quite steady. Provisions are dull and weak.

From Kansas City, Mo.: Cattle are active at an advance of 10c. Receipts of hogs are heavy. Prices are 5c. to 10c. higher.

From Lawrence, Kan.: Large shipments of produce are being made mostly to the west.

From Wilmington, N. C.: Provisions are quiet.

From New Orleans, La.: Provisions are quiet owing to scarcity.

From Memphis, Tenn.: Lard is quiet and meats are unsettled.

THE NEW YORK DRY GOODS MARKET.

The volume of business transacted by first hands for the week is generally quoted of fair proportions, though decidedly not up to expectation. Considerable deliveries have been made on back orders and some duplicates have been filled. Jobbers report an increased business over the previous week, though retailers are not yet making their regular fall purchases. They are busily trying to clear out their summer stocks ere it is too late. Rumors in the air of a large failure in the dry goods line has been the topic of conversation towards the close of the week, but up to the time of going to press there seems to be not the slightest foundation for such talk, which in reality does more harm to trade than is generally believed. Some of our prominent merchants are of the opinion that the time is not far distant when buyers will require to give notes, as in the "good old times," in place of purchasing on sixty days' open account with sixty days additional dating, as is now the practice, making in reality four months' open credit. It will be a day of general rejoicing when the change takes place.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

From London: At Manchester cotton is steady, yarns are slightly higher, and export yarns are from 1/16c. to ⅛c. up. Otherwise there is no real advance that can be quoted.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: There is no change in the aspect of the dry goods market.

From Boston, Mass.: The general tone of the market is quiet, but jobbers report a still further increase in western orders and the outlook is quite promising. Agents are moving some kinds of staple goods a little more freely, but there is not as much activity as there ought to be at this season. With the exception of colored goods prices of cottons are well maintained.

From Providence, R. I.: The print cloth market is quiet and steady, and sales are light; 64s are quoted at 3½c., less ½ of 1 per cent., and 56x60s at the nominal price of 3 1-16c. There are about 135,000 pieces on hand.

From Philadelphia, Pa.: Trade in package lines is improving, but buyers are very conservative, and the movement as a whole disappoints general expectation. The jobbing trade is quiet, but mail orders are coming in more freely. Prices ruled steady on standard productions, but are weak and unsettled on low grades of cotton goods.

From Pittsburgh, Pa.: The dry goods trade was dull during the first part of the week, but has shown more activity during the past few days. Collections are a little slow.

From Cleveland, Ohio: The dry goods market is in sympathy with other lines, quietness pervading it also.

From Cincinnati, Ohio: There is no change in dry goods or woolens.

From Columbus, Ohio: Dry goods jobbers here quote trade for this week fully as good as last and entirely satisfactory for this season of the year, but a slight falling off in collections has been noticed, which can now be quoted only fair.

From Toledo, Ohio: The dry goods trade is improving.

From Chicago, Ill.: Dry goods are selling fairly on interior orders. Transactions average fair with the opening week in August in former years, and better than at date last year. Country stocks are very low but retailers buy with more than ordinary caution. Conservatism is increased by the labor troubles in many sections, and heavy eastern failures in other trades.

From Peoria, Ill.: In dry goods trade averages well, but collections are slow.

From Detroit, Mich.: In dry goods jobbers report a good healthy trade, and predict a good fall business.

From Louisville, Ky.: The cotton goods movement is fair; inquiry at steady prices.

From St. Louis, Mo.: The dry goods trade is moderately good at unchanged quotations. Fall orders are coming in.

From Burlington, Iowa: Dry goods are in fair demand and looking up. Collections fair.

From Kansas City, Mo.: Dry goods are not materially changed. The fall season's business has hardly opened yet, but the outlook is satisfactory.

From Topeka, Kan.: The dry goods trade is dull and sales are considerably less than during July.

From Omaha, Neb.: Dry goods sales are increasing and orders for fall goods are coming in.

From Baltimore, Md.: Sales of dry goods reached very fair proportions and orders are reported coming in far better than at same period last year. Jobbers thought a month ago that the volume of business in August would fall far below the average, but results so far go to show that such will not be the case. Commission men report trade with them a little quiet.

From Norfolk, Va.: Dry goods jobbers are inactive. Travelers are now out and trade will soon begin.

From Wilmington, N. C.: Dry goods are improving.

From Savannah, Ga.: Stocks of dry goods are fuller, and there is a better and more general demand both by orders and cash purchasers. Collections are coming in slowly.

From Galveston, Tex.: Dry goods are less active.

From Memphis, Tenn.: Dry goods sales have been very fair during the past week.

CLOTHING.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Manufacturers' of clothing report an increase in orders, and the fall trade, so far, is as large, if not larger, than last year. The failures in other branches have no effect here, and there is a confident feeling that the business will steadily increase during the month.

From Chicago, Ill.: Clothing is slow.

From Savannah, Ga.: In clothing the trade is opening fairly, and drummers report a satisfactory supply of orders ahead for the coming fall trade.

COTTON.

The market for spot cotton at New York has been quiet, with but little demand. Quotations show a slight improvement, middling uplands closing last night at 10¼c., an advance of 2 points. The sales for the week foot up as follows: For export 559 bales, for consumption 2,920, and for speculation 304. The total sales aggregate 3,774 bales against 11,475 last week. Deliveries on contract amount to 11,550 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week*	*Last year.*
Ordinary	7 11-16c.	7 7-16c.	10⅝c.
Strict ordinary	8⅛	7⅞	11 1-16
Good ordinary	8 15-16	8 11-16	11⅞
Strict good ordinary	9½	9¼	12 5-16
Low middling	9⅞	9 11-16	12 11-16
Strict low middling	10 1-16	9 15-16	12⅞
Middling	10¼	10⅛	13
Good middling	10⅜	10½	13⅛
Strict good middling	10⅝	10¾	13⅜
Middling fair	11⅜	11¼	14⅛
Fair	12⅛	12	14⅞

STAINED.

	This week.	Last week.	Last year.
Good ordinary	7⅛	6⅞	10¼
Strictly good ordinary	7 15-16	7 11-16	11 1-16
Low middling	8⅝	8⅜	11¼
Middling	9⅝	9⅜	12 11-16

The market for spot cotton closed easy.

The future market for the week has been fairly active, with higher prices. The upward movement is attributed to the unfavorable reports of the growing crop. Quotations show an advance of 5 points for near months, and 7 for later months. The sales for the week foot up 581,400 bales against 240,700 bales for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	Last week.	Last year
August	10.16	10.24	12.84
September	10.15	10.21	12.52
October	10.06	10.06	11.88
November	10.05	9 99	11.68
December	10 07	10.00	11.68
January	10.15	10.08	11.77
February	10.27	10.19	11.88
March	10.38	10.31	12.02
April	10.49	10.42	12 15
May	10.60	10.53	12 28

The market for futures closed easy.

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	To-day.	Last year.
Galveston	946	9¾	12¼
New Orleans	3,900	9¾	12⅝
Mobile	648	9⅝	12⅜
Savannah	176	9¾	12
Charleston	87	9⅞	12½
Norfolk	1,240	10⅛	12½
Baltimore	754	9⅞	13

The total receipts of cotton at the ports since September 1 are 5,931,099 bales, against 4,635,209 last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	Last year.
Galveston	841,134	423,928
New Orleans	1,067,333	1,174,742
Mobile	311,342	263,431
Savannah	812,136	726,068
Charleston	566,429	496,215
Wilmington	128,908	133,489
Norfolk	796,592	608,117
Baltimore	83,514	35,646
New York	152,060	171,848
Boston	197,337	232,177
Philadelphia	98,908	81,914

Below will be found the receipts for each day of the week ending Friday, August 10, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	S. & M.	Tues.	Wed.	Thurs.	Fri.
Galveston	506	200	672	142	486	315
New Orleans	230	488	859	259	177	423
Mobile	17	19	1	....	11	56
Savannah	7	130	415	596	255	27
Charleston	154	38	32	9	15	101
Wilmington	10	18	....	29	24	4
Norfolk	141	293	261	21	150	197
Baltimore	94	213	....	192	....	339
New York	....	....	....	44	100	29
Boston	191	....	5	....	31	118
Philadelphia	40	114	40	....	35	....
Totals	1,390	1,513	2,285	1,292	1,284	1,609
This day last week	1,109	807	1,637	1,285	787	1,226
This day last year	711	764	586	615	329	1,382

The total receipts at the ports for the week were 9,686 bales, against 7,010 last week and 4,767 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 2,343 bales, against 2,213 bales last week and 1,592 bales for the corresponding week last year. The shipments for the week were 5,026 bales, against 5,451 bales last week and 5,208 bales for the corresponding week last year. The stocks for the week were 46,099 bales, against 49,774 last week and 18,169 for the same week last year.

The market at Liverpool for prompt delivery uplands has been steady with a fair demand, which was freely met. Quotations have been a trifle higher, closing last night at 5 11-16d., against 5⅝d. last week. Futures have been strong and steady; closed an average of 1 point higher for near months, and 2 for later ones.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	Last week.	Last year.
August	....	....	7 3-64d.
August-September	5 40-64d.	5 38-64d.	7 2-64
September-October	5 39-64	5 38-64	6 58-64
October-November	5 38-64	5 37-64	6 44-64
November-December	5 37-64	5 36-64	6 38-64
December-January	5 38-64	5 36-64	....
January-February	5 40-64	5 38-64	6 40-64

The sales for the week at Liverpool were 43,000 bales (of which 29,000 were American), against 54,000 (of which 39,000 were American) last year. The sales for export were 2,800 bales, against 7,100 bales last year. The sales for speculation were 1,970 bales, against 4,500 bales last year. The amount forwarded was 6,100 bales, against 4,100 bales last year. The stock in port is 932,000 bales (of which 650,000 are American), against 669,000 bales (of which 367,000 were American) last year. The total imports for the week were 54,000 bales (of which 12,000 were American), against 20,000 bales (of which 11,500 were American) last year, and the amount afloat 153,000 bales (of which 35,000 are American), against 228,000 bales (of which 29,000 were American) last year.

The Manchester market closed dull.

The Havre market is hardening.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is quiet and steady, sales for the week being fair. Middling uplands are worth 10⅝@10¾c. and middling gulfs 11c. The stock of short staple cotton on hand is small.

From Philadelphia, Pa.: Spinners have been buying fairly for actual wants, but mostly in small lots. Prices have undergone no change.

From Cincinnati, Ohio: There is a fair trade in cotton, and prices here advanced ¼c.

From St. Louis, Mo.: Cotton is firmer and the demand has improved, but offerings are light. Spinners are inquiring considerably, but refuse holders' figures. The trade generally continues rather better than usual for summer, though some exceptions are marked. Heavy stocks are accumulating for the fall opening.

From Baltimore, Md.: Transactions in cotton are small, and the market is dull.

From Wilmington, N. C.: Cotton is steady.

From Savannah, Ga.: Little is doing in the cotton market, trade not having fully opened.

From New Orleans, La.: Cotton movement since Thursday has been moderate and spots are unchanged; futures declined 8 points on Augusts and 7 on Septembers, while Octobers advanced 3 points, Novembers 5 and Decembers 8.

THE GROWING COTTON CROP.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: The growing cotton is doing well.

From Savannah, Ga.: We have had a heavy rainfall since last report, with cooler weather. Reports of the growing crop are conflicting, and not altogether encouraging, but the rains have been beneficial.

From New Orleans, La.: There is talk of a shorter crop, owing to reports of damage in some sections by drouth. Estimates of less than seven million bales are now freely made by prominent parties.

From Galveston, Tex.: The weather for the past week has continued hot and dry, and the cotton crop prospects are reported much less favorable on account of the drouth.

WOOL.

The movement of wool has continued on a large scale in all markets, but the distribution is in part in execution of previously recorded contracts, and close inquiry develops the fact that the actual new demand during the week has been less active. This is the natural sequence of the active trading of the three or four preceding weeks, which has, in a measure, supplied the near wants of consumers, some of whom are now temporarily holding out of the market. Large orders are still held by receivers in the principal markets to be filled as soon as stocks can be prepared for delivery, and the current inquiry continues very fair. Long staple wools are stronger, and in most cases well sold up. The general market, however, is no better; if anything, the advantage is with buyers, as the majority of dealers are free sellers at last week's prices. The leather trade troubles and the recent failure of a wool firm in Boston have not appreciably affected the market, but there is a noticeable tendency to greater discrimination and caution in the matter of credits that is probably the direct result of the business embarrassments referred to. Wool is comparatively low in price, and the more conservative operators are more inclined to anticipate an advance than a decline, but neither is regarded as immediately probable. In the interior full prices continue to be paid, and the markets show no sign of weakness. The goods trade is improving, but there is general complaint of a lack of profit margin in present prices, both among wool dealers and manufacturers.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There is very little change in the wool market since last week. The failure of Messrs. Wright, Worster & Co. was quite a surprise to the trade, and had a tendency to check business for the time being, but will have no bearing on the market or interfere with the credit of other well-known houses in the trade, who generally have a large capital to fall back upon. There is nothing in the condition of the wool market to cause a failure, and it is believed that outside speculations have had something to do with it. The sales of the week have been large, and amount to 3,573,000 pounds, and include all grades. Ohio and Pennsylvania fleeces have been sold at 36@37c. for X, and 37@39c. for XX and XX and above. Michigan fleeces range from 33¼@35c., and have been in moderate demand. Combing and delaine continues to meet with a ready sale, and prices are steady and firm. Fine Michigan and Ohio delaine range from 38@40c., and fine and No. 1 combing from 42@43c. per pound. Supplies continue to be taken as fast as graded. Unwashed wools have been in demand. There have been considerable sales of Georgia and Lake at 27c. and a shade under. Texas, territory and northern fleeces have been sold to some extent, principally from 23@28c. per pound. Coarse and low wools have been sold for less, and an occasional choice medium as high as 30c. per pound. A lot of 100,000 pounds choice northern California spring sold at 29c., and this is about as high as the best northern will go. Pulled wools remain quite steady and have been in fair demand. Sales of choice eastern and Maine super at 40@43c. and common and good supers at 20@38c. per pound. Foreign wool has been quiet. A lot of 190,000 pounds Montevideo sold on private terms.

From Philadelphia, Pa.: The week's sales foot up 1,750,000 pounds, including deliveries on back contracts, and the market closes steady with a fair demand; but inquiries are not so brisk as last week.

IRON.

American pig continues firm at the same prices which have been quoted in these columns for several weeks past. Buyers still continue their hand-to-mouth policy, and while this lasts there will be no special activity. Prominent members of the trade in New York look for less buoyancy in prices during the remainder of the year than they did one month ago. The recent failures at Boston and elsewhere have had no appreciable effect upon the iron trade. The latter have been selling in small lots only and still continue to do so. The Scotch pig iron trade here has suffered no material change since last week. The arrivals have increased to 2,700 tons, which is nearly three times what they have averaged per week for two months past, but it is due to the arrival of a new steamer which brought out 1,400 tons as ballast. Most of that which arrived went into consumption at once, having been sold previous to arrival. The sales of Scotch during the week, for future delivery, were nominal. Manufactured iron continues weak and the price unchanged. The steel rail mills are doing well and are comfortably supplied with work. Prices continue at $37.50 and $38, according to the size of orders. There are no features to specify in other lines. The improved tone felt in southern and western iron centers noticed last week still continues. On the whole, iron is quiet and firm, and buyers being conservative to almost an excess of caution.

THE BRITISH IRON TRADE.

[By Cable to BRADSTREET'S.]

From London: Iron is quieter. August shipments are reported smaller. The Scotch trade is flat. Shipments to America are very small indeed.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Domestic pig is steady to firm, with sales mostly in small lots. Merchant bar is weaker on account of western competition. Mill owners are holding off for more pressing demand. Construction iron is active for fall delivery to meet railroad requirements. Steel rails are strong, at $37 50 for large lots up to $38@$38 50 for smaller lots. The market is generally steady, with prospects of a heavy demand.

From Pittsburgh, Pa.: The market for manufactured iron continues inactive, but the prospects for the fall trade are encouraging. Sales of pig iron are very light, though prices indicate considerable firmness on the part of holders.

From Cleveland, Ohio: The iron market is still unchanged from the condition of previous weeks.

From Cincinnati, Ohio: There is a growing trade in pig iron, and the demand is promptly met from stocks in yards. Manufactured iron is in moderate demand only and prices are weaker.

From Chicago, Ill.: Hardware, metals, iron and nails are meeting satisfactory August rates. Stocks are in good shape and steadily held.

From Detroit, Mich.: In iron a much better feeling exists. Mills have started up with a fair amount of orders.

From Louisville, Ky.: Iron and hardware are in fair current demand and prices are active. The outlook for the season is decidedly good.

From St. Louis, Mo.: Pig iron continues brisk at steady rates. Manufactured iron is quieter than last week, but prices are firm.

From Baltimore, Md.: The demand for pig iron for foundry purposes is improving, and the market now quotes steady and firmer for favorite brands.

COAL.

The anthracite coal trade continues about as reported one week ago. Prices are unchanged, and the degree of shading done on circular rates is not materially different. An advance, to take effect within a week, or by September 1 at the farthest, is talked of; but nothing beyond this can be learned of it. Trade is not rushing. Coal is going into consumption with moderate movement, and from the fact that several of the coal-carrying roads have recently advanced tolls, comfort is obtained by the suggestion that rates ought to be better. The consumption of bituminous coals is quite active, and some prices received have been very low indeed. Judging from the news received from the Connellsville coke region during the past week, coke is very likely to be higher. The news that Mr. Vanderbilt and his friends have secured options in a majority of the ovens of the Connellsville region with a view to buying them and connecting the region with the Vanderbilt system of railroads has not yet been confirmed; it is not at all improbable, however. And this plan, in connection with his project for crowding into the Clearfield bituminous region, will be very likely to cause a stir in coal and coke carrying circles. At the present time Connellsville coke makers are threatening to strike for higher wages. The Knights of Labor are also identified with the dispute, and the men, it appears, find it obligatory to defend that trades union in its claim to interfere in the management of the works.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal market is quiet and firm. Prices remain unchanged. The amount of sales is fair. The stock on hand is about the same as last week.

From Cincinnati, Ohio: There is a fair volume of trade in coal and fair stocks are in the yards.

From Chicago, Ill.: Coal is quiet, and trade slow.

PETROLEUM.

There have been a number of new wells and old wells redrilled brought in during the past week. In fact there is a very visible renewal of operations. Thus far, however, no significant find can be recorded. It cannot be expected, of course, that at this early day the oil trade will place much faith in either the Lockport, N. Y., or the Missouri reports of discoveries of petroleum deposits. The renewed drilling in the Pennsylvania regions continues; but so does the demand for oil, and on Monday and Tuesday the demand was of such proportions that a marked advance was recorded. On Saturday last, with but moderately brisk trading, the gain made on Friday's close was 1c. Monday evening bettered this by 2⅞c., touching $1.11⅞, the highest closing figure. Tuesday evening the final bid was $1.10¼. Less demand was noticed Wednesday and Thursday, and prices sank back to $1.10 and $1.09⅜ respectively as the final bids in those days.

On Friday the news received from the regions was that the Porcupine Oil Company's well No. 9 will be ready to come in on Monday; but that it may be held back until the last of next week, as the owners may see an advantage in making a mystery of it. The Grandin well No. 11 is on top of the sand and was expected in during the afternoon; still it was not improbable that it might go over until Saturday. Both of these holes are in the well-known Cooper tract, a small producing territory. Prices opened at $1.09⅛ on Friday and varied fractionally until the close of the morning session, when $1.09 was bid. It opened strong at 1.30 P. M. at $1.09¼, and after receding to a fraction over $1.08 again advanced, and at 2 P. M. had touched $1.09¾. At that time the market was firm and the buying here and at Oil City spirited. Other oil centers were enjoying less patronage. At the close the bid was $1.08⅞, against $1.08 at the close on Friday evening of last week, a gain of ⅞c. on the week. The market closed very nervous and unsettled.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	Highest.	Lowest.	Closing.
Saturday, Aug. 4	1.07⅛	1.09	1.07⅛	1.09
Monday, Aug. 6	1.10	1.12⅞	1.10	1 11⅞
Tuesday, Aug. 7	1.12⅛	1.12½	1.09⅝	1.10¼
Wednesday, Aug. 8	1.10	1.10⅞	1.09⅜	1.10
Thursday, Aug. 9	1.10	1.10⅜	1.09⅜	1.09⅜
Friday, Aug. 10	1.09⅛	1.11	1.08⅜	1.08⅞

Refined oil was firmly held at 7¼ @7⅜c. on Saturday, with but a limited demand from exporters. There was no special demand for case oil. Crude was in fair request only. An advance of ⅛c. in refined was made on Monday, as was to be expected from the higher rates for crude. Another advance of ⅛c. was attempted on Tuesday, but was unsuccessful. Crude was active on Wednesday and prices were advanced to 6¾ @7¾c., but the refined fell away on Thursday. Refined and case oil and naphtha were quiet and unchanged. Quotations for crude certificates and refined and crude oils on the dates named were as follows:

	July 13.	July 20.	July 27.	Aug. 3.	Aug. 10.
Certif's, crude	1.08	1.06	1.08¾	1.08	1.08⅞
Refined, 110°	7⅞	7⅞	7½	7¼	7⅞
Refined, 70°	7½	7¾	7⅝	7⅜	7½
Crude, in bbls	6¾@7½	6⅝@7⅞	6½@7½	6⅝@7⅜	6¼@7¾
Case, plain	9⅛	8¼	9⅛	9	9
Naphtha	5¾	5⅛	5	5	5

The exports of petroleum from the United States, crude equivalent, for the week ending August 4, was 20,278,552 gallons, against 9,858,378 in the preceding week. The total export from the United States since January 1 was 370,485,620 gallons, against 394,921,532 gallons in the corresponding portion of 1882, a decline in the current year of 24,435,912 gallons. The total exported from New York city during the week ended August 4 was 16,389,908, and during the year, to that date, 304,925,139, against 313,589,423 gallons in a like portion of 1882. The decrease in shipments on the year from New York alone, as compared with 1882, was 8,664,284 gallons (crude equivalent), or about 33 per cent. of the total decline recorded thus far in the year.

OCEAN FREIGHTS.

The business done in charters during the past week has not equaled that of the preceding seven days, although there were a number of charters engaged during the earlier portion. The movement of grain from Baltimore has been considerable and the outlook is for a continuance of the same. The movement in the berth from this port has been quite active and rates have been firm. Petroleum has gone abroad to a less extent than was expected. Such charters as were engaged were mostly for the East India and Asiatic trade. The renewed buying of exporters during the past few days has improved the general tenor of the ocean freights market, but Baltimore has thus far received the lion's share of orders. Grain room from New York to Liverpool is nominally 4d. per bushel, but less inquiry of late has weakened the market.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The supply of tonnage in port continues small, and rates are stronger both for grain and oil, with an improving demand for charters. Sail tonnage for grain is very scarce.

From Baltimore, Md.: The movement of wheat is large, and a good foreign trade is doing. This improvement has created an active demand for vessels, and the freight market now appears thoroughly aroused from the state of lethargy that it has been in for months past.

From Wilmington, N. C.: In freights foreign spot tonnage scarce. Coastwise is dull.

From Savannah, Ga.: Ocean freights are unchanged, with a continued demand for vessels for coastwise charters.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Trade continues in full force in boots and shoes, and the only complaint now is that shipments cannot be made as fast as wanted. All lines receive attention and the factories are still well employed, though some of them are near the end of their large contracts. The bulk of the shipments for two weeks past have been to the south and southwest. This week they aggregate 76,500 cases.

From Chicago, Ill.: Boots and shoes are selling in small orders.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Leather and hides are depressed by eastern failures, but there are no losses here.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: Business in tobacco is very good, and prices favor sellers for all desirable samples.

From Louisville, Ky.: Leaf tobacco receipts are light. The demand is active and prices are strong. Burleys are well supported and the dark grades are bringing the highest figures of the year. There have been complaints of drouth from most tobacco-growing districts, but light local rains are now prevailing.

From St. Louis, Mo.: Leaf tobacco is in excellent offering again, but sales are small.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Whisky unchanged.

From Louisville, Ky.: The situation in Kentucky whiskies is dull and unchanged.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Minneapolis, Minn.: The lumber market is very quiet. There are some 60,000,000 to 70,000,000 feet of logs kept back by low water, which will not reach the mills in time to be cut this season; but there is enough in sight to keep them running, and the trade will not suffer by the delay.

From Wilmington, N. C.: Lumber and timber dull; shingles firm.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Naval stores receipts are falling off. Spirits of turpentine are advancing; rosins, tar and crude are steady.

SPECIAL LOUISIANA TRADE REPORTS.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar and molasses are very quiet, as usual at this season. Old rice is steady, and the demand and stocks are light. There is some new rice coming in, but not enough to make a market. Coffee is unchanged. Cotton-seed meal and cake are $23.50@$24.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, August 8.—There is little change to note in the situation of business at the banks; the demand for loans is very small for the reason that there is no disposition to enlarge business while the outlook for the future is regarded as unpromising; on the other hand, borrowers who are in a position to pay up are doing so, and the general tendency in nearly all lines of trade is to "slow up." As a result of this conservatism the banks are steadily accumulating idle funds, and discount rates are easier to choice borrowers; large loans can be had at 4 to to 5 per cent., and the market promises to maintain its easy position until the movement of grain to market assumes more liberal proportions, and the present indications are not flattering for such a movement. Those who are conversant with affairs in the interior say that farmers have become so accustomed to high prices, and have learned so much regarding the enormous demand that is to come from Europe for American wheat, that they will only sell as their necessities for funds compel them to part with their grain. The general jobbing trade is slowly improving, and the current week's distribution of dry goods will show a slight gain over the preceding one. Orders for hardware are a little more liberal, and a very fair early August trade is reported in metals and tinners' stocks. Bar and other classes of refined iron are moving slowly in job lots, and a slight increase is announced in sales of nails and pig iron, but the usual conservatism is observed in the selections, and it is evident from the caution with which purchases are made that they are only taken as pressing necessities require. Advices from the northwestern iron districts indicate a further reduction in the output of ore, and it is now said that the value of ore mined and pig iron produced in the Lake Superior and Menominee districts will fall below the estimates of a month since. The boot and shoe trade is quiet, sales being closely confined to small orders to supply the current wants of interior dealers. The caution of buyers has no doubt been increased by the recent heavy failures at the east, but it is not supposed that the Chicago trade has in other respects suffered. Leather is very dull, but as a rule Chicago tanners and dealers have been pursuing a conservative policy; hence they are not now compelled to press sales of goods in order to realize funds. Hides are very dull and weak. A large dealer remarked to-day that "the policy of hide dealers during the past twelve months in keeping up prices far above figures that were justified by the laws of supply and demand was reacting on those who had pursued it with disastrous effect." Wool is arriving in moderate volume. The samples as a rule are very desirable, and meet a fair demand at low prices. The receipts of wheat exhibit a slight increase over the first half of the previous week, but they are very small compared with this date last year. The light arrivals are partly due to the lateness of the harvest, but chiefly to the unsatisfactory prices and other causes noted above. The receipts, however, are amply sufficient for the demand from legitimate shippers, and the reports of stocks show an increase last week. Those who were formerly the largest buyers for the eastern seaboard and European markets say that prices are too high to allow them to touch it, and some of them have not moved a cargo this year. Stocks are larger than ever before at the opening of August, and unless prices are soon sufficiently equalized to admit of free shipments to consuming markets supplies must rapidly accumulate with increasing receipts. Corn is coming in and going out freely, and prices to-day are stimulated by rumors of a corner in August and September, but the present free receipts and the fact that an advance on present prices would not only increase receipts, but check legitimate shipments, seem to render a corner unlikely. Oats are steady and destitute of speculative or other features of interest. The recent heavy decline in provisions has caused a fair shipping demand for meats and lard, and stocks are moving out freely, but pork is handled almost exclusively on speculative account, and there is a growing impression among the trade that consumers will not take any class of hog product with freedom at a material advance on current prices. The receipts of hogs, after making a liberal showing last week, are again declining. This was to be expected, as feeders have not as yet become reconciled to low prices, and when values depreciate, as they did under the free arrivals of last week, farmers refused to accept the reduction, but their holdings only tend to increase the number of pounds for future delivery. The following shows the stocks of

GRAIN IN CHICAGO ON DATES NAMED.

	Aug. 4, 1883.	Aug 5, 1882.	Aug. 6, 1881.	Aug. 6, 1880.
Wheat, bushels	5,730,000	1,250,000	3,848,000	1,862,000
Corn, bushels	1,746,000	1,640,000	2,500,000	3,721,000
Oats, bushels	595,000	155,000	2,031,000	131,000
Rye, bushels	307,000	100,000	127,000	127,000
Barley, bushels	21,000	4,000	26,000	62,000
Total bushels	8,399,000	3,149,000	8,531,000	5,876,000

POSITION AND PROSPECTS OF THE SOUTH.

The following are extracts from a letter written abroad by a prominent New Orleans gentleman on a subject of great interest to the whole country.

As to the present condition of the south it is difficult to return any but a general answer, viz.: That it is, on the whole, as sound as that of any section of our country, and this will be readily understood if, while thought is given to the immense value of the crops raised within the past four or five years, the fact is borne in mind that the proceeds of the crops are distributed among a small and widely scattered population. Thus the present year's cotton crop, roughly estimated at 7,000,000 bales, equal to $300,000,000, is raised chiefly by the states averaging barely 22 inhabitants to the square mile.

Various combinations of firms, or syndicates, have within the past two or three years established agencies in the south for the purpose of loaning money on mortgages of farm property. Their operations are understood to have been successful, though not so large as might have been expected, their terms being considered too onerous by the better and more desirable class of borrowers. It seems fair to state that the south opened the widest and safest field for the employment of capital; while eastern and foreign immigration and money have stimulated the growth of the west and brought values of land in that section to nearly if not quite a maximum, the south has been left to rely for the extension of its agriculture and industries upon the slow accumulation of profits on its crops, and presents still an immense area of unimproved lands which, hanging over the real estate market, tend to keep the salable value of improved property down to a low level. This proposition is illustrated by the annexed table, the figures of which are taken from the census returns of 1880. Comparing three southern states that come within the immediate sphere of our city's financial action with three western states in a geographically analogous situation, the following result appears: Louisiana, Mississippi and Arkansas, average value of improved land per acre, $19.57; average yield per acre, $13.02; Illinois, Iowa and Kansas, average value of land per acre, $13.95; average yield per acre, $6.91.

States.	Improved land, acres.	Value of farms.	Value of farm prod. 1879-'80.
Louisiana	2,739,972	$58,989,117	$42,883,522
Mississippi	5,216,937	92,844,915	63,701,844
Arkansas	3,595,603	74,249,655	43,796,261
Totals	11,552,512	226,083,687	150,381,627
Average value per acre			$19.57
Average crop per acre			13.02

States.	Improved land, acres.	Value of farms.	Value of farm prod. 1879-'80.
Illinois	26,115,154	$1,009,594,580	$203,980,137
Iowa	19,866,541	567,430,227	136,103,473
Kansas	10,739,566	235,178,936	52,240,301
Totals	56,721,261	1,812,203,743	392,323,971
Average value per acre			$31.95
Average crop per acre			6 91

The following table is taken from the United States census and shows the number of farms, area and value of improved lands, amount of crop, and principal articles of production in eight southern states with which our city is more or less in business connections. The area under cultivation and the production of these states have increased since the date of the census, but averages of value and yield per acre remain substantially the same:

States.	No of farms.	Improved land, acres.	Value of farms.	Value of farms' products for 1879-80.	Aver'ge value per acre.	Aver'ge production per acre.	Principal crops 1880. Cotton, bales.	Rice, pounds.	Sugar, hhds.	Molasses, gallons.	Ind. corn, bushels.
Alabama	135,864	6,375,706	$78,954,648	$56,872,994	$11.57	$8.92	699,654	810,889	91	795,199	25,451,278
Arkansas	94,433	3,595,603	74,249,655	43,796,261	20 65	12.18	608,256	.....	....	.....	24,156,417
Florida	23,438	947,640	20,291,835	7,439,392	21 40	7 85	54,997	1,294,677	1,273	1,029,868	3,174,234
Georgia	138,626	8,204,720	111,910,540	67,028,929	13 64	8.17	814,441	25,369,687	601	1,565,784	23,202,018
Louisiana	48,292	2,739,972	58,989,117	42,883,522	21.53	15.65	508,569	23,188,311	171,706	11,696,248	9,889,689
Mississippi	101,772	5,216,937	92,844,915	63,701,844	17.79	12.21	963,111	1,718,951	18	536,625	21,340,800
Texas	174,184	12,650,314	170,468,886	65,204,329	13.48	5.15	805,284	62,152	4,951	810,605	29,065,172

By reference to the official report of the cotton crop of 1881–2 (a disastrously short one for some sections of the belt) you will observe that New Orleans handles the bulk of the Mississippi valley's crop. Georgia appears to be self-sustaining, besides carrying probably a large portion of north Alabama. The central and southern sections of the latter named state are mainly supplied by or through Mobile. Tennessee has a growing financial center at Memphis. Northern Arkansas is to some extent and central and northern Texas are largely dependent upon St. Louis. Our city thus carries exclusively the cotton crop of Louisiana, Mississippi, central and southern Arkansas, and partially that of Tennessee and eastern and southern Texas. This in addition to the sugar and rice crops of our own state, which in 1881–2 amounted to 123,000 hogsheads and 240,000 barrels respectively, representing a gross value of $25,000,000.

The annual report of the Treasury Department shows the value of the foreign commerce of New Orleans for the year ending 30th of June, 1882, to have been $83,092,022 (exports, $70,958,731; imports, $12,133,291), this city holding the fourth rank in this respect and coming immediately after New York, Boston and San Francisco. No official statistics exist of the value of our interior commerce which is roughly estimated at $175,000,000 to $200,000,000. The organized capital is represented by twelve banks with an aggregate of $5,550,000 nominally, but if allowance is made for dead weight, really by $4,500,000 to $5,000,000 banking means.

One result of the disproportion between the cash capital and the business of our city is that those of our merchants who deal with the interior are compelled to hold the largest portion of their means in an immediately available shape to meet the heavy demands that come upon them at harvest time and for moving the crops to the seaboard. They, as far as they can, avoid immobilizing any important part of their capital in mortgages on plantation property. Most of the latter class of business could be controlled by parties who, seeking safety of investments, would be content with a moderate interest on their money—say 6@8 per cent. A large and safe field is presented for operations in short loans, commercial paper, loans on pledge of produce, etc., during the early portion of our active season, say from September to December inclusive.

TRADE EMBARRASSMENTS.

There were 168 failures in the United States reported to BRADSTREET'S during the past week, 13 more than the preceding week, 73 more than the same week in 1882, and 62 more than the same week in 1881. Compared with the previous week the middle states had 38, an increase of 6; New England states 34, an increase of 7; western states 47, an increase of 7; southern states 21, a decrease of 2; Pacific states and territories 28, a decrease of 9; Canada and the Provinces 36, an increase of 4. The important failures were Hersey, Whittier & Wyman, hides and leather, Wright, Worster & Co., wool, The Auburndale Watch Company, manufacturers of watches, William B. Fowle, president of Auburndale Watch Company, The Whipple Music Company, and Charles W. Clement, wholesale boots and shoes, all of Boston, Mass.; Stein & Trough, flour mill, Pottsville, Pa.; George R. Fiske & Co., bankers, Kokomo, Col.; Seltz & Mertz, tailors, Washington, D. C.; Cockroft & Black, manufacturers of worsted yarns, Philadelphia, Pa.; W. A. Northrop & Co., clothing, Cleveland, Ohio; Carl Lotz, coal, Chicago, Ill.; Hersey & Co., tanners, Moose River, N. Y.; G. M. Blotchford & Co., tanners, Glensdale, N. Y.; The First National Bank and The Indiana Banking Company, Indianapolis, Ind. In the principal trades they were as follows: General stores 31; grocers 22; liquors 15; boots and shoes 11; hotels and restaurants 9; dry goods 6; hardware 6; bankers, banks and brokers 7; clothing 5; leather 5; bakers and confectioners 4; drugs 4; furniture 4; butchers 3; coal 3; grain, flour, etc., 3; jewelry 3; paper 3; tobacco and cigars 3; books, etc., 2; iron 2; lumber 2; millinery 2; oil 2; commission 1; cotton 1.

ALABAMA.

ALMOND.—W. S. Rice, general store, is reported to have failed and left town. C. P. Motley & Son, Daviston, Ala., are said to have a mortgage on his stock and to have taken possession of his notes and accounts.

ARKANSAS.

NEWPORT.—J. W. Reid, restaurant, has failed and been closed by the sheriff.

CALIFORNIA.

ALMA.—J. G. Floyd, hotel and saloon, has been attached.

CALUSA.—C. M. Perdue, saloon, has been attached.

GRASS VALLEY.—L. B. Wilson, groceries and wines, has filed a petition in insolvency.

LOS ANGELES.—S. Norton, general store, has applied for relief in insolvency. A meeting of creditors has been called.

OAKLAND.—J. Morris, hotel, has been attached.

POMONA.—Henry Sattler, general store, is offering to compromise at 40 cents.

SAN FRANCISCO.—Clinton & Fagan, theatre and bar, have been attached.

SAN FRANCISCO.—Griffiths & Flannagan, saloon, have been attached.

SAN FRANCISCO.—J. Grunder, boarding, has been attached.

SAN FRANCISCO.—Lun Sun, Lung Kee & Co., Chinese goods. An application has been made to force them into insolvency.

SAN FRANCISCO.—Henry Mahlmann, saloon, has been attached.

SAN FRANCISCO.—Aaron Meyers, cigars, has been attached.

SAN FRANCISCO.—Charles Moeglich, saloon, has been attached.

SAN FRANCISCO.—Pacific Manufacturing & Reduction Works have assigned.

SAN FRANCISCO.—G. Quandt, shoemaker, has been attached.

SAN FRANCISCO.—M. J. Stanley & Co., willow-ware, have been attached.

SAN FRANCISCO.—Steck & Co., Eureka Sugar Refinery. Paul Steck has applied for relief in insolvency.

SAN FRANCISCO.—J. G. Thurston, New York Straw Works, has been attached.

SAN JOSE.—S. A. Gordon, saloon. An application has been made to force him into insolvency.

SANTA CRUZ.—F. Pratschner, saloon, has been attached.

TULARE.—L. Levinger, varieties, has been attached.

COLORADO.

ASPEN.—William Stone & Co., general store, have assigned, with liabilities of $9,300 and nominal assets $4,000.

DENVER.—Edgar Smart, Colorado Tea Company, has been closed out by the sheriff.

DENVER.—H. G. Swenson, contractor, has assigned, with liabilities of $5,600.

KOKOMO.—George R. Fisher & Co., bankers, have been closed on attachment. Assets $20,800, and liabilities $11,000.

CONNECTICUT.

GROSVENORDALE.—A. J. Jodoin, grocer, is offering to compromise at 50 per cent.

NEW HAVEN.—Charles E. Kay, printer, has assigned.

NORWICH.—Albertine Brothers, woolen mills, have assigned.

STRATFORD.—Thompson Brothers, bakers, are insolvent.

TARIFFVILLE.—G. A. Taylor & Son, grocers, have assigned.

DAKOTA.

GRAND FORKS.—H. Wolf, wholesale and retail liquors, has been closed by the sheriff.

MANDAN.—Smith & Smith, grocers, have failed, and been attached for $4,000.

FLORIDA.

LAKE CITY.—J. G. Hinson, general store, has failed and closed out.

GEORGIA.

BAINBRIDGE.—Smith, Boynton & Fleming, general store and turpentine, have assigned.

MILLER'S STATION.—A. L. Mamlock (agent), general store, has been closed by the sheriff.

ILLINOIS.

CHENOA.—John Jourty & Co., shoemakers, have been closed out by the sheriff.

CHICAGO.—I. D. Crawford, Crawford House, has been closed by the sheriff.

CHICAGO.—Bernard Greenbaum, wholesale tailors' trimmings and cloths, has been closed by the sheriff.

CHICAGO.—Carl Lotz, coal, has confessed judgment for $6,650, and assigned. His liabilities are said to be about $42,000, against assets of $25,000.

PEKIN.—Zerwehk Brothers, bakers, etc., have given a bill of sale for $2,500.

PEORIA.—F. A. Koch, wagon maker, has had chattel mortgage foreclosed.

PERU.—Louis Graff, Jr., wagons, etc., has failed.

SIDNEY.—G. W. Helm & Co., general store, have failed, with liabilities of $10,000 to $15,000, and assets of $2,000 to $3,000.

INDIANA.

INDIANAPOLIS.—The First National Bank has suspended.

INDIANAPOLIS.—The Indiana Banking Company has suspended.

JEFFERSONVILLE.—Lancaster & Loomis, boots and shoes, have assigned to C. W. Prather.

SULLIVAN.—B. Koltinsky, grocer, has assigned.

VEEDERSBURG.—Owen Pasley, grocer, has failed.

IOWA.

GLIDDEN.—J. Eaton, furniture, etc., has failed.

IDA GROVE.—Maurice Brothers, creamery, have suspended.

SIOUX CITY.—Cottrell Brothers, wholesale and retail agricultural implements, have been attached for $15,853.

STRAWBERRY POINT.—W. B. Field & Son, hardware, have failed, and offer to compromise at 30 per cent.

KANSAS.

CONCORDIA.—Norton & Reid, general store, have made an assignment to W. G. Read, said to have been subject to a chattel mortgage for $4,000. The total liabilities are $7,000, with assets about the same.

COOL.—E. D. Adams, general store, has failed, with liabilities of $1,100; assets nominal.

KENTUCKY.

COMMERCIAL POINT.—A. J. Berry, undertaker, etc., has been attached and assigned.

LOUISVILLE.—Edward Welsh, saloon, has been attached and closed out.

LOUISIANA.

ALEXANDRIA.—T. M. Biossat, jewelry, etc., has been attached.

DONALDSONVILLE.—F. Leroy, general store, has been attached and closed up.

NEW ORLEANS.—J. Pelletier, importer Havana cigars, is reported to have sold out to E. C. Chauviere and left town. Ukoen & Co. have filed an attachment and issued a writ of sequestration for $1,404 against him

MAINE.

CORINNA.—J. W. Furber & Bro., fancy goods, etc., have had their paper protested within a few days.

PORTLAND.—James S. Libby, bridge builder, has been attached for $220.

VINALHAVEN.—John S. Hopkins, granite, has been attached for $8,000.

MARYLAND.

BALTIMORE.—Charles R. Colladay, groceries and provisions. A petition has been filed by Mr. Carlisle to foreclose mortgage against him.

BALTIMORE.—C. W. Kreidel, stoves, etc., who assigned July 17, has assets estimated at $8,000 against liabilities of $12,000.

BALTIMORE.—The stock and fixtures of George N. McKenzie & Co., who recently failed and assigned, are advertised to be sold at auction on August 15. It is said that the creditors declined an offer to compromise at 25 cents cash.

CRISFIELD.—L. E. Lawson & Co., general store, have been closed by creditors.

FAIRMOUNT.—L. W. Beauchamp & Co., general store, are offering to compromise at 70 per cent.

WASHINGTON.—Seltz & Mertz, tailors, with a branch at Baltimore, have assigned, with nominal assets about $20,0000, actual $16,000 and liabilities $14,000. No preferred claims.

MASSACHUSETTS.

ATHOL.—R. L. Jones, cotton manufacturer, who failed recently, has liabilities estimated at $50,000.

BOSTON.—Auburndale Watch Company, manufacturers watches, have failed and will settle in insolvency.

BOSTON.—George A. Chase is in insolvency.

BOSTON.—Charles W. Clement, wholesale boots and shoes, has failed and made an assignment to A. P. Martin and F. A. Wyman. Liabilities are said to be about $500,000; assets unknown.

BOSTON.—William Colwell, cattle dealer. Proceedings in insolvency have been dismissed.

BOSTON.—William B. Fowle, president of Auburndale Watch Company, has failed. His liabilities are said to be small.

BOSTON.—Hersey, Whittier & Wyman, hides and leather commission and tanners, failed on August 4, and made an assignment to W. F. Mullin, of Mullin & Brown. Their liabilities are about $500,000 and chiefly to banks. They claim to owe nothing for hides. The business has been established since 1874, the original style being Hersey, Washburn & Co., who were succeeded March 1, 1882, by the present firm, the partners of which are Charles W. Hersey, Justin Whittier, Walter F. Wyman, and Lewis W. Nute special for $100,000 to February, 1885.

BOSTON.—Kendall & Phillips, wholesale flour. A committee of creditors chosen to investigate their affairs report liabilities of $36,362, of which $500 is contingent and $35,825 direct indebtedness, and nominal assets of $33,474. An assignment is thought to be the best method of settlement.

BOSTON.—John A. Littlefield, printer, is in insolvency.

BOSTON.—Rogers & Bacon Piano Company, pianos, have failed.

BOSTON.—James Stevenson, commission, has failed, with liabilities estimated at $35,000 to $40,000.

BOSTON.—Turner & Bryant, cotton buyers, are in insolvency.

BOSTON.—John C. Watson, stock broker, has suspended.

BOSTON.—Wright, Worster & Co., wool, have failed and assigned. The business has been established a number of years. The above firm dates from September 1, 1882, and succeeded Wright, Worster & Delano. They were supposed to employ from $100,000 to $150,000 in the business, and stood well with the trade.

BOSTON.—The Whipple Music Company have suspended. The capital stock of the company was $100,000, of which $57,000 was paid in. They were attached last June by New York parties.

BROCKTON.—Edward C. Palmer, hotel, gave a chattel mortgage for $600 and is reported to have left town.

CAMBRIDGEPORT.—John Stafford, groceries and provisions, has failed.

GREENFIELD.—Arthur W. Hull, coal, has failed on account of the failure of Lamson, Jones & Co., of Windsor, Vt., who owed him $5,000 cash. A meeting of creditors has been appointed for August 18.

HUDSON.—Walter H. Howe, butcher, has failed.

LAWRENCE.—Charles N. Jackman, contractor, has been attached for $125.

NEW BEDFORD.—W. A. Hathaway, florist, has been attached for $100.

NEW BEDFORD.—B. H. Waite & Co., dry goods. The recent report that this firm were in insolvency is an error.

NORTH ATTLEBORO.—James N. Franklin, stoves, etc., has failed.

REVERE.—J. C. Barrett, carpenter and builder, is reported to have failed, with liabilities of $10,000.

SHELBURNE FALLS.—E. P. Hadley, boots and shoes. He is trying to compromise with his creditors and continue business.

SPRINGFIELD.—Dwight & Hoyt, iron builders, have been attached.

STONEHAM.—W. C. Holdsworth, confectionery, has failed.

STOUGHTON.—S. C. & I. G. Phinney, manufacturers boot counters, who failed recently, are said to have liabilities of $400,000 or more. There has been no settlement, and they state that they will go into insolvency.

WORCESTER.—George S. Agry, drugs. Closed by attachment.

WALPOLE.—Aaron E. Clapp, manufacturer woolen goods, is in insolvency.

WEST MEDWAY.—E. L. Pond & Co., manufacturers boots and shoes. Closed by attachment.

MICHIGAN.

AUSABLE.—S. & P. Rosenthal, general store, have failed.

BOWNE.—Meyers & Co., grocers, have been closed by the sheriff.

CADILLAC.—J. W. Nelson, saw mill, has assigned.

CHEBOYGAN.—Gustave Rosenthal, general store, has failed.

DETROIT.—Herbert Symonds, stoves and tinware, has assigned to F. G. Russell, with assets of $1,000 and liabilities of $1,788.

MONROE.—Louis La Fontaine has assigned.

MUIR.—Harl & Stevens, general store, have assigned.

OVID.—C. S. Buckley, dry goods and groceries, has failed.

OVID.—J. S. Hastings, grocer, has been closed by creditors.

PIPESTONE.—M. R. Quackenbush, general store, is reported to have left town.

ST. LOUIS.—F. C. Morris, stationery, etc., has been attached.

MINNESOTA.

MINNEAPOLIS.—Paul Payette, saloon, etc., has been closed by creditors.

ST. PAUL.—Louise Briedert (Mrs. J. H.) hardware, etc., has assigned.

ST. PAUL.—Barner & Eldridge, furniture, have made an assignment to O. O. Cullen.

ST. PAUL.—John Endres & Co., saloon, etc., have been attached.

ST. PAUL.—G. A. Michaeles, saloon, has been attached.

WILLMAR.—Merritt & Co., livery, have failed.

MISSISSIPPI.

WINONA.—Sawyer & Co., general store, have been attached for between $20,000 and $30,000, and closed up.

MISSOURI.

ST. LOUIS.—A. & E. Camp, manufacturers of brick, are advertised to be sold out by the sheriff.

ST. LOUIS.—William Goedecke, grocer, etc., closed upon the 1st, and is being sold out by his local creditors.

NEBRASKA.

TALMAGE.—F. M. Specht, blacksmith, has been closed by the constable.

NEVADA.

HAWTHORNE.—F. A. Angell & Co., general store, have applied for relief in bankruptcy.

NEW HAMPSHIRE.

CLAREMONT.—C. M. Leet, millinery, has been attached.

GORHAM.—A. A. Carter, grocer, has failed.

GREENFIELD.—W. E. Downes, saw mill, who was burnt out in May, says he lost $8,000. Has no assets except household furniture, and his father will soon make an offer of settlement.

ROLLINSFORD (Salmon Falls).—B. L. E. Gowen, hotel, has had a note protested.

NEW JERSEY.

CAMDEN.—George W. Scott, boots and shoes. His stock is advertised to be sold at sheriff's sale.

HUNTSVILLE.—Lewis Wilson, miller, has made an assignment to H. A. Wilson and S. H. Hill, of Andover, by whom the business is being closed. The assignment is attributed to the shrinkage in value of real estate.

NEW MEXICO.

SANTA FE.—W. H. Brown, hotel, has left town. His goods have been attached.

NEW YORK.

ALBANY.—French & Johnson, merchant tailors. A receiver has taken possession of the stock and will sell the entire business lease. The cause of this is due to a disagreement between the partners, who have taken this way to settle up the business, which will probably be bought in by one of them.

BROOKLYN.—Joseph Boman, manufacturer of dress and cloak trimmings, has assigned to Sidney D. Rowland.

BROOKLYN.—Thomas H. Turner, stationery, has assigned.

C. J. Patterson preferred to the amount of $2,500.

BUTTERNUT GROVE.—Beaverkill Manufacturing Company, woodenware. Mortgage on real estate for $2,000 and execution on personal property, and said in hands of constable.

COOPERSTOWN.—William L. Snyder, boots and shoes, has assigned to Edgar H. Lake, with preferences to the amount of $1,800.

FORT PLAIN.—Austin Cronkhite, grocer, has made a general assignment, and preferred claims to the amount of $2,600. The assets will probably not exceed $1,500.

GENEVA.—Catherine Fahley (John Fahley, agent), books, etc., has assigned.

GLENSDALE.—G. M. Blatchford & Co., tanners, have assigned. The above firm succeeded H. J. & G. M. Blatchford in the spring of 1882. The Co. is a Mr. Hersey, of Boston, who is of the firm of Hersey, Whittier & Wyman, of that city, and is also of the firm of Hersey & Co., of Moose River, N. Y. Assets and liabilities are not stated.

HUDSON.—R. P. Crapser & Co., manufacturers of knit goods, made an assignment on August 4 to Benoni S. Johnson.

HUDSON.—S. C. & C. P. McArthur, mill supplies, have made an assignment to Benoni S. Johnson.

HUDSON.—McArthur & Crapser, manufacturers of knit goods, made a general assignment on August 4 to Benoni S. Johnson.

MOOSE RIVER.—Hersey & Co., tanners and general store, have assigned. The partners were Charles W. Hersey and Walter F. Wyman. Mr. Hersey was also of G. M. Blatchford & Co., of Glensdale, N. Y., and Hersey, Whittier & Wyman, of Boston, Mass. No estimates of assets and liabilities have yet been offered.

NEW YORK CITY.—T. S. Atwater, bags, has assigned to Justus H. Hesse. The business was established in 1865, and had been, it was thought, very successful, and he was supposed to be worth over $100,000. No statement of assets or liabilities is yet obtainable.

NEW YORK CITY.—Hermann Burghardt, manufacturer of shoes, has assigned, giving no preferences.

NEW YORK CITY.—Isaac Feinberg, hangings, has assigned to Mitchell Hershfield, preferring Harris Rosenthal to the amount of $5,750.

NEW YORK CITY.—Morris A. Feinberg, of Isaac Feinberg & Son, dealers in hangings, has assigned to Michael Hershfield preferring Isaac Harlen for $4,750.

NEW YORK CITY.—Moritz Gruenstein, suspenders, has assigned.

NEW YORK CITY.—Katherine Kafka, grocer, has assigned to Alexander Schwab, giving preferences aggregating $574.50.

NEW YORK CITY.—Lucas & Merritt, coal, have assigned.

NEW YORK CITY.—A. R. Overton, gents' furnishing goods, has assigned to Theodore D. Jones, giving preferences for $425.

ONTARIO.—Jacob Lefevre, general store, has assigned, with actual assets of $2,746 50, and liabilities of $2,225.52.

OSWEGO.—Mrs. F. M. McFarland, grocer, has assigned to David McFarland.

SYRACUSE.—H. R. Hoefler & Co., confectionery, gave a chattel mortgage for $67, and absconded. Their business has been closed by the sheriff.

OHIO.

BEALLSVILLE.—J. H. Weisener, general store, has assigned to Isaac Hatcher.

CINCINNATI.—Mary J. Barger (Mrs. J. N.), millinery, has given a chattel mortgage for $650 and assigned.

CLEVELAND.—J. E. Bayrd, frames, etc., has given a chattel mortgage for $500 and assigned.

CLEVELAND.—W. A. Northrop & Co., clothing, have assigned to Thomas P. Thompson, who is made assignee on a bond of $15,000. The liabilities are estimated at $25,000, against assets of $18,000. The failure is ascribed to overstocking and a late season.

CLEVELAND.—The Union Foundry Company gave a chattel mortgage for $1,600, and have assigned to Nicholas F. Purcell. There are mechanics' claims filed against them aggregating $1,000 or more. The company had a paid in capital of $10,000.

COLUMBUS.—Albert Baumer, hardware, etc., has been closed by sheriff on judgment of $5,000.

COLUMBUS.—The Ohio Law Publishing Company has asked for a receiver.

SANDUSKY.—W. E. Ludlow, manufacturer of derricks, has assigned.

OREGON.

PORTLAND.—Clinton & Fagan, theatre and bar, have been attached.

PENNSYLVANIA.

CAMBRIA.—John A. Stibich, grocer, has been closed by the sheriff.

GREENBURG.—R. H. Young, wagon maker, has assigned.

HARRISBURG.—Henry Burn, grocer, has assigned.

LANCASTER.—A. Bitner has assigned.

LANCASTER.—Lancaster Watch Company, manufacturers watches. The business of this company will be suspended, it being a losing one. The superintendent, A. Bitner, who is also a large stockholder, is said to have sunk $75,000 in the business and has been compelled to assign. It is thought that all debts will be settled.

PHILADELPHIA.—Christie Brothers, grocers. A judgment for $12,000 has been entered against Hugh Christie and execution issued.

PHILADELPHIA.—Cockroft & Black, manufacturers of worsted yarns, have been sold out by the sheriff. Their liabilities are thought to amount to about $40,000. Can get no estimate of assets.

PHILADELPHIA.—Henry Graffelder, manufacturer of tables. Judgment has been entered against him for $850 and execution issued.

PHILADELPHIA.—John P. Hafer, grocer, has been sold out at auction.

PHILADELPHIA.—H. C. Lanphear, novelties, has been sold out by the sheriff.

PHILADELPHIA.—James J. McGuire, grocer, is advertised to be sold out by sheriff.

PHILADELPHIA.—John A. Redles, gents' furnishing, has been sold out by the sheriff.

PHILADELPHIA.—Nav C. Reisky & Co., furs, robes, etc., state that their total liabilities amount to about $58,000, including $21,000 preferred claims. They offer to compromise in notes of four, eight and twelve months, with Reisky's mother's indorsement.

PITTSBURGH.—William M. Hill, confectioner, has been closed by the sheriff.

PITTSBURGH.—Wormser & Co. (Limited), glass manufacturers, have confessed judgment to Weiler Brothers for $7,541 and execution issued.

POTTSVILLE.—Stein & Trough, flour mill, have failed. In addition to some $10,000 of liens they have just confessed a trust judgment (one or more) for some $20,000 to $35,000 in favor of general creditors and to protect friendly indorsements. The personal property is advertised for sale by sheriff on the 14th inst. It is thought that the mill and personal property should bring $25,000.

READING.—D. B. Redney, cigars and tobacco, is in the sheriff 's hands.

SHAMOKIN.—A. Kachelries, grocer, has been sold out by the sheriff.

RHODE ISLAND.

CRANSTON.—A. W. Cutting, grocer, has assigned.

TENNESSEE.

GLEN MARY.—R. Huott, general store, etc., is reported offering to compromise at 50 cents.

HELLENWOOD.—J. A. Potter, general store, has assigned.

JACKSON.—C. F. Willey, confectionery, who assigned recently, has liabilities of about $1,200 and assets $350.

KNOXVILLE.—J. P. Thomas, marble. His affairs are said to be in the hands of an assignee, and it is thought will pay about 85 per cent.

TEXAS.

FAIRFIELD.—Day & Loader, clothing, have been burnt out and attached.

FORT WORTH.—J. R. Dougherty & Co., saddlery. Attachment for over $1,300 reported levied on this firm, and stock only inventoried at about $1,700. There are said to be claims not secured by attachment for $1,728.

NEW COLUMBIA.—T. J. Brack, general store, has been sued and attached.

TWIN SISTERS.—John Kneupper, general store, has been attached.

VERMONT.

ST. ALBANS.—Vermont National Bank has suspended, but it is said the suspension will be only temporary; it was caused by the embarrassment of its its president, Bradley Barlow, who has since disposed of a railroad property to advantage, and is all right financially. So the bank will not lose.

VIRGINIA.

LIBERTY.—James W. Smith, general store, is in the hands of the sheriff.

NORFOLK.—Webb & Jelt, drugs, have made a general deed of trust to V. O. Cassell, trustee. Preferred creditors to be paid in full, and general creditors to take the balance.

WASHINGTON TERRITORY.

DAYTON and POMEROY.—G. T. Parks & Co., notions, have assigned.

PALOUSE CITY.—George Bythe & Co., publishers *Boomerang*, have been attached.

SEATTLE.—G. R. Finn, grocer, has been attached.

WEST VIRGINIA.

KEYSER.—John H. Ashfield, confectionery, etc., has assigned.

WISCONSIN.

ADDRESS PUBLISHER OF BRADSTREET'S, NEW YORK.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

FINANCIAL.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, AUGUST 18, 1883.

NOTES OF THE WEEK.

We have to report for this week 174 failures in the United States and 20 in Canada. This against 168 last week and 36 in Canada. The average weekly return of failures in the United States since July 1 of this year has been 156. For the third quarter of 1882 the average weekly return was 128, and for the same period of 1881 the weekly failures numbered 87. For the second quarter of 1883 the weekly return was 162, and for the first quarter of the same year 245. It is, therefore, seen that the average weekly return of failures thus far in this quarter is 6 less than for the second quarter and 89 less than for the first quarter. The disaster of F. Shaw & Brothers, at Boston, combined with a successful attack of the bears on prices in Wall street, served as the immediate cause of numerous small failures which have gone to increase the current statistics. The downfall of F. Shaw & Brothers is now seen to have had its beginning in the Pacific Bank failure, which again illustrates the truth of our position that sound banking is the key to the stability of the mercantile credit system. The failures at Boston and the financial disasters at New York mark a point of increased severity in the process of liquidation which first became pronounced last autumn. The comparative dullness which has prevailed and the reluctance of the general public to return to the speculation of Wall street, owing to the just suspicion attaching to railway management, doubtless served to force the prices of leading stocks below their real value. What that value is, of course, cannot be exactly determined, but much progress might be made were trustworthy reports issued in all cases by American railway managers. Rightly understood, the fact that the events of the last two weeks have not precipitated worse disasters gives full assurance that the country is approaching a period of greater activity and higher prices without passing through a loan market panic, a time when solvent men are forced to suspend.

Wall street affairs have occupied a large measure of public attention through the week, owing to the severe depression in prices and the failures of firms caught on the wrong side of the market. Much has been heard about the possibility of a panic, but the general sentiment seems to be that the conditions of a panic are not existent now. If it be meant by this, as it seems to be, a panic such as we had in 1873, it is true; for then stocks were at high prices and were widely scattered among the public. Such is not now the case. Stocks have been finding their way back to Wall street for nearly two years past, and are now mainly concentrated in the hands of the professional operators. Ten days ago this fact was used as an argument why there could be no severe break in prices. Securities, it was said, were in "strong hands." Subsequent events have shown that the hands were not strong enough to sustain the load they attempted to carry, and when the tumble came a mass was thrown upon the market. Various causes, as is usual, contributed to aid the depression, and the market ran at times into a very panicky state. The free purchases to cover shorts made it turn again, and Oregon stock bounded back 10 per cent. by Wednesday afternoon from its lowest price of the previous day. It carried the whole market with it. Since then bulls and bears have apparently co-operated in a sustained effort to push up prices, and yesterday the market was rushed upward as furiously as it had been driven down a few days before.

The operators' side of the telegraph controversy was developed before the Senate Committee on Labor and Education during the week, and some facts of interest were elicited. With most of the details in regard to wages, etc., the public has been already made familiar through the statements of the representatives of the Brotherhood which have appeared in the newspapers, and they need not be recounted here. The leader of the Brotherhood of Telegraphers estimated the strength of that organization in the United States and Canada at 22,000 men, and thought that at least 5,000 men were on strike. The Western Union Company, it appears, employed until recently about one-fifth of all the operators in the United States and Canada. About two-thirds of the operators are employed by railroads and other corporations. One-twentieth of the operators are women. The fact was developed that the capitalists fear the growth of labor organizations, and witnesses exhibited to the committee copies of contracts which employers engaged in manufacture had recently exacted from their employés, and which bound the latter to withdraw from the Knights of Labor and to ignore all trade and labor associations.

We give place elsewhere to the concluding portions of Judge Cooley's article in the *North American Review* on the regulation of corporate profits by the state. It will be recalled that Judge Cooley was led to a closer study of the main points involved through serving on the railway commission appointed to consider the trunk-line freight problem. In the article before us attention is first directed to a transformation of the legislative problem in relation to transportation that has been brought about through the advent of the locomotive. In place of meeting modern needs directly by the government "we have persons (a corporation) carrying on a business as a public agency, with the public as a customer, but without the competition which in the case of ordinary business is supposed to be the sole protection against extortionate demands." Thus we have the odious features of monopoly as the result of a grant of a public privilege, and this will be obnoxious in proportion. This while announcing liberal views as to the power of the legislature to interfere. The general position indicated is undoubtedly sound. It is well that the Reagan or other bills did not pass Congress. When the development of the railway system of the country is nearer completion and more is known of the subject than now will be ample time for congressional interference. Such a postponement, however, renders all the more necessary more comprehensive state measures for compelling more satisfactory reports of earnings, etc., from railway managers.

The Controller of the State of New York is receiving from the various corporations throughout the state returns of their gross earnings for the year ending June 30, 1883. The largest amount returned is that of the New York Central & Hudson River Railroad, whose gross earnings for the year amount to $28,929,444, an increase of $4,372,402 over the preceding year. Lake Shore & Michigan's gross earnings amounted to $1,021,401, an increase of $14,000 over he preceding year. The New York & Sea Beach Railroad shows a reduction of $26,444. Among the city railroads the largest amount of gross earnings is that of the Manhattan Elevated Railroad, which reaches the sum of $6,245,589, a gain of $421,011 over the year before. Notwithstanding this gain the surface railroads directly in competition with the elevated system continue to increase their gains, though the largest gain is made by one of these railroads which competes with the elevated railroad only through a portion of its route.

The treaty of friendship and commerce between the United States and the Kingdom of Corea has been proclaimed by the President. An article in the treaty stipulates that the coasting trade of Corea shall not be carried on by American citizens, though according to the Senate's understanding of this clause (which has been communicated to the King of Corea and has not been objected to by him), this clause is not intended to prohibit American ships from going from one open port to another in Corea or Chosen to receive Corean cargo for exportation or to discharge foreign cargo. A violation of the article referred to will subject the merchandise carried in contravention thereof to confiscation. It is understood that the restrictions on Chinese immigration do not apply to the inhabitants of Corea. This is the understanding of the Secretary of State, who takes the view that by the act of concluding a treaty with Corea the United States recognizes the fact that our existing international compacts touching Chinese subjects do not extend to Coreans, notwithstanding the dependence of Corea upon the Chinese Empire. It is not expected that the growth of commerce with the Hermit nation will be perceptible for a year or so, though there is certainly a promising field for the trader there, nearly everything except the simplest necessaries of life having to be brought from abroad.

Mr. Haworth, the inspector having general supervisory charge of Indian schools, reports good progress in the construction and equipment of the new industrial schools, the establishment of which was provided for in the last Indian appropriation bill. Three new schools are to be opened in January next, one in Kansas, one in Nebraska, and one in Indian Territory. Upon the completion of these the Indian schools throughout the country will accommodate 10,250 pupils. The attendance during the present year has been much larger than in any preceding year, owing apparently to the fact that the Indian is beginning to recognize that the chase is a rather precarious means of subsistence in the present condition of the country and that if he would share in the benefits of civilization he must fit himself for the discharge of its duties. The schools to be opened in January will be of a higher grade than the ordinary agency schools, it being intended to teach the pupils useful trades in addition to the regular course of study. The results of the experiment will be looked for with no small concern by the friends of peace and of the nation's wards.

THE PRICES OF FOOD STAPLES.

The process of liquidation through which the country has been passing during the past year has served to facilitate a decline in the prices of staple articles. The prevailing tendency to a lower range of prices, though attracting more attention in other departments of general trade, has in no instance been more marked than in the case of the staple food products. The extent to which this tendency has obtained and the directions in which its influence has been most apparent will be seen from an examination of the facts presented below.

The average price of wheat exported (at New York) for the fifty years ended in 1875 was fractionally higher than $1.33 per bushel. For the five years ending in 1830 the average price of wheat for export was but 89 cents. In the succeeding five years it advanced to $1.20, but from 1835 till 1845 the price was but a little over 98 cents. From $1.25 per bushel in the five years ending with 1850 it advanced to an average of $1.39 in the succeeding five years, went down to $1.29 during the period covered by the civil war, with an average of nearly $1.44 in the following five years, and finished the five years ending 1875 at about $1.32 per bushel, or about one cent under the average for fifty years ended with and including that period. From 1875 down to and including 1880–81, the first year of the late period of inflated prices and commercial activity and coincident with the enormous increase in the production of wheat, the price has averaged lower, at about $1.20 per bushel. One year ago the price of No. 2 red, at New York, ranged at about $1.13 and $1.14. Within the week it has touched $1.17¼, after having been noticeably lower. Still, it is worthy of remark that the price of wheat is not only considerably below the average of late years but below that of a year ago, on the basis of a much larger crop than is now promised. While it is true that the total available supply this year does not promise to greatly exceed (if at all) that of one year ago, still, in view of the statistical position of the cereal at home and abroad, a belief in a higher range of prices for wheat in the future is widely held.

Indian corn prices within the week have been 11 cents below the average price of the same for export during the fifty years ended 1875, which was 74 cents. On the other hand, it has been within the week (at 63 cents) 7 cents above the average export price for Indian corn during the years (inclusive) 1875–76 and 1880–81, when it was 56.4 cents per bushel. Recent reports from the corn-growing belt all point to a large harvest—possibly the largest ever grown. The government agricultural bureau very conservatively places the probable total yield at 1,700,000,000, and practically admits that it may be larger. In view of the exceedingly short estimates made of the corn crop by this authority heretofore, it is quite probable that a very full harvest will be obtained. Inasmuch as the corn is late, however, the opportunities for frost to affect the quality will be enlarged, and this is naturally used in determining prices. Still, on the basis of average prices of Indian corn, the price to-day may be regarded as a full one—one which, relatively, is higher than that of wheat.

The average export price of wheat flour per barrel for fifty years ending with 1875 was about $6.41. For the semi-decade ending with 1855 it was $5.75, but rose to $6.74 in the five years ended in 1865. The succeeding five years witnessed an average price per barrel of $8.03, which was precipitated to $6.47 in the period included between 1872 and 1876–77, when the range of prices was made materially lower through the liquidation incident to that period. From the date last mentioned until the fiscal year 1879–80 the average export price per barrel was $5.87. At the close of July, 1882, winter wheat family flour was quoted at $4.85@$6.15, and at the corresponding date in 1883 it was held at $5@$7. Common extra flour was quoted on the day last named at $3.85@$4.10. Thus it may be observed that while there has been a marked reduction in the prices of this staple it is bringing fair prices when considered on the basis of averages in the light of improved processes of milling. This subject is a matter of some seriousness to those engaged in the manufacture of wheat flour. The profits which have been realized in the production of flour of late years have so encouraged the investment of capital in that direction that there is a possibility of stagnation, owing to what is commonly called "overproduction." A well known authority on this subject recently remarked that "if the building of new mills is not stopped by natural causes" before long an association of millers to limit the production will become a necessity. It is added that the entire crop can now be ground, if the mills of the country all run, in less than three months, and the result is to flood the market as soon as it shows any signs of life. Stocks are thus accumulated which go begging for buyers, and the latter have things their own way from the beginning of the season until the end.

The situation in the market for cornmeal is quite similar to that for wheat flour. The average price of Indian cornmeal for fifty years ending with 1875 was $3.57 per barrel. It went as high as $5.42 in 1870, was but $3.37 in 1876–77, and but $3.69 in the five years ending 1855. The following table giving average prices for the staples already noted during each of the five years ending with the dates noted and at the close of July, 1883, will indicate the existing lower range:

AVERAGE VALUE OF EXPORTS.

	For 5 years ending with—					Close of July,
	1855.	1865.	1870.	1876–77.	1879–80.	1883.
Wheat, bushels....	$1.39	1.29	1.43	1.32‡	1.21	1.17¼
Ind. corn, bushels..	.741	.663	.98	.587*	.543†	.63
Wheat flour, bbls..	$5.76	6.74	8.03	6.47*	5.87†	4.10
Ind. cornmeal, bbls.	3.69	4.52	5.42	3.37*	2.79†	2.75

* 1877. † 1880. ‡ 1875.

The variations in prices in leading hog products during the same periods have been equally notable. The following is a compilation of prices for the dates named:

AVERAGE ANNUAL PRICE AT NEW YORK.

	1855	1865.	1870.	1877.	1880.	Aug. 13, 1883.
Lard, per lb..	10 2.3c.	21c.	15 7-12c.	9½c	7¾c.	8.3c.
Pork, per bbl.	$17.90	$29.22	$26.28	$14.76	$13.09	$15.00
Mess beef.....	.....	.....	.....	12.71	10.20	12 50

The comparatively high prices of beef have been explained as due to the cattle ranch proprietors, who have thus far succeeded in controlling the market for this staple article of food. The average price of hog products is moderately low, far below that at which they were held prior to the June break in Chicago. There have been exports since that time in good sized lots, which indicates fairly well that the prices charged are close to the normal.

INDIVIDUALISM AND CURRENT TENDENCIES.

To any one who has followed the current of discussion during recent years no fact is more apparent than that a great change has taken place in public opinion regarding the relations of the state to corporate enterprise. In many instances where formerly the right of the state to interfere for purposes of regulation and control was debatable it is now unquestioned, and where hitherto the claim of the state to intervene was held clearly inadmissible the question whether the right of intervention shall be exercised or not is now considered an open one, the solution of which is held to depend upon considerations of expediency alone. What renders this change the more striking is that the teachings of political economy, that is, in so far as the revelations of the science have been employed to influence opinion upon social questions, have been adverse to the tendency upon which we have remarked. Economic science, regarding self-interest as the most potent spring in productive development, has seemed to point to an untrammeled play of individual interests as the condition under which a natural economic organization of society could be best effected. The new theory, on the other hand, assuming that under such a condition the general interest is likely to suffer detriment, demands that the state, as the representative of the general interest, shall be entitled to exercise a certain amount of regulation and control.

So long as the change of opinion referred to was confined to the continent of Europe, or to new countries under peculiar conditions, such as the Australian colonies, the matter was disposed of by explanations which looked upon the new tendency as exceptional. In France and Germany, for instance, it was said that the military habits and antecedents of the two countries and the absence of a real constitutionalism rendered a just sense of the proper province of government and of the relations of the state to private enterprise an impossibility. In the Australian colonies, on the other hand, the oldest of which, New South Wales, was originally a convict settlement, it was shown that in an atmosphere of oppressive officialism the habit of dependence upon government was early formed and had given a bent to the subsequent history of the colonies; that at first all public works in those colonies were naturally and necessarily undertaken by government; that the provision for education was solely governmental, and that the financial economy of the country was managed almost entirely from the center of government at home. But of late a tendency to the intervention of government in concerns hitherto held to be matters solely for the individual cognizance has made itself apparent in England and the United States. The recent decisions of courts of high authority in important railway cases indicate the strength of the current in this country, of which a fresh illustration is found in the demand for a government telegraph which has been urged in some quarters. In England many things have been done within the last half century really in violation of the principles contended for by eminent economists, but, as is usually the case there, without sharply attracting attention to the drift of legislation. Now, however, the existence of the tendency to which we have referred is beginning to be recognized, and its underlying principle is being to some degree formulated.

Quite recently, for example, the Railway Passenger's Duty bill elicited from Sir Edward Watkin a vehement protest against what he regards as the unfairness with which railways generally are being treated. He declared that the habit of unjust interference with the capital outlay, the management and the taxation of railway companies had increased and was increasing. The *Pall Mall Gazette*, in an article in which this remark is noticed, contrasts the demand of Sir Edward Watkin for protection to railroad property with the philippic of a French radical against the railways there and the "financial feudalism" of which they form a bulwark, and adds that the principle for which the Frenchman and his party are contending is destined to be still further extended. This principle the *Gazette* declares to be—

> The principle of applying all profits, after the payment of a certain moderate interest upon capital, to reducing the expense to the public of the services which the monopolists are empowered to render. The companies are to be entitled to fair remuneration for their services, but no more. Whether, if this principle is accepted, it would not be better for the state to take the business entirely into its own hands, may be an open question. But that the choice will ultimately lie between one of these two courses seems increasingly probable. The process may be a slow and difficult one, for there is no civilized country in which the classes interested in the maintenance of high profits have not a powerful influence in the legislature. But there is no fear that in any country, where the political influence of these classes is not absolutely predominant, where the constitution is not really plutocratic, the end may not be peaceably attained. And precisely in proportion as a state is not only in appearance but in reality democratic, and as the mass of the people are practically supreme in the management of their affairs, will this idea of the partnership of the public in such monopolies be quietly and speedily realized.

From this it would seem that the tendency referred to is no longer confined to particular countries, but is making itself felt in enlightened and conservative communities, and that the explanations formerly deemed sufficient to account for its presence in certain parts of the world can be no longer considered satisfactory. The principle of individualism so long regnant in economic and political science seems to be losing ground. The inquiry here suggests itself whether the view of the province of government which lends support to the new tendency is a revival or a new development. This involves the determination of the question whether the solution of the grave problems which press upon the age for settlement is to be sought in the remote past, or whether it must be attempted by the light of the present alone, together with whatever of instruction the near future may offer. In the ancient world individual interest was sacrificed to that of the state, and there was no question concerning the legitimate range of state power. In the feudal age, which succeeded, individualism received a tremendous impetus, and such individual liberty as there was appeared in the shape of franchises separately chartered or arrogated, and signified an exemption from duties or burdens imposed upon others or formerly enacted. Does the individualism whose basis of strength was then laid need to be pruned and curtailed in the interest of all, and is the remedy for its evils to be found in a return to the antique conception of the state, or is that rendered impossible by modern developments? These are the questions which present themselves for answer to-day. Upon their proper solution the future welfare of the race largely depends.

THE INDUSTRIES OF NEW YORK AND PHILADELPHIA.

In our issue of the 4th inst. we printed a letter from Mr. Lorin Blodget, in which he set forth some very interesting facts in relation to the industries of the chief cities of the United States. Among other things

he showed that the productive population is increasing more rapidly than the population as a whole, and that the industries are changing their form and are becoming a better resource for those engaged in them, wages being better and the conditions of labor less restricted. Mr. Blodget called attention to the crude form of the statement in which the industries were tabulated in the census of 1880, which, according to his statement, failed to distinguish the industries in full. In another column in this issue will be found a second letter from Mr. Blodget, in which he compares in detail the census returns relating to the industries of New York and Philadelphia, and exhibits the relative positions of those cities as commercial and industrial centres. An inquiry of this nature could not in any case fail to be of considerable interest; Mr. Blodget's investigation is particularly interesting by reason of the evident thoroughness with which it has been conducted and the nature of the results at which he has arrived.

The cities of New York and Philadelphia, it appears, now represent an enormous manufacturing interest closely approaching $500,000,000 each, of which the greater part in both cities, and nearly all in New York, is the growth of the last twenty-five years. New York has especially advanced within the last ten years, and its industries are conspicuous by their commercial value. It appears that in the latter city, in 1880, 11,339 establishments, employing 227,262 persons, produced a total value of $472,926,437, while in Philadelphia, in 1882, 11,841 establishments, employing 241,443 persons, produced a total value of $475,814,402. As will be seen, an interval of more than two years elapsed between the respective enumerations. This has, of course, to be taken into account in any comparison of the relative positions of the two cities in which numerical results are considered.

Generally speaking, it appears that figures relating to the New York industries show an unexpected degree of diversity, and indicate a rapid development of the classes working freely in small establishments. The finer textile industries are gaining in New York, but in the production of the ordinary textiles that city cannot compare with Philadelphia. In industries from absolute raw materials Philadelphia it seems largely exceeds New York, but New York remains the commercial center, the depot and distributing place for an aggregate of industrial products three times greater in value than all that are sold in Paris or London. As will be seen from Mr. Blodget's detailed comparison, the United states census fails to particularize and distinguish the industries of New York, a defect which has been carefully guarded against in the Philadelphia census of 1882. In the Census Compendium the industries of New York are arranged under 164 heads; some heads mentioned in former census returns being omitted in that of 1880, while the Philadelphia census of 1882 classifies the industries of that city under more than 450 heads. The fact that Mr. Blodget superintended the former censuses of Philadelphia, taken in 1860 and 1870, is a sufficient guarantee of his acquaintance with the entire city and its developments, and this, together with the evident care with which he has conducted the compilation and classification of the returns, should give this industrial census a peculiar value. The spirit, too, which leads him to give wide publicity to the results of his researches cannot but be regarded as commendable by all interested in the progress of statistical truth.

THE DIAMOND TRADE.

What has become of all the diamonds mined from the earliest times is a question to which no determinate answer can be given. Some have been buried to escape the ruthless grasp of invaders, others lie at the bottom of the ocean, while a considerable quota have been lost by fire and other accidents. Allowing for disappearance by these causes, diamonds of an incalculable aggregate value must be stored in private hands. India is suspected by many as being the great absorber. The old mine stones of extreme beauty and value, and which never fall off in price—stones gathered ages since—are still objects of search in European Turkey and throughout Central Asia, and are among rare acquisitions. A large proportion of the diamonds which have constituted the stock of trade since 1870 have come from the South African diamond fields, a fortunate resource after the comparative exhaustion of the India and Brazil mines. Brazil supplies limited quantities of extremely fine stones; so also Ceylon. The stones from India are bought at all prices. South African yield is not confined, according to general impression, to medium and low grades. Large London and Paris houses have traveling and residential buyers in India, Turkey and other countries. The product of the Kimberley mines, which occupy an area of one and a quarter square miles, with those of other neighboring mines, and are worked by a number of companies with an aggregate capital of $32,000,000, is controlled by London, French and Dutch syndicates, whose buyers are on the spot, and whose prices at times greatly differ. The aim of each is to consolidate, as far as possible, mining interests in its favor, while they unite in action taken to a certain extent. They are always ready to make advances when mines are working at a loss, or to place goods on the market which they have not succeeded in buying up, securing themselves by a broad margin on the sums advanced. The principal market for rough diamonds is London. These are mainly cut in Amsterdam and Antwerp. The former city has 6,000 cutters of unsurpassed reputation. Large steam factories for cutting have been established there, each containing several hundred machines. The business is singularly individualized, the cutters separately, or in combination with others of the craft, buying and selling stones. As this country is getting to be an important diamond market there is no reason why New York should not hereafter do most of its own cutting.

Fine qualities of diamonds, those which are not off color and in other respects all but perfect, are getting scarcer, particularly blue white. Prices of all grades have steadily advanced since the curtailment of the South African supply. Diamonds in the rough of low grade that brought at the South African mines in February last 30s. per karat now realize 52s. 6d. The stock held here is larger than usual, advantage having been taken by our importers of the low prices then prevailing in the European diamond marts, in anticipation of a more than ordinary active trade. In the last two months the advance on rough stones has been fully 40 per cent., and on cut stones, which are but half the original bulk through the process of cutting, 20 per cent. Prices are still going up, there being no prospect of full operations being resumed at the Kimberley mines for a year or more. While values are variable among the syndicates at the Cape, they maintain a certain uniformity in the European centers of trade. The business of buyers is thus mainly in suitable selections. Transfers are continually taking place between these centers, no customs duties interfering. An intending buyer will often have the very same parcel he has inspected in Paris submitted to him in London. A few months ago, trade being dull here and prices off, it might have paid to re-export diamonds to Paris or London, but the narrow margin of profit, with duty paid, did not justify the venture. The improving scale of the American trade is in part due to the circumstance that the wear of diamonds by ladies is not confined in the United States, as in Europe, to dress occasions. The American trade limits its purchases to well-cut stones, and retail diamond dealers abroad and at home agree that of all purchasers Americans are most appreciative and critical. A circumstance that facilitates assessment of values in this line is that when the eyes have become familiarized to a fine diamond any inferior grade as to form and brilliancy can at once be detected. New York, as the great diamond center of the country, necessarily receives the great bulk of importations. The import trade in diamonds has more than trebled the past ten years. The Treasury customs returns blend fancy stones and diamonds under the head of precious stones. The latter do not amount to a tenth of the aggregate value stated. The aggregate value of the importation of "precious stones" in the last three official years was as follows: Year ending June 30, 1880, $6,698,488; 1881, $8,090,411; 1882, $8,444,525. A moderate number of rough stones are imported, as these escape all duty, and the services of expert cutters are now obtainable here. The former duty of 15 per cent. on loose stones cut was unchanged by the amended tariff. The mounting of diamonds bringing them within the classification of jewelry entails a duty of 25 per cent., and so prevents the importation of jewelery in which diamonds are set, except for patterns. The chief retail trade is that of New York, which is followed in the order named by Boston, Philadelphia, Chicago and St. Louis. A leading demand in the west is for large, fine diamonds.

The preference of the wealthy in Europe for precious fancy stones—such as rubies, sapphires, emeralds, cats' eyes—over diamonds gives signs of being followed here by persons of wealth, purchases being, of course, confined to veritable gems. A perfect fine pigeon-blood ruby is indeed more valuable than a diamond of the same weight. Star sapphires, distinctly fine, are extremely rare; so also Egyptian turquoise. Fancy stones generally, fine and well proportioned, are by no means abundant.

OCCASIONAL NOTES.

Fears were expressed a short time ago that there would be a flood in Egypt, owing to an unusually rapid rise of the Nile. The Paris *Bourse* seems to have been taking account of the rising of the river, and in a recent issue it prints an interesting comparative table, from which it appears that the present rise corresponds to that of the most fertile years that have ever been seen in Egypt. The *Bourse's* showing would seem to indicate that the rise will be productive of excellent results from an agricultural point of view, though later developments may upset these calculations.

Even the average congressman begins to feel that his way has been made smoother through the operation of the Civil Service act, one of the objects of which was to deprive him in great measure of his power of patronage. The ubiquitous interviewer has sought out representatives of this class of public servants and has learned from them that the new law has sensibly relieved them from the importunities of office-seekers, and that, as far as their experience goes, the same is true of department officials. These office-holders have apparently begun to recognize that this same power of patronage, which was at first employed by them as a means to strengthen their own power, at length grew by use to such a degree that it made them in reality its slaves. While it is pleasant to notice that this view of the matter is beginning to prevail in the public service it seems not to have made much headway among the class known as practical politicians. It is even beginning to be discovered by some persons who have been engaged as practical politicians while holding posts in the public service that there is a considerable degree of incompatibility between the two vocations. An illustration of these remarks is found in the recent resignation by an official of the chairmanship of the Republican General Committee of Kings county, New York. The official resigned for the reason that the principal business of the chairmanship was "to secure impossible positions for a vast number of men in the Navy Yard and in other directions." The resignation itself, and the fact that it was found necessary, are alike instructive.

Examinations conducted under the direction of the United States Fish Commission in the gulf of Mexico have led to a report by Mr. M. L. Word, of the United States Navy, in which the opinion is expressed that the fishing interests of the gulf will, when fully developed, compare favorably with those of the fishing banks of Newfoundland. At present there is no comparison, though the large market at hand in Cuba alone, not to mention any other, should go far to make gulf fishing a financial success. The field is now occupied only by small sailing vessels, badly equipped, with no means for keeping ice and with no facilities for obtaining it. The banks are said to be much larger than is generally supposed even by the fishermen themselves. As there has been practically no supply there has been but little demand, and the fish caught near the northern gulf coast bring very low prices. There is much to be learned, it seems, concerning the habits of the fish in order to develop the fishing interests of the gulf to the full, and the investigation necessary to elicit the needed information, it is pointed out, is not likely to be carried out successfully until the government takes the matter in hand. This done, the fishing interests of the gulf would develop enormously, and by means of the refrigerator car plan—both afloat and ashore—every city and town in the United States would become a ready market for a moderate supply of fresh fish. Such a plan as that outlined, however, would, as Mr. Word suggests, require the attention of capitalists to be drawn to its advantages, and these advantages would only show themselves when the sources of supply had been accurately determined and the conditions affecting the supply well enough investigated.

In an article giving an account of the lumber resources of New Mexico the *New Mexican Review* says that there is scarcely a section of the mountainous regions of the territory that does not grow heavy pine of fine quality. Flourishing forests of this wood, it seems, abound in nearly all parts of the territory; while on the other hand there is very little hardwood grown there, that useful wood, the oak, being found only in small quantities, and its growth being somewhat stunted. The laws relating to the subject are very favorable to the cutting of trees for the lumber industry. Altimber situated on mineral land may be cut by any one, without locating the property or paying anything for the privilege, the only restriction being that it shall not be sent out of the territory unless in a manufactured state. On lands available for agricultural purposes, on the other hand, there are stringent laws against cutting timber, even when the lands are unlocated. As the greater part of the territory, however, contains minerals in some form, there is, as will be seen, a very wide field for lumber operations, mineral lands being held to include land containing minerals in any form. The journal mentioned complains that, notwithstanding the richness of the lumber resources of the territory, the bulk of the lumber used there comes from the northern states, a large proportion being sent already dressed from Chicago. It therefore suggests that saw mills and planing mills could be made very profitable establishments in New Mexico, since the demand for finished lumber products is already large and is constantly on the increase, and the kind of labor mainly required is cheap. The *Review* is of the opinion that investments of money in the lumber business in New Mexico would undoubtedly prove renumerative.

The development of industry in Russia during the last fifteen years has been rapid and great. In 1867 there were in European Russia 17,488 factories, employing 369,203 hands and producing articles representing a value of 335,855,392 roubles. In 1879 the factories had increased to 27,927, employing 689,452 hands and producing 909,000,000 roubles. That is, the factories had increased nearly 60 per cent., the workpeople by 86 per cent. and the value of the products 171 per cent. In addition there are the articles subject to excise, namely, the manufacture of sugar, spirits, beer and tobacco, amounting to 350,000,000 roubles. All these industries are protected by the Russian tariff, and the custom house returns show the sum of 324,000,000 roubles levied on raw material or manufactured articles necessary for the Russian factories. Equal progress is displayed in the mining department, especially in steel.

	1881. *Pounds.*	1872. *Pounds.*
Zinc	277,041	188,144
Tin	604	263
Iron, cast	28,661,720	24,374,956
Iron	17,839,190	16,368,476
Steel	17,967,360	511,728
Coal	67,022,742	21,258,477

The production of gold does not fluctuate much. In 1880 it amounted to 2,642 pounds; in 1881 it fell off, owing to the heavy rains of the summer of that year, but may on an average be found to amount to 2,500 pounds per annum.

SPECIAL CORRESPONDENCE.

ST. LOUIS INDUSTRIES.

St. Louis, August 13.—A review of the workings of miscellaneous manufacturing establishments in St. Louis since the opening of the year shows that, taken altogether, our productive industries have been doing exceedingly well. Excepting, perhaps, some iron furnaces, some glass works and the flour mills, it is almost certain that the actual output of our industries in general much more nearly represent their full productive capacity than in any previous period of as many successive months. Neither, upon the whole, has it been a period of special risk

or anxiety. The worst that the proprietary interest suffered was sharing the apprehensions of the country at large on labor questions. Now, however, they look forward to eight or ten months, at least, of peaceful progress, and are happily in a condition to make the most of the opening opportunities. Even when the wage issue was in violent agitation our manufacturers were at heart evidently confident, for there have been remarkably numerous instances, scattered along through the whole period since the close of 1882, of increases of operative capital. Private and corporate owners have alike pursued this course. Moreover, the manufacturing line has been among the very steadiest and most constant in application for discounts at the banks, thus showing that even where there may have been no permanent increase of capital the rush of business necessitated a temporary practical increase.

But it must not be imagined that this is at all indicative of recklessness. The St. Louis manufacturer is *sui generis* in his practical adoration of the conservative idea, and he wraps himself in it as in a garment. He is especially careful to cultivate it in the direction of reticence, and does so to an extent which is generally amusing and sometimes irritating. Next to having his paper protested he most dislikes it to be known that he is making first-class progress, and on this account St. Louis was the most difficult city in the Union as to the collection of manufacturing statistics for the last census. No, St. Louis manufacturers do not increase their capital until they think they have to to keep out others, and even then it is ten to one that they will give the proceeding a sort of funeral tone. It is said of one of our manufacturing potentates that when the board of directors of his concern had found it in order to declare an unusually heavy dividend, it was only with difficulty he was overruled in the notion of sending out stockholders' dividend notices in mourning envelopes by a messenger with crape on his sleeve.

With additional capital there has been a quite general enlargement of works. There have also been organized a number of new companies and some locally novel industries. For instance, a match factory has just been started with a "plant" costing $50,000. It is in no way connected with the "Diamond Match Company."

As to specific lines of industry some facts can be given that go to show that there will be great briskness and a huge output of goods ready for market during the approaching autumn. St. Louis has the reputation of being the greatest producer of iron and steel chains in the country. Excepting short intervals of idleness devoted to making necessary alterations, repairs and enlargements, our chain factories have been worked to about their full capacity all the year. Their stock is now slim and much smaller than at this time last year. They are in full operation, and have orders ahead that will keep them busy for a long time. Yet prices have ruled low in the chain markets. We have a shovel factory that has been continuously busy this year putting out 100 dozen shovels or spades per day. Part of the time it runs "double turn," when it can put out 200 dozen shovels per day. It will continue to have all it can do this fall. Our several malleable iron works have all been kept busy and now have plenty of work ahead. The production of architectural iron is an immense and growing industry here. One company has this year so enlarged its works that the establishment now is believed to be the most extensive of its kind in the country. In this line also work has been very constant, and the outlook for increasing orders was never more flattering. Exclusive, perhaps, of some specialties, in fire-clay products it is probable that St. Louis leads the country. At one time early in the year the demand was rather slow, though not discouragingly light. Since then the business has been excellent, and inquiries indicate unusually heavy fall orders.

There are signs here that the southwest and south are on the eve of competing in all lumber markets with the northern pineries. Our great saw works and our manufacturers of wood-working machinery have this year had an unprecedented run of orders from the south and southwest, and have had a busy year, and there is nothing which now threatens a diminution of their trade. From the same section there has come an unusual demand for belting. This is another important line of our manufactures, in which there are several establishments. They are having a generous amount of work. Their trade reaches about over this country, and they now have a steady custom from Europe, especially from France and Belgium. The agricultural implement producers have had little, if any, idle time, and the autumn seems likely to be busier than is ordinary with them. Boiler shops, nut and bolt works, stove works, furniture factories and car factories and brick works are among others in which the demand for products has been almost constantly healthy and encouraging, and in some cases has been verily surprising. Not for years has the industrial situation in St. Louis been so full of satisfaction as to the amount of work recently accomplished, in progress, and immediately prospective.

IDAHO AND WASHINGTON TERRITORY.

Boise City, Idaho, July 15.—During the past two or three years a good deal of attention has been directed to Idaho and the extreme northwest territories, partly on account of the near completion of the Northern Pacific Railroad and the Oregon Short Line. The former has had its greatest effect in calling settlers and others to Oregon and Washington Territory, the latter more especially to Idaho. The Oregon Short Line takes its departure from the main line of the Northern Pacific Railroad at Granger, Wyoming Territory, and crosses the Territory of Idaho nearly east and west to and beyond Shoshone (known to the Post Office Department as Naples). The line in Idaho runs mostly through beds of lava and volcanic ashes. In the valley about Boise City some excellent farming lands are situated, which are fairly-well cultivated, but as a rule the road runs through a section of country which will unquestionably need irrigation to produce much. From Shoshone a branch has been built into the Wood river mining district some fifty-five miles, the present terminus of which is Hailey, the county seat Alturas county. Some few mines are already developed in this locality and are paying well, though no very heavy outputs have been made. Bellevue and Hailey, the two largest towns in the region indicated, have been built mostly on their prospect of being important centers, and to-day Bellevue is feeling the depression consequent upon the carrying through of the line of railroad to Hailey. Bullion and Ketchum, much smaller towns, are sustained largely by the periodical distribution of money to employés. The former has several paying mines in the vicinity; the latter town enjoys the patronage of the works of the "Philadelphia Company," the largest smelter in the territory. The excitement at present, however, is about the Bay Horse district, the town of that name for the past year having attracted many prospectors, merchants and others, and to a large extent has drawn these from older camps, where the excitement had died away. In this locality several very rich mines are being worked. Along the banks of the Snake river some good placer deposits have been found and are being worked. In some of them miners claim to make $7 to $10 per day with the cradle. Silver City may be said to have reached and settled on its proper level in the working of the old mines, which yield a steady output. In the Idaho City district the mines are almost entirely placers, and the banks of the creek are pretty well scaled off for miles. Under the debris and tailings some good diggings are said to exist, which have been covered up in the rush for the richer deposits. The latter have been worked for years. From time to time the question of putting a bed-rock flume along the creek for several miles has been agitated. The object is to clean up these deposits and recover the gold and mercury amalgam, which the creek doubtless holds. But the heavy expense which this would entail has always prevented any action.

As a grazing country Idaho is "patchy," and in most of it the extreme cold and deep snow render the wintering of the stock too hazardous to be followed to any extent. In a few localities grazing has, however, been carried on satisfactorily. A similar story, as to extent, may be told of Idaho farming lands. No extensive farming areas are found, except at the north, where, owing to warm atmospheric currents, the severity of the winter is much less than further south.

Lands about Lewiston and similar tracts in Washington Territory bring in some cases $20 to $25 per acre, which, considering the low price of wheat to the farmer (50c. to 55c. per bushel), would hardly appear at that price to be desirable purchases in the face of better rates in Dakota and Nebraska. People, however, who have gone to the far northwest are sanguine. But the relations of the Oregon Railway & Navigation Company and the Northern Pacific Railroad Company are not such as to promise relief from the onerous freight tariff with which the whole extreme northwest is at present handicapped. Nor does it seem likely that the Oregon Short Line, in its present shape, will afford the relief looked for, inasmuch as an outlet for anything raised west of Idaho will doubtless be subjected to arbitrary freight tariffs to Baker City, its prospective terminus, unless it shall seek an outlet to the Columbia river of its own. That would be a very expensive venture when the topography of the country is considered. The lands being new and very fertile the best portions will probably average 40 per cent. better in wheat than the best Illinois and Iowa lands; though considering the cost per acre and price per bushel they will pay the farmer much less, while some crops which in the latter states can be raised advantageously cannot be cultivated in the region under discussion.

Boise City, the capital of Idaho, and its metropolis, enjoys a good trade, though restricted in its area, and has been steadily prosperous. As a rule its merchants are easy financially and depend but little on speculative sources for trade. How far this will obtain in the future remains to be seen. The decision of the Oregon Short Line to build a branch to Boise will of course revolutionize its methods to a great extent and introduce a competition which it has not heretofore experienced, and though its people express themselves confidently of the future, there is still discussion enough of the prospective advent of the railroad to convince a stranger that the question is by no means a settled one. On the whole it would appear that those desirous of bettering their fortunes by coming to this part of the country would probably lose nothing by waiting.

NEWS BUDGET FROM AUSTRALIA.

Sydney, July 10.—The New South Wales Parliament has adjourned, having performed the special work for which the short session was convened. The interest in politics is not active, however, although it is known that the government intends introducing a land bill prohibiting, among other things, selection before survey, which has been productive of so many abuses, and is the prolific parent of the "dummy" system. That the land law of New South Wales needs amendment none can deny, but it will be a remarkably well-drawn act that will prevent land-grabbing. Free selectors are mere fences for rich plunderers, who are absorbing the best of the crown lands as fast as possible. A civil service reform bill is also promised. This is a cheap way of making a reputation for reform and economy, but I always observe that the civil service incubus is increased with every reforming measure. I don't know how it is with you in the United States, but that is our colonial experience.

We have placed a loan of £3,000,000 on the London market, the minimum being fixed at par. Tenders were to be opened July 17. The loan will be inscribed payable to bearer at the Bank of England, which will make it all the more valuable as an investment. It may be doubted, however, whether we have not done quite enough borrowing for some time to come, but if the resources of New South Wales are considered, its debt is small compared with other colonies of the Australasian group. It is said that South Australia will soon follow our example, and draw upon futurity for present needs. As a matter of fact, these colonies are unique in finance. They subsist in part upon loans and the national capital, land, which they sell, and then treat the proceeds as ordinary revenue. This, of course, makes money plentiful for the time being, but debts must ultimately be paid, and futurity will doubtless bless our reckless extravagance, which is not only eating up a continent but hypothecating its revenue for all time.

There is great stringency in the money market, the bank rates being 7, 8, and 9 per cent. discount for three, four and five months' bills. Interest on time deposits 4, 5, and 6 per cent. for three, six and twelve months respectively. Land sales having fallen off, the government deposit at the associated banks was reduced £934,000 in the three months ended June 30. This drain put a damper upon new enterprises and checked the industrial development of the country. The revenue of New South Wales for the fiscal year 1882-3 was £7,062,873, against £7,209,764 in the preceding year—a decline of £146,890. But the decrease on the last quarter of 1883, compared with the corresponding period of 1882, was £193,240, showing that we are upon the down grade. The customs revenue for 1882-3 was £623,283, an increase of £7,697 over last year.

There was no special feature in the export trade last month. Imports were inactive, owing to excessive stocks accumulated in the two previous years. Prices could not be sustained, and a great many weak houses went by the board from the opening of the year, and the end is not yet. English consignors kept pouring in goods reckless of consequences, and they are now gathering as they sowed. Prudent men are curtailing their business, but the general tone is not elastic, despite the certainty of good harvests.

The opening of the railroad connecting Sydney and Melbourne was celebrated by a great banquet, at which the governors of New South Wales and Victoria made speeches. There was some federation talk by politicians, but federation is more likely to result from the pressure put upon the colonies by the Liberal ministry refusing to sanction the annexation of New Guinea and the New Hebrides than by anything else. The colonies have set their heart upon this, and England must either assume the responsibility or let the colonies go their own way. This the home government would not do, inasmuch as the patronage and profit incident to the possession of a great colonial empire are too potent influences to be disregarded by any administration. But there is some apprehension that the French have stolen a march on John Bull and sent a war-ship to New Hebrides and hoisted their flag. A formal complaint has been made to the Foreign Office, and through it to France, regarding the lawless and aggressive acts of French citizens in the New Hebrides group. I should also mention that federation is opposed by ultra loyalists because federal union in America preceded the revolution. A similar result is dreaded in our case. Thus the lessons of history are read backward.

The Engineers' Exhibition in Sydney was one of the most successful and instructive enterprises ever attempted in the colony. Thousands attended it daily. The machinery in motion and models were very numerous. Agricultural, mining and marine machinery were exhibited separately. Models of boats, railroad and telegraph appliances, American sewing machines, etc., were on exhibition.

New Zealand usually leads the van in novel legislation. Sir George Grey, formerly governor, has introduced a bill to regulate the mode of annexation of all the islands of Polynesia, and bring them under a British-colonial protectorate. It will probably pass. The revenue receipts last year were £3,957,000; expenditure, £3,835,000; estimated revenue for 1883, £3,609,000; estimated expenditure, £3,661,000. It is proposed to make up the deficit by increasing the property tax. New Zealand is now beginning to feel the pinch of rapid borrowing, but population is flowing steadily in from Great Britain, and it is in a generally thriving condition.

Last financial year's revenue of South Australia was £2,086,264, being £104,167 less than the estimate, and an actual decline of £155,821, as compared with the receipts of last year. The decrease is in land revenue wholly. The revenue proper showed an increase of £120,000 on the year. As already stated South Australia is going to London to borrow money for public works. French colonies for grape-growing are to be established in South Australia.

Queensland had an income of £2,383,859 last fiscal year, which was an increase over the previous one of £281,764. It is in a flourishing condition generally, although the land and pastoral revenue fell off, as indeed it did in all the other colonies.

Every head of revenue except land sales showed a healthy increase in Victoria, whose total income from all sources last fiscal year was £5,589,472.

These figures will give readers of BRADSTREET'S who are accustomed to national statistics an idea of the progress of the Australasian commonwealths. There is every sign of a revival in the mining industry. The export of foreign meat to England has become an important factor in the colonial trade, more especially in the case of New Zealand, which ships better meat—it sells for more money—and more of it than any other colony. Several new steamships of the highest rate of speed are being built for the inter-colonial trade. The Queensland Parliament rejected the bill authorizing the construction of a transcontinental railroad on the basis of a land subsidy, which the government had introduced. There is no earthly use for such a trunk line, nor will there be for half a century to come, but as the Queensland politicians always strive to keep in power by disbursing borrowed money in favored localities, this scheme, it was hoped, would keep Sir William McIlwraith in office during his natural life. The labor question is still afflicting Queensland. The planters want contract colored labor and the white immigrants oppose them.

POINTS OF INTEREST FROM THE ORIENT.

Yokohama, July 19.—Imports have been inactive for some time past. Silk has advanced in price, owing to the prospect of a short crop in China and a Franco-Chinese war, compelling purchases on French account to be made in Japan. Of 44,232 bales of silk exported from Shanghai for the ten months ended March 29, 1882, 24,912 bales were on French account. War between France and China would therefore transfer the bulk of this trade to Japan direct, although a good deal of Chinese silk might find its way through English and Italian merchants into France. Besides this speculative

element, it is known that the silk crop is short in China. There is, however, a reserve of some 15,000 bales in Chinese hands at Shanghai from last season's crop, which must find its way into the market and would about make up the deficit of the present year. The native newspapers are discussing the probabilities of war between France and China with intelligent earnestness. They anticipate an active demand for coal and food products by both powers, but agree that should China be victorious that empire would probably turn its arms against Japan. Although there are reports of insufficient nourishment of silkworms in some places, a good crop of silk is certain in Japan.

Tea will be short in three provinces at least—Suraga, Totomi and Ise, the principal producing districts of the empire. There is little animation in tea; owing to unfavorable advices from New York. The news that Mr. Davies, tea appraiser at that port, had condemned a great deal of adulterated tea by the Flintshire was not unexpected here. The wonder is this action was so long delayed by Americans. Shipments of low-class Japans and Pingsuey greens have been made; also tea dust, which was unfit for consumption. This was the rejected rubbish of last season, added to very inferior teas bought at from $5 to $8 per picul.

The silk season for 1882–83 closed June 30, with a total export of 28,734 bales, being nearly 33 per cent. increase over the previous season. The average weight per bale was 92 catties and the total 26,412 piculs. The shipments to the United States were 9,589 bales, against 7,022 bales during the previous season, an increase of 36½ per cent. This is the largest silk export since Japan was opened to foreign trade. The silk industry, however, is in its infancy, and is capable of very great development. The official steps taken to collect and disseminate useful information regarding it, outlined in a former letter, are certain to produce beneficial results.

The native and foreign press are discussing the policy of borrowing money for resumption of specie payments, owing to the success of a similar operation by Italy. But similar conditions do not exist in Japan. Adherence by it to the plan of withdrawing the bank circulation, as detailed in a former communication, is undoubtedly the best and safest policy for Japan to pursue. It will accomplish the purpose in due time without any monetary disturbance and without cost to the nation. Resumption by means of borrowed money would increase the public debt to a very serious extent, incurring liabilities which it would be extremely difficult to meet.

The Japanese troops are to be withdrawn from Korea at the end of this month, an armed police force, trained since the military occupation of that country, taking their place. A force of 500 Chinese soldiers still remains at the capital of Korea. Application has been made by the Korean government to the Mikado's government for mining experts to develop the rich mineral resources of their country.

A further order for Murata rifles has been received at the Japanese arsenal from China. The French invasion of Tonquin appears to be as much a revenue proposition as it is one of trade. It is contemplated to annex Anam and pension the king by an annual payment of one-third the estimated revenue, aggregating $7,000,000. English, Chinese and Americans control nearly all the trade of Cochin China, which France is so anxious to protect. The Tonquinese are easily dealt with, but the hill tribes are warlike. They made it so hot for the Chinese, who took possession of Tonquin in 1418, that after ten years' occupation they withdrew and never returned. Anam conquered the province in 1802, but the hill tribes did not submit, and they are as bitterly opposed to the French.

The organization of our post office department is satisfactorily progressing. The Central Post Office Bureau is establishing seventy-one branch offices throughout the empire.

The railroad between Tokio and Takasaki will be opened for traffic in August.

LETTERS TO THE EDITOR.

THE MANUFACTURES OF NEW YORK AND PHILADELPHIA COMPARED.

To the Editor of BRADSTREET'S.

SIR—The forms which productive industry has assumed under the rapid growth of American cities are worthy of study quite as much as the numerical expression of these industries in persons employed and values produced. The marked and obvious tendency of many of these to grow to great proportions as single establishments and to show superior results due to energetic management is only one of the phases developed. Another, scarcely less important, is the diffusion of compensated employment in the finer and artistic industries which has so long been a feature in the greater European cities, but which is now growing here in a more liberal and beneficent manner. Employers are numerous, and the numbers employed vary through a wide range—modeling and molding, painting, enameling, engraving, embroidering, zephyr and lace working, artificial flowers, artistic work in many forms of ornamentation on furniture and household articles, clothing, jewelry, book and serial publication and photography. The numbers so employed have increased rapidly within a few years, and they form distinct industries, which should be as carefully noted and as fully reported as the more easily counted employments in factories. They add greatly to to the resources of a city population, and do more to promote social prosperity and the general amelioration of city employment at wages than perhaps anything else.

The greater interest of the general public, however, is in the usual numerical results, and especially in the values produced. The cities of New York and Philadelphia now represent an enormous manufacturing interest, closely approaching five hundred millions of dollars each, yet the greater part of it in both cities, and nearly all in New York, is the growth of the last twenty-five years. New York has especially advanced during the last ten years, and its industries are conspicuous for their commercial value. The industrial census of New York was very fully taken in 1880, and the first returns were thoroughly revised and corrected before compilation. But it is very much cut down and obscured in the form of publication given it in the Compendium, the number of distinctions being reduced to 164, and the terms retained being chiefly the more common industries and trades. The trades are not properly industries, and "blacksmithing," "coppersmithing," "paper-hanging," "slaughtering," and "wheelwrighting" are not properly manufactures. If articles of copper or iron are made these products should be defined by the name of the articles. The actual manufactures of iron, steel, copper, brass, and bronze must be very large in New York, yet they scarcely appear in the census schedule. Machinery is not named, except under the general term, "Foundry and machine shop products," which would be understood as relating to machinery repairs. Exception should be taken to the large aggregate for "Slaughtering and meat packing," which is $29,297,527; a small part probably represents meat curing, but the main portion is merely wholesale slaughtering at the abattoirs, and not a manufacture. The production of tallow and grease and the refining of lard are barely admissible as industries approaching manufacture, but as all the ordinary errors of a census are on the side of omission the presence of even doubtful elements would be compensated by omission of that which should be in.

The inadequacy of the schedule renders comparison very difficult, but the actual industries of Philadelphia are reported in the city census of 1882, and they show over 480 proper distinctions, at least 350 of which may be assumed to be condensed in the 164 official designations used in the statement for New York city. The difference between the two cities is not so likely to be in the presence of industries in one which are wholly absent in the other as in the relative development they have in either. Perhaps the best method of comparing the two will be by the use of groups, as nearly correspondent as possible, with explanations for each group, perhaps to take each alphabetical letter; thus we have under A:

	New York.		Philadelphia.	
	Persons.	Values.	Persons.	Values.
Acids	....	.....	323	$1,365,000
Agricultural implements	....	.....	429	710,735
Alcohol and spirits, distilled and rectified	...	.....	125	809,500
Alum products	....	.....	165	793,000
Ammonia products	....	.....	65	227,500
Ammunition	....	.....	163	280,900
Animal charcoal	....	.....	48	258,000
Architects' specialties	....	.....	193	537,500
Artificial feathers & flowers	3,497	$4,298,684	560	400,000
Artificial limbs	17	44,620	32	48,000
Artificial teeth	....	.....	199	307,200
Art work in oil, statuary, etc.	....	.....	51	120,400
Assayers and refiners	78	2,614,877	75	1,490,000
Awnings and tents	204	457,035	122	183,000

This number of entries is but half of the schedule at Philadelphia, but it includes all at New York, with one brought back in fact, viz., "gold and silver refined," which is put under "Assayers." Former census returns for New York have shown agricultural implements, art products, alcohol, etc., and they undoubtedly exist.

	New York.		Philadelphia.	
	Persons.	Values.	Persons.	Values.
Bags—cloth and paper	958	$3,884,147	680	$1,492,500
Bakery products	5,587	7,603,000	3,240	7,997,496
Bedding and mattresses	298	1,023,494	248	580,860
Belting and hose	257	1,699,729	78	332,600
Blacking	86	432,660	199	501,000
Blacksmith	579	937,144	858	1,232,200
Bookbinding & blank books	4,088	4,927,880	2,210	2,702,000
Book printers & publishers	3,193	7,232,118	1,998	5,752,810
Boots and shoes	5,670	7,943,702	10,149	12,643,300
Boxes—wood, paper & cigar	3,685	4,451,958	2,487	2,472,400
Bricks	....	.....	3,334	2,970,200
Brass foundries and work	1,330	1,826,845	966	2,366,070
Bronzes and mixed metals	....	.....	192	2,312,400
Brewers—ale and beer	4,245	19,137,882	1,588	6,844,000
Brooms and brushes	694	1,573,561	1,405	1,613,794
Butterine and oleomargarine	248	5,215,393	157	585,000
Buttons—silk, pearl, etc	850	491,027	494	462,700

Two of these of the New York list are also brought from alternative designations—brewers from "liquors malt," and butterine from "oleomargarine"—in order to compare with the order of the Philadelphia list. There are sixty-one distinctions under this letter in the Philadelphia list, and but eighteen in the New York list, which is clearly inadequate. Barrels, baskets, bath-tubs, blacklead crucibles, bleachers, bristle dressers, bricks, bronzes, etc., are not in the New York list at all. Book printers and publishers are not distinguished, but are included under "printers and publishers," and we estimate a separation, giving to "books" one-third of the total of printing and publishing, as it is found to form less than one-third in Philadelphia. The totals of all printing and publishing will be given under that letter. It is clear that the New York schedule under B is far from complete, although the aggregates are large.

	New York.		Philadelphia.	
	Persons.	Values.	Persons.	Values.
Canned vegetables & fruits	....	.....	161	$241,000
Cardboard and cards	....	.....	340	832,600
Carpenters and builders	3,499	$7,096,315	3,831	7,129,700
Carpets—brussels, ing'n, &c.	....	.....	11,043	20,300,445
Carpets—rag, list, wood, &c.	....	.....	242	317,500
Carriages and wagons	1,602	2,613,361	2,061	2,956,528
Carriages—children's	278	434,569	138	193,100
Cars—railroad	348	547,037	2,121	6,364,600
Chemicals—not specified	....	.....	1,473	6,241,925
Clothing—men's	47,647	60,798,607	24,649	34,704,700
Clothing—women's	12,366	18,930,553	4,342	4,649,333
Coffee and spices—ground	440	5,974,458	56	360,700
Coffins and caskets	418	1,098,103	210	370,200
Coinage—U. S. Mint	....	.....	377	48,309,395
Combs	11	13,719	60	74,200
Confectionery	1,747	4,592,622	1,952	5,345,650
Cooper (and barrels)	455	895,571	828	1,406,262
Copper manufactures	369	925,289	123	354,700
Cordage and twine	....	.....	991	1,973,000
Cotton goods	235	532,542	11,621	16,284,033
Cutlery and edge tools	68	93,760	381	524,500

There are fifty-seven classes of industries under this letter in the Philadelphia list, and but twenty in that for New York—canes, canned goods, cards, card printers, carpets, carriage materials, car springs, chains, chemicals, china decorators, chronometers, cloth finishers, copying presses, cordage, costume makers, etc., being the leading items present for Philadelphia but not reported at New York. In the miscellaneous list for New York one each of carpets, castings, car springs and cordage is cited, but no statistics are given. Three or four small items common to both are not cited. Clothing is the greatest industry of all at New York, reaching $79,729,250 in value, and employing 60,003 persons, of whom a part must necessarily work beyond the city limits, but it is not important to raise the question. It will be seen that in men's clothing each employé makes about $1,300 in value at New York and $1,400 in value at Philadelphia, and in women's clothing each employé makes about $1,530 in value at New York and only $1,073 at Philadelphia. While the New York clothing makers undoubtedly produce more for each person employed than at Philadelphia, this rate of $1,530 on women's clothing is scarcely possible.

Cotton yard goods are not made from raw materials in New York, the articles being lampwick, mosquito netting, and a few articles like these. At Philadelphia cotton yard goods employ 9,523 persons, and produce $13,100,333 in value—yarns, thread, coverlets, towels, webbing and tapes, wadding and waste are other products of cotton. "Cutlery and edge tools" at Philadelphia do not include dental and surgical instruments, nor saws, ordinary tools, etc.

	New York.		Philadelphia.	
	Persons.	Values.	Persons.	Values.
Dental instruments	....	.....	580	$956,100
Drugs and chemicals	688	$3,694,178	*	*
Dyers & finishers—textiles	450	690,236	2,184	6,621,200
Dyers and scourers	64	82,750	134	160,800
Dyes and dye extracts	....	.....	47	225,000

Furs and fur manufactures	2,440	4,474,018	465	979,986

* See chemicals.

For these letters the New York list is still meager, twenty names only, and it does not include many that should receive a place. The number in the Philadelphia list is fifty-two, including designers and card stampers, diamond-setters, dies and stamps, disinfectants, dolls, drug-mills, felting, fire brick, fishing tackle, etc. The term "foundry and machine shop products" is given at New York to represent almost everything in iron work, and it will be used under that heading for comparison.

There should be a return of florists' products, which is a large industry in New York. Flouring mills, furniture and fur clothing compare fairly, and each shows a much greater production at New York, which is well known to be true.

	New York.		Philadelphia.	
	Persons.	Values.	Persons.	Values.
Galvanizing	232	$850,770	495	$2,165,000
Gas-works (estimated)	1,500	3,000,000	2,017	3,691,152
Gas-meters and tanks	...	.....	317	621,000

Hats and caps—men's	2,631	4,008,503	1,907	2,456,868
Hats and bonnets—women's	....	.....	349	375,550
Hosiery and knit goods	545	683,936	12,591	14,219,140

In this group the number of omissions is still considerable; the designations at Philadelphia are forty-eight, while there are but fifteen printed for New York. Gas making is a legitimate industry, and it should be in New York. It is scarcely possible that gas meters and machinery, glass, glue, gold watchcases, hair cloth, curled hair, etc., can all be wanting at New York. "Hardware" will be compared under iron. Hats and bonnets for women are probably included under "millinery." Knit gloves and mittens are largely produced at Philadelphia, and included under "hosiery and knit goods."

Leather goods	947	1,762,748	....	.....
Lithographic work	1,149	1,738,452	672	854,200

The explanations required are frequent in this part of the schedule; "ink" is chiefly printing ink at Philadelphia, and instruments includes those properly distinguished as surgical, and as mathematical and scientific, to compare with the term given in the table; but dental instruments have no equivalent at New York. Iron manufacturers require an extended list to designate them properly, and for Philadelphia there are sixty-four distinctions in iron and machinery alone. As given here the aggregate for all manufactures of iron is placed in the portion corresponding to the leading entry at New York, the items marked thus * being part of that aggregate. It is impossible to say what the elements of the New York aggregate are; here they include thirty classes of machinery and thirty-three classes of iron and manufactures of iron; three blast and air furnaces, nine rolling mills, four sheet galvanizing works, sixty-eight foundries of five different classes, and 240 works on bolts, nails, spikes, axles, railway iron, chains, safes, iron ships, etc., not including any work in steel. The aggregate of these iron works shows the employment of 26,814 men, and a value of $50,712,835 produced.

As to lace goods, a portion of the equivalent of the New York aggregate will be found in women's and children's lace-trimmed clothing; the item lace represents millinery laces only. Lumber, as entered in New York, is not a proper designation, and its figures will be found under saw and planing mills.

Leather products are very large in Philadelphia in classes unknown at New York, morocco leather chiefly, which employs 2,552 persons, producing $7,062,184; next calf-kid, which is a soft tanning, 450 persons, $1,380,000 in value, with a large amount of fancy and binders' leathers.

The distinctions under iron and machinery will be again referred to.

Printers' furnishings	48	151,000	48	86,400

The letters represented in this group show eighty classes in the Philadelphia schedule, and but twenty-six at New York. There should be, and doubtless are, many in New York corresponding to these in Philadelphia, viz., slate mantels, map publishers, masts and spars, cocoa mats, medicine chests, metal foil, metal wares, metal spinners, non-friction metals, military and society goods, millstones, mince meats and fruits, needles, nickel platers, oil-cloths, animal and illuminating oils, and especially optical goods, so-called, which may possibly be included with jewelry. Gold pens are but little made in Philadelphia, but gold rings and chains are a distinct industry there. Steel pens are made at two establishments in Philadelphia, but apparently not in New York. Needles for knitting and sewing machines are made in Philadelphia, possibly also in New York. Oils are deficient in New York, but as the census originally reported none for Philadelphia perhaps they are simply omitted. The finer oils of distillation, essential and chemical oils, are probably made to a large extent in both cities, but are concealed under general chemicals. The manufacture of oils constitutes an important and complicated class of industries, passing through a wide range of lubricating, illuminating, edible, essential, animal and vegetable, on all of which the United States census is entirely wanting in any form of report. There must necessarily be a considerable product in New York city of oils in the aggregate. Pharmaceutical preparations, which are large at Philadelphia, are covered under medicines and chemicals, probably, but they are intrinsically distinct. "Printing and publishing" is returned as a single item at New York, while at Philadelphia it is separated into four leading classes—newspapers, books, job printers and music or plate printers. The numbers employed are nearly the same, but a greater ratio of values appears to be given to the number employed at New York. This is correct to some extent, but probably the number so employed is not fully reported. The entire force of writers directly and necessarily employed in current publications should be included among those engaged in productive industry.

The next considerable industries are somewhat scattered: "roofing" is indefinite, the material being extremely various; "rubber goods" attain some importance, also "saddlery," which is now harness making. "Safes," "sash, doors and blinds," "sewing machines" and "shipbuilding," may each be named.

	—New York.—		—Philadelphia.—	
	Persons.	*Values.*	*Persons.*	*Values.*
Roofing and materials	515	$993,110	448	$707,920
Rubber goods	405	859,262	84	110,000
Saddlery and harness	563	1,037,768	541	838,050
Safes and iron vaults	317	518,516	126	261,000
Sash, doors and blinds	470	867,995	759	1,524,500
Scales and balances	82	168,234	153	280,000
Sewing machines	196	269,100	500	867,600
Ship-building, iron only	941	2,071,005	2,743	5,873,400
Silk goods	7,491	7,800,250	6,193	8,608,270
Silverware	805	1,527,600	477	902,300
Slaughtering & meat pack'g	895	29,297,527	657	4,563,500
Soap and candles	634	3,697,964	625	2,670,600
Sporting goods	394	486,417	158	262,400
Stationery goods	1,681	3,179,134	490	816,100
Stone and earthenware	206	209,600	180	257,900
Stone masonry	1,181	2,324,650	569	1,332,500
Sugar and molasses	554	11,330,883	1,789	27,050,000
Steel, ingots and rolled	....	.....	640	1,659,200
Steel saws, springs and other manufactures	....	.....	1,511	2,039,500
Steel cutlery, dental & surgical instruments	68	93,760	1,128	1,714,050

This group presents many difficulties of classification, but generally there is unexpected similarity, especially in silk goods, which show a rapid growth in New York. In stone masonry the designation is "masonry, brick and stone" at New York, while in Philadelphia stone cutting and laying is alone taken. "Slaughtering" is not taken at Philadelphia, and is not a manufacture as conducted at the abattoirs. The original return for Philadelphia for 1880 had an item of 1,245 persons, and $16,236,148 under this name, but it was struck out of the Compendium. It should be in to correspond with the $29,000,000 at New York; the value above given for Philadelphia under that name is meat smoking and curing, strictly. "Stationery goods" undoubtedly includes envelopes, card and address packages, etc., as well as stationery in a more limited sense. Steel and manufactures of steel do not exist at New York except one establishment on steel springs. The entries conclude with cutlery, dental and surgical instruments, which three classes employ 1,128 persons and produce $1,714,050 in value at Philadelphia to 68 persons, $93,760 value at New York. There is probably some incompleteness in the New York report.

Sugar refining is not large within the limits of New York city, but this is compensated for in Brooklyn, which has 2,067 persons so employed, producing $59,711,168, or twice as much as Philadelphia. Ship-building shows respectably in both cities.

The remaining designations of the alphabetical schedule are very few, 17 in all at New York to 58 at Philadelphia—the New York list of course being imperfect. Restoring some items at New York, the leading points are as follows;

	—New York—		—Philadelphia—	
	Persons.	*Values.*	*Persons.*	*Values.*
Tallow and grease	287	$6,871,175	49	$411,000
Tanks and vats	....	.....	77	169,400
Terra cotta, pipes and vases	....	.....	69	207,000
Telegraph and telephone apparatus	416	753,459	229	343,750
Tin and sheetiron ware	1,605	1,611,389	1,229	1,841,600
Tobacco manuf'd and snuff	1,622	4,320,972	236	707,000
Tob., cigars and cigarettes	14,476	18,347,108	3,054	3,164,000
Toys and games	470	237,166	232	237,600
Trunks and valises	310	666,766	213	423,000
Trusses and surgical appliances	29	60,448	216	340,900
Type foundries and electrotyping	573	793,257	593	830,248
Umbrellas and canes	1,345	3,456,144	2,108	3,752,450
Upholstering	722	1,952,289	438	754,900
Varnish	....	.....	52	262,000
Wagons and wheelwrights	449	756,406	293	387,250
Watchcases—gold & silver	....	.....	862	1,744,450
Watch and clock repairing	154	361,641	175	220,500
White and red lead	....	.....	272	1,360,000
Whiting and Paris white	....	.....	68	476,000
Window shades and blinds	124	282,000	261	480,650
Wire and wire-work	763	1,250,306	236	385,000
Wood, turned and carved	825	1,351,789	315	465,800
Wool manufactures	....	.....	7,948	16,681,980
Worsted manufactures	....	.....	9,139	19,311,010

In this group there are many explanations wanting, and a much more definite classification is needed. The "tallow and grease" is a slaughter-house product, and scarcely a manufacture. Tobacco and cigar manufactures are surprisingly developed at New York, employing 16,000 persons, and producing $22,000,000 in value. Typefounding proper is represented by only five establishments in each city, but the associated processes make up half as much more in force. Umbrellas were not supposed to be so largely made at New York—the establishments must be new; at Philadelphia it has long been a large industry. Wagons are combined with "carriages," and not well distinguished. "Wheelwrighting" is a bad term, all wagon menders are presumably wagon makers also. Watchcases now constitute a large industry in Philadelphia, but do not appear at New York. "White and red lead," "whiting and Paris white," and several associated products used in paints and chemicals are largely produced in Philadelphia, but do not find room in New York. The "wire work" cited at New York must have been the Brooklyn Bridge material, and the "wood, turned and carved," some structural work, here merged in building operations. Similar values are with the products of "architects and builders" on "carpenters and builders."

The general list of the United States census concludes with a large force of miscellaneous industries, employing 3,656 persons and producing $8,968,164 in value. The census of 1882 for Philadelphia has no miscellaneous list, and it is unfortunate that so many definable classes are put under that name in the United States census.

The totals for the number of establishments, force and production for the two cities compare as follows, the difference in time being more than two full years, and therefore an important element in the case: New York, 1880, 11,339 establishments, employing 146,175 men, 71,795 women, 9,378 youths; total, 227,262 persons, producing $472,926,437 in value. Philadelphia, 1882, 11,844 establishments, employing 146,307 men, 66,907 women, and 28,219 youths—241,433 in all, and producing $476,817,402 in value for the year.

The following summary gives in tabular form the leading aggregates for the two cities, and contrasts them directly for the two enumerations used in the preceding comparisons, and also compares the like aggregates for each city as published in the United States Census for 1870:

SUMMARY TABULAR STATEMENT.

	New York, 1880.	*Phila.,* 1882.	*New York.* 1870.	*Phila.,* 1870.
No. establish's	11,329	11,844	7,624	8,184
Capital	$181,306,256	$187,148,857	$129,952,262	$174,016,674
Men	146,179	146,307	91,305	95,421
Women	71,795	66,907	32,281	32,687
Youths	9,378	28,219	5,991	9,388
Total	227,262	241,433	129 577	137,496
Wages	$97,030,020	$83,670,730	$63,824,049	$58,780,130
Product	472,926,427	476,817,402	332,941,520	322,004,517

The census of industries taken for 1882 under the authority of the Mayor of Philadelphia during the first two months of 1883 was carefully revised, first by wards during compilation, and finally by industries, every part of the city being examined and all returns verified. The results, as finally reported August 14, show 11,844 establishments, 146,307 men, 66,907 women and 28,219 minors or youths employed, a total of 241,433. The aggregate of values produced was $476,817,402, in which a small product is taken for 377 persons employed in the United States Mint, $2,500,000; the total coinage for the year was $48,309,395.

The leading general class in Philadelphia is the textile industries, which employ in the aggregate 60,962 persons, and produce $102,243,578 in values. The iron and steel industries next, employ 32,000 persons and produce $58,608,781 in value of manufactures.

Generally, the New York industries show an unexpected degree of diversity and a rapid development of the social classes, or those working freely in small establishments. There are 11,339 establishments, employing 227,262 persons, being an average of 20 to each. At Philadelphia in 1882 11,844 establishments employed 241,433 persons, an average of $20^4/_{10}$ to each. The number employed and the average to each establishment has greatly increased at New York since 1870. It appears that this increase is most largely in clothing, which employs 60,000 persons and produces $79,730,000 in value; in tobacco and cigar manufactures, which employ about 16,100 persons; also in breweries, lard refining, slaughtering, meat packing, etc. The finer industries in silk and ornamental tissues are gaining rapidly, but there are little of the ordinary textile classes, and nothing of consequence of the large classes in wool, cotton and mixed goods, which make up $100,000,000 in value at Philadelphia for 1882. A similar relation of New York to Philadelphia has characterized the census returns for three decades, and the writer of this review had personally assisted in the verification and comparison of the statistics for both cities at the census enumerations of 1860 and 1870, as well as now. In industries from absolute raw materials Philadelphia largely exceeds New York, but New York is the commercial center, the depot and distributing place for an aggregate of industrial products three times greater in value than all that are sold in Paris or in London. The United States census only faintly shows what these are, either in detail or in the aggregate. A careful and faithful statement of these would be a most impressive exhibit, instructive and valuable to the whole country.

LORIN BLODGET.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

When sureties execute, each to the other, as security between themselves only, mortgages for the payment of the debt, such mortgages are not available to the creditors of the principal upon the principle of subrogation, according to the decision of the Supreme Court of the United States, in the recent case of Hampton vs. Phipps.

The Missouri Supreme Court recently, in the case of Dougherty vs. Cooper, laid down the conditions which must concur to protect the title of a purchaser upon a sale made by the vendor with a fraudulent intent. These conditions the court declared to be as follows: First, he must buy without notice of the bad intent on the part of the vendor; second, he must be a purchaser for a valuable consideration; and, third, he must have paid the purchase money before he had notice of the fraud.

A bill in equity was recently filed in the United States Circuit Court for the Southern District of New York by a stockholder to restrain a corporation from raising money by a pledge of bonds of other railroads of which it was the owner. The answer alleged that the money was to be used to pay the floating debts of the defendant. In this case, Leo vs. The Union Pacific Railroad Company, the court held that the plaintiff was not entitled to an injunction restraining the defendant from raising money by such a pledge of securities, that the defendant could sell the securities to raise money to pay its debts, and that the power to pledge them was included in the power to sell for the same purpose.

In the case of Eggers vs. Hink, decided recently by the Supreme Court of California, it appeared that the plaintiff had a sign over his place of business upon which was painted a representation of a row of beer barrels, with the letters "P. B." stamped on the head of the barrels, the words "Depot of the Celebrated" being placed above and the words "Philadelphia Beer" below the row of barrels. The defendant erected over his place of business a similar sign to that of the plaintiff, the chief difference being the insertion of the letters "F. B.," indicating and standing for "Fredericksburger Beer," in lieu of the letters "P. B.," and the insertion of the word "Fredericksburger" where the word "Philadelphia" appeared on the sign and label of the plaintiff. The plaintiff sued for infringement of his trade-mark. The court held that the plaintiff's sign could not be protected as a trade-mark for the reason that it related only to the description of the beverage dealt in by him, and did not in any manner indicate origin or ownership, it not appearing that the plaintiff was the manufacturer of the Philadelphia beer or the sole agent for its sale.

The effect of the statute of frauds upon a verbal contract for the lease of real property which was entirely performed on one side was considered by the Supreme Court of Missouri in the recent case of Winters vs. Cherry. In this case it appeared that the defendant had leased a brick storehouse from the plaintiff for a term of three years. This lease was to expire by its own limitation on November 2, 1877. In December, 1876, during the existence of the lease, the defendant, in order to have the use of an unfinished basement, which was not included in the lease, proposed to plaintiff that if he would fit up this basement as a carpet-room for his (defendant's) use he would pay the plaintiff $100, and continue the lease of the storehouse, including the basement, for two years after the expiration of the written lease, at a rental of $66.66 per month. Plaintiff thereupon fitted up the basement, and defendant paid him the $100, took possession of the basement, and continued to hold it and the storehouse until the expiration of the original three-years' lease, when he quit the premises, without any notice to the landlord, and refused to pay any rent afterward. Upon a suit to recover the rent accruing after the termination of the written lease, the defendant set up that the contract was one concerning lands, not in writing, and not to be performed within one year, and that consequently the statute of frauds barred a recovery. The plaintiff had judgment in the Circuit Court. This judgment was confirmed by the Supreme Court, which held that since the contract had been entirely executed by one of the contracting parties, the other party could not interpose the defense of the statute of frauds.

BUSINESS NOTES.

There were 209 failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* (London) during the week ended July 28, against 229 in the fourth week of July, 1882, and 235 in a corresponding period in 1881. England and Wales had 183, against 210 and 211 respectively in each of the corresponding weeks in the preceding years. Scotland had 19, against 15 and 19, and Ireland had but 7, against 4 and 5.

Prices of coke, says the Connellsville *Courier*, have an upward tendency, and it is believed that the period of depression in this industry is over. Twenty new ovens have been contracted for. The total number of ovens now in the regions is 9,176. Of this number 2,160 are idle, as compared with 1,456 a fortnight previous. This decline in production is accounted for by a strike which affected over 700 ovens. The 1,571 ovens at and about Connellsville are all in active operation, with orders ahead for all the coke they can make.

A French journal is responsible for the statement that the imports of wool into France have declined about 4 per cent. for the first four months of the current year, as compared with a like portion of 1882, when they represented a value of $25,000,000. The imports of woolen manufactures have decreased from $4,200,000 to $3,700,000 for this portion of the year. The exports of woolen goods show a decrease of only $350,000 on the $28,750,000 of last year at the same time. In woolen yarns the fall is much more appreciable, being from $2,500,000 to $1,800,000.

A recent telegram to the London *Daily News* quite corroborates the views expressed in BRADSTREET'S special Vienna correspondence published last fall, in which was given the reasons why Russian petroleum would soon become a competitor of American oil in the markets of Europe. A consignment of Russian oil recently received at Bromberg, Germany, undersold in the market American petroleum brought thither from Bremen. Until the completion of the railway from Baku (on the Caspian—the Russian "Oil City") to Batoum, on the Black sea, Russian oil could only reach Europe via the Volga. It now goes across the Caucasus in tank-cars into central Europe or to Mediterranean ports via the Black sea.

The London financial journal, *Money*, speaking on the subject of the development of the Russian petroleum regions, says that already large consignments have found their way to the Mediterranean by this means, and the supply will become larger when the rolling stock of the Transcaucasian line has been increased to comply with the present demand. French agents are now surveying the Caucasus, as a preliminary to conveying the oil in a pipe from Baku to Batoum, a distance of over 500 miles—a project which has the warm support of the government, and which would be assisted by a subsidy if taken up by an influential syndicate having a million and a half sterling at command. This may seem a large sum to invest in the transport of Baku

oil, but the Russians themselves estimate that they have sunk over five millions sterling in developing the transport service in the Volga during the last six years. This transport service includes two or three hundred oil-carrying steamers—of which there is a whole fleet of huge ones, 200 or 300 feet long—60 miles of piping to convey the oil to the 27 piers erected at Baku, scores of huge iron reservoirs at various points in Russia, and nearly 3,000 tank-cars added to the rolling stock of various Russian lines. In spite of this development of transport power the production has increased so fast that prices rule very low indeed at Baku just now.

Aside from the idea of conquest, pure and simple, which may be supposed to go far to explain the desire of the French to hold Tonquin, recent reports of the richness of that far-away Asiatic region which have gained currency in France will account for the very general anxiety of the French people to hold their own against the protests of the Chinese. The *British Trade Journal* says that the French have deluded themselves with the notion that the gold mines of Tonquin exceed in richness those of California and Australia. Copper is so plentiful that "all the domestic utensils of the inhabitants are made of that metal." The tin mines are the most valuable in the world; while zinc, lead, iron and bismuth are also found. Coal, of course, is available in abundance; and, as a climax, Tonquin also produces musk, tortoise-shell, silk, peacocks' feathers, mother-o'-pearl and wax. But it appears as if the French would have to fight for undisputed possession of all these riches.

There has been no improvement in the British labor market during the week ended August 1. The London *Labour News* of that date reported that it continued unsettled at various points, mainly through wages disputes. The Staffordshire colliers' strike continued, and much distress had resulted. The iron strike in the "Black country" had proved a failure, and the greater number—all but about 2,500 of the men—had returned to work. The building and engineering trades throughout the kingdom were still busy, as they had been reported for several months. The ship-builders' strike at Sunderland had not been terminated. At Birmingham the hardware manufacturers had a fair supply of orders, and at Sheffield most firms were busy, especially in the heavy branches. The textile trades showed a slight improvement. At Leeds machinery was going well, and at Leicester hosiery weavers were more active. At Dundee 2,000 spinners were shut out at four mills, owing to a demand for increased wages, and a general strike was anticipated. Emigration continued brisk.

The New Orleans *Picayune* has begun the self-imposed task of "digging out" the facts concerning the amount of subsidies granted to railways by the Mexican government. If the whole sum and details of payment could be ascertained it would undoubtedly make very interesting reading in Europe as well as in the United States. The journal named claims to give the subsidies granted to eight lines as follows:

	Miles.	*Subsidy.*
Mexican Central	2,046	$30,923,400
Mexican National	2,266	25,537,820
Mexican Southern (Gould and Grant's lines)	2,400	29,287,600
Topolovampo	1,400	11,261,400
Sinaloa and Durango	350	9,800,000
Tamaulipas International (Telfener's)	389	4,894,000
Sonora (A. T. and S. F.)	265	3,926,550
Apizaco (Whiting's line)	110	1,210,000
Totals, so far	9,226	$115,903,770

The Mexican *Echo* is responsible for the statement that forty railway companies have secured subventions from the Mexican government. This, if true, leaves thirty-two more companies for the New Orleans newspaper to investigate. While the accuracy of the figures is not vouched for, the paper publishing them calls upon its "Mexican friends" to make inquiry as to their correctness.

In a review of the situation in the ivory trade, published in BRADSTREET'S over a year ago, it was pointed out that in the near future the price must show a considerable advance, owing to the growing scarcity of the supply. The ivory hunters in Africa and Asia now have to make lengthy and expensive journeys into the interior to find elephants, and every pair of tusks procured means the death of one of these animals. In this way the coast regions have been cleared of elephants, and the London quarterly ivory sales, which regulate the market price, are showing steadily increasing quotations. At the recent sales 120 tons were offered, and all, with the exception of about five tons, were bought at considerably advanced prices. Sheffield ivory has advanced from £1 to £4 per cwt., and defective ivory has in some instances risen still more in price. The stock in the market at the present time is not half the amount that was offered six years ago. The cholera epidemic in Egypt has greatly interfered with the sale of African ivory, and it is very probable there will be no supply from Egypt this year. But competition is said to be keen, notwithstanding these drawbacks.

Recent events in Madagascar have attracted considerable attention to that island, and its annual foreign trade resources and government have been the subject of special reports. Tamatave, the seat of the alleged offense to Great Britain by a zealous French admiral, has a population of about 6,500 only. Of these about 60 are Europeans, 100 or more are British Indian subjects, and between 500 and 600 are Creoles. There is one large commercial house at Tamatave, branch of a London concern. Other merchants there are said to comprise two American houses, one German and one French house. There are, besides, a number of Creole traders from Mauritius. The British imports at the port are chiefly cotton goods, and Sheffield, Birmingham and Wolverhampton goods. The chief exports are oxen to Mauritius, Réunion and Natal, hides, india rubber, beeswax, rice, sugar and coffee. The total annual trade between the United Kingdom, Mauritius and British India with Madagascar is computed at a million sterling, while that of France is not more than one-third of that sum. For the British trade, Tamatave on the east coast and Majunga on the west are the principal ports.

The following national banks have been organized: The Henrietta (Tex.) National Bank; capital $50,000; Elisha F. Ikard president; James W. T. Gray cashier. The Lewiston National Bank, Lewiston, Idaho; capital $50,000; John Brearley president; Nelson W. Brearley cashier. The First National Bank of Olympia, Wash. Ter.; capital $50,000; John P. Hoyt president; Albert A. Phillips cashier. The First National Bank of East Portland, Ore.; capital $50,000; A. H. Breyman president; B. H. Bowman cashier. The First National Bank of Perry, Iowa; capital $50,000; George W. Blakeslee president; Howard A. Rouse cashier. The following changes have taken place: First National Bank of Reading, Pa., George Brooks president, in place of William H. Clymer. Lumbermen's National Bank of Williamsport, Pa., R. J. C. Walker president, in place of J. G. Reading. First National Bank of Stockton, Cal., Henry H. Hewlett in place of Frank Stewart. First National Bank of Elkader, Iowa, William Larrabee president, in place of H. B. Carter. First National Bank of Fergus Falls, Minn., Charles D. Wright president, in place of H. G. Page. Fergus Falls National Bank, Henry G. Page president, in place of E. D. Dyer.

JUDGE COOLEY ON THE RAILROAD QUESTION.

In the September number of the *North American Review* Judge T. M. Cooley writes regarding "State Regulation of Corporate Rights." The following conclusions are laid down:

First. Of the corporations serving public ends the most important are railways. These are chartered that they may establish the business of carrying for hire the property and the persons of those who may desire that service. This is a business well known to the common law, and has long been recognized as having a semi-public character which made it an exception to private business in general. Legislative permission to build and operate a railroad is commonly a necessary requisite. Highways must be crossed and public places intersected or occupied; and a railroad upon any of these, without permission of the state, would be a public nuisance, and subject as such to indictment and removal. It becomes necessary also to resort to the eminent domain to force sales of lands for a right of way by persons who will not voluntarily part with them or who take advantage of the circumstances to demand exorbitant prices. But, in addition to other impediments to individual construction, the capital required for the purpose is so great that only the coöperation of many persons can secure it, and the safe and convenient method of coöperation is under corporate forms. We therefore, of necessity, have charters for railway companies.

If a railway corporation is to be regarded as occupying in all respects the position of a common law carrier large profits will not necessarily determine its charges to be unreasonable. But when the company receives from the state special privileges and grants of power, on the understanding that these are conferred in the public interest and to subserve public ends, it is not by any means certain that its profits may not justly be used as a test of the reasonableness of its charges. The charter is granted for the mutual benefit of the state and the corporators, and, while it contemplates reasonable returns to the latter on their investment, it cannot fairly be understood to contemplate anything more. In determining what are such returns, all the risks to which the investment is subject are to be taken into the account, and it is obvious that these are much greater than the risks which attend the loaning of money on security. But charges can only be regulated for the future, and this must necessarily be done, either by the company itself or by the state, upon estimates of the business likely to be done and its cost. That the company could not be exclusive judge in doing this even at the common law has already been seen, and as no third power can intervene except by mutual consent it seems to follow of necessity that the state may limit profits as well as charges. The judicial decisions go to this extent, that when the state establishes a maximum of charges, these charges are to be deemed, *prima facie*, at least, reasonable. The case of corporations which are created to serve public ends in new ways and by means of new inventions and discoveries differs from that of railway companies in this, that their business being new, duties and obligations of exceptional character have not been prescribed for them by the common law. A telegraph company, for example, is not a common carrier, and therefore does not come under the rules which control the carrier's business. But there is precisely the same reason why the state should regulate its business and keep its charges within the limits of reason that applies to the business of railways. The telegraph exists only by permission of the state, and is only constructed by the aid of the eminent domain. It is just as much within the proper police authority of the state to keep a telegraph company from abusing its powers in the matter of charges as it is to prevent other abuses. And this may be done in strict accord with the principles of the common law, and by virtue of powers which are inherent in every sovereignty.

Second. Where charters exist which have been granted without the reservation of the power to amend or repeal, the state must abide by the grant, and, if it was improvident, must suffer the consequences. All that can be done is to see that the incorporators themselves observe the conditions of the charter according to its true intent, and if they fail to do so to forfeit it. This is the rule of constitutional law, and it is also the rule of public honor and integrity. Charters, however, are not often their own sufficient interpreters, and the question of construction in respect to the power to make charges and accumulate profits is often troublesome. The grant of this power is sometimes subject to a maximum limit, and, when that is the case, nothing which observes the limit can be deemed abuse. But more often the grant is either silent on the subject of charges—in which case the corporation by implication would be empowered to fix them—or it gives the power to the corporation in general terms, and prescribes no maximum. In the first of these cases the right of the state to restrict corporate charges is unquestionable. In the second, though long and earnestly contested, it is now well settled. The ground on which it is affirmed is that the state, in conferring upon the corporation the right to charge for the services rendered to the public, without expressly abdicating the power of control, must be understood to have reserved it. All corporate grants are to be strictly construed, and it must always be assumed that the state proposed to give nothing which it has not given in express terms, and that the grantees have bargained for and secured in express terms everything they understood they were to have. A railroad charter, therefore, which authorizes the company to establish such rates for the conveyance of persons and property as it shall from time to time determine by its by-laws, confers the power subject to the higher authority in the state to regulate the rates itself if the circumstances shall seem to demand its interposition.

Third. Whenever, in granting corporate franchises, the power to amend or repeal at will has been reserved, the control of the state must be deemed practically absolute.

Chief Justice Shaw said, in one case, that "Where, under power in a charter, rights have been acquired and become vested no amendment or alteration of the charter can take away the property or rights which have become vested under a legitimate exercise of the powers granted." He did not profess to decide the case then before him on this principle, though he held an amendment unwarranted which was made under full reservation of power. Afterward, in an opinion by his successor in the same court, it was decided that while the legislature might, under its power to amend, authorize a corporation to undertake new and additional enterprises of a nature similar to those embraced within the original grant of power, if the act was accepted by a majority of the stockholders in the manner provided by law, it could have no such power without the acceptance, because the effect would be to alter the charter contract between the corporation and its members. Possibly these are to be taken as indications that, even when the power of control is reserved in the broadest terms, the courts must, if possible, find some means of reconciling radical changes or repeals with the fundamental rules of right and justice.

It ought to be said, however, that much of the legislation which would prove injurious to corporations has right and justice distinctly in contemplation, and is promoted in the sincere belief that the public good requires it. If mischief results from its adoption it must be attributed to error in judgment or misinformation on the part of those who enacted it. Propositions to regulate the charges of railroad companies are likely to be of this sort. Legislators are likely to think just regulation easy and simple, and in the case of passenger traffic it may be found to be so; but the charges for the transportation of property are governed by conditions which no legislation can possibly change or control, and which railroad companies must observe, whatever the statute may say. The law of competition in a country politically divided like ours is an imperious and exacting master, and statutes at most can only modify its operation, while pools at most can only prevent its operating disastrously. What is a fatal impediment to its control by law is, that the states and the nation have, in respect to it, a divided power, and while it is for the interest of the nation at large to encourage the competition which favors long hauls it is for the interest of localities to make competition most active in short hauls. A state is therefore likely to favor legislation which compels proportional charges, or something near such charges, for all distances; but this, if it could be adopted and enforced, would preclude the great through lines of New York and Pennsylvania from competing at Chicago, St. Paul, and St. Louis in the grain-carrying trade of the northwest, and would reduce such links as are wholly within a state to the condition of mere local roads, compelled to make high charges or go into bankruptcy. But whenever state power should thus be exerted prejudicially, it can hardly be doubted that Congress would interfere, under its authority over inter-state commerce, in aid of those competitive forces which silently but steadily have forced down the charges for railway service.*

* In 1870 the average rate per mile for the transportation of a ton of freight over seven great lines of road radiating from Chicago was 2.227 cents. In 1880 it had come down by steady reduction to 1.090. On the Michigan Central, whose freights have been unaffected by legislation, the average charge for moving a ton of freight thirty miles is now about the same as the twenty-five cents which one expects to pay a truckman for moving a box of goods from one street to the next. There are roads in the country whose charters permit a charge of five cents per mile for passengers, but the exigencies of the business compel their managers to accept three.

The true policy of the state is to give due and full protection to corporate property, and at the same time to insist on the faithful performance of corporate duties. It is no more for its interest to invite and encourage raids on corporations than it is to countenance vast corporate profits for which no adequate return is made. In some kinds of business competition will keep corporations within the limits of reason in their charges; in others it will not. When it will not, it may become necessary to legislate upon profits. If the business is simple, like the supply of light or water, this can be done by prescribing a tariff of rates; but sometimes a tariff of rates prescribed by law could only be mischievous. It would generally be so in railroad transportation of property, except in the case of mere local roads. Rates must yield and accommodate themselves to innumerable circumstances and contingencies, expected and unexpected, and these must be met and provided for by the governing power as they arise. No other known business requires larger technical skill, greater ability, or wider experience. And the ablest, wisest, and most experienced man would be guilty of an act of supreme folly if, with ample power, he undertook to prescribe unbending rules for future charges. To prescribe tariffs of rates for one road, or the roads of one state, which the competitors are not obliged to observe, would be like prescribing in advance by law the movements of an army, while the enemy was at liberty to manœuver at discretion. Railroad competition is an earnest strife, if not a warfare; and experience hitherto has shown that all that can be done by common arrangements and understandings is simply to prevent the strife becoming mutually destructive.

T. M. COOLEY.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

It has been active enough in Wall street during the past week to largely compensate for the weeks of stagnation which preceded it. The trouble began to look serious in the last hour on Friday of last week, when the market closed in a way which boded no good for the morrow. On Saturday there was a small rally during the first hour, but it developed no vigor and was followed by a pressure to sell which thoroughly alarmed every one who held stocks. The air was full of rumors of impending failures, and several large commission houses in the street were cautiously spoken of as being very weak. Buyers of stock at anywhere near the market price were hard to find. A purchase of 1,000 shares would advance a stock ½ per cent, and a sale of 100 would drop it back again. The Villard stocks began then that decline which never stopped till they touched bottom in the break which occurred soon after the opening on the following Tuesday morning. Long stock was pressed upon the market and little support was found. Rumors were current that a large loan had been called on Northern Pacific. By half-past one the exchange presented a scene bordering on panic. Nearly every broker had selling orders. Occasionally one would bid for several hundred shares and be instantly overwhelmed with stock and almost torn to pieces by brokers determined to sell. About two o'clock the excitement died away, and a little later the room became comparatively quiet. The steady stocks in all the turmoil were the Vanderbilts, and their steadiness contributed greatly to strengthen the market. At the close there was a slight rally on the covering of shorts, and, as usual after any kind of a fall in the market, the majority of the small operators went away convinced that bottom had been touched and the market was in now for a rise.

Monday morning undeceived them. The opening prices were all lower than the closing Saturday, and the pressure to sell increased rather than diminished for an hour after. It was now that the Villard stocks, which seemed utterly without support, were raided without mercy. There was not the scare there had been on Saturday; the room had got over its surprise and fright, but there was a general sentiment that all prices must come down. It was seen that the Villard securities were the ones aimed at, and it seemed to be thought that when liquidation had been forced in them the downward movement would stop. One failure was announced, but it was comparatively small and did not do much damage. The press cable dispatches from London, however, had a bad effect, for they told of something like a panic in the American market there. The falling of prices continued with occasional short reactions through the day. In the afternoon President Villard issued a sort of manifesto in the shape of a letter characterizing as an "abominable falsehood" the published statement that he had borrowed exchange on pledge of his stocks as collateral, or that he had ever bought his stocks in the market to support their price. Wall street received this letter with a smile, and met with a laugh the complementary manifesto of Mr. Gould, issued a day or two after, to the effect that he had no hand in causing the decline in the Villard stocks. In the last hour of business there was again a good deal of covering to realize profits by the room traders and other small shorts, which made the closing prices much better than the lowest of the day. On Tuesday morning, in the half hour before the opening of business, there was very bearish talk, and several stocks which had stood up pretty well on the previous days were declared to be marked for several declines. The chairman's gavel fell and at once there was a tremendous rush of orders to sell. Complete consternation took possession of the room when the tickers at the various corners of it failed to give quotations, and then printed an announcement that nearly all the wires had been cut. This cutting silenced over 700 instruments in the street, though it happened that the tickers on the circuit of the Exchange building were left untouched. The excitement in all the offices of Wall street when this discovery was made was extreme. A great crowd surged up to the Exchange to find out how the market was moving; all kinds of expedients were devised to get the quotations, and wherever a ticker was found to be going in any office everybody who had any acquaintance there crowded in. On the floor of the Exchange itself the fright resulted in intensifying the desire to get out of stocks, and prices generally fell that morning to the lowest level they have reached on this flurry. It lasted about an hour, and then the turn came.

The large operators who had been conducting the bear movement seemed to think that a level had been reached sufficiently low to cover their shorts from, and in a brief time the selling orders gave place on all sides to orders to buy. The wires on most of the circuits were repaired soon after twelve o'clock, and before that hour the market had had a rebound upward almost as great as its fall of the early morning. Just at this time, however, the firm of George W. Ballou & Co. notified the Exchange that it was unable to meet its contracts, and another scene of intense excitement followed. The news flew all over the street like wildfire, and the upward movement of prices was checked. As the house of Ballou & Co. was known to have been a "bull house," a deluge of long stock to be sold for their account was expected to immediately come upon the market. When, therefore, the chairman began buying in under the rule a long list of stocks of which the firm was short, the astonishment was unbounded, and then prices danced up livelier than before. The failure entirely puzzled the street, and the causes of it are still a matter of controversy; but the general opinion seems to be that the firm, after losing heavily on the bull side, went in and sold stocks without stint at the bottom of the market, when the sharp turn coming they were caught as badly there, and brought down. The affair, however, still remains to be cleared up.

Tuesday morning marked the turn of the market, and since then it has been rapidly jumping upward, though to this rule Western Union has been an exception. It developed an extraordinary weakness, and has recorded the lowest prices made for it, while the rest of the market has been on the rise. Mr. Gould has utterly failed to sustain it at 80, as it was supposed he would be able to do, but has been forced to see the price driven down on him nearly nine points below that figure. The advent of a great capitalist like Mr. Mackey on the scene, as a promoter of a rival telegraph line, seems to have thoroughly scared the holders of telegraph stock, and made them throw their stock on the market; for it was on the announcement of Mr. Mackey's election as a director of the Postal Telegraph Company that Western Union fell lowest. The street also believes that Mr. Gould has been selling stock as fast as possible ever since the market turned and started up, because Western Union failed to move with it until yesterday, when everything was steamed up furiously, and telegraph was carried along with the rest.

Through all this turmoil the loan market has continued easy, but the rates are now from 3 to 5 per cent., the average being 4 per cent. The announcement of the Treasury that 5,000,000 of bonds would be redeemed weekly, without rebate of interest, beginning on the 22d inst., contributed to allay the apprehension beginning to be felt on account of the known movement of money to the west, which has now fairly set in for the fall months. The Treasury announcement also stiffened the tone of the government bond market, but there has been no material change in prices. The following were the closing quotations yesterday:

	Aug. 3, bid.	Aug. 10, bid.	Aug. 10, asked.
U. S. 5s extended (3½ p. c.)	..	..	..
U. S. 4½s 1891, registered	112	112	112⅛
U. S. coupon	113	113⅜	113¼
U. S. 4s 1907, registered	119⅛	119	119¼
U. S. 4s 1907, coupon	119⅜	119⅜	119¼

Foreign exchange shows a weakening tendency, as is natural at this time, when our exports increase. The posted rates are now $4.83 and $4.86½; actual rates are about 1 per cent. lower. The condition of the foreign markets was referred to above. It is stated that a good many stocks and bonds were bought on foreign account as soon as the market turned, and that Amsterdam particularly was a large buyer.

The bank statement of Saturday showed no important changes. There was a nominal increase of $87,300 in the surplus reserve, bringing it up to $9,333,655, which is much larger than the surplus of the corresponding week last year, the movement of money this year being later. The following are the comparative totals of the statements of August 4 and August 11:

	Aug. 4.	Aug. 11.	Differences.	
Loans	$326,822,000	$326,601,100	Dec.	$220,900
Specie	63,188,400	63,650,100	Inc.	461,700
Legal-tenders	26,981,200	26,990,700	Inc.	9,500
Deposits	323,692,900	325,228,500	Inc.	1,535,600
Circulation	15,640,900	15,450,800	Dec.	190,100

The proportion of total reserve to liabilities is now 27.87 per cent., against 26.19 per cent. in the same week of 1882.

THE LONDON STOCK MARKET.

[By Cable to BRADSTREET'S.]

From London: American securities have been greatly affected by the condition of financial affairs in America. The fall was great early in the week, but there has been a good recovery since. Wednesday's settlement passed without failures.

From New Orleans, La.: Financial circles are quiet. Securities dull but well maintained. Money is firm with an upward tendency reported. There is a combination of long operators in securities here to tighten money so as to depress prices and enable them to buy them in at low figures.

From Baltimore, Md.: The only securities in which there has been any disturbance of moment are Marietta & Cincinnati, or Cincinnati, Washington & Baltimore. Transactions were largely confined to second mortgages, of which $125,000 changed hands on Monday. The price of these on Saturday was 76; Monday they opened at 73½, dropped to 70, reacted to 72, and fell off to 70½ again. Later they ruled at 72@73, and continue active with a tendency to grow firmer. Railroad bonds are in good demand, and the general tone of the market now is more cheerful.

Following is a comparison of quotations of leading stocks for Tuesday of this week with nearly corresponding dates in 1882 and 1881, and for January, 1879:

	Aug. 14, 1883.	Aug. 11, 1882.	Aug. 12, 1881.	Jan. 1, 1879.
Canada Southern	49	..	65½	46⅝
Chicago, Burlington & Quincy	119	138	159½	111½
Central Pacific	61⅞	93⅞	93¼	..
Central of New Jersey	82	79¼	96¼	33⅝
Chicago & Alton	132	143¾	140	..
C. C. & I. C.	2½	13	22⅜	6
Delaware, Lack. & Western	120⅞	143¾	124½	43½
Delaware & Hud. Canal Co	106¼	117⅜	110	38
Erie	29⅛	40	43⅝	22⅜
Illinois Central	124½	141	137	80
Lake Shore	105	115⅛	123⅝	68
Louisville & Nashville	46¾	74⅜	102¼	37
Michigan Central	83	100	97¼	74
Missouri Pacific	94	106⅝	107¼	..
New York Central	114⅞	136	143⅞	114⅛
Northern Pacific	40¼	51½	41½	..
Northwestern	120⅞	144½	125¾	49⅞
Pacific Mail	29	45½	..	13⅞
Panama	..	..	260	123
Reading	51⅜	59	63¾	..
Rock Island	118½	139	137¾	119
St. L. & I. M.	..	..	..	13
St. Paul	99½	123¾	114⅝	36⅜
Union Pacific	87¼	117½	120	66½
Western Union	73⅞	89	..	84⅞
Wabash	17¾	37¼	50⅞	22⅛
Texas & Pacific	25¼	51⅜	57⅛	..

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

TRUNK LINES, WITH THEIR CONNECTIONS.

	Aug. 18, 1882.	Aug. 10, 1883.	Aug. 17, 1883.
New York Central	135½	115¼	116¾

COMMERCIAL.

SUMMARY.

The financial disturbance in Wall street early in the week had less effect on the general trade of the country than might have been expected, though the banks very generally have guarded their reserves and reduced their loans. Special advices to BRADSTREET'S from the west show that at the more prominent cities lines of discount have been curtailed and reduced. At most points in the west the outlook is for a good fall trade. In the northwest and west of the Mississippi river, particularly where the crop prospects are bright, nothing stands in the way of an active autumn's business but the completion of harvesting. New wheat has begun to move, and Chicago and other western banks report demands upon them for currency for the interior. In dry goods and other distributing centers the 1st of September is named as the earliest date at which there is any likelihood of a revival of fall business. Wheat has advanced about 2c. per bushel during the week, but has gone off 1¾c. owing to the heavy gain in stocks at all points and a dearth of buying orders. Indian corn has followed a like course, but was more particularly influenced for a decline at the close, owing to excellent weather at the west and needed rains throughout the drouth-affected regions. Provisions have been much lower, with a partial recovery, due to an improved foreign demand for lard and a gaining consumptive request at home. The statistical position of these products with the heavy arrivals of hogs at the west is against any material improvement in prices, based on demand and supply. Petroleum has advanced on the week, both in certificates of crude and refined oil. The consumption of petroleum is daily in excess, and the outlook is for a heavier demand during the fall, with the existing sources of production on the decline. Ocean freights have gone off during the past few days, owing to the check in demand abroad for petroleum and the full supply of tonnage. The anthracite coal trade continues full and steady movement. Prices are now nearly on a full circular basis and the excess production as compared with 1882 is larger than it was at the close of the half year. The consumptive demand for wool has been moderately active and the general market has ruled steady. There were 174 failures in the United States reported to BRADSTREET'S during the past week—8 more than the preceding week, 26 more than the corresponding week of 1882, and 100 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: General trade is quiet. Groceries are not so active.

From Boston, Mass.: The development of the fall trade continues to be restricted by the uncertainty which prevails in regard to financial affairs, but the volume of business in several departments shows some increase over last week, and a steady improvement is confidently expected during the remainder of the month. Large buyers are operating very cautiously in manufactured goods, but orders from small dealers throughout the country are increasing and shipments are going forward quite freely. Our merchants sensibly appreciate the gravity of the situation, but there is a strong undertone of confidence and a determination to stand by each other until the storm has completely passed away. The wool trade has passed through another active week, and sales run up nearly to the large figures of last week, with a firmer tendency in prices. The banks continue to be well supplied with loanable funds and discount freely for their customers at reasonable rates, but outside borrowers find it somewhat difficult to get accommodation except on sound collaterals.

From Providence, R. I.: The rate of discount on prime commercial paper is 5½@6 per cent. The rate of exchange on New York is at par.

From Rochester, N. Y.: The outlook for the fall business is encouraging. Collections are reported fair. The retail trade continues dull. Trade in other lines is quiet and retailers generally report very little business.

From Philadelphia, Pa.: Trade is improving, but slowly. Jobbers are getting more orders as a general thing, but mostly for small lots. The flurry in stocks has had little effect in the general merchandise markets. Legitimate trade is believed to be on a sound basis and confronting a prosperous season, but there is a tendency to caution in all lines.

From Pittsburgh, Pa.: General trade is fair for the season, and whilst there is considerable grumbling among retailers business generally is considered on a healthful basis and the outlook is regarded favorable.

From Cincinnati, Ohio: The disturbances in monetary circles throughout the country has not been without a depressing effect in this locality. Banks are cautiously strengthening their reserves, and country banks are gradually drawing upon their balances here. There is some movement of early produce. The need of money for this and the disposition to conservatism rather than fear of trouble has caused stringency in money matters. Traders and manufacturers continue to obtain their wants upon legitimate paper. The situation in this locality is apparently healthy.

From Cleveland, Ohio: Jobbing business continues quiet, yet not unusually so for midsummer. In most lines merchants continue firm in anticipation of a fair fall trade.

From Toledo, Ohio: Trade in all lines is satisfactory. Collections are fair. Interest is 8 per cent. per annum. Exchange one-tenth of 1 per cent.

From Indianapolis, Ind.: Trade is fair, this being the week of the state encampment, which has attracted a large number of visitors from all over the state. The excitement caused in financial circles by the bank suspensions has about subsided and matters are going on as usual, and it is thought there will be no further difficulty. Interest is at 8 per cent., but banks are scrutinizing loans closely and curtailing accommodations, which causes some embarrassment to business men.

From Louisville, Ky.: General trade is in every way satisfactory, increase being the rule in all lines. The railroad passenger and freight business is far in excess of previous years. The exposition, now in full operation, is an assured success, and is contributing much to render the city attractive. There are many fall visitors who have not heretofore traded in Louisville. Money, though ruling a trifle less, is fairly plenty for regular customers. The banks are sending currency to the interior in a moderate way. Collections are fair. Money will come in with the fall purchases.

From St. Louis, Mo.: General trade is in rather lighter volume than for several weeks, but fully as good as last year at this time, and collections from most directions are easy. Money continues active at 7@8 per cent. Rates and the eastern excitement seem to create no apprehensions here. New York exchange is from par to 50c. discount. Prime commercial bills $1 discount.

From Chicago, Ill.: Money is quiet; choice names and collaterals 4@6 per cent. The banks are moving cautiously and holding large reserves. Shipments of funds to the grain district are increasing. Exchange is 50 per cent. discount. Collections from the country are as fair as could be expected. Dry goods, notions, and fancy articles are rather more active. Country buyers are coming in. Groceries are more active. Stocks of sugars are fair. Stocks of coffees and teas are large.

From Peoria, Ill.: Preparations for an active fall trade have begun, and the business outlook is encouraging. Collections are still backward.

From Des Moines, Iowa: Trade in all lines is quiet. Money is firm.

From St. Paul, Minn.: General business has steadily improved within the last two weeks. City merchants are more disposed to encourage customers, and the latter are less slow in buying. Both classes are still cautious about assuming too great liabilities. Assured good crops have created a better feeling, resulting in more trading without the boom element. Drugs are active and sales greatly improved. Money is in fair demand, banks discriminating on discounts so as to accumulate loanable funds for future crop demands.

From Minneapolis, Minn.: In most lines of jobbing a fair trade is expected, as is usual during harvest. Collections are light, but with the movement of the new crop an improvement is assured. The money market is close. Deposit balances are drawn down with calls for renewals of paper.

From Milwaukee, Wis.: Trade generally improving and money in fair supply.

From Topeka, Kan.: General trade is quiet. No change need be expected until September 1. Money is in better demand than a few weeks ago. Collections are only fair.

From Omaha, Neb.: Trade in general is quiet, as is to be expected in August during harvest.

From Baltimore, Md.: The general volume of business has reached very fair proportions, and in some branches a marked improvement was reported. Orders are coming in quite freely from Tennessee, the Carolinas, Virginias, Pennsylvania and other sections. There is an exception in the case of Georgia, where trade is reported backward this season.

From Richmond, Va.: General business is much improved and is now quite active.

From Norfolk, Va.: Trade for the past week has somewhat improved. Peanuts are promising. Collections improved. Various lines of trade are improving.

From Wilmington, N. C.: General business quiet and the outlook fair.

From Savannah, Ga.: Trade shows more activity with wholesale dealers, there being more buyers in the market seeking fall supplies. The retail trade has not fully opened. Real estate continues to advance, and merchants are fully employed.

From Memphis, Tenn.: Business during the past week was only fair. Money is 6 per cent. Exchange ¼ per cent. premium.

From Nashville, Tenn.: Trade here is better than last week. The outlook for fall trade is encouraging. Orders are coming in rapidly and jobbers generally are in good spirits.

From San Francisco, Cal.: The outlook for the fall trade is very promising. Stocks are heavy in most lines. The triennial conclave of Knights Templar has attracted a great number of country merchants to town, who will purchase stocks before leaving. This will make the fall trade a fortnight earlier than usual. Money is plentiful and in fair demand. Exchange is 5c. premium.

INDUSTRIAL.

The convention of the members of Amalgamated Association of Iron and Steel Workers has concluded its session at Pittsburgh. All of the proposed action in relation to arbitration and trades' unions was not taken. It was decided that the nailers' scale shall be determined on June 1 of each year. A law was passed requiring nailers to teach annually 3 per cent. of the nail-feeders employed in nail mills hereafter, provided the feeders are of the required age and are members of the Amalgamated Association in good standing. Mr. Jarrett declined a renomination to the presidency of the Association. Mr. William Weihe was made his successor. He is a Democratic member of the Pennsylvania State Assembly, and says he approves the principles of the Association regarding a tariff for protection, and announces that he will pursue the same policy adhered to by Mr. Jarrett.

BREADSTUFFS ABROAD.

The weather in the agricultural regions of the United Kingdom remains unfavorable, and, in addition to being late, the wheat crop there will lose materially in quality, owing to the long continuance of rainy weather and the presence of worms. Rust is spreading rapidly, and various authorities agree that the English crop is losing daily in quality as well as quantity. It is now certain that the acreage of the wheat crop in the United Kingdom is much smaller than that of last year, and when the great variation in the crop is taken into consideration it becomes an absolute certainty that the bulk of the output must be much smaller than usual. The atmospheric conditions of the latter half of July and the first week in August were such as to destroy the probability that the average quality will be at all equal to the possibilities of a month ago. In France, also, the weather has been very unfavorable, and reports now point unanimously to a short crop. The London *Corn Trade List* estimates the French wheat harvest at 75,000,000 hectoliters, or 47,000,000 hectoliters (about 128,000,000 bushels) less than the official report of the crop of 1882, which was 122,000,000 hectoliters. Other advices place the probable yield of wheat in France at 85,000,000 to 95,000,000 hectoliters. The latter estimate, if correct, would still leave the crop short 27,000,000 hectoliters, or about 76,000,000 bushels. During the season of 1882–3 France imported about 40,000,000 bushels of wheat. Existing French stocks of wheat are in excess of those of last year at the corresponding time; but it is, nevertheless, believed that French imports during 1883–4 will necessarily exceed those of the preceding year. In Germany the prospect has not improved, the weather having continued wet and unsettled, while the latest reports from Austria-Hungary confirm the expectation previously expressed that exports thence during the ensuing season will be relatively small. From Russia the reports given this week have been less favorable. Constant rains during the last ten days in July and well into the current month have prevailed in the north. From fair to only average crops are reported from the south of Russia. From these, together with the unsatisfactory reports from other leading wheat-growing countries during the past month, the outlook for a higher range of prices appears to be good. A readier advance in prices, in view of this situation, is doubtless prevented in part by the presence there of large stocks at points of export. On this point, in reference to stocks in the United Kingdom, the London *Corn Trade Journal* says: It is likely that September will witness a slackening in imports and a consequent diminution in stocks. "There are now [August 4] 1,623,000 quarters wheat and flour on passage to the United Kingdom, of which about 750,000 quarters are due to arrive within the next four weeks, or 187,500 quarters per week; and if to this be added the probable further shipments from Atlantic ports and north Russia, and the probable diversions to the continent deducted, it appears difficult to expect that the required quantity of foreign wheat [about 350,000 quarters per week] will be made up, more especially as no provision has, so far, been made for the usual extensive shipments from the Atlantic ports in August." A late harvest in Europe, which is now likely, coincident with a similar state of affairs in America, means a considerably smaller available supply than usual in August and September, the effect of which would doubtless be very decisive were it not that the stocks on hand are ample. And under these circumstances it would not be surprising if prices were to harden. Cable advices August 13 confirmed the preceding reports of bad weather, with consequent damage to the grain.

The quantity of grain in passage for the United Kingdom and continent August 16, reported by cable, was:

	Wheat. *Qrs.*	*Maize.* *Qrs.*
To the United Kingdom	1,725,000	330,000
To continent	540,000	80,000
Total quarters	2,265,000	410,000
Equal bushels	18,120,000	3,280,000

Compared with the previous week:

To the United Kingdom	1,675,000	290,000
To continent	460,000	110,000
Total quarters	2,135,000	400,000
Equal bushels	17,080,000	3,200,000
Increase, bushels	1,040,000	80,000

AMERICAN BREADSTUFFS MARKET.

On Saturday wheat at New York left off ⅛c. below the price bid for August at the close on Friday, at $1.17½. The decline, after an advance earlier in the day, was due to less firmness abroad, as reported by cable, and a decline in orders to buy. The Wall street disturbance on Monday affected the grain market. Buyers were not numerous, and operators as well as the public preferred to await the progress of the blow up the street before making heavy engagements in any direction. On that day wheat declined 1c., making a total of 1⅛c. since the close on Friday and leaving bids at $1.16⅝. This movement was the more noticeable in that there had been some animation in the demand from abroad, where prices were firmer and offerings light. Tuesday brought the grain market to where it left off on Saturday, at $1.17½. The final upward move was simultaneous with the steadying of securities. The principal bear talk on 'change now appears to hinge on the excellent prospects for spring wheat in the northwest and heavy stocks. These points however have not proved enough to overcome the effect of the actual shortage in this year's crop, backed by a large deficiency in Europe. Exports were fair and prices closed firm. Wednesday, with all prospect of further financial disturbances removed and higher prices and a firm market on the other side, gave August wheat a lift to $1.19 bid. The demand for wheat for export was better and transactions in options were animated. Thursday's market was easier, and prices on the later options recoiled a little. On Friday the market was very irregular. There was an advance of from ¼c. to 3⅛c. a decline of from ¾c. to 1⅛c. and a recovery later of from ¼c. to ⅜c. Spot lots steady. Exports quiet and speculation restricted.

There is no crop news to chronicle other than that late reports from Wisconsin and Iowa, and particularly from Minnesota and Dakota, are more and more favorable, with good weather. The new wheat harvested thus far comes forward slowly. This reacts unfavorably on the flour market, as farmers have been holding wheat above the views of western millers. Receipts here are behind the demand. Foreign buyers have called for more low grade than the market contained. The price of flour has tended upward, but owing to the peculiar situation in which it is placed no permanent strength in prices has been gained. The Washington Agricultural Department report of August 1, 1883, makes the condition of the spring wheat crop in the northwestern states 97—same as in 1882, but higher than any previous August since 1877.

The receipts of wheat at tide-water for the week ending August 11 increased to 2,033,377 bushels from August 4, when they were 1,798,708 bushels. The exports from the Atlantic ports for the week ended August 11 amounted to 1,622,037 bushels, against 895,552 bushels August 4. From September 1, 1882, to August 11, the exports of wheat from the Atlantic ports were 65,958,839 bushels, against 54,144,245

bushels in a corresponding portion of the preceding year, a gain of 11,814,594 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended August 11 amounted to 2,103,694 bushels, against 1,629,119 bushels in the preceding week, and the shipments to 1,128,185 bushels, against 894,341 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) August 11, as against the preceding week, showed an increase of 1,650,000 bushels.

The course of the wheat market at New York and Chicago during the past week, has been as follows:

	AT NEW YORK.				AT CHICAGO.	
	Aug.	*Sept.*	*Oct.*	*Nov.*	*August.*	*Sept.*
Aug. 10.....	$1.17¾	$1.18⅞	$1.21	$1.23	$1.02¾	$1.04
Aug. 11.....	1.17⅜	1.18½	1.20½	1.22½	1.02¼	1.02⅝
Aug. 13.....	1.16¾	1.17¾	1.19⅞	1.21¾	1.01	1.02¾
Aug. 14.....	1.17⅛	1.18¼	1.20¾	1.22¼	1.01¾	1.03
Aug. 15.....	1.18¾	1.19⅞	1.22	1.24	1.02½	1.02⅝
Aug. 16.....	1.18¾	1.19⅞	1.21½	1.23⅝	1.02¼	1.03¼

At 1 P.M. Friday, August wheat at Chicago was quoted at $1.02, and September at $1.02¾.

INDIAN CORN.

The receipts of corn at the leading western markets continued heavy last week, as did the shipments of the same from those centers to the seaboard. The exports during the week were but little heavier than in the preceding seven days. No. 2 mixed, August delivery, remained steadily at about 61¾c. per bushel on Friday and Saturday, and stubbornly held this at the close on Monday after the break. On Tuesday corn advanced 2c. per bushel and another ½c. on Wednesday. Reports of probable damage to the growing corn from frost helped this advance, but more liberal buying in the option market had as much to do with it as anything else. On Wednesday orders for corn were cabled from abroad, which reanimated that cereal and explains the additional gain in price. The supply of corn at this point being relatively small, the strength of quotations was more pronounced. On Thursday corn declined in sympathy with wheat, and owing to the stoppage of foreign buying, which was doubtless influenced by reports of better weather from the west. On Friday No. 2 spot corn dropped 1¼c. on heavy offerings, and closed dull. Other grades were firm. Options fell away ⅝@1c. No export movement.

Irrespective of the question of quality of the growing crop, dependent upon the weather, the lateness of crop, etc., there are no advices in any way tending to change the previous estimates that the total yield of Indian corn this year will be upward of 1,700,000,000 bushels. The government Agricultural Bureau report of August 1, gives the average condition of corn as 89, against 88 July 1. The condition of the 1879, or census crop, August 1 was 99 and the yield 28 bushels per acre. The returns this year indicate about 25 bushels as the average yield per acre. The weather in the northwestern corn regions has been cooler of late, but nothing definite as to alleged damage from frosts has been made public.

The receipts of Indian corn at the Atlantic ports for the week ended August 11 were 1,332,046 bushels, against 1,419,932 in the preceding week, while the exports from the same points amounted to 1,202,862, against 1,149,839 bushels. From September 1 last to August 11 the exports of Indian corn were 44,972,629 bushels, against 25,600,571 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, August 11, had increased 127,393 bushels as compared with August 4. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending August 11, were 2,103,091 bushels, against 2,064,782 the week preceding, and the shipments were 2,142,236 bushels, against 2,816,936 in the preceding week.

The closing prices of Indian corn at New York and at Chicago at 1 p.m. for the past week were:

	At New York.			Chicago.	
	Aug.	*Sept.*	*Oct.*	*Aug.*	*Sept.*
August 10.....	.62	.61½	61⅜	.50⅞	.50¼
August 11.....	.62	.61¾	.61⅜	.50⅜	.50
August 13.....	.61⅞	.61⅛	.61⅜	.50⅜	.49½
August 14.....	.63¾	.62½	.62⅝	.51¾	.50¾
August 15.....	.64½	.63¼	.63¼	.52	.51⅛
August 16.....	.63¾	.62⅜	.62¾	.51¼	.50½

Corn at Chicago at 1 P.M. yesterday was for August 51c. and for September 50⅛c.

The prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

THE BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Receipts of flour are light, and, as stocks are small and home trade demand is fairly active, the market is hardening. Some grades show an advance of 25c. per barrel since last week. Grain has been irregular under speculative influences, but closes a shade better for all descriptions. Exporters are buying wheat to some extent, but trade is not active. Corn is dull for export and on speculative account. Oats are scarce.

From Cincinnati, Ohio: Flour continues to disappoint speculators, and the week has been marked by a lack of animation and but slight improvement in prices. The movement of grain was less in volume, but marked by an improvement in prices.

From Chicago, Ill.: Wheat is dull and tame, and the advance of the previous two days is lost; the prospect of increasing receipts at all points shakes the confidence of buyers. Crop reports are good. There is a fair shipping demand for red winter, but scarcely any for spring; prices chiefly sustained by bull manipulations and covering by shorts; the general feeling that prices must go lower induces free shipments. Corn has weakened by the fine rains in most of the drouth-stricken sections and warmer weather; the shipping demand is less urgent. Oats are weak; there is no pressure to sell; receipts are large; the shipping demand smaller. Rye is firm and active.

From Peoria, Ill.: Grain receipts are more liberal than for several months past.

From Louisville, Ky.: The receipts of wheat continue light, farmers are seeking better prices. The demand from millers is fair, and prices are ruling higher. The corn crop has been materially aided by recent rains, and a fair price is now assured.

From St. Louis, Mo.: The grain markets have weakened all around, with heavy receipts of corn and wheat. The flour market has greatly improved this week and the movement is large, though values have advanced very little.

From Baltimore, Md.: A good business is doing in flour and prices rule firm. The wheat markets were very active, and most of the buying was done by shippers. Prices are firmer. Corn continues in good demand and offerings of southern lots are small.

From Norfolk, Va.: Corn is somewhat affected by the drouth.

From Wilmington, N. C.: Breadstuffs and grain are steady. The grain crops are suffering from drouth.

From Savannah, Ga.: The hay and grain are in good supply and in very fair demand for the season. Weather being warm, with occasional rain, makes it favorable for the growing crops.

From New Orleans, La.: Corn is nominal at 55@55½c.; wheat $1.18. Receipts from Friday to Thursday, inclusive, were: Corn, 300,000 bushels, and wheat, 50,000 bushels. Exports: Corn, 80,000; wheat, 50,000. The stock of choice and fancy flour, which is most in request, is now of fair proportions.

From Memphis, Tenn.: Corn is dull and the supply is plentiful. Meal is weak. Flour is firm and the demand is good.

From Milwaukee Wis.: The wheat market is steady with fair shipping demand. Flour moderately active and prices leading upward.

From Nashville, Tenn.: Corn is in fair demand. Wheat and flour are rather quiet.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Toledo, Ohio: The wheat crop in this section is poor. The corn crop will be very light, but oats and hay will have a large yield.

From Des Moines, Iowa: The crops are promising and the general feeling of confidence is increasing.

From Milwaukee, Wis.: Another week of fine weather has enabled farmers in this latitude to finish their wheat harvest, and threshing has commenced. New wheat of good quality is received daily, samples of No. 3 weighing 58 and 59 pounds to the bushel being noted. A heavy rain Monday supplied the necessary moisture to vegetation and the crop prospects are very favorable where the soil is good and farmers are thrifty.

From Minneapolis, Minn.: The weather is fine for harvesting, which is progressing favorably. The number of acres of wheat in Minnesota this year is 2,500,007, an increase over last year of 77,000 acres. Think the average yield will be equal to last year, giving 35,000,000 bushels as the present crop. The increases in the acreage in Dakota are much greater than in Minnesota, with about the same yield. Higher temperature is forcing the corn crop, which is in fair condition but late. The result is uncertain.

From Omaha, Neb.: Crop reports from the state this week are very encouraging. Warm weather prevails and corn is doing well.

From San Francisco, Cal.: Barley is coming forward freely. Wheat is held for higher prices. No. 1 shipping is $1.72½ per cental afloat.

PROVISIONS.

If the much talked of liquidation be necessary in all lines of trade in order to put general business firmly on its feet once more the provisions market has taken its share of the same during the past week. On Saturday prices of pork and lard fell, and the operation was repeated on Monday. On Tuesday the provisions market was still weak and nervous, little more having been accomplished than to stay the outward tide. The approach to a panic in these commodities was not very close, still it was suggestively so. In explanation of the unexpected break it has been intimated that certain western banks, which had been loaning funds on pork and lard as security, had tired of their holdings and had decided to realize. The inference is, therefore, that they threw a heavy block of the products named on to the market, which at once sunk under the load. No particulars are offered in support of this explanation, and it is not impossible that its currency may be due to its plausibility, in the absence of any known efforts at manipulation on the part of the short interest. There has been a better inquiry for spot lard for export during the week, but the general demand for hog products is not marked by that strength which holders have been waiting for. Speculation was very excited during the earlier portion of the week, but has since fallen away. Receipts of hogs at the west continue very heavy and prices thereof have declined. On Friday the provisions markets were steady. Trading was light, and at the close the market was called dull and easy.

The exports of leading hog products from the principal Atlantic and gulf ports for the week ending August 11, with comparisons, were as follows:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York.....	2,171	4,820,687	4,836,339
Boston.....	221	1,015,119	2,677,395
Portland.....	..	....	....
Montreal.....	..	...	....
Philadelphia.....	..	4,072,500	29,000
Baltimore.....	..	....	229,121
New Orleans.....	80	1,400	770
Totals.....	2,472	9,914,706	7,772,625
Previous week.....	6,157	9,319,916	10,645,905

The total quantity of hog product exported from the above-mentioned places from November 1, 1882, to August 11, 1883, was as follows:

	1882–83, pounds.	*1881–82. pounds.*
Pork.....	37,445,400	40,979,000
Bacon.....	331,573,594	324,771,310
Lard.....	221,149,703	200,478,027
Totals.....	590,168,699	566,228,337

Prices of lard and mess pork at New York during the week were as follows:

	Lard, per lb., September.		*Pork, per bbl., spot mess.*	
	This week.	*Last week.*	*This week.*	*Last week.*
Saturday.....	8.59c.	8.56c.	$15.00	$15.50
Monday.....	8.43	8.45	15.00	15.50
Tuesday.....	8 50	8.54	14 50	15.37½
Wednesday...	8.60	8.60	14.50	15.50
Thursday.....	8.61	8.66	14.50	15.50
Friday.....	8.62	8.55	14.50	15.25

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There is a good jobbing trade in provisions, and a better feeling pervades the market, which closes stronger for all staples. Butter is weak and declining, under large stocks and prospects of continued liberal receipts. Cheese is quiet. Pennsylvania creamery cheese are in large supply, and almost unsalable, owing to poor quality.

From Nashville, Tenn.: Cattle market is good, with fair prices.

From Memphis, Tenn.: Meats and lard are quiet.

From Cincinnati, Ohio: The continual depression in the provisions trade has forced prices to a lower level. Consumers appear to be waiting for them to go lower yet.

From Chicago, Ill.: Pork is weak and the demand is chiefly local to cover shorts. Offerings are free. Prices are declining. Lard is in fair shipping and speculative demand and offerings are moderate. Prices are steady. Meats are in good shipping demand and steady. An advance in prices would check the demand. Hogs are weak and dull, packers holding off for lower prices. Cattle are active. Receipts for the week very large and the quality is good.

From St. Louis, Mo.: Provisions are in light sale, and stocks are small. Cattle and hogs have been active all the week, with fair offerings and good prices.

From Topeka, Kan.: Trade in provisions and groceries fair and well up to the average. Produce is firm, with a very fair trade.

From Baltimore, Md.: Provisions rule easy, and prices are lower.

From Wilmington, N. C.: Meats irregular, prices tending downward.

From New Orleans, La.: The stock of provisions is small, and hinging altogether on the position at Chicago.

THE NEW YORK DRY GOODS MARKET.

The week has not been a very satisfactory one either to the jobber or commission merchant. Trade opened up brisk enough, but fell off considerably on Wednesday, and though it rallied a little toward the close the latter half showed a quietness rather unusual to the season. The cause was largely owing to the failures in Wall street and to the depression following. There are plenty of buyers in the market, near-by western trade and many representatives from the south. They are evidently holding off to some extent, awaiting a more settled state of affairs. Commission merchants are confident of a good volume of business for the season, as they believe the dry goods trade of the country to be in as sound a condition as any. The jobbing trade generally are but lightly stocked and the opinion is expressed that they must have goods at an early day. The far-off western trade on their first visit here were but light purchasers; their usual return is early expected.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

From London: At Manchester cotton goods are in quiet demand. There is a fair business for China and other Eastern markets, with moderate sales of finished materials, but at low prices.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Dry goods are looking better, but a heavy trade is not expected. Jobbers exact more prompt payments.

From Boston, Mass.: The jobbing trade in dry goods has improved a little and dealers feel quite sanguine in regard to distribution when the vacation season is over. From agents' hands there have been rather small movements, but while the present financial flurry lasts a conservative policy is no more than may be expected. Seasonable goods receive a fair share of attention and stocks are under control, while prices in the main are on a steady basis.

From Providence, R. I.: The print cloth market is quiet and sales are moderate; 64s are quoted at 3½c. less ½ of 1 per cent., and 56x60s at 3 1/16c. There are about 135,000 pieces on hand.

From Rochester, N. Y.: Dry goods jobbers report trade quite active for ten days back and increasing daily.

From Philadelphia, Pa.: Jobbers are doing more on small orders for miscellaneous assortments, but the market is not active. With commission houses trade rules quiet, but the situation is regarded hopefully in most quarters. Woolens are moving more freely in some lines, notably in worsted effects, but undesirable styles are neglected. Low cotton goods continue weak.

From Pittsburgh, Pa.: Dry goods are in fair demand for the season, and a slight improvement is noted over last week.

From Cincinnati, Ohio: Midsummer dullness continues in the dry goods line, but dealers are making extensive preparations for a good fall trade. Prices are steady. Hemp trade is light, but without change.

From Columbus, Ohio: Trade in dry goods is reported quite active for this season and entirely satisfactory. There is some improvement in collections reported.

From Louisville, Ky.: The dry goods movement

is more than passably active, showing an increase and a good prospect.

From St. Louis, Mo.: Dry goods is less active than lately, but selling better than usual in midsummer and at firm prices.

From Peoria, Ill.: In dry goods no new features are reported and collections are slow.

From Detroit, Mich.: Dry goods merchants report an average fair trade, fully up to last year, with collections improving generally; a very fair business is reported doing and good fall trade looked for. Collections fair for the season.

From St. Paul, Minn.: Dry goods sales have been decidedly better within the week past, through personal and order-taking assortments. Some are anticipating fall and winter wants.

From Minneapolis, Minn.: The dry goods trade shows more activity, but the movement is not large. Business is good for August. Jobbers are receiving their stocks for the fall trade and the prospects for a heavy business are satisfactory. The facilities for meeting an increased demand for goods are largely increased in this city.

From Topeka, Kan.: Dry goods are very dull, being less than at corresponding month last year.

From Omaha, Neb.: Dry goods houses are busy getting out fall goods, and sales this week are reported good.

From San Francisco, Cal.: Dry goods jobbers are kept busy, although the fall trade has not fairly opened.

From Baltimore, Md.: Jobbers in dry goods are more active and the fall season has fairly opened. Southern and western orders are arriving, and the volume of business at this time compares very favorably with same period last year. Prices are firm. Retail dealers are not doing much, but anticipate a brisk season in the near future.

From Richmond, Va.: The dry goods trade is active.

From Norfolk, Va.: Dry goods jobbers are quite active filling orders from travelers.

From Wilmington, N. C.: Dry goods are inactive and collections are only fair.

From Savannah, Ga.: Dry goods stocks are full, and the volume of trade in this line is increasing.

From Galveston, Tex.: Dry goods and general jobbing are more active,

From Memphis, Tenn.: The dry goods trade shows a slight improvement only.

CLOTHING.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Manufacturers of clothing continue to speak favorably of the progress of trade, and say their orders are coming in quite as freely as at this time last year. They are running along without any regard to the financial disturbances in other branches.

From St. Paul, Minn.: Clothing gradually increasing sales.

COTTON.

The market for spot cotton at New York for the week has been very dull, and the movement scarcely sufficient to base quotations properly. Middling uplands dropped a point on Tuesday, but have since remained unchanged, the closing price last night being 10 3-16c. The sales for the week foot up as follows: For export 1,026, and for consumption 2,135. The total sales aggregate 3,136 bales, against 3,774 last week. Deliveries on contract amount to 6,700 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year*
Ordinary	7⅝	7 11-16c.	10 11-16c
Strict ordinary	8 1-16	8¼	11⅛
Good ordinary	8⅞	8 15-16	11 15-16
Strict good ordinary	9 7-16	9½	12⅜
Low middling	9 13-16	9⅞	12¾
Strict low middling	10	10 1-16	12 15-16
Middling	10 3-16	10¼	13 1-16
Good middling	10 9-16	10⅝	13 7-16
Strict good middling	10 13-16	10⅞	13 11-16
Middling fair	11 5-16	11⅜	14 3-16
Fair	12 1-16	12⅛	14 15-16

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	7 1-16	7⅛	10 5-16
Strictly good ordinary	7⅞	7 15-16	11⅛
Low middling	8 9-16	8⅝	11 13-16
Middling	9 9-16	9⅝	12¾

The market for spot cotton closed easier.

The future market for the week has been inclined to dullness. The closing quotations last night show a decline of 4 points for August, and no material change for other near months, and an average advance of 3 points for later ones. The total sales for the week foot up 469,900 bales, against 581,400 for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
August	10.12	10.16	12.94
September	10.15	10.15	12.53
October	10.07	10.06	11 90
November	10.09	10.05	11 66
December	10.09	10 07	11.67
January	10.18	10.15	11.73
February	10.30	10.27	11.84
March	10.42	10.38	11.99
April	10.53	10.49	12 12
May	10.64	10.60	12 25

The market for futures closed dull but steady.

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at four leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
New Orleans	5,950	9¾	12⅝
Savannah	89	9¾	12
Charleston	75	9⅞	12⅛
Norfolk	854	9⅞	12⅛

The total receipts of cotton at the ports since September 1 are 5,941,388 bales, against 4,644,861 last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	845,475	424,986
New Orleans	1,609,014	1,175,419
Mobile	311,580	263,406
Savannah	813,663	726,982
Charleston	566,539	492,798
Wilmington	128,928	133,572
Norfolk	797,406	608,919
Baltimore	....	35,947
New York	152,169	172,830
Boston	....	232,427
Philadelphia	98,989	82,490

Below will be found the receipts for each day of the week ending Friday, August 17, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	659	800	1,421	207	903	354
New Orleans	82	470	561	134	208	226
Mobile	102	90	....	1	....	45
Savannah	9	200	296	256	118	48
Charleston	40	5	27	12	5	21
Wilmington	14	6	....	....	....	....
Norfolk	13	166	23	356	71	185
Baltimore	265	....	210	92	69	....
New York	....	42	40	....	6	....
Boston	....	87	79	129	....	....
Philadelphia	....	....	....	....	....	81
Totals	1,181	1,866	2,657	1,187	1,380	....
This day last week	1,390	1,513	2,285	1,202	1,284	1,609
This day last year	809	605	2,271	692	513	941

The total receipts at the ports for the week were 10,289 bales, against 9,686 last week and 6,338 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 2,286 bales, against 2,485 bales last week and 1,749 bales for the corresponding week last year. The shipments for the week were 4,094 bales, against 5,033 bales last week and 5,662 bales for the corresponding week last year. The stocks for the week were 39,980 bales, against 46,268 last week and 14,106 for the same week last year.

The Liverpool market for prompt delivery uplands has been easy with a moderate inquiry, which was freely supplied. Quotations have remained unchanged at $5^{11}/_{16}$d., the closing price last Friday. The market for futures has been dull. Prices have remained practically unchanged, not varying more than three points during the week.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
August	....	....	7 9-64d.
August-September	5 38-64d.	5 38-64d.	6 42-64
September-October	5 37-64	5 38-64	6 58-64
October-November	5 36-64	5 37-64	6 43-64
November-December	5 36-64	5 36-64	6 39-64
December-January	5 36-64	5 36-64	6 37-64
January-February	5 38-64	5 38-64	....

The sales for the week at Liverpool were 47,500 bales (of which 33,500 were American), against 62,000 (of which 45,000 were American) last year. The sales for export were 5,100 bales, against 6,500 bales last year. The sales for speculation were 3,200 bales, against 4,300 bales last year. The amount forwarded was 7,700 bales, against 4,900 bales last year. The stock in port is 909,000 bales (of which 631,000 are American), against 654,000 bales (of which 338,000 were American) last year. The total imports for the week were 27,000 bales (of which 18,000 were American), against 46,500 bales (of which 17,500 were American) last year, and the amount afloat 142,000 bales (of which 28,000 are American), against 190,000 bales (of which 21,000 were American) last year.

The Manchester market closed dull and tending down.

The Havre market is quiet and steady.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is quiet and steady, sales being moderate. Middling uplands are worth 10⅝c., and middling gulfs 10⅞c. The stock on hand is fair for this time of the year.

From Philadelphia, Pa.: Consumptive requirements have not increased and the market has ruled dull, but shows no quotable change.

From Cincinnati, Ohio: Spinning demand for cotton is fair, sales being principally of the better grades at stronger prices.

From Louisville, Ky.: In cotton a good inquiry prevails and prices are firm and the first bale of new cotton was sold here at auction last Saturday at 21c. per pound. It was raised by C. C. Clare in Sumpter county, Georgia, and consigned to Trabul & Co. and sold to the house of T. N. P. Forewood & Co., cotton buyers.

From St. Louis, Mo.: Cotton sales are improving slightly on demand from spinners.

From Baltimore, Md.: Speculation in cotton is steady, but the market for spots is dull and easy.

From Wilmington, N. C.: The receipts of and demands for cotton are small.

From Savannah, Ga.: The cotton market is still quiet and sales are very limited.

From New Orleans, La.: The cotton movement is moderate. Sales of spots are restricted by the limited stock offering. Spots have advanced one-sixteenth of a cent on all grades except low middlings. Futures have declined as follows since Thursday: August, ten points; Septembers, three; Octobers, nine; Novembers, five and Decembers ten. There is a heavy visible supply, especially at Liverpool, which counteracts to some extent the unfavorable crop news in regard to drouth, and apprehensions of serious damage should heavy rains occur in the present condition of the crop. Bets on as low as a six and a half million crop are now made, and few estimates are over six million eight hundred thousand bales.

THE GROWING COTTON CROP.

[By Telegraph to BRADSTREET'S.]

From Norfolk, Va.: Cotton is somewhat affected by the drouth. The first bale of new cotton from Alabama was received Tuesday. Fine rains for the past two days have greatly raised the spirit of the farmers.

From Wilmington, N. C.: Cotton is suffering from drouth.

From Eufaula, Ala.: Caterpillars have appeared on nearly all bottom lands on the river and creek bottoms tributary to Eufaula, but as yet they have done no serious damage, but it is thought that there will be. In all other respects the crop is looking finely, and the prospects look good for a crop as large as that of 1882-83.

From Galveston, Tex.: The weather still continues dry and very hot. Reports of cotton crop are very discouraging, owing mainly to the continued drouth.

WOOL.

The volume of general business in wool has fallen off somewhat, but there has been no radical change in the condition of the market. The inquiry is fair, but not so active as a fortnight ago. There is still a good deal of woolen machinery idle, and the condition of the goods trade, though more satisfactory than of late, is not sufficiently encouraging to warrant a resumption of production except for actual orders, as there is still a considerable accumulation of certain styles seeking an outlet at comparatively low and unremunerative prices. Worsted fabrics, as a rule, are closely sold up and in very fair demand, and all arrivals of long staple wools are therefore taken promptly by manufacturers at steady prices. The general tendency of consumers is to move cautiously, and, while requirements are freely met, and there is an evident feeling that wool is not dear at present prices, there is not much disposition to pile up stocks in advance of need. Buyers have this week been using the stock flurry and the closer scrutiny of credits by the banks and private lenders as a lever to depress prices, but have met with little success, as holders generally have confidence in the staple, and are not inclined to make concessions. Wool cannot be laid down from the country to undersell current rates on the seaboard, and the feeling among holders at primary points is very strong.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The demand for wool continues quite active, the sales of the week large, amounting to 3,151,000 pounds of all kinds. Prices are low, but the market is firm at present current rates. Manufacturers are free buyers of round lots, as they have evidently come to the conclusion that prices are as low now as they are likely to be any time this year. The sales of Ohio and Pennsylvania fleeces have been at 36@37c. for X and 36½@39c. for XX and XX and above. Michigan fleeces range from 34@34½c. per pound for X, and choice lots at 35c., with a fair demand. Combing and delaine selections are sought after, and the market is very firm for all kinds of combing wools. The sales have been at 38@40c. for Michigan and Ohio delaine and 42@43c. for No. 1 combing. The demand for unwashed wools has been quite active, and large sales of western, territory and Texas at a wide range of prices, principally from 23@30c. per pound. Low and coarse unwashed have been sold at 16@22c. per pound, as to quality. In spring California there have been sales of 200,000 pounds choice at about 29@30c. per pound. Pulled wools have been in demand, with large sales of western and eastern supers. Prices range from 22@38c. for common and good supers, and 40@43c. for choice lots of eastern and Maine. In foreign wool the sales have been of no importance, including small lots of Australian, Canada combing and carpet wools.

From Philadelphia, Pa.: Demand has been fair, but not so active as last week, and sales have fallen off. The week's business foots up 1,000,000 pounds, as against 1,750,000 pounds at last report. Prices generally steady.

From Cincinnati, Ohio: There is no change in prices of wool.

From Louisville, Ky.: The wool sales are large; prices ruling low. Holders are looking for better prices in the near future.

IRON.

There is less buoyancy in the iron trade to-day than there was thirty days ago. While there is no cause for discouragement in the outlook, dealers have come to the conclusion that August, September and October, generally the portion of the year in which the best business is done, will furnish only a moderate trade at no special advance in prices. Buyers appear to have sat down upon the market. They will not anticipate their wants, and persist in buying in small lots, as they require the iron. This gives a fair passing trade, but nothing upon which to base any advance from the manufacturers' or dealers' point of view. Prices for No. 1 American foundry irons continue as last reported, $22@$23, with $23.50 paid for special brands. Bar iron is reported to be somewhat better than for a month or so previously, but is far from having acquired strength. The demand has improved a little, but prices are unchanged. Steel rails continue firm, at $38@$37, with prompt deliveries doing 50c. better per ton. There is an improved request for angles and plates. Scotch pig iron receipts during the week aggregate about 1,500 tons. Prices remain firm and unchanged. Most of that which arrived had been sold previously. Sales to arrive were small. Stocks of Scotch here are not large. The strike of the Scotch colliers for 6d. per ton more wages, consequent on the advance of 1s. per ton for coal abroad, may exert some influence on Scotch pig, but none is yet reported. The New York Metal Exchange reports about one-fourth of the pig iron furnaces in the United States have made returns to that body, showing a decline of stocks of pig at the furnaces during the month. The value of such statistics is conceded, but some of the largest furnaces are known to have declined to furnish the information requested, which suggests incompleteness.

THE BRITISH IRON TRADE.

[By Cable to BRADSTREET'S.]

From London: Iron is dull. Cleveland pig is cheaper than last week. Glasgow is comparatively steady. There is a fair business in Staffordshire.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is weaker to sell. Consumers decline to order ahead at the stiff prices asked, especially as finished iron has slightly declined. Sales are small. Bessemer is firm. Muck bars are moving quietly. Merchant bar is weak. There is a good deal selling, but the supply is growing by the gradual resumption of mills. Nails are firm, with good inquiries for September delivery. Construction iron is selling fairly at steady prices. Steel rails selling in small lots, but large orders are $1@$2 below sellers' views. Old material is scarce, and 50c. to $1 higher.

From Pittsburgh, Pa.: The iron trade is unchanged and quiet.

From Cleveland, Ohio: The iron market is without material change, aside from a slightly improved tone which seems to pervade the trade.

From Cincinnati, Ohio: The tone of the iron trade is more confident. The demand is apparently limited to immediate wants.

From Chicago, Ill.: Hardware, metals and tinners' stocks are in fair demand. Bar and angle iron and nails are in average request. Stocks are ample and pig iron is unchanged.

From Louisville, Ky.: Bar iron is active with a good inquiry, and prices are fairly sustained. The demand for wagon material is heavy. General hardware is improving.

From St. Louis, Mo.: The demand for manufactured iron is improving, with steady values. In pig iron the demand continues good at unchanged rates.

From Detroit, Mich.: In iron prices hold about the same. The market is reported firmer and a better feeling prevailing.

From St. Paul, Minn.: Hardware, after two weeks of moderate trade, finds its sales extending. Nails are scarce and firm. Bar iron is in easy demand.

From Baltimore, Md.: In the iron market favorite brands are in fair demand and prices rule steady.

COAL.

There has been an advance of 10c. on egg, 20c. on stove and 15c. on chestnut coal made by the Pennsylvania Coal Company, and the impression appears general that other members of the Anthracite Coal Association will make corresponding advances within a short time. This brings the regular lines of coal well up to the last circular. There is as yet no special improvement throughout the trade as compared with the week preceding or the week prior to that. The anthracite trade is experiencing a full, healthful movement and is finding a fair market, even under the pressure of the extra production which has been the rule thus far during the year. The anthracite coal tonnage of the various carrying companies for July aggregated 2,615,686 tons, being a decrease as compared with corresponding month last year of 141,564 tons. The Philadelphia and Reading Railroad and Central Railroad of New Jersey carried 1,026,481 tons; Lehigh Valley Railroad, 497,741 tons; Delaware, Lackawanna and Western Railroad, 427,646 tons; Delaware and Hudson Canal Company, 279,262 tons; Pennsylvania Railroad, 240,609 tons; Pennsylvania Coal Company, 121,596 tons; New York, Lake Erie and Western Railroad, 22,349 tons. The total tonnage of all the companies for the year to July 31 was 16,626,453 tons, an increase of 1,301,352 tons as compared with the corresponding period last year. The stock of coal on hand at tide-water shipping points July 31, 1883, was 502,150 tons, being a decrease during the month of 90,150 tons. The production of anthracite coal for the week ending August 11, 1883, was 729,421 tons, against 667,124 tons in 1832, and from January 1 to August 11, 1883, 18,163,710 tons, against 16,733,206 tons last year, a gain of 1,430,504 tons during 1883.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET's.]

From Providence, R. I.: The coal market is dull, and sales are small. Prices remain unchanged. The stock on hand is fair for the season.

From Chicago, Ill.: Coal is dull and unchanged.

PETROLEUM.

The week in petroleum circles has been a heavy one. The disturbance in financial circles naturally caused a part of this, but irrespective of the situation elsewhere there has been a surprising exhibition of letting the market alone in view of the fact that the statistical situation of the crude product has seldom been so bullish as at present. The shipments of oil out of the regions to supply the home and foreign demand have averaged about 3,000 barrels a day more than the receipts of oil by the pipeline companies from the wells. This means that consumption has gone ahead of production, and that the surplus stocks of oil of some 36,000,000 or 37,000,000 barrels are being drawn upon. The runs and delivery record of August have been uniformly of this nature. The renewed exploitation of known New York and Pennsylvania territory has thus far failed to reveal new wells of staying qualities, which points to a steady decline in production. There is no fair prospect in the way of new fields in adjacent territory. The domestic consumption, as usual, will be heavier during the remaining months of the year, averaging probably some 25,000 barrels daily, and foreign stocks, which have been heavily drawn on, will soon need replenishing. This points to an increasing demand for petroleum on top of a declining production, which is already less than the daily consumption. Still, the market for certificates of crude, as previously noted, has been dull, trading comparatively inactive, and prices have merely been maintained at a slight gain. The monthly report of the United Pipe Lines was published August 10. It showed an increase of 374,152 barrels in gross stocks, an increase of 35,729 in sediment and surplus account, and an increase in net stocks of 339,423 barrels. This increase in net stocks is the largest since February, when the increase was 567,779 barrels. The receipts of oil in July showed a decline of 125,020 barrels, and the deliveries a decline of 169,178 barrels. The excess of receipts over deliveries is 44,158 barrels greater than in the month previous.

On Saturday the speculative market closed at ⅜c. under the close on Friday, August 3. Monday's concluding bid was $1.08⅛, another drop of ⅜c. Tuesday and Wednesday showed more strength, and prices advanced to $1.10¼ and $1.09¾ respectively at the close on those days. Thursday's trading sagged off again, and the final price offered was $1.09¼. There was an active bullish feeling in 'change on Friday, and prices advanced. This was true of both crude and refined oil. Pipe-line certificates opened at $1.10¼ and closed at noon at $1.11. At 1:30 the opening price was $1.11⅛, and the buying continued spiritedly. The feeling in petroleum circles relative to the reported absorption of the Tidewater Pipe Line Company by the Standard Oil Company is that the statement is probably true. It is known that the Standard people have long been endeavoring to crush the Tidewater Company, the only opposition of special importance to the United (Standard) Pipe Line Company, and thus obtain an actual monopoly of the transportation and storage of petroleum. Several onslaughts on the Tidewater by the Standard have been vigorously repulsed, as alleged, owing to the generalship of J. R. Keene and F. B. Gowen. The trade have received word that the Standard has got the Tidewater—by paying for it the price asked by its owners. The latter have excellent facilities for storing oil and shipping it from the regions to Bayonne, N. J., where they have extensive refining works and water front. If the absorption has taken, or does actually take place, it will remove the only worthy antagonist which the great oil monopoly has yet encountered. News from the producing regions yesterday was mainly of a bullish character, but after the advance to $1.11⅝, against $1.10¼ at the opening, the desire to realize was so strong and so generally indulged in that free selling brought prices at the close back to $1.10 once more. This, against $1.08⅞ at the close last week, Friday, shows a gain of but 1⅛c. on the week.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, Aug. 11	1.08½	1.09½	1.08¼	1.08½
Monday, Aug. 13	1.08¼	1.08¾	1.07⅞	1.08⅛
Tuesday, Aug. 14	1.08¼	1.10⅜	1.08¼	1.10¼
Wednesday, Aug. 15	1.09⅜	1.11⅜	1.09⅛	1.09¾
Thursday, Aug. 16	1.09½	1.09¾	1.08½	1.09¼
Friday, Aug. 17	1.10¼	1.11⅜	1.10	1.10

Refined, Saturday, showed no change and little activity, holders apparently not caring to force their goods in view of the comparatively unsettled condition of crude. The latter in barrels, as well as naphtha, remained dull. Monday's quotations were again unchanged and the condition of business was no better. Another day of dullness throughout was recorded on Tuesday, but on Wednesday there was some activity in the market for refined oil and prices were advanced ⅜c. per gallon. There was also some demand for crude. Case oil was marked up to 9¼c. on Thursday. The improvement noted the day before was fairly sustained in refined, and prices were firmly held. There was, however, less business done. The export demand for crude in barrels was only fair. Friday saw refined go up another ⅛c. Case and crude oil also went higher. Quotations for crude certificates and refined and crude oils on the dates named were as follows:

	July 20.	*July 27.*	*Aug. 3.*	*Aug. 10.*	*Aug. 17.*
Certifi's, crude	1.06	1.08¾	1.08	1.08⅞	1.10
Refined, 110°	7⅛	7½	7¼	7⅜	7⅜
Refined, 70°	7¼	7⅜	7⅜	7½	8
Crude, in bbls	6⅝@7⅜	6¼@7½	6⅝@7⅝	6¾@7¾	6⅞@7⅞
Case, plain	8¾	9⅛	9	9	9⅜@10⅝
Naphtha	5⅛	5	5	5	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending August 11, was 12,637,109 gallons, against 20,278,552 in the preceding week. The total export from the United States since January 1 was 383,122,729 gallons, against 403,218,509 gallons in the corresponding portion of 1882, a decline in the current year of 20,095,780 gallons. The total exported from New York city during the week ended August 11 was 9,046,991, and during the year, to that date, 313,972,130, against 320,051,107 gallons in a like portion of 1882. The decrease in shipments on the year from New York alone, as compared with 1882, was 6,078,977 gallons (crude equivalent), or about 30 per cent. of the total decline recorded thus far in the year.

The National Bureau of Statistics reports that the total actual number of gallons of petroleum and petroleum products exported in June last was 47,923,069, valued at $4,305,086, against 54,066,294 gallons in June, 1882, valued at $4,669,564. For the twelve months ended June 30 last the total so exported was 505,931,621 gallons, valued at $44,913,079, against 559,954,590 gallons, valued at $51,232,706 in the twelve months ended June 30, 1882.

PETROLEUM ELSEWHERE.

[By Telegraph to BRADSTREET's.]

From Philadelphia, Pa.: There is a fair export demand for refined, which closes firm at ⅜ @ ½c advance from last week's prices.

From Baltimore, Md.: A better feeling prevails in the petroleum market, and prices of refined are firmer.

OCEAN FREIGHTS.

The past week has not brought a very satisfactory business in this line. The financial difficulties in the earlier portion of the week so unsettled general trade for the time being that no transactions were entered into. Wednesday saw a weakening of berth freights, and Thursday an actual decline in provisions, oil and grain. There had been some demand for steamer room to arrive at the leading Atlantic ports, but that soon fell away. Baltimore has had more inquiry again this week, and the ocean freights market there has been better. The advance in oil checked petroleum chartering at New York, and it is upon this export that a good share of the business done in ocean freights here of late has had to depend.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET's.]

From Philadelphia, Pa.: There is a better feeling in the transatlantic freight market. Liverpool steamer room is engaged ahead for grain, and the supply of tonnage in port is small both for grain and petroleum. The inquiry for charters is more active, and rates have advanced 6d. per quarter for grain and are generally stronger for oil.

From Wilmington, N. C.: Freights—foreign are firm; coastwise nominal.

From New Orleans, La.: Ocean freights are dull, and there is scarcely any movement in bulk grain.

From San Francisco, Cal.: Ships demand higher freight charters. To Liverpool wheat is 55s.; to Cork, 57s. 6d.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET's.]

From Boston, Mass.: There is a gradual falling off in new business in the boot and shoe market, but manufacturers continue to be fully employed on orders, and are still shipping large quantities of goods, which are urgently called for. In another week or two work will slacken off, as there is a strong disposition to keep as close as possible to contracts and not have any goods to carry over. So far trade has been satisfactory as regards volume, and the jobbing business is still quite active, but, as usual, there is more or less complaint about profits. The debts of F. Shaw & Brothers, as shown by their statement, are larger than was expected, and there is a tone of disappointment among creditors. Shipments for the week 74,592 cases.

From Chicago, Ill.: Boots and shoes are moving fairly well on orders.

From St. Paul, Minn.: Boots and shoes are enjoying moderate sales, but a good fall trade is anticipated.

From San Francisco, Cal.: The shoe trade is encouraging.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET's.]

From Chicago, Ill.: Leather and hides are dull and unchanged. Stocks are good, with no pressure to sell.

From San Francisco, Cal.: Hides and leather are dull.

LUMBER.

[By Telegraph to BRADSTREET's.]

From Chicago, Ill.: Lumber is quiet.

From Minneapolis, Minn.: Lumber is rather quiet, but steady. The Mississippi river and tributaries are low.

From St. Paul, Minn.: Lumber is more active, both for country and city account.

From Wilmington, N. C.: Timber and shingles are firm. Lumber quiet.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET's.]

From Cincinnati, Ohio: The whisky market is without new features.

From Louisville, Ky.: Whisky offerings are low with fair demand, the market indicating an upward tendency for trading brands. The withdrawals for consumption are large. Competition has a tendency to depress prices.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET's.]

From Cincinnati, Ohio: There has been no movement in the tobacco market here.

From St. Louis, Mo.: Tobacco is in excellent manufacturing demand, but otherwise dull.

From Baltimore, Md.: Good grades of tobacco find ready sale, and the market has an upward tendency.

NAVAL STORES.

[By Telegraph to BRADSTREET's.]

From Wilmington, N. C.: Naval stores receipts are light. The river is very low. Spirits of turpentine is firm. Rosin, tar and crude are steady.

From Savannah, Ga.: Naval stores show more activity. Opening steady with an advance on some grades.

SPECIAL NEW ORLEANS TRADE REPORT.

[By Telegraph to BRADSTREET's.]

From New Orleans, La.: Sugar is dull and molasses nominal. Stocks of both are small. Sufficient new rice has come in to make a market. Fair to prime is 5⅜c. to 5⅞c. Nearly all mills are pounding. The cottonseed season is in a state of transition from old to new. Holders intend keeping the old season on as long as possible on account of the large stock of oil.

SPECIAL CALIFORNIA TRADE REPORT.

[By Telegraph to BRADSTREET's.]

From San Francisco, Cal.: Sugar is active. One hundred boxes of adulterated tea imported by a Chinese firm have been condemned by the government. Salmon are at a low range of prices. The actual count of the Columbia river output is 629,438 cases. The canneries are fully engaged on California fruit, which is now plentiful.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET's.]

Chicago, August 15.—The failures that have occurred in other sections, although not directly affecting any Chicago business firms, have had an adverse influence on financial, speculative and mercantile interests. Bankers have become more than usually conservative, and, while they are carrying very large balances of idle funds, they have not been disposed to do more than meet the wants of their best customers, as they preferred to strengthen their position in every direction, not knowing "where lightning would strike next." They have, however, promptly met the calls of customers who presented first-class paper for discount, and rates to such applicants were easy at 4½ @ 5 per cent. on call and 5@6 on time loans. But as the demand for money from borrowers who were favored with such backing was small the volume of paper discounted during the past six business days was much below the customary average. New York exchange is weaker, shippers' bills being more abundant, and there are large offerings by bankers at all leading trade centers as far east as Cleveland who are anxious to sell their bills for currency, but as the banks had increased calls for money from their correspondents in the grain districts and expect a steady and accumulating demand from that quarter, they were not disposed to increase their eastern balances by buying out of town bills. The current rates between city bankers were 50@60c. discount per $1,000.

The following shows the stocks of grain in Chicago on dates named:

GRAIN IN CHICAGO ON DATES NAMED.

	Aug. 11, 1883.	*Aug. 12, 1882.*	*Aug. 12, 1881.*	*Aug. 12, 1880.*
Wheat, bushels	5,661,000	575,000	3,650,000	1,647,000
Corn, bushels	1,695,000	1,301,000	3,331,000	3,435,000
Oats, bushels	276,000	92,000	1,490,000	116,000
Rye, bushels	321,000	95,000	136,000	101,000
Barley, bushels	22,000	5,000	26,000	58,000
Total bushels	7,974,000	2,127,000	8,603,000	5,367,000

TRADE EMBARRASSMENTS.

There were 174 failures in the United States reported to BRADSTREET's during the past week, 8 more than the preceding week, 26 more than the corresponding week of 1882, and 100 more than the same week of 1881. Compared with the previous week the middle states had 42, an increase of 4; New England states 29, a decrease of 5; southern states 19, a decrease of 2; western states 50, an increase of 5; Pacific states and territories 34, an increase of 8; Canada and the Provinces 20, a decrease of 16. The principal failures in New York city were George William Ballou & Co., E. C. Stedman & Co., and Cecil, Ward & Co., bankers and brokers; Taussig & Hammerschlag, wholesale syrups. Elsewhere they were: The City National Bank of Lawrenceburg, Ind.; The Farmers' Bank of Richmond, Ind.; Richard B. Hoag, maltster, etc., Lockport, N. Y.; L. Meyer & Co., general store, Tucson, Arizona, and El Paso, Tex.; Alexander & Taussig, wholesale syrups and rock candy, Chicago. In the principal trades they were as follows: Grocers 33; general stores 19; manufacturers 14; liquors 13; shoes 11; hardware 10; bankers and stockbrokers, 6; hotels and restaurants 6; clothing 5; dry goods 5; tobacco and cigars 4; harness 3; bakers and confectioners 3; drugs 3; jewelry 3; fancy goods 3; millinery 2; produce and provisions 2; lumber 2; furniture 2; butchers 2; leather 2; banks 2.

ALABAMA.

TROY.—J. S. Branscomb & Co., shoes, hats, etc., offer to compromise at 50 cents.

ARIZONA.

COPPER MOUNTAIN.—Gus Stoddard, general store, has failed.

TUCSON.—L. Meyer & Co., general store, have assigned. Liabilities estimated at $100,000; preferences $10,000. The firm

have a branch at El Paso, Tex., at which the stock is estimated at $50,000, and at Tucson $70,000. They started in business about six years ago with a small capital.

TUCSON.—The San Francisco creditors of Marcus Katz, general store, have rejected his assignment to Mr. Wilkins.

CALIFORNIA.

FRESNO.—Barnett & Lane, drugs, have failed.

MARYSVILLE.—William England, stationer, has assigned.

OAKLAND.—Application has been made to force the Oakland Artesian Well Company into insolvency.

PORTERVILLE.—P. P. Davis, grocer, has been attached.

PORTERVILLE.—J. E. Kinkade, hotel, has been attached.

SALINAS.—C. A. Hudson, grocer, burnt out and attached.

SAN FRANCISCO.—Creswell, Packham & Co., teaming, have assigned.

SAN FRANCISCO.—I. L. David, clothing, has been attached.

SAN FRANCISCO.—Thomas Kelly, stables, has been attached for $1,200.

SAN FRANCISCO.—Kowalski & Co., liquors, have been attached.

SAN FRANCISCO.—P. McAtee, saloon, has been attached.

SAN FRANCISCO.—Henry Nordbruch, grocer, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—Our Boys and Girls Cigar Factory has been attached.

SAN FRANCISCO.—Herman Schmidt, grocer, has been attached.

SAN FRANCISCO.—J. G. Thurston, straw works, has been attached.

SAN FRANCISCO.—H. H. Wilson & Son, gunsmiths, have assigned. Liabilities $5,000.

SAN JOSE.—P. Maguire, hotel, has filed a petition in insolvency.

TIJON RESERVATION.—E. F. Beale, general store, has assigned.

WATSONVILLE.—W. E. Peck, grocer, has been attached.

COLORADO.

DENVER.—P. Frankin, cigars, was attached for $800, and gave a bill of sale to John Corcoran.

DENVER.—Sipple & Thompson, hotel, have been closed on a mortgage for $1,600.

FORT COLLINS.—Houston Brothers & Co., dry goods, have been closed on an attachment for $3,500.

ROSITA.—D. D. Miller & Co., grocers, have been closed by the sheriff. Liabilities about $20,000. They have a branch at Querida.

CONNECTICUT.

ANSONIA (Derby).—M. L. Blakeman (agent), stoves, has been closed on attachment.

DERBY.—George Hall, meat market, has assigned.

BIRMINGHAM.—Peter Foy, saloon, has been attached.

MERIDEN.—The Meriden Patent Novelty Company has assigned.

SOUTH NORWALK.—Joseph H. Read, saloon, offers to compromise at 20 cents cash and 20 cents unsecured.

DAKOTA.

CLARK.—Andrew M. Olson, hardware, has assigned.

CLARK.—Rogers & Fosdyke, general store, have assigned.

LAKE PRESTON.—Keith & Hall, general store, have assigned.

FLORIDA.

JACKSONVILLE.—Dowling & Coxe, general store, have failed.

JACKSONVILLE.—Charles F. Powers, general store, has assigned. Liabilities $16,000; assets $15,000.

LAKE CITY.—Dowling & Wolfe, general store, have failed.

GEORGIA.

FORT GAINES.—J. W. Bass, grocer, offers 50 cents.

LOCUST GROVE.—J. S. Dickson, general store, has failed.

SAVANNAH.—H. J. Fear, hay, grain and produce, has assigned. Liabilities $11,800; assets $2,200.

ILLINOIS.

AVA.—Johnson & Riley, groceries and saw mill, have failed.

CHICAGO.—Alexander & Taussig, wholesale syrups and rock candy, are reported to have failed and confessed judgment. They came from New York in April, 1879, starting with a claimed capital of $17,000. A few months ago they claimed assets $136,726, and liabilities $85,596.

CHICAGO.—Charles & Thompson, saloon, have been closed by the sheriff.

CHICAGO.—I. I. Crawford, hotel, offers 25 cents. The attachments amount to $34,698.

CHICAGO (Lake).—Carroll & Gloystein, grocers, have been closed by the sheriff.

DANVILLE.—George F. Bryant, printer, has been attached.

ELLSWORTH.—Charles Egler, blacksmith, has failed.

LA SALLE.—C. M. Braden, brick manufacturer, has assigned to Thomas Davidson. Liabilities $5,700.

MOUNT VERNON.—J. R. Maddox, grocer, has assigned to J. B. Leonard. The preferences cover about all the assets, $810.

ROODHOUSE.—J. A. Martin, merchant tailor, is being closed out by creditors.

STERLING.—W. R. Graves, grocer, has assigned.

VIRGINIA.—William C. McDonald, saloon, has assigned to H. H. Turner. Liabilities about $5,000; assets $2,000.

INDIANA.

BRAZIL.—The Watson Coal & Mining Company has been placed in the hands of a receiver, W. G. Watson. The company was taken out of the receiver's hands about two years ago and reorganized. The statement of the company on November 10, 1882, showed assets $361,129; liabilities $213,823, including the capital stock of $150,000.

DANVILLE.—Gregg Brothers, hardware, have assigned.

INDIANAPOLIS.—The First National Bank has resumed payment. A syndicate was formed by W. H. English and W. C. Depauw to reorganize the bank by increasing the capital stock from $400,000 to $800,000. Mr. English becomes president. Messrs. English, E. F. Clagpool, John C. Wright, A. B. Conduitt, W. W. Johnston, W. P. Ijams, of St. Joseph; P. Shipp, Robert Browning and Simeon Yandes, of Indianapolis; W. C. Depauw, of New Albany, and John Reynolds, of Terre Haute, compose the directors.

INDIANAPOLIS.—John Landers has been appointed receiver of the Indiana Banking Company, which suspended on the 10th inst., his bond being fixed at $500,000. The deposits are about $900,000. The bank has been in business since 1865, and was a private partnership, with a capital of $300,000. The partners have made individual assignments.

LAWRENCEBURG.—The City National Bank suspended on the 11th inst. It is expected that the depositors will be paid in full. The bank commenced business March 8, 1883, with a paid in capital of $100,000. The circulation was $90,000. The bank building was valued at $10,000. The average deposits were $30,000. D. W. C. Fitch was president and his sons vice-president and cashier.

MICHIGAN CITY.—C. A. Powell, tobacco, etc., has failed.

NORTH VERNON.—Hazelrigg Brothers, implements, have been closed by the sheriff.

MONGO.—D. Crowl, dry goods and groceries, has been closed by creditors.

RICHMOND.—The Farmers' Bank suspended on the 16th inst. It was a partnership concern of Stanley, Estel & Co., and was established in 1877.

SULLIVAN.—Abraham McClelland, grocer, has sold out to preferred creditors.

IOWA.

GARFIELD.—J. B. Richards & Son, general store, have assigned.

GOWRIE.—John F. Wilde, harness, has failed and gone out of business. He was closed out on a chattel mortgage and the stock did not realize enough to satisfy the claim. The other indebtedness is about $1,000, with no available assets.

GRISWOLD.—William Allen, saloon, has suspended.

KANSAS.

LEAVENWORTH.—The Leavenworth Steam Heating Company has assigned.

KENTUCKY.

GOFF'S CROSSING.—Day & Wakefield, general store, have assigned.

LOUISIANA.

LAKE CHARLES.—The Lake Charles Lumber Company has assigned. Liabilities $70,000; assets $60,000. Of the liabilities $45,000 is secured by mortgage. It is thought the unsecured creditors will receive but little.

NEW ORLEANS.—Joseph Samposs, baker, has been sued and attached.

MAINE.

BOOTHBAY.—Huff Brothers, hardware, have settled at 30 cents.

HOULTON.—O. B. Buzzell, grocer, has been closed by attachment. Assets small.

NEWCASTLE.—Fred. A. Cameron, liquors, is reported to have left town.

WINTHROP.—Mandeville Hall, furniture, has failed, and offers 25 cents.

MASSACHUSETTS.

BOSTON.—W. E. Bicknell, grocer, has failed. Liabilities about $7,000; assets about $2,800, in stock and accounts and some mortgaged real estate.

BOSTON.—At a meeting of the creditors of Charles W. Clement, wholesale boots and shoes, on the 16th inst., the statement showed liabilities $537,418; assets $302,292. The liabilities are divided as follows: Time notes indorsed by Shaw & Brothers $338,135; unindorsed notes and open accounts $15,438, and contingent liabilities as indorsed on customers' notes discounted $3,844. Among the assets are $24,834 in notes receivable and $66,858 in open accounts receivable. A committee was appointed.

BOSTON.—The Fairbairn Manufacturing Company, grate bars, has failed. It had a nominal capital stock of $200,000, and was incorporated under the laws of New Jersey in July, 1881.

BOSTON.—Andrew McArthur, baker, owes $8,275, of which $1,675 is secured. The assets for the unsecured creditors are light.

BOSTON.—At a meeting of the creditors of Macomber & Greenwood, wholesale boots and shoes, held on the 16th inst., a statement was presented showing total liabilities, which include $365,570 in accommodation paper issued to Shaw & Brothers, $421,160, and assets $457,275. In the latter are included memorandums from Shaw & Brothers for the amount of the accommodation paper above referred to. An investigating committee was appointed. Mr. Macomber said that his firm had not received a dollar's benefit from the paper loaned to the Shaws.

BOSTON.—George D. Morse, printer, has failed. Liabilities about $4,100; no assets.

BOSTON.—The creditors of F. Shaw & Brothers, leather and tanning, met on the 15th inst. The statement showed a less flattering condition of affairs than expected. The total direct liabilities are $4,612,074 and contingent $2,897,235, making in all $7,509,309, against assets $5,262,197. Of the direct liabilities $1,580,165 are time notes payable, $558,524 open accounts, $558,375 loans secured by collaterals, $90,837 owed at the tanneries, and $1,824,170 accommodation notes, of which all but $34,110 are signed by insolvent parties. Of the contingent liability $1,824,082 is insolvent, and $1,073,150 it is thought will not have to be provided for, being trade paper. They claim to have collateral amounting to $169,552 for a part of the contingent liability, of which $44,735 is called good, and the balance, $124,817, is insolvent. The table of assets is made up as follows: Accommodation and other notes deposited for sale, or held by other parties as collateral, $311,406; accommodation notes on hand $6,425; notes receivable on hand $15,490; open accounts receivable $395,407, classified thus: Doubtful $38,472; failed $250,380; good $106,554. Included in the failed are amounts due from firms with whom they have dealt and received "accommodation notes," and which would be used in an accounting between Shaw Brothers and them, aggregating $195,437; cash in bank $12,177; hides pledged as collateral $220,000; hides and leather on hand $1,600,000; bark $600,000; merchandise in tannery stores $60,000; accounts receivable and cash at tanneries $11,590; steamboat property $15,000; horses, wagons, etc., $40,000; ten railroad shares $45,000; estimated value of tanneries and buildings $900,000; estimated value of lands $1,000,000; store Nos. 268 and 270 Purchase street $70,000; ten shares Exchange National Bank $1,200; claims against various firms and parties with whom they have dealings in notes, and amount impossible to state, blank; total assets $5,262,197. In making up the list of assets Mr. Shaw explained they did not consider it necessary to put in all this paper, on which their name appears in common with these other houses, as an asset of F. Shaw & Brothers. If they did so their assets would be very large. Whatever balance a final accounting shows in their favor with these several concerns will, of course, be an asset. An advisory committee and a committee to investigate and report were appointed.

BOSTON (Highlands).—W. S. McClure, grocer, has failed. Liabilities about $2,000; assets small.

CAMBRIDGE.—A. A. Wyeth, gents' furnishing goods, has failed.

HALIFAX.—Alson Porter, grocer, is reported to have failed, and offers 40 cents. Liabilities about $2,000.

HAVERHILL.—Flanders & Shannon, shoe manufacturers, are in insolvency.

HAVERHILL.—William E. Morse, stoves, has failed.

HOLDEN.—Charles H. Davis & Son, woolen manufacturers, have assigned to George Follett & Son. Liabilities $14,000; nominal assets $8,500, in stock and material.

HOLYOKE.—Creditors of S. A. Bugbee, painter, have filed a petition in insolvency against him.

LAWRENCE.—A. A. Whittredge, shoes, is reported to have failed and offers 40 cents. Liabilities about $16,000.

LYNN.—George F. Burgess, manufacturer of heels, has failed.

LYNN.—S. Gale, Jr., shoe manufacturer, has failed.

NEW BEDFORD.—B. H. Waite & Co., dry goods, are not in insolvency, as previously reported.

NORTH ATTLEBORO.—J. N. Franklin, hardware, offers 20 cents. Liabilities $25,000; nominal assets $13,000.

SPRINGFIELD.—H. W. Payne, harness, has been attached.

STOUGHTON.—The statement of S. C. & J. G. Phinney, shoe counter manufacturers, show unsecured liabilities $732,888, of which $100,162 is contingent in the shape of indorsements on discounted paper. Of the direct liabilities $408,522 is paper given F. Shaw & Brothers. The assets consist of accounts and notes receivable $55,661; stock about $15,000; cash $4,207; mortgage notes $1,250, and equity in real estate in Hull and Stoughton, with factories, machinery, horses, carriages sleighs and harness.

MICHIGAN.

CENTRAL LAKE.—J. M. Wadsworth, general store, has been closed up on a chattel mortgage.

DETROIT.—Brown Brothers & Co., lumber, etc., have as signed.

MECOSTA.—Baker Brothers, dry goods and groceries, have failed.

OVID.—E. F. Elwood, jeweler, has assigned.

MINNESOTA.

BROWNTON.—Strickland & Baker, general store, have failed.

MINNEAPOLIS.—George Baldensperger, hardware, has been closed by the sheriff.

WASECA.—C. T. Ketchum & Co., grocers, have assigned. Liabilities $900; assets $1,200.

MISSISSIPPI.

MERIDIAN.—Gachet & Crudup, grocers, are reported to have failed.

MISSOURI.

AURORA.—J. M. Jobe, general store, has assigned.

MARSHALL.—D. H. Abney, jeweler, has assigned.

ST. LOUIS.—Dolton Brothers, agricultural implements, have assigned to James E. Withrow.

ST. LOUIS.—Charles W. Gottschalk, grocer, has assigned to C. C. Hartman. The assets consist of stock valued at $600 and real estate valued at $3,500, mortgaged for $3,000.

TRENTON.—E. F. Horton, drugs, has assigned. Liabilities $5,000; assets $4,000; preferred claims $1,200.

MONTANA.

BOZEMAN.—John Schreiner & Co., liquors, have assigned to Andrews & Co., of St. Louis.

HELENA.—Kleinschmidt Brothers & Co., wholesale and retail grocers, had a small attachment and execution issued against them on the 13th inst. The local indebtedness is said to be very large and the firm is said to owe a large amount to Albert Kleinschmidt. The firm had numerous branches throughout the state, and Iler & Co., wholesale liquors and cigars, of Helena, in which they are interested, have been attached by Albert Kleinschmidt for $10,000.

NEBRASKA.

EMERSON.—Morey & Barber, hardware, have mortgaged all their property.

FALLS CITY.—I. I. Falkner, grocer, has failed and had a mortgage foreclosed.

GENEVA.—D. Lauden, drugs, is reported to have left town.

LINCOLN.—C. Bloedel, carpets, has failed.

NEBRASKA CITY.—Charles D. Richardson, shoes, has been attached.

PAWNEE CITY.—Higgins & Son, hotel, have closed.

NEVADA.

VIRGINIA CITY.—Frank Baker, varieties, has assigned.

NEW HAMPSHIRE.

MANCHESTER.—John F. Roberts, teas, has been attached and closed by the sheriff. Liabilities about $500.

NASHUA.—Mrs. M. J. George, 99-cent store, has failed and been attached. The stock is estimated at $1,500.

TROY.—W. C. & R. M. Silsby, manufacturers of leather, have assigned.

NEW JERSEY.

BRIDGETON.—A. F. Baum, shirt manufacturer, has been attached.

NEWARK.—The Clough Manufacturing Company, wire goods, has called a meeting of creditors for the 20th inst. The company had but little cash capital.

NEW YORK.

ALBANY.—The schedules of R. P. Cornell, pork, show liabilities $6,670; assets $2,019.

ALBANY.—Isaac Durk, carpenter, has assigned.

ALBANY.—George H. Kimball, furniture, has assigned.

BALLSTON.—D. G. Harris, organs, has had judgments for $5,100 entered against him in favor of his brother, Arnold Harris, and $16,000 in favor of his mother-in-law, which about cover the assets.

BROOKFIELD.—A. J. Stillman, grocer, assigned on the 14th inst. to B. Stillman.

BUFFALO.—The schedules of R. L. Bertram, harness, show liabilities $3,775; nominal assets $2,521; actual assets $1,691.

BUFFALO.—L. M. Krauber, planing mill, has assigned.

BUFFALO.—The schedules of Adolph Rose, hides and leather, show liabilities $62,924; nominal assets $23,899; actual assets $13,635; preferred claims $9,931.

BUFFALO.—Jacob P. Wirth, dry goods, has assigned.

CALDWELL.—S. D. Brown, grocer, has assigned to James T. Crandall, preferring $300.

CORNING.—The liabilities of D. H. Baxter, drugs, are about $6,500; assets $3,500; preferred claims $4,000.

LOCKPORT.—Richard B. Hoag, grocer and maltster, assigned on the 13th inst. to James O. King, and the firm in which he was the capitalist, Steele, Torrance & Co., wholesale liquors, also assigned to Mr. King. Mr. Hoag was formerly mayor of the city, and was extensively interested in business enterprises. His individual liabilities are about $70,000, of which $50,800 is in mortgages; nominal assets about $70,000. The firm liabilities are about $20,000; assets $6,000. The firm prefer $5,500.

LYONS.—E. P. Salyer, clothing, has assigned.

NEW YORK CITY.—George William Ballou & Co., bankers and brokers, suspended on the 14th inst., and in their notice sent to the Stock Exchange said that it was on account of the failure of customers to make good their margins, and hoped that it would be but temporary. In settling their accounts under the rule at the Stock Exchange 12,300 shares and $44,000 bonds were bought and 6,100 shares sold, which showed that the firm were involved on both the long and short side of the market. The failure was precipitated by the heavy decline in the stock market. On the 15th inst. the firm made an assignment to Theodore M. Nevins, their cashier, without preference. In speaking of their failure, the members of the firm have asserted that they will be able to pay in full as soon as they could collect from their delinquent customers, all of whom are considered good, settle their differences and market some of their assets, such as municipal bonds and unlisted securities, which would require time, as they could not be sold immediately, there being no ready market for them. The suspension, they expected, would be only temporary. It caused great surprise in financial circles, as there had been no intimation whatever of any embarrassment of the house. The business was started in Boston in 1873 by Mr. Ballou, who was very successful in dealing in municipal bonds, and was supposed to have accumulated a fortune of upward of $750,000. He extended his business to New York city, and admitted George H. Holt as a partner in October, 1876, who continued with him until May 2, 1881, when they dissolved, and the present firm was formed, composed of George W. Ballou, William H. Bingham, David H. Darling and Allen S. Weeks. The firm placed the stock and bonds of the Mutual Union Telegraph Company and the securities of the Toledo, Delphos & Burlington Railroad Company.

NEW YORK CITY.—Cecil, Ward & Co., bankers and brokers, suspended on the 13th inst., the result of the decline in stocks and failure of customers to respond with margins. The liabilities are reported at about $35,000.

NEW YORK CITY.—The schedules of De Wilton Robinson, agent, show liabilities $9,165; assets $5,117.

NEW YORK CITY.—The schedules of Isaac Feinberg, paper hangings, show liabilities $19,692; nominal assets $13,217; actual assets $9,143. The schedules of Morris A. Feinberg show liabilities $18,014; nominal assets $15,200; actual assets $4,749.

NEW YORK CITY.—Irvine & Dunn, retail cloaks, assigned on the 13th inst. to John J. Connolly, giving preferences for $2,103. Liabilities $4,630; nominal assets $2,518; actual assets $1,909.

NEW YORK CITY.—Marcus B. Kohn assigned on the 17th inst. to Jacob Rubenstein, giving eleven preferences for $1,753.

NEW YORK CITY.—Frederick W. Moullin, grain broker, suspended on the 16th inst.

NEW YORK CITY.—Edmund C. Stedman & Co., bankers and brokers, assigned on the 15th inst. to John McGinnis, Jr., giving preferences to Mrs. Jennie C. Croly $1,000; Mrs. Emma E. West $2,000; Miss L. E. Perkins $1,000; total $4,000. The failure, it is said, was the result of the individual speculations of Frederick S. Stedman, the junior partner, with the firm's money on his own account. Before the assignment was made Mr. E. C. Stedman fully met all obligations in the Stock Exchange and closed all outside contracts. The liabilities are about $125,000, of which about one-half is secured to the banks; the nominal assets are larger than the liabilities, but the actual value is less.

NEW YORK CITY.—Taussig & Hammerschlag, wholesale syrups and rock candy, assigned on the 17th inst. to W. R. Barricklo, giving preferences to Sigfried Hammerschlag $4,513; Importers and Traders' National Bank $5,000; total $9,513. The present firm was formed in March, 1872. In 1877 they adopted the trade name of the Waverly Steam Sugar Refinery. Their inventory of April 1, 1883, they claimed, showed liabilities $91,600, of which $12,000 was real estate mortgage; $30,000 for merchandise and $49,600 to friends; assets $214,351. The liabilities are reported at upward of $250,000. It is said they indorsed largely for Alexander & Taussig, of Chicago, which precipitated the failure. Mr. Taussig is mayor of Jersey City.

NIAGARA FALLS.—J. A. Schofield, jeweler, has left town.

OLEAN.—J. E. Avery, meats, has been closed by the sheriff.

ONTARIO.—R. Johnson, general store, has assigned, giving preferences for about $8,000.

TONAWANDA.—The schedules of J. J. Evans, jeweler, show liabilities $6,556; nominal assets $3,628; actual assets $2,842; preferences $2,701.

UTICA.—Volk & Beck, shoes, have failed.

WEST HURLEY.—James E. Stewart, of J. E. Stewart & Son, general store, died on the 8th inst., and on the 13th inst. the surviving partner, E. E. Stewart, assigned to Lucius Lawson.

YONKERS.—William Harris, clothing, has failed.

OHIO.

CINCINNATI.—W. H. Blair, baker, has assigned.

CINCINNATI.—Davidson & House, sash, doors, etc., say they have compromised with most of their creditors at 40 cents cash and 60 cents on time, and will continue business.

CINCINNATI.—Harker, Lansing & Co., shoe manufacturers, have assigned.

CINCINNATI.—Vincent Shinkle, capitalist, has assigned to William Finley and R. T. Miller. He was largely interested in steamboating. Liabilities $80,000.

COLUMBUS.—M. Fassig, shoes, has assigned to Cornelius Fassig.

DELPHOS.—Vageder & Klevern, grocers, have assigned to Wesley Valston. Liabilities $3,000; assets about $1,000.

DRESDEN.—Lemert & Brammer, merchant tailors, have assigned.

WARSAW.—A. Coffman, harness, has assigned.

WEST CAIRO.—Allen, Moyer & Co., general store, have assigned to W. J. Ferguson. Liabilities $3,762; assets $3,000.

OREGON.

EAST PORTLAND.—E. C. Beard, printer, has been attached.

TURNER.—Isaac B. Kauffman, hardware, has assigned.

PENNSYLVANIA.

ALLEGHENY.—Michael Heilman, shoes, has been closed by the sheriff.

ALLENTOWN.—A. M. Buchman, photographer, has been sold out by the sheriff.

ALLENTOWN.—H. E. Leeds, 5 cent store, was sold out by the constable. Liabilities about $1,000; actual assets $100.

BEAVER.—Thomas McCreery & Co., bankers, have suspended.

BRADFORD.—The Bradford Refining Company, oils, has failed. Execution for $1,213 was entered against it in favor of The Emery Oil Company. The company was a partnership, not a corporation, the proprietors being J. C. Caldwell and C. O. Perrin. The company had an office at 189 Broadway, New York.

BRADFORD.—Robert Wright & Co., grocers, have been closed by the sheriff.

CORRY.—Jones & Francis, brooms, have been closed by the sheriff.

EMPORIUM.—William McGee, grocer, has been closed by the sheriff.

ERIE.—F. Gloth, shoes, has been closed by the sheriff.

HARRISBURG.—Execution has been issued against John Cruikshank, painter.

IRWIN'S STATION.—Meerhoff Brothers, carriage makers, have been closed by the sheriff.

NEWVILLE.—George P. James, publisher, has been sold out by the sheriff.

PHILADELPHIA.—Barber, Cochran & Co., manufacturers of cotton and woolen yarns, were advertised to be sold out by the sheriff. Recently judgments were entered against them aggregating $12,010, and execution issued. The liabilities were reported about $20,000, and it is said they offered 25 cents cash in settlement. They were partly burnt out about a month ago, claiming a loss of $10,000; the insurance companies settled for about $6,000, the insurance being $17,000.

PHILADELPHIA.—John S. Bowman, manufacturer of ladies' shoes, was sold out by the constable. Liabilities about $1,500.

PHILADELPHIA.—C. C. Carey, manufacturer of neckties, was sold out by the sheriff on the 16th inst. on a judgment for $2,861 in favor of J. Supplee, his former employer.

PHILADELPHIA.—Hugh Christie, trading as Christie Brothers, grocers, was advertised to be sold out by the sheriff. Judgments for $1,200 in favor of Gilbert Young and $990 in favor of S. F. Christie were recently entered against him, and execution issued on both of them.

PHILADELPHIA.—W. H. Miller & Co., stock brokers, failed on the 11th inst., on account of the decline in the stock market.

PHILADELPHIA.—Saller & Newman, wholesale clothing, offer 35 cents in two, four, six and eight months, with indorsement. Liabilities $25,000; nominal assets $10,000.

PHILADELPHIA.—Edward P. Wetzlar, stock broker, has failed. Liabilities about $3,000; assets small. He was a creditor of W. H. Miller & Co.

SCRANTON.—The liabilities of Oscar Carpenter, hotel, are about $10,000; nominal assets $5,000; actual assets about $3,000; preferred claims $1,460.

SCRANTON.—Louis Christ, grocer, was sold out by the sheriff. Liabilities about $1,000; actual assets $273,

SCRANTON.—Wildenberger & Beers, grocers, have been closed by the sheriff.

TURBOTVILLE.—A. D. Greiner, carriage maker, has had execution issued against him.

WATERFORD.—Smith & Shoppart, tanners, have assigned.

RHODE ISLAND.

PROVIDENCE.—George R. Eaton, wholesale butter, has assigned.

WOONSOCKET.—Lucier & Guy, millinery, have assigned.

SOUTH CAROLINA.

ANDERSON.—Carlisle & Peoples, millinery, have assigned.

FLORENCE.—M. Manheim, general store, has been sold out by the sheriff on a confessed judgment of $2,700 to his wife. Liabilities $3,600; assets $1,500. Outside creditors, it is said, will realize nothing.

TENNESSEE.

PLUM ISLAND.—E. B. Friend, general store, has failed and sold out.

TEXAS.

DECATUR.—Mason Oldham, sewing machines, has been attached.

EL PASO.—L. Meyer & Co., general store, have assigned. See Tucson, Ariz., for particulars.

LAREDO.—Fondard & Iglesias, saloon, have assigned to Raymond Martin.

LAREDO.—Thomas & Withoff, dry goods, have assigned Liabilities $24,000; assets $16,000.

McGREGOR.—Grubbs & Malpas, grocers, have been closed by creditors.

SHERMAN.—M. J. Chapman & Co., grocers, have failed.

VERMONT.

BURLINGTON.—M. Noyes, tinware, has failed. Liabilities about $31,000. The nominal assets consist of personal property $7,000; real estate $35,000, which, it is thought, would not bring half that amount at forced sale.

WASHINGTON TERRITORY.

OLYMPIA.—F. A. Howard, grocer, has failed.

SEATTLE.—Alden & Fiske, hotel, have been attached.

SEATTLE.—D. A. Jennings, grocer, has failed.

SEATTLE.—J. W. Wilson, hotel, has failed.

SEATTLE.—F. W. Wusthoff, hardware, has sold out and called a meeting of creditors.

MANITOBA.

BRANDON.—William Senkbiel, shoes, has assigned.

MOOSE (Northwest Territory).—Perchard & Andrew, general store, have assigned.

PORTAGE LA PRAIRIE.—Ferris & Co., horse dealers, are advertised to be sold out by the sheriff.

REGINA (Northwest Territory).—Remciman & Kennelly, hotel, have assigned.

VIRDEN.—John Cain, hardware, has assigned.

WINNIPEG.—D. Cowan, contractor, has assigned.

WINNIPEG.—William Ferguson, grocer, is advertised to be sold out by the sheriff.

WINNIPEG.—Williams & Hill, tinware, have assigned.

NEW BRUNSWICK.

ST. JOHN.—T. & H. Likely, grocers, have assigned.

ST. JOHN.—A. B. Sheraton, carpets and furniture, has failed. Liabilities reported over $100,000.

NOVA SCOTIA.

HALIFAX.—Dodd, Cairns & Co., dry goods, have suspended, and offer 50 cents.

PROVINCE OF ONTARIO.

BEETON.—T. H. Hayes, shoes, has assigned.

CHATHAM.—W. H. Adams, grocer, is reported in the hands of the sheriff.

BLOOMFIELD.—Victory Sykes, tanner, offers to compromise at 50 cents.

HAMILTON.—G. M. Franklin, stationer, has assigned.

HAMILTON.—Wilkinson Brothers, grocers, have assigned.

LONDON.—R. F. Lacey & Son, manufacturers of uppers, have compromised at 50 cents.

TORONTO.—The stock of J. A. Bleakley, tobacco, is advertised to be sold out by the sheriff.

TORONTO.—Charles Hickling, grocer, has assigned.

TORONTO.—William Iveson, builder, has assigned.

PROVINCE OF QUEBEC.

MONTREAL.—L. Lowenthal, clothing, has failed.

MONTREAL.—H. F. Poivier, dry goods, has compromised at 60 cents.

ST. CESAIRE.—Vadenais & Co., manufacturers, have assigned.

ST. VALIER.—P. N. Roy, general store, offers, 50 cents.

A GENTLEMAN, age 33, of thorough business experience, who is desirous of residing in Australia, wishes an appointment as representative or prospector by a first-class firm. Excellent references. Address E. P., care of The Bradstreet Company, 84 Newgate Street, London, England, or 279 Broadway, New York.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.
THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

NOTICE.
CLEARING DEPARTMENT
OF THE
New York Stock Clearing House Association,
No. 41 EXCHANGE PLACE,
NEW YORK, July 19, 1883.
On and after Monday, July 23, the following stocks will be added to the list for Clearing purposes:
NEW YORK CENTRAL,
LAKE SHORE,
MICHIGAN CENTRAL,
CANADA SOUTHERN.
R. L. EDWARDS, MANAGER.

J. A. KOHN & CO.,
Bankers and Brokers,
No. 19 BROAD STREET (MILLS BUILDING), NEW YORK.
Special attention given to buying and selling on commission foreign exchange, bonds, stocks, and miscellaneous securities.
JULIUS A. KOHN, *Member New York Stock Exchange.* DAVID OCHS. MORITZ OCHS.

SEYMOUR, HUNT & CO.,
BANKERS AND BROKERS,
Member N. Y. Stock Exchange and Chicago Board of Trade.
No. 3 EXCHANGE COURT, NEW YORK.
123 LA SALLE ST., CHICAGO, ILL.
SPECIAL FACILITIES FOR THE PURCHASE AND SALE OF STOCKS, BONDS, GRAIN, PROVISIONS, COTTON AND PETROLEUM.
Refer to Mechanics' Nat. Bank, New York; Fifth Nat. Bank, Chicago; German Security Bank, Louisville, Ky.

H. K. ENOS. T. C. BUCK.
H. K. ENOS & CO.,
Bankers and Brokers,
Nos. 31 & 33 BROAD STREET, NEW YORK.
BRANCH OFFICE, 657 FIFTH AVENUE.
Members of New York Stock and Produce Exchanges.

GREGORY, BALLOU & CO.,
BANKERS AND STOCK BROKERS,
1 NEW STREET, CORNER WALL, NEW YORK.
CHAS. GREGORY,
Member New York Stock Exchange and Mining Exchange, Chicago Stock Exchange.
MATURIN BALLOU, Member New York Stock Exchange.
CURTIS P. GATELY.

I. F. MEAD & CO.,
STOCK BROKERS,
No. 80 BROADWAY, NEW YORK.
Branch Office, with private wire, at 23 West 23d Street.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, AUGUST 25, 1883.

NOTES OF THE WEEK.

The stock market has been quite tame during the past week as compared with its movements of the week before. The course of prices has been downward, and the hopes indulged in that the great break of last week marked the lowest depth prices would go to this year have proved fallacious. There has been a somewhat steady decline this week, which in the cases of some stocks has carried them below the lowest quotations made on the day when the market was on the verge of panic. Some stocks are higher, but the general tone of the market is heavy, and there is a feeling of discouragement in the street.

The testimony given before the Senate Committee on Labor during the week was, in many respects, of deep interest, though much of it was of a character already rendered sufficiently familiar by the platforms of labor congresses and the speeches and writings of labor advocates. Some of the facts laid before the committee gave a striking idea of the extent to which industrial organizations might be employed as agents in the elevation of the morals of the workingman and in the general amelioration of his condition. The success of the Seamen's Union of the Lakes, referred to in the testimony of Mr. Powers, in overcoming the improvident tendencies of a class peculiarly open to unthrifty influences, seems to have been quite marked. A similar remark may be made regarding the work of the Cigarmakers' International Union, which appears to be a type of the industrial organizations whose activity has a benevolent and an educational, as well as a protective, aspect. It must have occasioned some surprise to the senators to learn from the representative of such an organization that its tendency was to prevent strikes rather than to incite them. This is certainly a curious fact. It would be interesting to know whether it is in any sense a general one. The demand that trades-unions should be allowed to be incorporated, so that their funds might be protected, appears to be a reasonable one.

The action urged upon the committee by the economists examined was in the direction of extending the control of government over corporations. Mr. George believes in a wholesale transfer of the control over the means of locomotion and communication to the government. This was to have been expected from him; but Mr. C. F. Adams, who was examined on Thursday, and who claimed to be an economist of the school of Cairnes and Fawcett, expressed the view that the profits of railroad companies should be shared between the capitalist and the public, and that franchises should be granted only under the express stipulation that at certain fixed times they should be open to competition. If Mr. Adams is correctly reported, his views in regard to the question of corporate profits do not differ very materially from those announced in an article in the *Pall Mall Gazette*, to which we referred last week, and which, as we thought, seemed to indicate a rather advanced position. Perhaps this is an indication that even the orthodox economists are beginning to feel the influence of current tendencies.

The semi-annual reports of the savings banks in the city of New York, as made to the superintendent of the State Banking Department, show that on July 1, 1883, there were twenty-five banks in active operation in the city, the same number as were in operation at the time of the last report. During the six months one bank voluntarily closed its affairs, having paid its depositors in full so far as they could be found, and a new bank entered upon active business. The deposits of the city savings banks on the date mentioned amounted to $231,525,352.54, an increase during the six months of $6,002,438.54. The aggregate resources of these banks amounted to $267,841,417.64, and the surplus to $36,310,141.97. The total number of open accounts in the city on July 1 was 593,170. During the six months ending with that date 65,475 accounts were opened, and 51,659 were closed. The total amount of the deposits received by the banks during the period referred to was $36,765,716.51; the amount withdrawn during the same time was $34,598,671.22. The expense of conducting the banks of the city for the six months was $327,352.32.

The third annual congress of the Federation of the Trade and Labor Unions of the United States and Canada was in session in New York city during the week, discussing the status of the workingmen and the best means, legislative and otherwise, for bringing about improvements in their condition. Resolutions were adopted favoring the arbitration of questions between employers and employés, asking that officers of the government be punished for violating the eight-hour law, and urging the passage of a law limiting dividends of incorporated and joint-stock companies to 10 per cent. per annum, the balance to be divided proportionally among the employés of the company. A resolution providing for a thorough unification of all the labor organizations throughout the country was strenuously debated and failed to pass as originally proposed. Considerable opposition was also manifested to a resolution demanding the establishment by Congress of a postal telegraph system, some of the members declaring that the resolution amounted to rank socialism. The resolution, however, was adopted, as was one directing the legislative committee of the Federation to present to Congress a bill providing for the establishment of a department of industry and statistics, for the purpose of collecting information relating to manufactures and labor such as would bring before Congress each year the true condition of industry in all its departments.

The *Bulletin* of the American Iron and Steel Association gracefully expresses its regret at the retirement of Mr. John Jarrett from the presidency of the Amalgamated Association for reasons which will commend themselves to all who have at heart the reciprocal interests of capital and labor. The *Bulletin* has to say of Mr. Jarrett that he exerted all the strength of his powerful influence in favor of peace, that he was firmly and consistently opposed to the policy of striking, which has brought so much misery upon the laboring class, and that he contributed all that lay in his power by advice, example and effort to the physical and moral elevation of workingmen. It is a gratifying and at the same time a significant circumstance that a journal representing an association of employers can find such words as these to say concerning the work of a man, who, at the head of an organization of employés, has never wavered in his fidelity to the interests of these. The fact is of significance in that it gives promise of a time when the relations of labor and capital will be far less strained than they are to-day, and when the representatives of both will be led to see that, rightly understood, their interests are identical, and that these will be best subserved by the adoption on both sides of a policy of conciliation and forbearance.

Acting Secretary of the Treasury French has addressed a letter to the Secretary of State, in which he notices a remark stated to have been made in the House of Commons by Mr. Dodson, Chancellor of the Duchy of Lancaster, to the effect that the foot and mouth disease had been carried from England to America, and that the American quarantine system in relation to cattle diseases gave no security against the conveyance of disease by men attached to quarantine yards and by articles taken out of the quarantine yards, and that the system took into consideration only the animals themselves. This statement Mr. French declares to have been made without a knowledge of all the facts in the case. He calls attention to the report of the Treasury Cattle Commission upon the subject, which, while admitting that foot and mouth disease did exist among herds of cattle imported from Great Britain, denies emphatically that the disease exists at present among the cattle from the United States. Mr. French says that ample quarantine stations exist in the districts of Boston, Mass., and Portland, Me., the only ports on the New England frontier where cattle are allowed to be quarantined; that no contagious or infectious diseases exist among the cattle of those states, and that the possibility of these diseases being communicated to our cattle by cattle arriving at those ports is quite remote. The Acting Secretary further remarks that the regulations governing the quarantine of cattle go far beyond the scope contemplated in the remarks attributed to Mr. Dodson.

The preliminary report of the Chief of the Bureau of Statistics on the foreign and domestic commerce of the United States for the last fiscal year shows that the total value of the imports and exports of merchandise during the year exceeded that of any previous year in the history of the country, amounting to $1,546,928,485. The value of the exports was $823,805,819, exceeding that of the imports by $100,683,153, as against a similar excess during the preceding fiscal year of $25,902,683. The exports were for the most part cotton and food products. The exports of cotton were valued at $274,326,621, as against $199,812,644 during the preceding fiscal year. The value of the exports of wheat and wheat flour amounted to $174,703,830, as against $149,304,773 during the preceding fiscal year. A slight decrease is noticeable in the exports of corn and cornmeal. The figures also show a decrease in the exports of meat and dairy products and of petroleum. The value of the imports was only exceeded once before, namely, in the preceding fiscal year.

THE AUGUST COTTON REPORT.

The August cotton report to BRADSTREET'S shows a serious falling off in the condition of the crop since the publication of the last report on July 28. The August report is based on 1,048 replies, from 610 out of the 657 counties growing over 500 acres of cotton each, an average of 1¾ replies to a county. From the more important cotton districts the average of replies is about 2½ to each county. In considering the present serious condition of the crop, it should be recalled that at the close of June we found it impossible to report the crop above fair. A month later, the July report revealed on the whole a slight improvement. But at that time serious injury from drouth had been inflicted in South Carolina and Georgia, and other regions were threatened with like injury. At the date of the last report a marked improvement in Texas was noted. Our mail advices are to August 17, and relate to the period from July 16. The condition of the crop, as indicated by the replies, was in a great degree reversed from fair to bad during the month in all the states save Florida, Arkansas and Tennessee. For the month to July 16, 546 correspondents reported the weather good, 407 said fair, and 153 bad. Now only 181 reports make the weather good, while 320 say fair, and 547 bad. The most striking reversal of conditions is in Texas. In the July report 146 Texas correspondents reported the weather for the month good, 45 said fair, and 8 bad. Now, in reporting the weather for the month ending August 16, only 23 Texas reports make the weather good, while 51 say fair, and 106 bad. Following is our customary table, giving the tenor of replies as to the condition of the weather, of the plant as to blooming and fruiting, of the crop as to cultivation, and the opinions of correspondents as to the general prospects of the crop:

CONDITION OF THE COTTON CROP ON AUGUST 17, 1883.

States.		No. of counties of over 500 acres	No. of counties reported	No. of replies received	Percentage of area reported	Condition of weather since June 16: Good	Fair	Bad	Condition of plant as to blooming and fruiting: Good	Fair	Bad	Condition of crop as to cultivation: Good	Fair	Bad	General crop prospect: Good	Fair	Bad
North Carolina		63	59	110	98	12	42	56	20	61	20	26	59	25	8	51	51
South Carolina		32	32	75	100	3	20	52	1	31	43	15	41	19	0	29	46
Georgia		122	114	191	99	13	51	127	17	77	97	2	82	17	8	72	106
Florida		29	25	28	98	10	14	4	7	19	2	1	17	7	1	7	5
Alabama		64	63	114	98	21	30	57	27	51	18	4	44	14	11	44	52
Mississippi		70	66	122	98	15	30	71	21	50	14	12	58	7	4	18	56
Louisiana		46	40	59	94	9	14	36	11	30	18	12	58	10	2	10	29
Texas		121	112	180	93	23	39	100	30	47	103	20	64	25	2	54	101
Arkansas		73	66	97	97	29	39	15	15	39	43	10	44	20	2	41	27
Tennessee		37	34	58	99	35	18	5	4	32	22	2	26	28	1	26	4
Virginia, Missouri and Indian Territory		..	..	14	100	1	9	4	2	11	1	1	12	2	1	11	2
Totals		657	610	1,048	98	181	320	547	210	415	423	119	489	140	145	424	479
Totals from July report		657	602	1,107	99	546	407	153	359	620	127	396	571	139	398	576	132

It will be seen from the above that on July 16, 359 correspondents reported the condition of the plant good as to blooming and fruiting, 620 said fair, and 127 bad. Now only 210 reports make the condition good, while 415 say fair, and 423 bad. The condition of the crop as to cultivation has altered for the worse, but only slightly. The tenor of the replies as to the general prospect of the crop is about reversed compared with the July reports. Following is a table making a comparison with the July reports showing the tenor of the replies on the above points:

COMPARISON OF THE CONDITION OF THE CROP BY PERCENTAGES FOR AUGUST AND JULY, 1883.

	Weather.	*Blooming and fruiting.*	*Cultivation.*	*Prospects for good crop.*
Good—August	18	21	40	14
July	49	33	36	36
Fair—August	30	39	47	40
July	37	56	51	52
Bad—August	52	40	13	46
July	14	11	13	12

From the above table it will be seen that 18 per cent. of the replies reported the weather good for August, while for July 49 per cent. reported the weather good. The remaining portion of the table is to be read in like manner.

The correspondents in 41 counties of North Carolina report an average injury to the crop from shedding of about 16 per cent. Reports from 18 other counties indicate no injury from shedding. No injury is reported from worms in North Carolina. The following table gives the tenor of our reports from the more important cotton-growing counties in North Carolina.

CONDITION OF COTTON IN THE LARGER COUNTIES OF NORTH CAROLINA ON AUGUST 17.

Counties.	*No. of replies.*	*Acreage.*	*P. cent. injury by shedding.*	*P. cent. injury by worms.*	*Weather since July 17.*	*Blooming and fruiting.*	*Cultivation.*	*Prospects for good crop.*
Ansom	2	27,000	17	..	Bad.	Bad.	Fair.	Bad.
Edgecombe	1	55,000	..	..	Fair.	Good.	Fair.	Good.
Franklin	3	28,000	17	..	Fair.	Fair.	Fair.	Bad.
Johnston	3	35,000	10	..	Bad.	Fair.	Bad.	Fair.
Lenoir	2	24,000	..	..	Fair.	Fair.	Fair.	Fair.
Mecklenburg	3	46,000	3	..	Good.	Fair.	Fair.	Fair.
Northamp n.	3	38,000	7	..	Bad.	Fair.	Fair.	Bad.
Union	3	23,000	15	..	Fair.	Fair.	Good.	Bad.
Wayne	1	36,000	25	..	Bad.	Fair.	Fair.	Fair.
Wake	2	59,000	3	..	Fair.	Good.	Good.	Fair.
Wilson	3	24,000	..	..	Fair.	Fair.	Fair.	Fair.

Correspondents in twenty-eight counties of South Carolina report serious injury from shedding; the average injury thought to have been inflicted being 26 per cent. Reports from four counties state that no injury has been caused by shedding. The reports from South Carolina are agreed that no injury has resulted from worms. The following table gives a condensation of the replies from the more important counties of South Carolina:

CONDITION OF COTTON IN THE LARGER COUNTIES OF SOUTH CAROLINA ON AUGUST 17.

Counties.	*No. of replies.*	*Acreage.*	*P. cent injury by shedding.*	*P. cent injury by worms.*	*Weath'r since July 17.*	*Blooming and fruiting.*	*Cultivation.*	*Prospects for good crop.*
Anderson	3	73,000	60	..	Bad.	Bad.	Bad.	Bad.
Abbeville	2	90,500	35	..	Bad.	Bad.	Fair.	Bad.
Barnwell	3	85,000	30	2	Bad.	Bad.	Bad.	Bad.
Chester	3	53,000	27	..	Bad.	Bad.	Fair.	Bad.
Edgefield	3	93,500	22	..	Bad.	Fair.	Fair.	Fair.
Fairfield	2	77,000	15	..	Bad.	Bad.	Fair.	Bad.

Laurens	2	68,000	35	..	Bad.	Bad.	Fair.	Bad.
Marlboro'	2	46,000	25	..	Bad.	Fair.	Fair.	Bad.
Newberry	2	65,000	12	..	Fair.	Fair.	Good.	Fair.
Sumter	3	80,000	13	..	Bad.	Fair.	Fair.	Fair.
Spartanburg.	4	80,500	33	..	Bad.	Fair.	Fair.	Bad.
Union	3	59,000	25	..	Bad.	Bad.	Good.	Bad.
York	2	63,500	35	..	Bad.	Bad.	Fair.	Bad.

Correspondents in 89 counties of Georgia report on the average an injury of 22 per cent. to the crop from shedding. No injury is reported in 25 counties. Worms in Georgia have inflicted some injury in a few counties, but taking the state as a whole the injury therefrom is very slight. The following table relates to the more important counties in Georgia:

CONDITION OF COTTON IN THE LARGER COUNTIES OF GEORGIA ON AUGUST 17.

Counties.	*No. of replies.*	*Acreage.*	*P. cent injury by shedding.*	*P. cent injury by worms.*	*Weath'r since July 17.*	*Blooming and fruiting.*	*Cultivation.*	*Prospects for good crop.*

From 45 counties of Alabama an average injury of 19 per cent. from shedding is reported, while in 17 counties no injury is apparent. Worms have done considerable damage in a few counties, but, taking the state as a whole, the injury from worms is not serious. The following table relates to the large counties of Alabama:

CONDITION OF COTTON IN THE LARGER COUNTIES OF ALABAMA ON AUGUST 17.

Counties.	*No. of replies.*	*Acreage.*	*P. cent injury by shedding.*	*P. cent injury by worms.*	*Weath'r since July 17.*	*Blooming and fruiting.*	*Cultivation.*	*Prospects for good crop.*

Correspondents in 53 counties of Mississippi report an average injury to the crop of 21 per cent. from shedding. Reports from 13 counties state that no injury has resulted. The injury from worms in Mississippi is nominal. The bearing of the following table on the situation in the larger cotton counties of Mississippi is evident:

CONDITION OF COTTON IN THE LARGER COUNTIES OF MISSISSIPPI ON AUGUST 17.

Counties.	*No. of replies.*	*Acreage.*	*P. cent injury by shedding.*	*P. cent injury by worms.*	*Weath'r since July 17.*	*Blooming and fruiting.*	*Cultivation.*	*Prospects for good crop.*

Correspondents in 89 counties of Texas report an average injury of 32 per cent. to the crop from shedding. Reports from 23 counties show no injury from shedding. Worms have caused some damage in Texas, probably not far from 2 per cent. for the entire state. The following table is of interest:

CONDITION OF COTTON IN THE LARGER COUNTIES OF TEXAS ON AUGUST 17.

Counties.	*No. of replies.*	*Acreage.*	*P. cent injury by shedding.*	*P. cent injury by worms.*	*Weath'r since July 17.*	*Blooming and fruiting.*	*Cultivation.*	*Prospects for good crop.*

The reports from Arkansas and Tennessee are distinctly better than the accounts from the other leading cotton states. Correspondents in 39 counties of Arkansas report no injury from shedding. Reports from 27 counties make the average injury from shedding 7 per cent. In Arkansas the worms have caused no damage worth mentioning. The following table relates to 11 of the larger counties in Arkansas:

CONDITION OF COTTON IN THE LARGER COUNTIES OF ARKANSAS ON AUGUST 17.

Counties.	*No. of replies.*	*Acreage.*	*P. cent injury by shedding.*	*P. cent injury by worms.*	*Weath'r since July 17.*	*Blooming and fruiting.*	*Cultivation.*	*Prospects for good crop.*

The above summary of our reports gives the condition of the crop on August 17. On that date in the principal cotton states outside of Arkansas and Tennessee the outlook for the crop was more nearly bad than fair. The following telegraphic dispatches to BRADSTREET'S were received yesterday, and relate to the condition and progress of the crop from August 17 to date:

From Charlotte, N. C.: The weather has been very warm. Good rains fell on Tuesday and Wednesday of this week, but were not general. Crop prospects are fair.

From Raleigh, N. C.: Crops were materially benefited by last week's rain, but the weather is hot now. We are again needing rain.

From Wilmington, N. C.: The outlook for cotton is unfavorable.

From Aiken, S. C.: Have had rain over the larger portion of the county, but too late to do much good. The crop will be short from 25 to 30 per cent.

From Charleston, S. C.: The weather is more favorable since the 17th, but the outlook for the state is unsatisfactory. The damage sustained cannot be recovered.

From Columbia, S. C.: The weather since the 17th inst. has been favorable, and the present outlook is good.

From Greenwood, S. C.: The weather is now dry and very hot. Less than one-half of a crop will be made.

From Spartanburg, S. C.: Rains have been very partial and crops not benefited. The outlook for cotton is poor.

From Albany, Ga.: Have had only partial rains since the 17th. Caterpillars have done considerable damage, and the crop outlook is gloomy. I estimate only one-half of a crop for this county.

From Bullards, Ga.: Heavy rains have damaged cotton badly, and the outlook is the poorest we have seen since 1873.

From Columbus, Ga.: The weather has been hot and dry. Cotton has been damaged by caterpillars, drouth and rust, and the prospect is not so good as at the same time last year by 25 per cent.

From Macon, Ga.: Considerable damage has been done by worms, and prospects for the state are 10 per cent. off from last year.

From Sandersville, Ga.: Excessively hot and dry weather has badly injured cotton. Rust and caterpillars in several sections of the country have caused much damage.

From Montezuma, Ga.: The weather since the 17th has been wet. The present outlook is very unfavorable, and we cannot hope for more than half a crop, as caterpillars are fast destroying all the top crop.

From Eufaula, Ala.: The weather has been too dry. Caterpillars are also damaging the crop.

From Montgomery, Ala.: The crop is greatly damaged by drouth and worms. Rains have been general since the 17th, but too late to be of much benefit. Bolls are small and opening rapidly. The crop will be from one-third to one-half short.

From Prattsville, Ala.: The weather since the 17th has been extremely hot and dry, but it rained to-day. The outlook for cotton is 50 per cent. off.

From Selma, Ala.: Occasional light rains and extremely hot weather have caused the cotton to open rapidly. The outlook is bad.

From Columbus, Miss.: Since the 17th inst. the weather has been warm, with partial showers, but they will not materially benefit cotton. The yield of the staple is one-third short. Worms and rust are doing considerable damage.

From Meridian, Miss.: The crop is seriously injured by drouth, not over one-half of a crop will be made. Weather is still dry and hot.

From Natchez, Miss.: We have had plenty of rain since the 17th, which has injured the cotton crop more than the dry weather. The general complaint is that there are no bottom or top crops. The stalks are large, but bear little fruit.

From Port Gibson, Miss.: The weather has been hot, with occasional rains. Hill crops have suffered, and there is a poor prospect for them. The bottom crop prospect is very favorable.

From Arcadia, La.: The present outlook for cotton is that not over half a crop will be made. The weather since the 17th has been dry and hot.

From Baton Rouge, La.: The weather since the 17th has been showery and good for cotton. The condition has improved since last report.

From Clinton, La.: General rains throughout the parish since the 17th have improved the outlook for cotton 10 per cent. The worm will work no serious damage. The present condition of the weather is favorable.

From Shreveport, La.: The weather has been dry and hot and the cotton crop is materially damaged by drouth and worms.

From Athens, Tex.: The weather continues hot and dry. Catterpillars are eating cotton. We cannot make more than one-half of a crop.

From Calvert, Tex.: The weather has been very dry and scorching hot. It is too late now for rain to be of any benefit. We may possibly make one-half of a crop.

From Corsicana, Tex.: Since the 17th we have had only slight and insufficient showers. The outlook is gloomy.

From Fort Worth, Tex.: The weather since August 17 has been favorable, and the cotton crop throughout Tarrant county is reported in fine condition.

From Galveston, Tex.: Cotton crop reports are very gloomy.

From McKinney, Tex.: The weather has been warm and rain plenty. We estimate the cotton crop in our county at something over one-half of last year's.

From Marshall, Tex.: Weather is dry and hot, and crop will be one-third less than last season.

From Terrell, Tex.: The weather since the 17th has been very hot, but the plants are not in need of rain, and prospects are fair if not good. Worms are reported in some localities, but are not general.

From Savoy, Tex.: The weather has been dry for cotton, and the prospect is 20 per cent. short of that of last report.

From Waco, Tex.: The weather continues dry and intensely hot. The outlook for cotton could not be worse.

From Arkadelphia, Ark.: The weather has been good, and the condition of the cotton plant is fair.

From Helena, Ark.: The weather has been rather favorable. The present outlook indicates a decrease of 25 per cent. from last year's crop.

From Van Buren, Ark.: The weather has been hot and dry, and cotton is well formed and heavily loaded. Over one-half of a crop is already made.

From Murfreesboro, Tenn.: The weather is fine and prospects good; never better for cotton.

From Rossville, Tenn.: Weather cooler, with light showers of rain. Cotton not much improved.

From the tenor of these dispatches it cannot be said that the condition and prospects of the crop have been much improved since August 17. On another page will be found interesting memoranda from our mail advices.

THE HAWAIIAN SUGAR INVESTIGATION.

At the coming session of Congress the report of the commission appointed to examine into the alleged frauds in the importation of Hawaiian sugar under the reciprocity treaty will doubtless be presented. The charges as originally made were by Representative Belmont, of New York, and included two principal complaints. The first was that Chinese sugar had been imported into the Hawaiian Islands, and thence exported to the United States as the product of the Sandwich Islands, thus defrauding the Treasury. The second important charge was that Sandwich Island planters and refiners are now, and for some time have been, making a higher grade of sugar for export to this country than was formerly manufactured by them or was contemplated by the terms of the reciprocity treaty. These charges, naturally enough, reflected somewhat on the Treasury Department, for if such frauds have taken place it was the business of certain Treasury officials to have prevented them. Secretary Folger was called on for information, and in order to make a conclusive report appointed a commission to go to the Pacific coast and to the Hawaiian Islands to learn the facts. On this commission were placed Mr. Searle, the manager of the Havemeyer Sugar Refining Company, of New York; Mr. Tingle, an attaché of the Treasury Department at Washington, and General Spalding, of Michigan. The first-named is understood to represent those who are most anxious to know whether high-grade sugar comes here from the islands in violation of treaty stipulation. On the other hand, Mr. Tingle is primarily interested in learning how Chinese sugar could be imported at Hawaii, if such has been done. The third member of the commission, prior to leaving for the west, declared himself as the lay member, eager to learn and understand.

After a sojourn on the Pacific coast the gentlemen named went to the Hawaiian Islands. The Honolulu *Gazette*, June 29, in chronicling their visit, says that the impression as to the result of their investigations is pleasing to the sugar makers and others in the island kingdom. From the abstract of the report of their movements in the *Gazette* and the tenor of the remarks of the commissioners at a reception in their honor, it was inferred that a report against the truth of the charges would be made to Secretary Folger. So patent was this to the islanders that the *Gazette* in voicing this sentiment said, editorially: "We had nothing to hide, and we were only too glad to have an opportunity of showing that there was nothing to hide. The commissioners are now satisfied that the alleged frauds are a myth; that our planters have been perfectly above-board in their dealings with their great neighbor." The same journal adds: "Proof again and again has been offered that there was nothing in this cry about importing sugars from China and Manila; proof has as often been given of our integrity in exporting to the United States after 1876, the treaty year, no higher class of sugar than we did before that time, in fact that the average grade was considerably lower after than before the treaty." In support of this is given a carefully prepared table of Hawaiian sugars exported to the United States in the calendar years 1875 and in 1881, by grades and quantities, from which we summarize as follows:

Grade.	1875, pounds.	Ratio to total exp., per ct.	1881, pounds.	Ratio to total exp. per ct.
Not above No. 7.....	147,899	1	.....	..
No. 7 to No. 10.....	320,689	2	3,994,338	4
No. 10 to No. 13.....	1,739,668	9	32 501,449	36
No. 13 to No. 16.....	15,543,062	82	53,967,300	59
No. 16 to No. 20.....	1,158,748	6	159,556	1
Totals.....	18,887,057		90,582,659	

The fear is expressed, however, that the commissioners might carry away with them the erroneous impression that the capability of the islands to produce sugar is much larger than it is. The statement is made that the capability of the islands in this direction has been largely overestimated. Of the 396,800 acres fit for pasture and cultivation of all kinds, but 100,000 are declared to be fit for sugar cultivation. There are now but about 40,000 acres planted with cane. It is added that the cultivation of the 100,000 acres with cane is practically impossible, as not more than 52,000 acres could be cropped each year. Last year but 26,000 acres were made profitable in this way, yielding 56,000 tons of sugar, or about 2 1-6 tons per acre. It is, therefore, concluded that the very utmost which can now be obtained from the islands would be about 100,000 tons per year. "Practically" there can never be obtained "any such crop, for though the lands may be there, the elevation and the lack of water are an insuperable barrier to making use of them."

A representative of BRADSTREET'S recently called on Mr. Searle in this city, and learned that the commission will shortly meet in New York for consultation prior to preparing a report to the Secretary of the Treasury. In reply to questions asked, Mr. Searle quite corroborated the account given above as to the facilities placed at his disposal at the Hawaiian Islands to learn of the methods of preparing and making the grades of sugar which are exported to the United States. He added that they showed everything except where the Chinese sugar is landed and what vessels it came in. In explanation of this statement he said that he meant the Chinese sugar which it has been charged is exported to the United States as Hawaiian. He said further that he asked specifically for information on this point, and it was either refused or no one knew of such occurrences—he declined to say which. It was suggested that there were other ways for determining these points than by asking Hawaiian planters and their friends, and it was assented to. Mr. Searle rambled willingly over the outskirts of the entire subject, but any reply to a leading question was avoided. It is fair to state, however, that the conversation, while freely entered into by the representative of the eastern sugar refining interest, gave forth unmistakable evidence of his being less satisfied as to the untruth of the charges of fraud, etc., than the reports from the Hawaiian Islands indicate. The report of the commissioners to Mr. Folger is expected to be ready to forward in about three weeks. The report of the Secretary of the Treasury to Congress, in compliance with the request of that body, may or may not be made public prior to the opening of the session in December. And, again, the report of the commissioners will not necessarily indicate the tenor of Mr. Folger's reply to Congress.

BUILDING IN NEW YORK.

For the city of New York this is emphatically a day of architectural transformation. The interest attaching to the architectural development now going on is not merely a present one, for this architecture will maintain a representative character in future times. We build mainly for durability, and on a colossal scale, dwarfing, as a good proportion of these new structures do, all preceding edifices. Even the spires of churches, to be in accord with street perspectives, are carried to an unprecedented height. There is more of ornamental accessories, more of general attractiveness in elevations, and greatly superior interior arrangements. The table below, furnished by the Building Bureau, presents a close approximate estimate of building operations in the last fifteen years. There are no returns drawn up of the number of new buildings or alterations for the first four years. The total tabulated estimated cost in those years slightly exceeded that of the years 1879 to 1882 inclusive; but in the former period labor and materials were higher, consequently less building was carried out. It is to be borne in mind that a certain percentage of permits are not at once acted on, undertakings being postponed from one year to another from various causes. This was the case in 1882, due to apprehended strikes and advancing cost of materials.

ESTIMATED COST OF BUILDINGS PROPOSED TO BE ERECTED AND ALTERED, FROM 1868 TO 1882.

Year.	No. of new buildings.	Cost of new buildings.	No. of alterations.	Cost of alterations.	Totals.
1868.....	....	$34,517,682	....	$2,168,045	$36,685,727
1869.....	....	40,342,058	....	4,228,174	44,580,232
1870.....	....	34,668,998	....	2,816,234	37,185,232
1871.....	....	42,585,391	....	4,351,681	46,937,372
1872.....	1,728	27,884,870	1,318	2,788,379	30,673,249
1873.....	1,311	24,936,535	1,311	3,496,995	28,433,530
1874.....	1,388	16,007,117	1,429	3,532,147	20,199,504
1875.....	1,406	18,226,870	1,258	3,200,438	21,427,308
1876.....	1,370	15,903,880	1,177	3,635,478	19,539,358
1877.....	1,432	13,365,114	1,308	3,215,125	16,580,239
1878.....	1,672	15,219,680	1,209	2,621,046	17,840,726
1879.....	2,065	22,567,322	1,373	3,300,110	25,867,432
1880.....	2,252	29,115,335	1,352	3,862,111	32,977,446
1881.....	2,082	43,391,300	1,497	4,142,070	47,533,370
1882.....	2,577	44,793,186	1,691	4,207,181	49,660,367
Totals.....	19,892	$424,195,638	14,923	$51,625,514	$475,821,152

In a classification of the buildings for 1882 we find apartment flats take the lead, and we may here say that these buildings have so increased as to have seriously reduced the calculated rentals. The cost of these blocks of flats, above $15,000 each, and numbering 577, was $17,164,100. Tenement houses, of an estimated cost of less than $15,000 each, follow, there being 691 in number and involving an outlay of $8,100,100. Dwelling houses, twenty in number, of an estimated cost of over $50,000 each, involved an outlay of $2,030,000; of between $20,000 and $50,000 each, and 88 in number, an outlay of $2,371,000; of less than $20,000, an outlay of $4,705,743. The estimated cost of stores over $30,000 each, and 40 in number, was $2,619,500; those of lesser cost, 81 in number, was but $811,300. Imposing stores are following on imposing structures of a different class, and rank among the chief scenic attractions of the city. The estimated cost of city manufactories and workshops, for which 137 permits were taken out, was but $1,968,010. Office buildings, 25 in number, figure for $1,403,645.

Since 1879 the advance in value of desirable building property of the first class has been 40 per cent., and a further improvement is looked for speedily. In the last nine months, whilst there has been no retrocession of values, the sales of the more valuable sites have been somewhat restricted, owing to high prices and firmness of holders. Even in less attractive localities it has been difficult to find good investment property at fair prices, holders not being willing to sell. New business locations are constantly springing up, and a large amount of property of moderate value as yet is strongly held. As the rental value of offices and apartment buildings increases in a rapid ratio with size, the continued construction of large buildings of the kind is assured. This circumstance adds to the prospective value of land.

Our more recent architecture—the "new departure," as it is termed—has for its predominating style the French renaissance, following closely on that of northern Italy, the latter an adaptation of the higher class of ornament to the outlines of Roman architecture. The main influence of gothic is in ornamentation. We are not witnessing, as affirmed by a recent critic, the renewal of the architecture of the Elizabethan era—an era notoriously wanting in correct proportion, in which architecture did not satisfy direct requirements, besides being defective in that pleasing, subdued composition which renders structures ornamental. In right proportion and adapting buildings to their purposes, our present architecture far exceeds what had previously been realized. Interior arrangements, as a rule, show thoughtful treatment. In office buildings, compare the narrow and frequently obscure passages with the easy and lightsome approaches now provided. As to exterior elevations, if we have numerous instances of too much mixture of styles and many of too much ornament, as in floriated forms adapted from the gothic, they are at all events an escape from insipidity and sameness. Not being inherent faults of style, they are suggestive of more skilled treatment in the future.

The restrictions under which street architecture labors, as in narrowness of frontages, almost necessitates a crowding of ornamental accessories, owing to the want of space of solid plain surfaces on a sufficient scale to set these off and afford an impression of restful repose.

Different classes of buildings have properly different styles. The business buildings illustrate principally the Italian and the French. The Mills Building in Broad street—an excellent design with parts well combined, is, in its general character, a good example of the renaissance. The ornament is a renaissance earlier than the French, characterized by conventionalized forms, to which leaves and vines pertain. The peculiarity of the building is the court connected with the street, so getting abundant light, which is well distributed. These open courts allow of fine architectural treatment, as in the Post Building and some of our apartment houses. To take an illustration from private dwellings, the house of Mr. Wm. H. Vanderbilt, on Fifth avenue, is the French renaissance with a modification of the gothic in dormer windows and panels, arches and doorways, as well as in some of the molded work. The most general result of the freedom of the treatment of styles which prevails is that of picturesque effect. Irregularities of site, and even interior requirements contribute to this end. The division of fronts into bays, the introduction of heavy-molded entablatures supported by clusters of columns and pilasters with rich foliage caps, the breaking the sky-line with gables and angle turrets, and where the structures are complete, the introduction of harmonizing and well devised contrasts in the trimmings, characterize a goodly number of our commercial structures. The large extent to which brick is now used for frontages has steadily widened the scope of design, especially in its admirable conjunction with terra-cotta in string-courses, hoods, molds, cornices, capitals and other enrichments. The finest example of the effective combination of the two is the new Produce Exchange, with its noble brick pilasters and lofty arched windows, the magnificence of the design, to which bulk largely contributes, being essentially aided by the superb terra-cotta moided entablature with floriated enrichments and the distribution of the arms of the several states between the spandrels, the harmonizing effect being improved by the hue of the terra-cotta. Iron, whilst not used so much as formerly for fronts, enters largely into interior construction. No buildings are fireproof the beams of which are not of iron, and these, with brick arches for flooring, necessitate thicker walls than would otherwise be necessary. Fireproofing as rendering buildings more durable and reducing insurance, adds materially to value.

To the increase of population and growth of business in raising the value of building lots must be added the invention of elevators, which render extreme height of stories no drawback to their use. Previously it was a matter of difficulty to let any offices above the third story; now the higher stories are the first to be let. Eighth and ninth stories are to be transcended, a permit having just been taken out for a building of thirteen stories, to cost $500,000. Thus we grow in architectural "greatness." The scale of these buildings, ordinarily occupying several lots, justifies large outlay in imposing appearance and convenient and lightsome approaches and wide and roomy corridors. Architects are afforded opportunities for display of design they never had before, but constantly the conditions imposed, especially as to time in this hurrying age, prevents them from putting in, in many instances, their best work. The resources of the styles adopted are all but inexhaustible, and the metropolitan buildings of the future, under good judgment, will, as we believe, realize the finest conceptions of use and beauty.

OCCASIONAL NOTES.

The Senate Committee continued to hear testimony in regard to the condition of labor during the week. At the Monday session some facts in regard to the operation of improvements in machinery upon wages were elicited from a tailor, who testified that before the introduction of the sewing machines tailoring was skilled work, and was better paid than it is now. A history of the consolidations which have resulted in the establishment of the present Western Union Telegraph Company was given by Mr. A. H. Seymour, a telegrapher of long experience. He thought the company's whole plant could be reproduced for $25,000,000, yet it had paid an eight per cent. dividend on $80,000,000. The profits for 1882 were, he said, over $7,000,000. Mr. W. H. Foster, a member of a Cincinnati typographical union, advocated the abolition of child labor, the reduction of the hours of labor, the protection of laborers in the right to organize in trades unions, and "the substitution of productive industry for speculative gambling."

On Tuesday Mr. Richard Powers, of Chicago, general superintendent of the Seamen's Union of the Lakes, laid before the committee some interesting facts which tended to show that industrial organizations might be made potent factors in the improvement of the workingman. He said that 75 per cent. of the sailors on the lakes were banded together in the organization represented by him for the purpose of ameliorating their condition, shortening the hours of labor, and increasing their wages. Under the influence of the organization, he said, their condition had very much improved, and they had to a great extent overcome their improvident tendencies. He thought that the government should establish some place of refuge like Sailors' Snug Harbor for disabled sailors; that the abuse of overloading vessels, which makes voyages dangerous to the lives of seamen, should be corrected, and that the sanitary condition of the vessels should be reformed. Before the union was formed the wages of sailors were $1 a day; now they are $2, with an increase toward the end of the season. Mr. George G. Block gave a description of the lives of journeymen bakers, whose wages, he said, averaged $8.20 per week. The conditions of their labor were, he said, very severe, they being obliged to work for long periods in a very hot atmosphere.

Mr. Adolph Strasser, president of the Cigarmaker's International Union, gave an account of that organization, which he said was protective, benevolent, educational and moral in its purpose. Last year the union paid over $16,000 in sick benefits. The union paid the expenses of workmen traveling from place to place in search of labor. These expenses includes actual fares and 50 cents for a meal in each place. For this purpose nearly $12,000 was paid last year. The members of the union have had a trade journal eight years. The hours of labor varied from forty-eight to sixty hours per week; without the organization the hours of labor varied from eighty-six to ninety per week. Regarding the efficacy of strikes in bringing about improvements in the condition of the workingman, he said that in the last eighteen years there had been 363 strikes of cigarmakers, of which 204 had been successful. The cost of these strikes had been $286,444, but they had added $1,800,000 a year to the wages of the strikers, and had prevented reductions estimated at $500,000. There were 185 branches of the International Union. The witness thought that trades' unions should be allowed to be incorporated so that their funds might be protected. The government should enforce the eight-hour law and extend it, and it should be made a condition of the granting of a patent that none of the laborers employed under it should be employed more than eight hours a day. The witness thought that it should be made unlawful to issue a license to anybody to manufacture cigars in prisons and penitentiaries. He said that the tendency of the organization to which he belonged was to prevent strikes, and that in the past year it had prevented 200 strikes.

Wednesday was devoted by the Senate Commtitee to hearing the views of Mr. Henry George upon the subject of their investigations. Mr. George expressed the opinion that the real conflict is not between labor and capital, but between labor and monopoly. He thought that the forcing down of wages was a natural result of the monopoly of the primary source of employment—the land. Some industries, according to the witness, were from their nature monopolies. Such was the case with railroads and telegraphs. Mr. George said that his experience with the Western Union Telegraph Company had made him an advocate of a telegraph system under government control. He believed that the government should operate a telegraph line in connection with its postal business, and he believed that it could be managed at a much less cost than the lines of private companies. He said that, while the introduction of labor-saving machinery should have improved the condition of the laboring classes, it was certain that it had not done so. Wages depended ultimately upon land, and as the land was closed up wages lowered. The only remedy was to wrest the advantages which had been gained by individuals and divide them among the many. This, however, applied only to land, not to other property. If the state owned the land it would increase continually in value, and every one would derive benefit from that increase and share in it, instead of, as now, onlythe few. Mr. George thought that combinations of laborers might do some good, but only very little. They were of value chiefly as educators. The witness said that if he were a dictator in the United States he would abolish all taxation except upon land values, add to the government control railroads and telegraph systems, abolish the navy, West Point and Annapolis, abolish the law for collecting debts, and simplify other laws. The tariff, he thought, increased monopolies and was no protection. If goods coming into the country under free trade should close up some manufactories other exports would offset the loss.

The projectors of the Florida ship canal are satisfied that their scheme is entirely practicable. They have caused three preliminary surveys to be made, extending from and above the mouth of the St. Johns river on the Atlantic to Dead Man's bay, a point south of that and the mouth of the Suwanee river, on the gulf of Mexico. The distances vary from 110 to 140 miles. No particular obstacles, it is said, will be encountered in the process of construction. There are swamps to be passed through, but no mountains, and the work will be mainly one of excavation. No rivers or streams of any consequence are to be crossed. The cost is estimated at from $30,000,000 to $50,000,000, and it is thought that the work will be completed within three years. The canal will be a tide-water canal, without locks or dams, and, it is claimed, will reduce the time of a steamer passage between New York and New Orleans from a day to a day and a half.

A British treasury minute is authority for the statement that under the National Debt bill, which recently passed its third reading in the House of Commons, stock amounting to £173,019,000 will have been canceled at the expiration of twenty years. Part of that amount, however, though canceled, will not have been redeemed. The amount of debt so redeemed will amount to £123,230,853, though that does not comprise the whole amount of debt redeemed by the arrangements for the reduction of the national debt. Debt will also be redeemed by the new sinking fund and by means of the money paid for the purchase of life annuities, for the redemption of land tax and other minor purposes. The new sinking fund, it is expected, will redeem £27,000,000 within twenty years, and it is thought that other methods of reducing debt will redeem £23,000,000 within the same period. These latter sums, together with the amount redeemed, will make a total of £173,000,000. This is apart from the effect of any surplus of income over expenditures constituting the old sinking fund, for which no allowance has been made.

The British government's programme for reducing the national debt does not meet with favor in all quarters. This is apparently not on account of any special features of the government bill, but because the bill is a measure for the reduction of debt at all. In a letter recently published in the London *Times* objection is taken to the arrangement for the annual increase of the appropriation for repaying the debt by the addition of interest on the debt which is from time to time repaid. By this means the debt is paid at an accelerating rate, while the annual charge remains unchanged. The writer of the letter in the *Times* makes the point that this arrangement disturbs the market for securities and embarrasses investors by extinguishing the debt too rapidly. The objection is not a new one and an answer to it is not far to seek. Men have probably by this time given up the exploded notion that a national debt is a national blessing. It is on the contrary a national inconvenience which should be gotten rid of as speedily as possible, provided only that the process of reduction be gradual so as to allow the withdrawal of money invested in the funds with as little friction as possible. The liberation of the amount represented by the canceled bonds cannot, as we have heretofore pointed out, be regarded otherwise than as an economic gain since it represents to that extent an accession to the capital of the country engaged in furthering the work of production. This is of course assuming that the money returned to private hands will seek investment—a fact which will hold true in the majority of cases. The investor, it is true, will have to relinquish the secure and steady income which he derived from the funds; but by the exercise of care and prudence he may be able to derive a much larger return from investments in well conducted industrial concerns. The interest of the investor, it may be remarked in passing, is a rather narrow consideration to urge against a measure looking to the welfare of the people of Great Britain as a whole.

A correspondent of the *Pall Mall Gazette*, writing from Paris recently, says that the debates on the Railway Conventions bill are beginning to show some warmth. Charges of venality are widely bandied about, and one prominent politician, formerly a cabinet minister, has come forward on behalf of the great companies. These things, however, do not occasion much astonishment. The fact of the matter appears to be that the government, in order to avoid discontinuing the public works in which it was engaged, was obliged to appeal to the capitalists at the head of the great companies, and was obliged to offer some substantial concessions in return. The opposition orators have laid great stress upon the military bearings of the conventions, and have shown that all the defensive resources of the country involved in its lines of railways are in the hands of enemies of the republic. The insinuation here conveyed was denounced as slander, but the friends of those thus covertly attacked by the *Gazette* correspondent make some statements which go to show that it was not without foundation. He says that he has learned from railway employés how a Bonapartist managing director spoiled the combinations of M. de Freycinet and hampered Gambetta by shunting ammunition trains, and purposely blocking up the lines between Tours and Le Mans and Tours and Orleans during the Franco-German war. When the employés revealed the doings of their superior to M. Gambetta it was too late to remedy their effects. Notwithstanding these considerations, however, the majority seem to be satisfied with a clause in the bill which enables the government to requisition railways in time of war.

In the controversy upon the railway question M. Leroy Beaulieu has come forward on behalf of the companies. In a recent article in the *Journal des Economistes* he declares that the growing hostility to corporations is based on a delusion and is doing great mischief. He says that in Italy hostile legislation has ruined two great railroad companies since 1870 and has resulted in keeping foreign capital out of the country and in increasing its financial and industrial difficulties. In Spain also unwise government action is likely to prevent the construction of some four or five thousand miles of road, which have been projected and which is much needed by the country. If constructed at all it will be only with the help of government subventions. In Paris itself the construction of a metropolitan railway has been indefinitely postponed owing to the vexatious course pursued by the municipal council. M. Leroy Beaulieu further declares that France is worse supplied with street railroads than any other country int he world, owing to the heavy charges with which the municipalities load these enterprises. Affairs are at such a pass in some towns that the street railroad companies have been driven into bankruptcy by municipal exactions and the tracks have been taken up because no one is found willing to take and use the franchise under the existing conditions. It is evident that governmental interference with railroads must be exercised with more care and wisdom than in the instances referred to if it would not result in total failure. One point made by M. Leroy Beaulieu has not much force in this country, whatever may be the case in European countries. He insists that there is now no danger from the great corporations, for the reason that the shares are of small amount and are in the hands of many holders. The fact is otherwise in the United States, where single powerful individuals hold "controlling interests." The tendency also appears to be in the direction of greater concentration of the power of control in corporations everywhere.

The anti-German feeling among the French people seems to be losing nothing in strength. It is finding expression not only in debates in the Chambers and in the journals which reflect most readily the popular feeling, but is even manifesting itself in the literature which is less sensitive to the impressions of the moment. Overzealous French patriots are now discovering that the Germans are deficient in genius, and that they are imitators of the English and the French in literature and manners. Even the possession of military skill is denied to the German nation as a whole; the Prussians alone are admitted to have a true warlike genius. This is certainly very singular as coming from the losers in the great struggle of a dozen years ago, and will be regarded by most disinterested people as very unfounded criticism indeed. Its significance, however, does not depend on the fact of its justice or injustice, but upon the circumstance that such expressions find currency among the people of France. The existence of these feelings is to be deplored as constituting a constant menace to the peace of Europe. It may be that Prince Bismarck's triple alliance was formed none too soon.

The most important of the serious articles in *Harper's Magazine* for September is ex-Mayor

Grace's paper on "The Government of Cities in the State of New York." The writer expresses the opinion that the question of the relation of the municipality to the state is to be regarded as of the first importance in any inquiry looking to the solution of the vexed problem of the government of localities. The real mischief in the present system, which makes municipal good government apparently impossible, is not so much in the character of the charters as in the absolute and irresponsible power of the central governments in all cases where a limitation on the legislative power is not imposed by constitutional provisions. Mr. Grace severely criticises the present system which places the government of a city like New York in the hands of commissioners, leaving the mayor very little executive authority, and the aldermen little or no legislative power. Under this system the government of municipalities is conducted except in the most insignificant details by the central and not by the local government, and through its operation actual local self-government has become a thing of the past. Until the radical evil pointed out is corrected, the writer declares that the government of our cities will continue to be not only an unsolved but an unsolvable problem. The remedy for the evil referred to, Mr. Grace declares, will be found in affording constitutional protection to local governments—in providing in the state constitution for the enactment of a general code for the government of all cities, which code should never be changed except in such manner as to affect all cities alike. The views of the writer are eminently sound, and are largely the result of practical experience in the administration of local affairs. They deserve the careful attention of all interested in genuine municipal reform.

The September *Century* is up to its usual high standard of attractiveness. Its contents are varied in kind, and, as a whole, the number has a seasonable out-of-door flavor. Among the serious articles, one of the most striking is Mr. W. C. Conant's inquiry: "Will New York be the Final World Metropolis?" This inquiry he answers in the affirmative. The pivot of the whole development of the metropolis, he says, is in the financial center on the eastern side at the lower end of the island. He thinks that this center will not change, and that the physiognomy of this part of the island is now defined, and will only become more pronounced in time. The jobbing trade, he thinks, will continue its march up town, and the dry goods trade, following the tide of fashionable life, will go still further to the north. The future fashionable section of the city he locates on the narrow, elevated plateau at the northern end. The number contains a sensible editorial on the temperance question, in which the point is made that the evils incidental to the liquor traffic can only be abated by a union of the majority opposed to these abuses, and that such a union can never be effected by extreme measures or fanatical pronunciamentos. The article rebukes the extreme temperance leaders, upon whose shoulders it casts the responsibility for the rejection of many admirable laws for the repression of abuses, especially in the state of New York, where the activity of these people has been particularly injudicious.

Considerable excitement has been felt on the Pacific coast of late—as well as in Missouri—over the discovery of what are believed to be extensive deposits of petroleum. In the latter region farmers are selling out their land at prices considerably in advance of what they would have gladly accepted three months ago, and Pennsylvania oil men are on the ground preparing to put down wells and find out the capabilities of the deposit. There appears to be no doubt that the oil is there. The main point is as to the extent of the territory and the quality of the oil. In California the oil territory extends from Newhall to Santa Barbara, a distance of 200 miles, and is said to be from one to fifty miles wide. The surface oil, as in Pennsylvania, is heavy and black. Lower down the oil becomes of the variety adopted for illumination, and in three districts so far tested no failure to get oil in paying quantities is reported. The rock is hard and thick, and the machinery used in drilling is procured in Pennsylvania. It costs $7,000 to put down a California oil well after the tools are on the ground, or twice as much as a Pennsylvania well costs, although the latter may be 2,000 feet in depth, while a California well is not over 1,000 feet deep. But after it is down and flowing or pumping the California well is a valuable piece of property. Newhall is the refining center of the California oil field, and the oil is run from the wells in pipe-lines and tank-cars. Great attention is being paid to the product as a fuel, and it is being used largely in smelting. It is far cheaper than coke. Experiments are now making with petroleum in smelting the low-grade ores which abound in the country where the oil is found. It is not known yet just how far the reports concerning the petroleum discoveries in Missouri may be relied on. It has long been known that there is oil in California, but time has yet to confirm the staying qualities of the wells. Mexico, too, is coming to the front with what are declared by Boston capitalists to be deposits of petroleum of great extent and value, and a company has been formed to work them. If these views of the situation prove to be realities the "statistical position of petroleum," as it is called, may have to be regarded from an entirely different point of view ere long. As yet, however, it is too early to look for an effect on the great oil output of Pennsylvania.

SPECIAL CORRESPONDENCE.

THE SOUTHERN EXPOSITION.

Louisville, Ky., August 20.—Since the opening day much work has been done by exhibitors and managers, and practically the exhibition is complete. Here and there you see still a vacant space, and some of the machinery is not yet fully regulated and adjusted, but it is now possible to understand the purposes and the methods of the projectors of this industrial movement and to judge of their success. Even to those who thought they knew what was doing at Louisville the result, as it is now presented, will be a great surprise. The vast aggregation of machinery has never been surpassed and it is doubtful if the Centennial display equaled it. In one branch at least it stands far ahead of all its predecessors. The electrical display is on a gigantic scale, and it includes every invention which has successfully produced light, as well as an electrical railway over three thousand feet long, which makes the circuit of the park in three minutes.

The contract for lighting this building, 910 feet by 620 feet long, with its galleries, was given to the Edison Company, of New York, and the work is done by 4,600 incandescent lamps. Fourteen dynamos are used. The power is furnished by one 600 horse-power Reynolds-Corliss engine, and by three Armington & Sims engines. In addition there is an all-night circuit of 240 lights, and the Art Gallery is lighted by 300 incandescent lights. In all respects the result has been exceedingly gratifying. Each night the illumination attracts a crowd of delighted visitors. The effect is most brilliant and in the Art Gallery it is exquisite. A number of judges assert that the pictures show to better advantage than in any light it is possible to have except for a limited time during the day.

The park and grounds are illuminated by the Jenney arc lights, about one hundred in number, very brilliant and steady. The annex for wheeled vehicles, 250 feet by 100, is lighted by the United States Company with its arc lights. This company has also erected across Fourth avenue an immense marine light, which illuminates the street a mile and a half away. In addition it has a room in the building where its system of incandescent lights is displayed, and one can compare it fairly with the Edison system.

It is plain, therefore, that for the scientific investigator the Southern Exposition has an interest second to none which has preceded it, for here is demonstrated beyond a doubt the practical utility of electricity for lighting purposes and for motive power. The reports on the cost of this work will be watched for with interest. The combined cost of the various electric plants here exceed largely $100,000, and they have never before been equaled.

The display of textile machinery is also on an extensive scale. The leading manufacturers of the north are here represented, and all the textile fabrics may be followed through the processes of manufacture from the raw material to the finished product. Silk, cotton, wool and hemp are treated with great elaboration, and the vast display of machinery in active motion interests large crowds daily.

Nothing which has ever preceded this exposition can be compared to the exhibit of agricultural machinery here witnessed. It is simply bewildering, and to one awake to its significance it is fascinating. The progress in agriculture in recent years deserves a volume of itself, and we have it epitomized in one display where is exhibited the plow in general use early in the century side by side with the modern hillside plow, the pony, and the sulky. Here, too, are the reapers and mowers and threshers, the cotton planters and potato diggers, the cultivators and the cotton cleaners, the new gins and the latest presses. Power is applied to all these which need it, and when all in motion their music is majestic. The effect on southern agriculture is certain to be widespread and lasting. Agriculture in the southern states has already entered on a new era of intensive and diversified farming with the most encouraging results, and this tendency will receive a great impetus from this exposition.

It is not possible in one short letter to do more than point out the significant features of this exposition, and this task would be incomplete did I not notice the exhibits of minerals and woods from Kentucky, Tennessee, Alabama and Arkansas. The Kentucky exhibit is made by the Geological Bureau, and does not relate to agriculture. The Tennessee exhibit and that of Arkansas include grain and grasses which will greatly surprise the northern visitor because of their variety and quality. The Alabama exhibit is made by the Louisville & Nashville Company, and is exceedingly comprehensive and valuable at this time. In these exhibits one is struck by the number of coal mines represented, the vast extent of these deposits, and the proximity to the banks of iron ore. There is the hand-writing which is unmistakable, and to the unprejudiced mind it is plain that in a few years these states are to be the center of the iron industries of the whole country.

The projectors of this exposition have labored untiringly in their work, and deserve the prompt and undeniable success already achieved. The most sanguine did not anticipate any large attendance during the month of August, but they have been agreeably surprised. There has never been less than 3,000 on any day, and now it runs up to 6,000, 8,000 and 10,000. On the opening day it was over 15,000. Every day now the crowds increase. The visitors are filling the hotels, and in September, it is certain, the capacity of the city to entertain great numbers will be taxed to its utmost. Special trouble has been taken to secure the comfort of all visitors, and the Committee on Public Comfort will see that every assistance is given strangers seeking accommodations.

Already the effect on business is marked. August in Louisville is usually an exceedingly dull month, but for two weeks our manufacturers have found it impossible to keep up with their orders, and our merchants, wholesale and retail, have more customers than they can give proper attention to. View the exposition from any standpoint and the verdict must be that it is even now an unqualified success.

LETTERS TO THE EDITOR.

THE PURCHASING POWER OF GOLD.

To the Editor of BRADSTREET'S.

SIR—For some time past a number of writers on finance, especially Mr. Goschen, the London banker, have been endeavoring to convince the public that gold is appreciating in value—that is, its purchasing power in commodities, property, etc., has increased within the last few years. The principal reason assigned is the resumption of specie payment by France, the United States and Italy requiring a a larger proportion of gold than silver, as all of these countries although in law under the double standard are practically, by limiting the coinage of silver, under a single gold standard. Mr. Goschen and those who believe with him claim that the withdrawal of such immense quantities of gold from the rest of the world by the countries resuming specie payment has caused gold to appreciate. The fact is that during the last twenty-one years gold has fluctuated in value or purchasing power. From 1862 to 1873 gold depreciated 15 per cent. From 1873 to 1879, during the low prices of commodities, it had appreciated in its purchasing power 38 per cent. In 1879 gold was at its highest point of appreciation; since 1879 to January, 1883, gold has depreciated 15 per cent. It will be seen in the tables of prices at the end of this article that gold has in the year 1883 exactly the same value in relation to commodities as it had in the year 1862.

I shall endeavor to point out the reasons for the variations in the purchasing power of gold from the suspension and resumption of specie payments in the United States, France and Italy. Without going into the laws that regulate the movement of the precious metals throughout the world, so ably explained by Ricardo, let us simply state that every nation is awarded by the automatic actions of the natural laws of supply and demand the exact quantity of the precious metals required by each for the arts and for currency. Now, without going into a question so intricate as the economization of the use of coin by increase of banks of deposit, the check and the clearing house, etc., etc., I will endeavor first to trace the causes of the depreciation of gold for the ten years ending 1872. Adam Smith laid down the axiom that you cannot circulate easily any more paper money than there would have been in circulation of coin, whose place it has taken if bank notes had never been invented or printed.

Now the point at issue is simply that after 1862 the United States, France and Italy, especially the first, had a large quantity of substitute paper money in circulation. These nations during the decade following 1862 suspended specie payment, and substituted for their legal tender coin and redeemable paper irredeemable paper money. Of course their entire currency became suspended paper money, and being more or less overissued, that is gold coin was at a premium, and a very large portion of their gold and silver coin was exported to other countries.

Now, the effect of three such populous countries as the United States, Italy and France suspending specie payment was that all the coin driven into the countries that are specie-paying inflates their prices just as much as if there were so many new gold or silver mines suddenly opened in the world; for instance, suppose the combined amount of coin and paper money circulating during specie payment was $2,000,000,000 in the foresaid three countries, half of which was coin, and by suspension of specie payment and substituting paper money to the amount of their coin, and it drives $700,000,000 of coin into other countries, it would be certain to inflate prices in other countries, and if these three countries should replace their former combined currency of coin and redeemable paper money with $2,700,000 of suspended paper money, would it not be plain that the world's currency, by the act of suspension of specie payment of these countries, would be increased by $1,400,000,000, viz., by $700,000,000 additional paper currency in the suspended countries over their normal former combined coin and redeemable paper money, while the foreign countries who received the coin would have their prices of commodities, etc., affected. We sinned in this particular by overissuing paper money during our suspension in a far greater degree than Italy and France. In fact, the conduct of the Bank of France during the suspension of their paper money, in keeping it from being redundant and never at a discount of over 2½ per cent., is deserving of the highest praise. It was clearly pointed out over seventy years ago, in England, that suspension of specie payment in any important country inflates prices less or more in all countries.

When France joined the countries that suspended specie payment in 1870 it increased prices of commodities still higher. About that time Mr. Gladstone even lost his balance, and declared that the national wealth of England had increased not slowly and steadily as previously, "but by leaps and bounds." The culmination of inflated prices of stocks and property and depreciation of gold was in 1871-2; in 1873 the bubble burst.

In 1873 preparation for specie payment was begun in France, and in this country, by the act of 1875, contraction set in, and as Mr. Goschen describes, the appreciation of gold commenced; resumption took place first in France, and on January 1, 1879, in this country, and in the fall of 1878 prices for cotton touched 8¾c. per pound, pork $8 per barrel, and wheat $1 per bushel.

Mr. Goschen is wrong. The world, as a whole, saw the lowest point in prices of goods and property in 1877-8, and gold, as a consequence, at the highest point of appreciation or purchasing power in commodities, etc., etc. There is not a doubt that the worst of the contraction was reached by 1878 at furthest, and from that year prices of merchandise and property had advanced. Taking the world as a whole, the quantity of gold required by Italy for resumption may have made a slight reaction in 1882, but nothing to the advance in prices in 1879, 1880 and 1881 in commodities.

With regard to Germany's having assisted in the appreciation of gold by her changing her unlimited coin legal tender from silver to gold, the effect of that demand for gold was fully felt by the year 1879, and was much overrated, as France had lost gold for some years and had got silver in its place, which she could very easily do, as during the twenty years ending 1870, at her ratio of gold to silver under her double standard 1 of gold to 15½ of silver, gold at that ratio during the above period being the cheapest metal, gold went to her mints, and silver, being undervalued as coin was exported, and gold coin substituted in the circulation of France for silver coin to an immence amount. Since 1874 the reverse has taken place, silver is now overvalued as coin, and kept in circulation, and gold undervalued as coin and exported in spite of the Bank of France.

About Italy resuming on gold instead of silver, I am certain that France has helped her in the same way as she did Germany. As to the United States we were in fact, if not in law, a gold country when we suspended in 1862, that reasoning will not apply to us; in fact our compulsory silver coinage act has retained $130,000,000 of silver in the country, which but for that act we would have shipped that amount of silver as merchandise, and we would now have that amount more gold coin in the country, less the overvaluation of the silver as coin, about $18,000,000, making the value of gold we would have had in the country but for that act, $118,000,000 more gold than we have.

To conclude, there cannot be a doubt if we compare the purchasing power of gold at present with the purchasing power it had in the year 1862, before the above three nations suspended specie payment, we would find, as the table below* will show, that the purchasing power of gold to commodities is equal to what it had in the year 1862.

HENRY KEMP.

New York, August 23.

*Cost of 12 articles or quantities estimated relatively to their ratio of consumption, so as to show the purchasing power of one gold dollar in commodities in the year 1862—100 being equal—12 articles are: 5 barrels S. F. state flour, 1 bushel wheat, 1 bushel corn, 1 barrel mess pork, 100 pounds butter, 10 pounds cheese, 50 pounds lard, 50 pounds cotton, 50 pounds wool, 1 ton coal, 50 pounds coffee and 200 pounds sugar.

	Cost of 12 Articles.	*Purchasing power of a gold dollar.*
1830	$123.14	102
1847	184.45	68
1843	85.33	146
1862*	125.75	100
1873*	149.59	85
1879	100.33	118
1883	125.47	100

*In gold. All other years in gold of course.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

In a recent action on a policy of accident insurance the plaintiff alleged that while a passenger on a train of cars he fell asleep from weariness and the motion of the cars, and that while so unconscious he arose from his seat and went to the platform of the car and fell therefrom to the ground, sustaining injury. Upon demurrer, the Supreme Court of Wisconsin held (Scheiderer vs. Travelers' Insurance Company) that the facts stated in the complaint amounted to a cause of action, it being evident from the allegations contained therein that the plaintiff was as irresponsible for his actions and conduct as a human being could be from any possible cause, and that that was sufficient.

There are circumstances under which it is not allowable for a person to make use of his name to distinguish goods manufactured and sold by him. This point was made clear in the case of Freeman et al. vs. Freeman, recently decided in the Chancery Division of the English High Court of Justice. The plaintiffs had been well-known manufacturers of baking powder since 1868 and carried on a large business in the manufacture and sale of a commodity known as "Freeman's Baking Powder." The defendant until 1882 had been engaged as an oil man and prior to that he had been an ironmonger. In the spring of 1882 he opened a shop and sold packets of baking powder similar to those manufactured by plaintiffs, the packets containing his name prominently displayed and otherwise resembling plaintiffs' packets. The plaintiffs claimed a monopoly of the words "Freeman's Baking Powder," which they had been the first to use, and demanded an injunction against the defendant, whose labels it was urged were calculated to deceive the public. For the defendant it was urged that there was no infringement and that he had a perfect right to use his own name on his packets and boxes. Mr. Justice North said that he saw no alternative but to grant the injunction asked for by plaintiffs.

The case of Hibbard vs. Halloway, recently decided by the Chicago Appellate Court, was a suit brought by the appellee against the appellant to recover upon certain cartage tickets issued by appellants to one Fitzgerald for teaming done by him for them, and which appellee bought of Fitzgerald. The tickets read: "Hibbard, Spencer & Co. Cartage tickets, 50c. Hibbard, Spencer & Co." They were printed, except the name of Hibbard, Spencer & Co., at the bottom, which was written. The plaintiff and appellee had judgment in an inferior court, but this was reversed by the Appellate Court. That court held that the appellee was not entitled to recover in his own name upon the tickets in question. They were neither due bills nor promissory notes, but merely acknowledgments of indebtedness to the person to whom they were issued. The court said that while no particular form of words was necessary to constitute a promissory note, and while it need not contain the words, "promise to pay," it was settled that in the absence of such words there must be other words of equivalent import. In the documents sued on there was not only no promise to pay, but no words of similar import. They could not be regarded as constituting negotiable paper. The most that could be claimed for them was that they were in the nature of vouchers or acknowledgments of services rendered by Fitzgerald to appellants, upon which the law implied a promise to pay to him, but not to a third person for such services. They were merely non-negotiable choses in action, upon which suit could only be brought in the name of Fitzgerald.

The English Court of Appeal recently had before it for consideration a covenant not to carry on a trade within a certain distance of the shop of the covenantor's former employer, the benefit of which was claimed by a third person, to whom the employer had sold the good-will of his business. This was in the case of Jacoby vs. Whitmore, decided on the 31st ult. It appeared that in October, 1878, the defendant entered into the employment of one Cheek, an oil, color and Italian warehouseman, signing at the same time an agreement according to the terms of which he was not, while in Cheek's employment or at any time thereafter, to undertake or be engaged in a similar business within a mile of Cheek's shop. For a breach of this agreement defendant was to forfeit £250 to Cheek. Subsequently Cheek moved to a shop ten doors off, and in April last sold to the plaintiff the beneficial interest in and the good-will of his business. The defendant meanwhile had gone to reside in a house within the prohibited limits, and had, in conjunction with others, one of whom lent his name to be put up over the shop, opened there the business of an oil, color and Italian warehouseman. The plaintiff, claiming the benefit of the agreement between Whitmore and Cheek, applied for an injunction against Whitmore. An injunction was refused by Vice-Chancellor Bacon, who was of opinion that the agreement was personal with Cheek. His decision was reversed by the Court of Appeal, which held that the benefit of Whitmore's contract passed both under the term good-will in the assignment to Jacoby and also under the words "beneficial interest in the business," and added that if the contract did not add to the value of the good-will because it could not bring customers to the shop it would at least prevent them from being taken away.

BUSINESS NOTES.

According to a recently compiled census of the rolling stock on the French railways, there are now in France 6,893 locomotives, of which 2,826 are for passenger traffic and 4,067 for goods traffic. The passenger carriages number 15,432, of which 3,208 are first class, 5,315 second class and 6,909 third class. The total number of goods wagons is 182,089.

On August 1 last there were 545 blast furnaces in blast in the United Kingdom out of a total of 912. This left 367 idle. On August 1, 1882, there were 563 furnaces in blast, 18 more than at that date this year, 363 being then idle. The various changes which took place during July were principally in Cleveland, Scotland and South Wales, the result being a gain of 5 furnaces over the total number in blast July 1 last.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* (London) for the week ended August 4 was 205, against 239 and 194, respectively, in corresponding weeks in 1882 and 1881. The total for England and Wales was 183, as compared with 215 and 181; for Scotland it was 15, as compared with 23 and 10, and for Ireland the total was 7, as against 1 and 3, respectively, in the opening week of August in 1882 and in 1881.

The value of the importations into Italy during the first half of the calendar year amounted to £28,760,000, or £3,200,000 in excess of that of the corresponding portion of 1882. The value of the exports during the first half of the current year was £24,880,000, a gain of £5,720,000. The wine exports alone show an increase of £840,000, a fact which may be regarded as an additional indication of the advantage which the neighbors of France have derived from the disease which threatens the extinction of one of the chief sources of French wealth.

A Tea and Sugar Exchange has been formed in New York city. No active business has been transacted as yet, the subjects of constitution and by-laws being as yet not fully decided. It is reported that the new organization will begin with over four hundred members, representing most of the prominent tea merchants and sugar importers in the city. Comment has been made on the fact that up to within a day or two no sugar refiners had applied for membership. The exchange will establish about a dozen fixed standards for tea on which the various grades will be based.

The London *Labour News* of August 8 reports that the Staffordshire colliers' strike continued, and that considerable privation was suffered. The ironworkers' strike was practically at an end. Birmingham's heavier industries were actively employed, and the ship-building and engineering branches continued busy. There was a slackness in the cutlery trade, pending the decision as to raising prices consequent on the higher prices charged for ivory. There was noticeable slackness in most departments in the textile industries. Operations in the agricultural regions was brisk. Emigration was active.

The total number of immigrants arriving in the United States during July, 1883, and in the corresponding month in the preceding year, are reported by the United States Bureau of Statistics as follows:

	July,	
From.	1883.	1882.
England and Wales	7,574	6,899
Ireland	5,288	5,638
Scotland	1,950	1,111
Austria	1,210	1,180
Germany	13,203	16,721
Italy	859	1,118
Norway	2,413	3,266
Sweden	3,253	5,888
Dominion of Canada	4,383	7,282
All other countries	6,087	15,907
Totals	46,220	65,010

From the hop yards in the vicinity of Utica, N. Y., word comes that the bright prospects for a crop which were reported some weeks ago have almost disappeared. Advices state that but a week ago a yield in excess of that of last year (a short crop) was promised. But vermin appeared, and the needed rains, followed by hot weather, did not make their appearance. The weather during the past week has been very unfavorable for the growing crops in central New York. Great injury has been wrought in Madison, Oneida and Otsego, and doubtless in other counties, and unless the needed changes come soon many acres of hops will not be worth the picking. At present it looks as though the quality of 1883 hops will be very inferior.

The nineteenth bulletin of the Edison Electric Light Company, August 15, 1883, opens with remarks as to the success of the electric lighting plant now in operation in the First District in New York city. The success attained there is said to be complete, as no stoppage has been made for even one minute, and customers are said to express themselves as pleased with the light and the price. In the First District there are 431 houses wired for about 10,300 lamps. Recent isolated introductions in New York are the plant of 116 lamps placed on Mr. Gould's yacht, the Atalanta, and that now being placed on board a Jersey Central ferry boat. Then follows a long list of orders for the placing of the Edison light, some being for extra lamps and others for the Edison lamps after trying "infringing lamps" and finding them "not satisfactory." In speaking of the coronation of the Czar of Russia, a late copy of the *Nowe Wreme* is quoted as follows: "Iwan the Great, fully illuminated with Edison lamps, presented a truly magic aspect."

The National Telegraph Company—a new organization with $25,000 nominal capital and with power to increase it to $10,000,000—has entered the field to compete for business between New York and Chicago. It makes the surprising announcement that it will undertake the transmission of messages between the New York Produce Exchange and the Chicago Board of Trade by October 1 next. The apparent mystery is explained, however, by the fact that the new organization has acquired the telegraph lines built along the N. Y., Chicago & St. Louis (Nickel Plate), and the N. Y., West Shore & Buffalo railways, which form a continuous circuit of four wires between New York and Chicago. The poles are constructed to carry twenty wires if desired. The railway companies named have leased the right to use the wires for the trasaction of railway business. It is not contemplated to extend the wires except by spurs to Toledo and to other cities near which the line passes. The stock of the new company will be placed on the market, and a stockholder is reported as making the following suggestive if not significant statement: "The line is not erected as a competitor to any other so far as fighting existing companies goes, and the original investors would in all probability sell to any one who wanted to buy the lines, provided they could make a good thing out of the investment."

The following national banks have been organized: The First National Bank of Taylor, Tex.; capital $50,000; John R. Hoxie president; C. H. Welch cashier. The Decatur National Bank of Decatur, Ind.; capital $50,000; T. T. Dorwin president; Gus. A. Kolbe cashier. The South Branch Valley National Bank of Moorefield, W. Va.; capital $55,000; A. Sommerville president; J. William Gilkeson cashier. The First National Bank of Punxsutawney, Pa.; capital $50,000; Reuben C. Winslow president; no cashier. The First National Bank of Vancouver, Wash. Ter.; capital $50,000; Louis Sohns president; E. L. Canty cashier. The American National Bank of Nashville, Tenn.; capital $600,000; E. W. Cole president; A. W. Harris cashier. The Leavenworth National Bank of Leavenworth, Kan.; capital $100,000; Paul E. Havens president; C. Cunningham cashier. The Merchants' National Bank of Charlotte, Mich.; capital $50,000; P. S. Spaulding president; G. M. Ely cashier. Bank Superintendent Paine has granted a certificate authorizing the New York Produce Exchange Bank of New York to do a banking business, with a capital of $1,000,000, all of which is paid in. In the Winters National Bank of Dayton, Ohio, J. H. Winters has become president, in place of V. Winters, and in the National Exchange Bank of Lynchburg, Va., George M. Jones president, in place of James Franklin.

The annual report of the New York Produce Exchange for 1882, has been issued, and proves to be a much larger and more complete record and work of reference than any of its predecessors. The report by the statistician of the Exchange, Mr. E. H. Walker, is unusually full and forms a compendium of information respecting harvests, the movement and consumption of produce, which has no rival published in the United States. In introducing his own report Mr. Walker refers to the question of the cost of transportation as follows: "The cereal crops in 1882 in the United States were very large, 126,568,545 acres of land being devoted to this branch of agriculture, producing 2,699,394,496 bushels of grain. The hay crop aggregated 38,138,049 tons, from 32,389,585 acres. The potato crop was 170,972,508 bushels, the production from 2,171,636 acres of land. The cotton and tobacco crops were large. The production of the coal and iron mines was without precedent. The production of petroleum exceeded that of any previous year. The number of miles of railroad constructed in the United States was between 10,000 and 11,000, being larger than ever before. The fleets of steam and sailing vessels, barges and canal-boats on the numerous inland water-ways were fully employed during the navigation season of 1882. The rates of freights inland, 1,000 miles, were, on grain, $5 to $6 per ton of 2,000 pounds, by rail, and about $1.90 to $2.62 per ton by water. The rates of freight on the ocean hence to Liverpool, by steam, during 1882, were, on the average, $2.94 per ton, the highest monthly average being $4.69, and the lowest monthly average $2.08 per ton. With such low rates of inland and ocean freight the United States has an important advantage over competing grain-exporting countries. The railways demonstrate by their annual reports that the cost for transporting freight per ton per mile is being diminished year after year." The enlargement of the Erie canal so that steam motors can be used there is also favored, it being noted that such a change would reduce the round time by canal from New York to Buffalo from thirty to twelve days.

The British foreign trade in iron and steel during July was very unsatisfactory, showing a decline of 41,919 tons, or 10.4 per cent., as compared with the shipments for July, 1882. The returns, compared with May and June, 1883, show declines of 13,165 and 18,092 tons respectively. Against the decline in tonnage as against July, 1882, noted above, the decline in price obtained is said by the London *Iron and Coal Trade Review* to have been 18.3 per cent. This indicates that there is as little if not less profit in the iron trade abroad at the present time as is claimed to be the case by the least enthusiastic among home dealers. British pig iron shipments for July, 155,004 tons, were 7,900 less than in July, 1882. Belgium, Russia, France and the United States took less, and Germany, North British America and "other countries" more than in July, 1882. The insignificant quantity of rails shipped in July was largely due to the absence of demand from the United States. But 5,719 tons were sent here against 27,182 tons in July, 1881. India is now England's best customer for steel rails. The seven months' shipments of pig iron from Great Britain are nearly 100,000 tons below those of 1882 in a like period, the United States, Holland,

British North America, Italy and Brazil having taken less, but France and Belgium much more. English bars and angles have gone to India and to Germany during the first seven months of the year in excess of like shipments in a corresponding portion of 1882, but Australia, Italy and Canada have taken less. The total for seven months' exports is 167,075 tons, against 173,183 last year. Exports of British rails during seven months were nearly 40,000 tons in excess of those of last year, 126,125 tons going to India; Australia, 80,144 tons; British North America, 43,609 tons; and the United States, 40,144 tons, against 142,023 tons last year and 186,491 tons in 1881. Hoop and sheet shipments for seven months exceed those of 1882 by 9,000 tons, the total being 198,129 tons, of which Australia took the largest quantity and India the next largest. Of tin-plates 156,179 tons were exported, 120,620 tons to the United States. France, British North America and Australia are the other chief customers, but the best did not take 9,000 tons. The total quantity of British iron and steel sent to the United States during the first seven months of each of the following years was: 1880, 1,044,603 tons; 1881, 642,536 tons; 1882, 744,377 tons; and 1883, 418,302 tons, the tonnage this year being less than half of that in the inflated times of 1880, when the British shipment to all countries was 2,410,899 tons, as compared with 2,333,793 tons in 1883—a quantity which falls short of last year's figures by 164,379 tons. But as the decrease to the United States has been 326,075 tons, it is pointed out that other countries have been better customers, and have made up 180,000 tons of this loss.

Supplementary to the general discussion of British iron and steel exports the following statement is given in tabular form of seven months' British shipments and countries to which exported:

	—Seven months.— Exp'ts, 1881, tons.	Exp'ts, 1882, tons.	Exp'ts, 1883, tons.	Inc over 1882, tons.	Dec. from 1882, tons.
United States	612,536	744,377	418,302	....	326,075

MEMORANDA FROM THE AUGUST COTTON REPORT.

NORTH CAROLINA.

From Alexander county: A good season from this forth may produce half a crop, but if drouth continues it will be almost a failure.

From Cabarrus county: For the past two weeks the growth of the plant has been checked entirely by the drouth, but it rained last night, and this will help the crops very much.

From Davidson county: The crop is free from grass and worms, but the weather is too dry for cotton to do well.

From Duplin county: The drouth has been so excessive that the plant in some places is almost dead. The crop, with good season from this time, is certainly injured 33 per cent.

From Franklin county: We are now in a protracted drouth. Early cotton is blooming to the top, which indicates no more growth available. Late cotton is looking better, but is not bolling. If we have rain in a few days, and favorable conditions from this forth, we think we may get three-fourths of an average crop.

From Hertford county: Everything concerning the crop is favorable, except the rather small growth of plants.

From Iredell county: Seven weeks of drouth have injured cotton to such an extent that not over half of a crop will be made.

From Lincoln county: The weather is very dry and the crop looks badly. The present prospects indicate not more than half an average crop.

From Lenoir county: The outlook is fair for a good crop.

SOUTH CAROLINA.

From Abbeville county: The drouth has so injured the plant that we will not make more than half a crop.

From Aiken county: The caterpillars are now doing serious injury to the plant, and should they continue to eat to the 25th we could not make more than one-third of a crop.

From Anderson county: The prospects are very gloomy, and point to not over 25 per cent. of a crop. The damage was mostly caused by drouth.

From Barnwell county: Dry weather has caused the plant to shed some 30 per cent; prospects are not bright.

From Clarendon county: The outlook for a good crop is very poor, the plant having been injured by shedding at least 50 per cent.

From Laurens county: Owing to a terrible drouth we will not make half a crop in this county.

From Marion county: It is not thought that there will be over two-thirds of a crop made, owing to injury from extended drouth.

GEORGIA.

From Baldwin county: The prospect at this time, compared with last year, points to fully 25 per cent. less yield. Considerable complaints of rust since beginning of rains.

From Berrien county: The weather is good, and the crop is growing finely. Stand good and well cultivated. Prospects good for a better crop than ever before.

From Calhoun county: Weather has been very dry since July 16. We think there will not be over half a crop made.

From Clayton county: The recent rains have made some improvement in the condition of the crop, though the drouth will cause the crop to be short.

From Coweta county: Considering the smallness of the weed, a good crop will be made.

From Crawford county: The crop was greatly injured by dry weather, and although we are having rain now it has come too late to do much good.

From Douglas county: The weed is small but well fruited, and prospects are considered fair.

From Franklin county: The long continued drouth has injured cotton 50 per cent.

From Forsyth county: The drouth will affect the yield one-half.

From Heard county: Owing to recent rains, the crop is now in good condition, with good prospects.

FLORIDA.

From Alachua county: It is thought that the crop will be better than last year.

From Gadsden county: Prospects were never better than at this time. The crop will be a large one.

From Sumter county: The crop promises to be larger than last year.

ALABAMA.

From Barbour county: The worms have appeared in large numbers, and will cut the crop short if they continue to eat as they are doing at present.

From Blount county: Dry weather is cutting off the crop. Rust and shedding is complained of. No amount of rain or lateness of season can possibly make a full crop.

From Calhoun county: The stands are not so good as usual, and cotton is small on account of drouth, but is very well fruited.

From Chambers county: The prospect for a good crop may be called fair at present.

From Choctaw county: There will not be over 50 per cent. of a crop made this year, owing to injury by drouth.

From Covington county: The condition of the crop has materially improved during the past six weeks, and the present outlook is good for a fair crop.

From Dallas county: We have had no rain for six weeks, and cotton within the last two weeks has failed badly; the rust has got at it, and it is shedding very much. The outlook is very discouraging.

From Elmore county: The weather has been good for the past month, but the prospect is that worms will cut the crop short 25 per cent.

From Hale county: The crop has been damaged some 30 per cent. by shedding, and prospects can hardly be called fair.

From Lowndes county: A six weeks' drouth has seriously injured the crop. Prospects look gloomy.

From Marengo county: Dry weather has caused the plant to shed some 40 per cent., and prospects are gloomy.

From Montgomery county: The outlook for cotton is decidedly bad. The worms are causing great injury.

LOUISIANA.

From Bossier parish: The crop has suffered greatly from drouth. If it continues ten days longer without rain the cotton crop will be reduced 40 or 50 per cent.

From Lafayette parish: The weather has been bad for the last three weeks for want of rain, and worms are eating cotton in certain localities. We do not think there will be half a crop.

From Lincoln parish: At present the cotton prospect is bad.

From Natchitoches parish: From present appearances there will not be more than half a crop.

From Sabine parish: A five weeks' drouth has injured the crop at least one-half.

From St. Helena parish: The dry weather has caused cotton to shed badly.

From St. Landry parish: The weather has been first too wet, then too dry, and the plant has been much injured. Prospects are bad.

From Tensas parish: Since July 15 the want of rain has caused the plant almost to burn up. The bottom crop is open, the middle shedding, and the top, unless we get rain very soon, will make very little.

MISSISSIPPI.

From Adams county: Dry weather has caused the plant to shed very badly, and with rain now the crop will be cut considerably short of last year.

From Alcorn county: The weather has been uniformly good, and stands of cotton were never better. Free from grasses and no indications of worms.

From Attalla county: The drouth has caused serious injury to the plant, and under the most favorable circumstances the yield will fall one-third below last year's.

From Clarke county: Cotton has been greatly injured by dry weather, and on high lands the squares are all dead on the stalks.

From Coahoma county: Cotton is generally quite small, but quite full of forms, and with a fair season and not much rain the crop may be more than an average one.

From Copiah county: The continued drouth has damaged the crop irretrievably, and the outlook is gloomy.

From Hinds county: The prospect may still be considered fair, although three-fourths of the county is suffering for want of rain.

From Jefferson county: The outlook for half a crop is gloomy, owing to continued drouth.

From Kemper county: The crop is terribly damaged by the drouth. We doubt whether there will be more than a half crop made.

From Madison county: The damage by drouth will be 25 per cent.

TEXAS.

From Atascosa county: We have had no rain since July 1, and only about one-fourth of a crop will be made.

From Bastrop county: The crop in this section is ruined on account of dry weather; there will not be more than one-fourth of a bale to the acre unless it rains soon and frost stays off so that we can make a top crop.

From Bell county: Have had no rain worth mention since June 30. Shedding has been general for two weeks, and all the late forms are entirely lost.

From Bell county: Worms have injured crop 25 per cent.

From Burleson county: The weather has been excessively hot and dry since July 1, which, from all appearances, has injured cotton at least 50 per cent.

From Camp county: At present the plant is fruiting splendidly, but we are having too much rain, and should it continue the crop will be seriously injured.

From Collin county: We had a long dry spell, but for the past two weeks there has been too much rain, and danger is apprehended from an excessive growth of the weed, which would have a tendency to rot the lower bolls.

From Comal county: Shedding and worms have injured the crop about 35 per cent., and prospects are bad.

From Coryell county: The crop will be a fair average, but less than half that of last year, owing to injury by dry weather.

From Falls county: Prospects are very gloomy. There will not be more than half of a crop made, owing to the injury caused by continued dry weather.

From Fannin county: The prospects are good for a crop. The weather has been good, with plenty of rain.

From Fayette county: Our planters say that it will take five acres to make a bale of cotton this year.

From Fort Bend county: The present outlook is that there will not be more than a good one-half to three-fifths of a crop made. The weather is now and has been for the last five or six weeks too dry.

From Gillespie county: We had on the 8th a good rain, which prevented shedding, and, though the yield will fall off from last year, the prospects are good for a fair crop.

From Gonzales county: The dry weather has caused cotton to shed about 60 per cent.

From Henderson county: We consider the chances for more than two-thirds of a crop slim, owing to injury from dry weather.

From Hopkins county: Cotton has suffered some from drouth in some sections, while in others rain has been plenty. Rain is plenty now and prospects are fair.

From Houston county: The present outlook is very gloomy; the drouth has caused cotton to shed about 75 per cent.

From Johnson county: The dry weather has caused much injury to the plant, and the prospects for a crop are very poor indeed.

From Lee county: Fifty per cent. damage has been caused by drouth, and I think that rain now would do no good.

From Leon county: We have had no rain for six weeks, and cotton is opening prematurely. Shedding and worms have injured crop some 30 per cent.

From Liberty county: Without rain at once the crop will be cut off one-half.

From Limestone county: The damage from shedding, caused by dry weather, will reach 40 per cent. Picking is general now.

From McLennan county: The crop is suffering severely from drouth, and late cotton will be a failure unless it rains soon.

From McLennan county: We have had a five weeks' drouth, the thermometer ranging from 103 to 105° Fahrenheit, which has injured the plant 50 per cent. It has been my experience that cotton will not do well with the temperature above 90°, and that a drouth of over ten days is injurious, and that our heaviest crops have been made in cool and wet seasons, as in 1859, 1880, and 1882.

From Marion county: Prospects are fair for a good yield.

From Montgomery county: Our farmers say that it will take three or four acres to make a bale of cotton, owing to injury from drouth.

From Morris county: The cotton crop is doing well, and prospects are fair.

From Navarro county: Prospects indicate only about three-fifths of a yield as compared with last year.

From Robertson county: The present outlook is for possibly half a crop.

From Rusk county: The only trouble to the crop is drouth, and even from this on, with a good season, the crop should be very large.

From Travis county: I never knew cotton to fail so signally as it has in the last thirty days.

ARKANSAS.

From Bradley county: The present outlook is for not more than two-thirds of a crop, owing to dry weather.

From Chicot county: All concur in the opinion that the crop will be much reduced this year, owing to dry weather.

From Dallas county: One-half of a crop is all that we can hope for, owing to the damage done by the long drouth.

From Greene county: There is not as much planted as last year, but the crop is fruiting well, and a full average crop is expected.

From Hot Spring county: Want of rain has cut off the crop at least 12 per cent.

From La Fayette county: We have not had a seasonable rain in this county in over two months, and cotton is suffering very much. A rain now would do but very little good to cotton.

From Miller county: The damage by shedding is 20 per cent. The plant is badly fruited, and prospects are not good.

From Mississippi county: Have had a little too much rain, but generally speaking the condition of the crop is good.

From Nevada county: The damage from shedding is about 25 per cent., but the crop, on the whole, is fully up to if not above the average.

From Phillips county: The stand was injured considerably by being worked out of grass about May, and since the growth was much retarded by dry weather. Prospects are only fair.

From Sebastian county: Fruiting of cotton was never better, and crop prospects are good.

From Sharp county: Stands good. Cultivation, as a general thing, fair. The late rains and warm weather is bringing it out wonderfully fast. A late frost will make a good crop.

TENNESSEE.

From Carroll county: Prospects are good for a large yield of cotton.

From Fayette county: Indications point to a good crop this year.

From Gibson county: Our crop is about two weeks late, and the only thing we fear is an early frost.

From Giles county: Prospects for cotton look better than for many years.

From Rutherford county: The plant is blooming and fruiting well, and with an ordinarily late Fall a full crop will be made.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

Last week the stock market from Tuesday afternoon to Saturday was in a state of reaction from the previous great break in prices, which had dragged down one large house, made a great noise in the financial world and provoked a great deal of newspaper comment. The reaction was so feverish and headlong that it ought to have roused doubt about its permanence, and unquestionably the cooler heads in Wall street looked upon the rise, to which they saw both bull and bear operators heartily contributing their efforts, with considerable suspicion; but it completely deceived, or seemed to deceive the majority of people interested in such affairs, and one of the principal morning journals published two or three columns of interviews with prominent operators, bank presidents and the like, Messrs. Gould and Sage being among the number, all of whom, whatever they may have thought, expressed themselves as confident that prices had touched bottom, and the permanent rise had come which was to take the hides off the over-confident bears. "The bears have had their innings," said Mr. Sage, "and now it is the turn of the bulls." These anticipations were doomed to speedy disappointment. The heavy lines of shorts which had been out in the market had been covered in the great break, and the leaders on the bear side had then turned round and helped to bid prices up again to a level where it seemed safe to put out more shorts. This had been attained by Saturday, and on Monday morning there was a strong pressure to sell stock right from the start. The leader in the decline on this occasion was Denver, which had been acting suspiciously for some days. It appeared now as if all the stock which could be sold without making a bad break in the market had been put out, and when more came out Monday morning there was no sustaining power anywhere, and the price went down in a constant melting away which speedily communicated its demoralizing influence to the whole list. On the next day (Tuesday) there was another tumble, the quotations going to 21⅛, from which there has since been a recovery of between 5 and 6 per cent. Denver became the chief point of interest in the market. A dozen different stories were in circulation as to the cause of this extensive selling of stock, for it was seen to be no bear raid. Some one, or more than one, large holder had thrown over his holdings, but it is not yet known who the sellers were. The supposition is that it was Mr. Charles Osborn's stock which was thrown upon the market with such disastrous effect. First of all it was said that the cause of the selling was the failure of the company to get any one to accept the presidency, vice General Palmer, who was recently forced to resign by some of the principal stockholders. Later it has come to be understood there was a better reason, namely, that the company was in straits for money to meet the September interest on its Western Extension bonds. This would explain why the bonds of the road had just as severe and sudden a drop in price as the stock. It was also said that a large loan, for which the bonds had been given as collateral, had been called, and that the company could not take it up. Whatever be the immediate cause, "the fundamental trouble is," said an experienced railroad man who has examined the property, "the road cannot earn its interest, and these people are finding it out." This gentleman had given some attention to the company's affairs, and had, months ago, come to a very unfavorable conclusion as to the earning capacity of the property. The Utah extension, from which so much had been expected as a rival road to the Union Pacific, he had declared could never compete with it and earn running expenses. What the ultimate fate of this road will be is doubtful. The difficulty with it is its extraordinary gauge, which is neither standard nor narrow gauge exactly, being three feet. As it is built principally through the mountains, a standard gauge road could not use it by laying a third rail, for to do this would require a practical reconstruction of the road on account of the many sharp curves on which an ordinary locomotive could not run. The gradients also are terrible, some of them being 200 feet to the mile. The company promises a statement of its financial condition soon, and it is surmised that it will not be a very encouraging one. It is possible that prominent changes in the control of the road will follow the present upheaval. Next to Denver, Louisville and Nashville was a cause of depression by the sinking capacity it exhibited, but this seemed to be caused more by the inability of the chief holders to support the stock against bear attacks than by a pressure of long stock from them. Undoubtedly some one was putting his stock on the market, but there was no such heavy block of it as knocked Denver to pieces.

On Wednesday trouble broke out from a new quarter. The Philadelphia Stock Exchange was thrown into a panicky state by the calling, so it is understood, of some large loans on Reading and Jersey Central. One of the consequences of this was to make a sudden stringency in the local loan market, and rates on call loans ran up for the day to 8 and 10 per cent. This caused so much alarm that stocks were thrown over without much regard to price, and of course all the stocks listed on both the New York and Philadelphia Exchanges were sold freely on this market. The Northern Pacifics and Oregon Transcontinental were largely traded in at Philadelphia, and these unfortunate properties, which now seem to be buffeted from all sides, experienced a sharp decline. This time, however, the Oregon stock escaped the hardest blow, which fell upon the Northern Pacific, and Northern Pacific preferred fell lower than it did in the great break of the previous week, and is now below the lowest point it touched then. Indeed, unless something happens very different from what now appears likely, these stocks are doomed to a decline which will carry them down pretty low. The power of the Villard syndicate to support them seems quite broken. Jersey Central and Reading are not in such bad case, these stocks appearing to have a good deal of strong backing yet, besides which, the anthracite coal trade is certainly in a prosperous condition through the large markets opened in the west, and were not the two companies crushed under a load of debt they would be doing as well as the Lackawanna—which proves a very hard nut for the bears to crack. Mr. Gowen comes out every day now with some new announcement of the brilliant prospects before the allied companies, and tells how much they are likely to earn; but his words do not have much weight in Wall street against his deeds. Despite all the talk of big earnings, this inveterate borrower has seized the occasion of exchanging the disputed Jersey Central income bonds for a new debenture bond, to make the issue of the latter $2,800,000 in excess of the amount required for the exchange, the proceeds to be used in the payment of floating debt, for improvements, etc. This, of course, will be so much additional burden to the already over-burdened Jersey Central road, and ought to be a warning to investors, if anything can act as a warning to them, not to touch either bonds or stock of any property of which Mr. Gowen has control.

The general temper of Wall street has been changed by the events of the past week so completely that no one seems to look for anything but a continuance of liquidation and corresponding decline of prices. The reaction which the market had was so short-lived, and the decline in prices since so evidently caused by the selling of stock by holders unable or unwilling to carry it longer, that no amount of assurances about the prosperity of the country avails to persuade people to buy stocks. The street is daily finding out that the "strong hands," into which it has so often been said of late the stocks have gone, are in fact no stronger than other hands, and the Vanderbilt stocks have begun to show serious symptoms of decline consequent on selling out by the holders. Lake Shore has been getting down toward par, not by sudden drops, but by that slow and fractional decline which surely betrays a "feeding out." There is no leader on the bull side. Mr. Vanderbilt will do nothing; Mr. Villard's power seems utterly broken; Mr. Gould has all he can attend to in looking after his Western Union and Missouri Pacific, and is plainly in a more uncomfortable position than it is usually his luck to get into. The formidable opposition which seems growing up to the Western Union under Mr. Garrett's manipulation (for it is an open secret that it is the president of the Baltimore & Ohio who is working the Postal Telegraph and other opposition companies) appears to be giving the Western Union people considerable uneasiness.

The loan market has been made easy by the bond call of the Treasury, and about $4,500,000 of called bonds were presented for redemption on Wednesday, the government paying full interest on them up to November. Call loans have averaged about 2½ per cent. for the week; time loans are 5 per cent. We are, however, approaching the period when the drain of money west will give us at least a 6 per cent. loan market. Foreign exchange remains about the same as last week, the market being perhaps a little firmer. It is something of a surprise that rates keep as high as they do at this time of year, but the comparatively light export movement and the continuance of the 4 per cent. discount rate by the Bank of England may account for it. In the government bond market there has been rather brisk trading, owing to the Treasury call, and prices have stiffened up a fraction. The following were the closing quotations yesterday.

	Aug. 17, bid.	Aug. 24, bid.	Aug. 24, asked.
U. S. 5s extended (3½ p. c.)	..	..	..
U. S. 4½s 1891, registered	112	112¼	112⅜
U. S. coupon	113⅛	113⅜	113⅝
U. S. 4s 1907, registered	119	119⅜	119½
U. S. 4s 1907, coupon	119⅛	119⅜	119½

The bank statement of last week showed that there had been a movement of money westward, but this was said to have been caused less by demand to move the new wheat than by the Indianapolis bank troubles, which caused many of the western banks to draw on their reserves here. The surplus reserve was reduced $2,454,025, bringing it down to $6,879,630. The following are the changes in the items:

	Aug. 11.	Aug. 18.	Differences.
Loans	$326,601,100	$329,449,700	Inc. $2,848,600
Specie	62,650,100	61,236,900	Dec. 2,413,400
Legal-tenders	26,990,700	26,549,500	Dec. 441,200
Deposits	325,228,500	323,626,200	Dec. 1,602,300
Circulation	15,450,800	15,545,000	Inc. 94,200

The proportion of total reserve to liabilities is now 27.12 per cent., against 26.61 per cent. in the same week of 1882.

THE LONDON STOCK MARKET.

[By Cable to BRADSTREET'S.]

From London: American railroad securities have not maintained Wednesday's rally, and closed flat.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: Transactions in stocks have been light, and the demand is mainly for local securities.

From New Orleans, La.: Money is becoming firmer. Premiums are advancing under a squeeze of shorts.

From Minneapolis, Minn.: The money market is close. Deposit balances are only moderate, with an active demand for money. Eastern exchange steady.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

The past week has furnished evidence of an awakening of the long-delayed fall trade. Special telegrams to BRADSTREET'S during the past few weeks have noted the relatively moderate demand for money at western trade centers. During the past seven days, however, a material change has taken place, and the legitimate commercial demand for money has made itself felt. A large sum in the form of silver certificates has been called for by southern and southwestern banks, and a considerable amount has been sent to San Francisco. Rates for money at Chicago and at other prominent distributing points in the west, southwest and northwest, have increased. Reassuring telegrams point to the revival of the general commercial movement. Exceptions to this rule, while not wanting, are in most cases governed by special circumstances which explain the delay of the new movement in making itself felt at certain points. The dry goods trade has experienced considerable improvement at the west, and has given signs of a change for the better at many eastern cities, except from agents' hands, where the extensive auction sales in New York intefered with the general distribution. At Pittsburgh, Cincinnati, Chattanooga and other points, the iron trade has partly recovered from the lethargy with which it has been struggling. At Chicago some lots of pig have been withdrawn from the market, holders expecting higher prices. This feeling is less observable at tidewater points. Crop reports are more favorable for wheat and somewhat less so for Indian corn. Advices from Minnesota as to the probable yield of wheat point to a crop in excess of that counted on prior to the late drouth in the Red River valley, and which, if these reports are verified, will make good the late reported shortage on the Pacific coast as compared with earlier estimates. The week has affected wheat bearishly, and prices have on the whole been held down. Better weather in the United Kingdom, easier prices at London and Paris, and good weather at home, in addition to the increasing visible supply, have had the effect mentioned. There has been cold weather in the northwest, which, with the late corn crop, has helped to advance prices of that cereal. The quality of this year's crop of corn is not now expected to be up to the average, and without a mild, late fall the earlier and larger estimates as to yield will probably have to be cut down. Anthracite coal goes steadily into consumption, but without any special activity. The excess production, as compared with 1882, is now about 1,200,000 tons. Petroleum has been heavy and dull, and somewhat depressed for pipe-line certificates. Refined oil has gone off fractionally without apparent good cause, yet exporters remain out of the market. Speculation is dull and confined mainly to room-traders. Provisions are dull and depressed, owing to continued heavy receipts of hogs, yellow fever rumors from the south and the absence of legitimate demand of note. The wool trade has continued fair at generally steady prices. The total number of failures reported by BRADSTREET'S this week is 202, of which 179 were in the United States and 23 in Canada. Of the former, the total is 5 in excess of last week, 47 more than in the corresponding week in 1882, and 100 more than in the like week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: General trade is more hopeful. Groceries are steady, with a fair trade. The fish business is restricted by current high prices.

From Boston, Mass.: There is a further improvement in the business situation, and the indications are that the fall trade will now steadily increase without any more serious drawbacks. The extreme hot weather interfered somewhat with movements, but it did not hinder the receipt of orders, nor have any particularly depressing influence. Advices from the interior are favorable for a free distribution of goods, and while there continues to be a conservative tone, dealers generally look for a satisfactory fall trade. Our leading manufactures are selling pretty well, and labor in the manufacturing districts is fully employed. What result will follow from the forced sales of cotton fabrics remains to be seen. The money market has developed a stronger tone, but so far the banks are well supplied with funds, and discount rates have not been materially advanced.

From Buffalo, N. Y.: The general volume of business is of fair proportions, and in some lines exceptionally good for the season. Transactions as a rule, however, are on a conservative basis, sellers generally preferring to encourage such a policy until the full effect of late mercantile disasters is apparent and the future for fall transactions can be better determined. The general tone of the market, however, is healthy and one of confidence. Money is plenty, and good commercial paper finds ready accommodation. Collections are only fair.

From Philadelphia, Pa.: Trade is increasing in volume in most lines under a widening and more general call for supplies for autumn wants, but there is noticeable conservatism and caution in all branches. Money is scarcer, and rates on call and time loans have hardened during the week, but not sufficiently to embarrass business. The general outlook is regarded as encouraging.

From Cincinnati, Ohio: There has been but little improvement in trade during the week. A better feeling prevails in the money market, though paper is still scrutinized very carefully. Manufacturers and jobbers continue to make preparation for a large fall trade.

From Cleveland, Ohio: The general business situation is quiet and without much change from that throughout the month. Collections are somewhat unsatisfactory, and the local demand for money is active.

From Evansville, Ind.: Business is fairly active in all lines of trade. Collections are reported fair. The outlook for the fall trade is good.

From Chicago, Ill.: Money is in better demand, and rates are stiffer; 5@7per cent.; shipments to grain sections are large. Exchange on New York is 50@60c. discount. There is a better feeling in business circles. Country collections are improving. Groceries are in better demand. Drugs and chemicals are fairly active. Lard oil weaker. Linseed steady and weaker.

From Peoria, Ill.: General business is reported fair, with somewhat backward collections.

From Detroit, Mich.: Merchants in most lines report a fair average trade, but collections not better than fair.

From Louisville, Ky.: Trade is active and expanding. Money is quiet and easy at 6@7 per cent. Exchange is in demand at par.

From St. Louis, Mo.: In jobbing circles there is a general feeling of satisfaction over the summer's trade, though it did not reach the expectations of some who had prepared for a continuance of the spring volume. Confidence prevails as to the autumn's business. Money is still active at former rates. New York exchange is plentiful at 75c. discount; prime commercial bills, $1 discount.

From Kansas City, Mo.: A steady improvement is noticeable in all branches. Collections are quite good, and the prospects are excellent for the fall trade.

From Topeka, Kan.: General trade is quiet and unchanged. Collections this week are better than usual.

From Omaha, Neb.: Collections only fair, but said on the mend.

From San Francisco, Cal.: Business is interfered with by the triennial conclave proceedings, but buyers are here in force from the whole northwest and the Hawaiian islands. The fall trade generally opens next week with a very promising outlook for all branches of business.

From Baltimore, Md.: General trade is satisfactory. In some lines, such as millinery, boots and shoes and hats, the volume of business during August reached the average of last year. Retail dealers are not doing much, but are laying in full stocks and anticipate a brisk trade this fall and winter. Prices are firm. The demand for coffee has increased, and importers are asking higher prices. The market rules steady.

From Richmond, Va.: Trade in all lines is good. Recent rains have been welcomed by country merchants.

From Norfolk, Va.: Very little change in the general outlook. Are having another heated term, and complaints are universal in relation to the drouth. The fear is that the crops will be injured.

From Wilmington, N. C.: General business steady.

From Savannah, Ga.: Trade is generally more active. Groceries have opened with a steady demand and heavier shipments than for some time past.

From Memphis, Tenn.: The movement of feed and breadstuffs this week is slack, and the volume exhibits considerable decrease from last week. The stocks of flour, meal and corn are liberal, and trade in these articles is dull. Oats are firm but no higher. Hay and bran are unchanged.

From Nashville, Tenn.: The trade for the week has been satisfactory and active in many branches.

BREADSTUFFS ABROAD.

The generally unfavorable outlook for the wheat harvest in Europe reported last week has been confirmed by late advices. The Russian official crop report says that the winter wheat has resulted in a general failure, the acreage thereof being about 30 per cent. of that sown to wheat. The spring wheat acreage in Russia is given at 20,764,890 acres. It is noted that with the failure of the winter wheat crop the Russian surplus for export (which has averaged about 59,000,000 bushels) promises to be cut down below 50,000,000 unless the spring-sown wheat proves to be well ahead of expectations. The London *Mark Lane Express* of August 20 furnished reports from 361 districts in England and Wales regarding the harvest, in 239 of which the crop is below the average, in 89 is an average, and in 33 only is it said to be better than an average. Other English crops than wheat are reported as generally promising above an average yield. The English wheat acreage of 1883, as officially returned, is 13 per cent. below that of 1882. The weather in Scotland and Ireland has been variable also, but there is more time for the wheat to ripen there, and the opinion has been expressed that the Scotch and Irish farmer may have nearly an average crop of wheat. The English reporter for "The Crops of the World," published by M. B. Estienne, of Marseilles, furnishes the following: "The mean of 280 returns from farmers gives the (British) wheat crop as 8½ per cent. under a standard average of 29 bushels per acre," or 91.6 per cent., as against 92.2 per cent. in 1882, and 90 per cent. in 1881. It is worthy of note that the present makes "the ninth unfortunate season" which the British farmer has encountered. From France there is no improvement to record since last week. Belgium and Holland are still hopeful of a middling harvest of wheat. Germany is believed to have only a moderate crop of wheat, an average yield in the best districts being reduced by deficiencies in others. Austria-Hungary has already secured the bulk of the wheat harvest, most of which will be wanted at home. Russia reports that new wheat and rye are already coming forward in the south, where a satisfactory harvest should furnish a surplus of wheat for export equal to that of last year.

In discussing the wheat outlook in the United States, the London *Miller* gives "first place to an Englishman's estimate sent to us from New York," which estimate is for a 60,000,000 bushel deficiency in winter wheat and a 10,000,000 bushel surplus of spring wheat, as against the 500,000,000 bushel crop of last year, thus indicating a net yield this year of 450,000,000 bushels—an unexpectedly bright prospect. The same journal, while "reserving" its own estimate of the American yield till it "knows more of the spring wheat harvest," prints estimates made by the London *Times*, *Daily News* and by three American weekly papers, of which but one is known to have made an exhaustive inquiry. The average of the five estimates gives 435,800,000 as the "probable" yield in the United States in 1883. During the five weeks ending July 28 the shipment of wheat to the United Kingdom and to the continent, as compared with a like period in 1882, indicates the extent to which our foreign customers have supplied themselves elsewhere.

	—*Wheat, quarters.*—	
	1883.	1882.
From Atlantic ports to United Kingdom	293,500	741,500
From Atlantic ports to the continent	167,000	285,000
California to the United Kingdom	105,000	213,000
Total wheat	565,500	1,239,500
	—*Flour, bags.*—	
To United Kingdom	454,000	285,000
To continent	12,000	22,000
Total flour	466,000	307,000

English millers are disturbed by this exhibit, which shows apparently increasing British imports of American flour while the imports of American wheat were fast declining. Mild weather in the United Kingdom, reported by this week's cable, and an easier market abroad, have conspired to produce a dull market here. The export demand has been interrupted during the week.

The quantity of grain in passage for the United Kingdom, August 23, as reported by Beerbohm's cable on that day, was as follows:

	Wheat. Qrs.	*Maize. Qrs.*
To the United Kingdom	1,725,000	230,000
To continent	590,000	45,000
Total quarters	2,315,000	275,000
Equal bushels	18,520,000	2,200,000
Compared with the previous week:		
To the United Kingdom	1,725,000	330,000
To continent	540,000	80,000
Total quarters	2,265,000	410,000
Equal bushels	18,120,000	3,280,000
Increase, bushels	400,000	....
Decrease bushels	.....	1,080,000

AMERICAN WHEAT MARKETS.

The earlier portion of the week was decidedly uninteresting, as the course of prices was not positive enough to please either side. Saturday recorded a fractional decline, which was offset on Monday, noted again on Tuesday, and met by a better tone on Wednesday. Better weather abroad, lower prices cabled from London and Paris, and the expected increase in the visible supply conspired to affect the market bearishly, and the conservative purchases by bull houses at New York and Chicago, together with the covering of shorts by doubtful outsiders, were about all that remained to influence the market for a higher range. The export movement has not been nearly so large as it was last week, when there aggregated about 900,000 bushels engaged for shipment. The crop reports received during the week are more favorable than otherwise. The dispiriting returns from Minnesota and Dakota which were received just after the drouth have, as shown by late reports, been practically groundless. Special advices to BRADSTREET'S, published last week, pointed out this fact, and the St. Paul *Pioneer Press* just at hand goes further to corroborate it. Speaking of the exceptional promise of the southern counties in Minnesota, where the bulk of the wheat crop in that state is still grown, it is remarked that the present situation makes it certain that the average yield per acre for the whole state will be higher than for any recent year; it may reach even the "sanguine figure of the local agent" of the Agricultural Bureau—15 bushels per acre. "This will make the total yield for Minnesota nearly 40,000,000 bushels. The estimate for Dakota before the midsummer drouths was 20,000,000 bushels. Persons in a position to know claim that the gain since the rains restore the promise of the early summer;" 60,000,000 bushels for Minnesota and Dakota is admitted to be a very "sanguine" but not wholly improbable estimate for the entire wheat crop of the state and territory.

On Thursday wheat declined and reacted and closed weak. On Friday it fell off ⅜c. and recovered ¼c., but trading was limited and it left off weak.

The receipts of wheat at tide-water for the week ending August 18 increased to 2,095,637 bushels from August 11, when they were 2,033,377 bushels. The exports from the Atlantic ports for the week ended August 18 amounted to 1,785,398 bushels, against 1,622,037 bushels August 11. From September 1, 1882, to August 18, the exports of wheat from the Atlantic ports were 67,744,237 bushels, against 58,118,393 bushels in a corresponding portion of the preceding year, a gain of 9,625,844 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended August 18 amounted to 2,546,933 bushels, against 2,103,694 bushels in the preceding week, and the shipments to 1,920,264 bushels, against 1,128,185 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) August 18, as against the preceding week, showed an increase of 627,192 bushels.

The course of the wheat market at New York and Chicago during the past week has been as follows:

	AT NEW YORK.			AT CHICAGO.	
	Aug.	*Sept.*	*Oct.*	*August.*	*Sept.*
Fri. Aug. 17	$1.17¼	$1.18⅝	$1.20¾	$1.02	$1.02¾
Sat. Aug. 18	1.17⅜	1.18⅜	1.20½	1.01¾	1.02½
Mon. Aug. 20	1.18	1.18¾	1.21	1.03¼	1.05
Tues. Aug. 21	1.17¾	1.18⅜	1.20½	1.02½	1.04½
Wed. Aug. 22	1.17⅜	1.18¼	1.20⅜	1.02⅜	1.01½
Thur. Aug. 23	1.17⅜	1.17⅞	1.20⅛	1.02⅜	1.04⅞

At 1 P.M. Friday, August wheat at Chicago was quoted at $1.01¾, and September at $1.03½.

INDIAN CORN.

Indian corn began the week on Saturday last with a substantial advance of over 1c. per bushel. The market for cash was fairly active and there was considerable speculation in the options. On Monday a reaction took place, the drop during the day going as far as 2c. per bushel, though a recovery from this point was made prior to the close. The decline was ascribed to the manipulations of the bulls, who desired to squeeze out weak holders and obtain their corn at a lower figure in view of an expected advance. On Tuesday there was less activity in the options and prices went up ⅛c. There was more firmness for cash corn, but the only explanation volunteered was the expectation that the corn west of Syracuse on the Erie canal would be detained too late for August delivery, owing to the expected interruption of traffic for four days to make canal repairs. Wednesday revealed more strength, which was attributed to a firmer feeling abroad, a slight advance in the English market and cold weather in the growing regions north. There was an advance of 1c. per bushel, and buyers appeared to think that a still further advance was in order. On Thursday corn was weaker and showed a decline at the close. On Friday the options were dull and weak and declined ⅛c. There was a more active moderate demand at the close and more strength.

The receipts of Indian corn at the Atlantic ports for the week ended August 18 were 1,440,482 bushels, against 1,332,046 in the preceding week, while the exports from the same points amounted to 1,048,355, against 1,202,862 bushels. From September 1 last to August 18 the exports of Indian corn were 46,020,984 bushels, against 25,648,361 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, August 18, had increased 534,919 bushels as compared with August 11. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending August 18, were 2,731,576 bushels, against 2,103,091 the week preceding, and the shipments were 2,487,561 bushels, against 2,142,236 in the preceding week.

The closing prices of Indian corn at New York and at Chicago at 1 P. M. for the past week were:

	—At New York—			—Chicago.—	
	Aug.	Sept.	Oct.	Aug.	Sept
Friday, August 17	.62½	.62	62	.51	.50⅛
Saturday, August 18	.63¼	.62⅛	.62	.50¼	.50⅞
Monday, August 20	.63	.62⅝	.62¾	.50¼	.49⅞
Tuesday, August 21	.62⅞	.62⅞	.62⅞	.50⅝	.50¼
Wednesday, August 22	.63¾	.63	.63	.50⅝	.50⅛
Thursday, August 23	.62½	.63⅛	.63¼	.50⅜	.50¼

Corn at Chicago at 1 P.M. yesterday was for August 50⅜c. and for September 50c.

The prices of breadstuffs in New York last evening, as against those of the Friday preceding, as compared with the same at a like date in 1882, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

	Aug. 17.	Aug. 24.
No. 2 flour	$2.40 @3.65	$2.50 @3.60

Barley	311,626	338,548	28,202
Rye	1,395,133	1,376,127	685,225

AMERICAN BREADSTUFFS MARKET.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Wheat is lower under freer offerings from the west and lower cables with reports of better weather for English crops, but corn has fluctuated but slightly during the week. Oats continue scarce and the August option has advanced for that reason. Speculation has been only moderately active; exporters have not bought freely. Orders are mostly limited below the views of sellers. Stocks are gradually accumulating. Flour is firm but demand is confined to nearest home requirements.

From Cincinnati, Ohio: There is no life in the flour trade, yet there is a steady consumptive demand for higher grades on account of the hot weather. Old flour is unsalable. There has been an increase in the receipts of wheat during the week. Prices have fluctuated some, but close firmer under a good milling demand. Corn is in good demand from distillers, and the market is strong and stocks light.

From Chicago, Ill.: Wheat is dull and weak. The demand for old spring is entirely to cover shorts. Red winter and new spring are in moderate shipping demand to fill small orders. Receipts are increasing. Corn is weaker and receipts are larger. The prospect of warmer weather checks demand from speculators. Shippers are mainly taking rejected. Oats are depressed by large receipts, but the shipping demand is good. Rye is steady with a fair export demand. Receipts are heavy.

From Topeka, Kan.: Wheat trade, owing to the recent rain, is light. Corn is in good demand.

From San Francisco, Cal.: Wheat is unusually active at higher prices. The corner in barley sent up prices, but futures are not affected.

From Baltimore, Md.: The grain market is active and receipts have been very large, the stock of wheat in elevators alone at this time being over 2,200,000 bushels. A good foreign demand prevails for new wheat.

From Wilmington, N. C.: Grain and breadstuffs close firmer. The crops are suffering from drouth.

From New Orleans, La.: Flour is in fair supply and steady. Want of tonnage is restricting the grain movement. Prices are nominal. Corn is 55@55½c.; wheat, $1.16. Receipts and exports are trifling.

From Nashville, Tenn.: Wheat is dull; no receipts. Flour is very active.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Milwaukee, Wis.: The weather thus far has been unusually auspicious for the harvest and crop reports are favorable in northern Iowa and southern Dakota. The harvest has been checked by rain but no damage resulted in central Iowa. The yield is double that of last year; the average being larger and the quality much better. Farmers sell No. 2 spring freely at 75c. Threshing is progressing satisfactorily, and new No. 3 received here weighs as high as sixty pounds to the bushel. In Wisconsin there is no complaint of moment, but the crop movement will commence late and be general not much before the 10th of September. Barley is secured in fine condition and the proportion of No. 2 will be somewhat larger than last year; the color being brighter, though the berry is not as plump. Oats are a large crop and the quality is fine.

From Louisville, Ky.: Wheat is moving more freely. Two-thirds of the Kentucky wheat harvest is estimated to have been sold by the farmers. Local dealers still hold considerable. There is a good general demand from northern and southern millers. Very little is being shipped to tidewater, prices ruling above an export basis. The wheat crop has turned out below estimates, and the surplus for shipment is placed at only one-third as much as last year. The corn crop has been reduced from expectations in July, owing to the drouth. General rains are needed badly.

From Minneapolis, Minn.: Some sections of southern Minnesota and northern Dakota have been visited by destructive storms during the week. The damage is local and confined to small territories. It will not be felt in the aggregate crop but severely in small districts. Harvest is progressing finely with good weather. There is no reason to change the estimate of the harvest given last week. Threshing has commenced in the southern portion of the state. The quality is good and the yield is up to the estimate. Barley and oats are mostly secured and the yield is large. Corn is growing well, but is too late to assure a crop of sound grain.

From Evansville, Ind.: The recent rains have about insured the corn crop, which is fine.

From Omaha, Neb.: Are again experiencing very cool weather, and much anxiety is expressed for the corn crop, which should have at least two weeks of warm weather. It is now believed that nothing short of a long fall and late frosts will assure a big corn crop. All other grains are safe, and the yield is very heavy.

PROVISIONS.

Prices of lard options on Saturday, Monday and Tuesday gave unmistakable evidence of a combination to advance prices, and a bull movement in lard was the feature during these days. It was not easy to perceive any special excuse for such a movement inasmuch as the demand and supply of the commodity did not fully warrant it. So far as arrivals of hogs at western points were concerned they were decidedly opposed to higher prices for hog products—being considerably in excess of those at the corresponding time last year. On Monday, however, there was less firmness in the bull corner on 'change and some of the advance noted had fallen away. Pork failed to sympathize wholly with the movement of lard prices and it has been claimed that the manipulated advance was largely in the interest of spot lots and to facilitate the unloading thereof. Orders for western steam lard either for export or for the home trade are on a moderate scale. Spot pork has been firmer, but sales thereof have been largely of a hand-to-mouth description. A telegram from Chicago on Wednesday read, in reference to the Chicago Board of Trade decision in the McGeoch-Fowler Brothers controversy, respecting the alleged delivery by the latter to the former of adulterated lard, as follows: "The particular charge against the firm of tendering a quantity of adulterated lard to McGeoch, Everingham & Co. was not verified, and the committee exonerated the firm on that point. The report, however, takes the stand that Fowler Brothers deserve unqualified disapproval and censure for the methods they have observed in manufacturing prime steam lard, the employment of secret pipes and other appliances." The Chicago pork packers have decided to have the products of their establishments inspected for the discovery of trichinæ or other imperfections, in order to silence European objections, and to that end have secured the services of a competent examiner, who will inspect all hogs brought to and slaughtered in that market. The telegram adds that this course is adopted by the Chicago packers "under instructions from the Department of Agriculture." The same authority adds that "it is stated on good authority that no trichinæ have ever been found in a live state in Germany from American hogs, and that no case of trichinosis has ever been traced to the American product, owing to the thorough system of curing on this side of the water." Now it is proposed to prove to the satisfaction of Germany that American hogs are not infected to any appreciable extent. The course of the provisions market on Thursday was downward. Trading was light both for speculation and for consumption. Friday brought a dull market and nominal prices, with no improvement.

The exports of leading hog products from the principal Atlantic and gulf ports for the week ending August 18, with comparisons, were as follows:

	Pork, barrels.	Bacon, pounds.	Lard, pounds.
New York	3,089	4,596,746	5,630,870
Boston	307	1,509,082	809,700
Portland	...	....	...
Montreal	873	4,427,500	831,160
Philadelphia	95	1,702,000	7,425
Baltimore	175	...	9,500
New Orleans	23	1,200	2,090
Totals	4,562	13,237,128	7,350,745
Previous week	2,472	9,914,706	7,772,625

The total quantity of hog product exported from the above-mentioned places from November 1, 1882, to August 18, 1883, was as follows:

	1882–83, pounds.	1881–82. pounds.
Pork	38,429,000	41,637,200
Bacon	345,150,722	329,524,885
Lard	228,692,508	202,069,413
Totals	612,272,230	573,231,498

Prices of lard and mess pork at New York during the week were as follows:

	Lard, per lb., —September.— This week.	Last week.	Pork, per bbl., —spot mess.— This week.	Last week.
Saturday	8 76c.	8.59c.	$14.25	$15 00
Monday	8.90	8.43	14 50	15.00
Tuesday	8.90	8 50	14 50	14 50
Wednesday	9.00	8.60	14 25	14.50
Thursday	8.85	8 61	14.25	14.50
Friday	8.65	8.62	14.00	14.50

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Buffalo, N. Y.: Provisions are moderately active in response to a fair demand. Hams and dried meats are in more urgent request and are firm at somewhat advanced prices. Other hog products are weaker and a shade lower.

From Philadelphia, Pa.: The jobbing trade has been quite active in all kinds of hog products. Prices show little change despite the fluctuations in the west. Butter is still in excessive supply and dull, but as prices have dropped 1@2c. lower here than in the west receipts are beginning to fall off. The production of near-by creameries is enormous.

From Cincinnati, Ohio: The pork and provisions trade is still unsettled, with possibly a slight improvement.

From Chicago, Ill.: Pork is dull and depressed by reports of yellow fever at the south. It has declined 60c. since Tuesday. Lard is weak and depressed by increased receipts of hogs and has fallen 55c. during the past three days. Meats are lower. Short ribs have declined ¾c., and there is no demand except to cover shorts. Hogs are dull and lower.

From Louisville, Ky.: Provisions are quiet and steady.

From St. Louis, Mo.: The provision movement is active, though cautious, and values are strengthening. Cattle prices are downward, on account of heavy receipts. Hogs are selling well and in excellent offering for the season. Horses and mules are higher, with demand largely ahead of supply.

From Topeka, Kan.: Provisions are in fair demand. Live stock nothing doing.

From Kansas City, Mo.: Provisions are steady, there being a fair jobbing demand. Cattle are active. Receipts are liberal. The market for shipping grades closes rather weak. Hogs are fairly active and prices tolerably steady.

From Omaha, Neb.: The state never had so large a crop of potatoes, and produce of all kinds is abundant.

From Wilmington, N. C.: Meats are steady, closing easier.

From Savannah, Ga.: Trade in provisions is well up to the average and the demand is fairly good.

From New Orleans, La.: Provisions are stronger and higher, in sympathy with Chicago.

From Memphis, Tenn.: The meat market is steady and on some classes a fraction dearer than has ruled for some days past.

From Nashville, Tenn.: Cattle receipts are heavy. Prices are dull and lower, with a limited demand.

THE NEW YORK DRY GOODS MARKET.

The irregular movement of staple goods noticeable last week has continued to prevail. The demand at first hands was light and only for actual requirement. The cause was undoubtedly due to the trade sale of 14,000 packages of domestic cottons which were satisfactorily sold by Wilmerding, Hoguet & Co., on Thursday and Friday. Now that it is over it is expected that a slightly increased movement in cottons will be perceptible. The importing houses report trade of very fair proportions for the week, the large retail trade predominating as purchasers, there being many representatives in the market of leading southern houses. The jobbing houses report an increased activity also, and retailers seem confident of good business for the fall months. Buyers as a rule are cautious, but strong in their opinion that the business foundation of the country has a firm foundation.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

From London: At Manchester cotton is in small inquiry, but cloths maintain prices. In consequence of the Ashton strike export yarns are in good demand for China and Japan, but there is no improvement in home yarns.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The dry goods prospects are fair.

From Boston, Mass.: In the jobbing department of the dry goods trade there has been a fair business, and the indications are favorable for a good distribution. With agents nothing of consequence has been done, owing to the announcement of the great trade sales of cottons in New York. Large buyers have been waiting for the results of the sale.

From Buffalo, N. Y.: The distributive movement of dry goods has been a very fair one for August, and shows a gain over the corresponding weeks of last year. Prices are firm and steady, except, possibly, in certain summer goods. The outlook for an active fall business is encouraging.

From Rochester, N. Y.: Dry goods jobbers report business very satisfactory and increasing, the volume of trade done during the past week being fully 20 per cent. in excess of the corresponding week last year. Retail trade quiet.

From Philadelphia, Pa. Business in staple cottons has been restricted by the large trade sale in New York on Thursday and Friday, but in lines not affected by the auction offerings trade has improved both at first and second hands, and the general market seems to be shaping for increased activity next week.

From Pittsburgh, Pa.: The dry goods trade continues to improve some and an average business is being transacted with encouraging prospects. Matured bills are not met as promptly as could be desired.

From Cincinnati, Ohio: While the dry goods trade is without animation there is some

From Cleveland, Ohio: The dry goods business is fair in comparison with other years at same date.

From Columbus, Ohio: Trade in dry goods is fully as good as last week.

From Chicago, Ill.: Dry goods are jobbing more freely on orders and increased selections by country merchants from the far west and the southwest.

From Peoria, Ill.: In dry goods the outlook is good, with improving collections.

From Detroit, Mich.: In dry goods a good trade is reported, but there is no noticeable improvement in collections.

From Providence, R. I.: The print cloth market is quiet and steady, sales being light; 64s are quoted at 3½c. less 1 per cent., and 56x60s at 3 1/16c. There are about as many pieces on hand as last week.

From Louisville, Ky.: Dry goods jobbers note an active southern order trade and an increased attendance of buyers.

From St. Louis, Mo.: The dry goods trade is active, and improving daily at steady prices.

From Kansas City, Mo.: Dry goods have opened briskly. Sales this week are 25 per cent. ahead of the corresponding week last year.

From Minneapolis, Minn.: Dry goods houses report a slight increase of orders from the country, with prospects for a large fall demand. The general condition of the jobbing trade is healthy with increasing demand for goods, and the condition of the crops is such as to warrant the expectations of a very active fall trade.

From Topeka, Kan.: Dry goods are dull. Merchants are making preparations for fall trade.

From Omaha, Neb.: The dry goods trade is active on fall orders.

From San Francisco, Cal.: Purchases of dry goods are unusually large.

From Baltimore, Md.: In dry goods a good business is reported, and some houses say they are taxed to fill orders promptly.

From Richmond, Va.: Dry goods are moving with seasonable activity.

From Wilmington, N. C.: Dry goods are fairly active.

From Norfolk, Va.: Dry Goods jobbers seem to be doing a fair business, mostly by order. All departments are getting fully prepared for the fall trade. Collections are fair. Money easy.

From Savannah, Ga.: Dry goods are lively and more shipments are being made, the demand on orders being heavier than usual.

From Galveston, Tex.: Dry goods are much more active and the general jobbing trade is reported good.

From Memphis, Tenn.: The dry goods trade is somewhat improved. Money is 6 per cent. Exchange ¼ per cent. premium.

CLOTHING.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: In the clothing trade business has further increased, and orders so far for August are ahead of last year. Manufacturers are well satisfied with the situation, and they feel quite confident of a prosperous season's trade.

From Cincinnati, Ohio: The clothing men say they have closed a good season.

From Omaha, Neb.: The orders for clothing cause considerable activity in that line.

COTTON.

The New York market for spot cotton has been quiet and steady at lower figures, the price having dropped 2 points from last Friday's quotations, closing last night 10 1/16c. for middling uplands. The sales for the week have been of fair proportion, and were taken principally by spinners and for export. They count up as follows: For export, 2,912 bales; for consumption, 3,772, and for speculation, 71 bales, the total sales aggregating 6,755 bales, against 3,136 last week. Included in the above are 142 bales to arrive. The deliveries on contract amount to 900 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year*
Ordinary	7½c.	7⅝c.	10 9-16c
Strict ordinary	8 15-16	8 1-16	11
Good ordinary	8¾	8⅞	11 13-16
Strict good ordinary	9 5-16	9 7-16	12¼
Low middling	9 11-16	9 13-16	12⅝
Strict low middling	9⅞	10	12 13-16
Middling	10 1-16	10 3-16	12 15-16
Good middling	10 7-16	10 9-16	13 5-16
Strict good middling	10 11-16	10 13-16	13 9-16
Middling fair	11 3-16	11 5-16	14 1-16
Fair	11 15-16	12 1-16	14 13-16

STAINED.

	This week.	*Last week.*	*Last year*
Good ordinary	6 15-16	7 1-16	10 3-16
Strictly good ordinary	7⅞	7⅞	11
Low middling	8 7-16	8 9-16	11 11-16
Middling	9 7-16	9 9-16	12⅝

The market for spot cotton closed quiet.

The market for futures has been dull but steady, dealings were very light and confined entirely to room-traders, there being no outside demand. The closing quotations show a falling off from those of last week of an average of 8 points for near months and 1 for later ones. The total sales for the week foot up 375,200 bales, against 259,800 for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
August	10.04	10.12	12.80
September	10.01	10.15	12.47
October	10.00	10.07	11 86
November	10.03	10.06	11 66
December	10.09	10 09	11.66
January	10.19	10.18	11.73
February	10.31	10.30	11.85
March	10.43	10.42	11.97
April	10.55	10.53	12 09
May	10.67	10.64	12 19

The market for futures closed dull but steady.

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
Galveston	3,658	9⅝	12⅛
New Orleans	2,250	9¾	12⅜
Mobile	105	9¾	12⅜
Savannah	577	9⅞	12⅛
Charleston	177	9⅞	12½
Norfolk	1,992	9¾	12½
Baltimore	7,720	10⅛	13

The total receipts of cotton at the ports since September 1 are 5,952,729 bales, against 4,652,867 last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	851,003	430,522
New Orleans	1,670,913	1,176,071
Mobile	311,745	263,550
Savannah	814,306	729,703
Charleston	566,056	496,654
Wilmington	129,005	133,678
Norfolk	797,894	610,140
Baltimore	85,006	35,917
New York	152,170	172,871
Boston	192,161	232,604
Philadelphia	99,138	82,864

Below will be found the receipts for each day of the week ending August 24, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	1,100	1,005	1,312	807	1,052	252
New Orleans	138	289	825	386	82	176
Mobile	....	36	2	....	5	122
Savannah	44	232	302	70	437	158
Charleston	19	3	10	10	18	57
Wilmington	....	16	....	6	52	3
Norfolk	129	249	33	36	31	10
Baltimore	....	399	138	18	....	366
New York	....	....	....	....	1	....
Boston	51	1	....	40	....	37
Philadelphia	....	....	140	....	9	....
Totals	1,481	2,240	2,765	1,373	1,687	1,175
This day last week	1,181	1,866	2,657	1,187	1,380	1,315
This day last year	1,923	1,862	1,978	1,042	2,753	1,600

The total receipts at the ports for the week were 11,341 bales, against 10,289 last week and 12,350 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 3,643 bales, against 2,618 bales last week and 5,067 bales for the corresponding week last year. The shipments for the week were 6,187 bales, against 4,886 bales last week and 7,628 bales for the corresponding week last year. The stocks for the week were 39, 756 bales, against 43,569 last week and 11,926 for the same week last year.

The market at Liverpool for prompt delivery uplands shows no material change. There was a moderate demand, which was freely supplied at slightly lower quotations, the price having dropped ■ point on Saturday and has since remained unchanged, closing last night at 5⅝d.

The future market presents no new features, but continuing dull and easy. Quotations show an average decline from last week of 2 points for near months and 3 for later months.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
August	....	....	7 5-64d.
August-September	5 36-64d.	5 38-64d.	7 5-64
September-October	5 35-64	5 37-64	6 58-64
October-November	5 34-64	5 36-64	6 43-64
November-December	5 32-64	5 36-64	6 38-64
December-January	5 33-64	5 36-64	6 38-64
January-February	5 36-64	5 38-64	....

The sales for the week at Liverpool were 46,000 bales (of which 33,000 were American), against 41,500 (of which 29,000 were American) last year. The sales for export were 5,800 bales, against 2,900 bales last year. The sales for speculation were 2,000 bales, against 2,700 bales last year. The amount forwarded was 4,900 bales, against 7,500 bales last year. The stock in port is 891,000 bales (of which 612,000 are American), against 632,000 bales (of which 316,000 were American) last year. The total imports for the week were 29,000 bales (of which 17,000 were American), against 30,000 bales (of which 11,000 were American) last year, and the amount afloat 126,000 bales (of which 20,000 are American), against 183,000 bales (of which 18,000 were American) last year.

The Manchester market closed dull and tending down.

The Havre market has declined a fraction.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is quiet and sales are light. Middling uplands are worth 10⅝c., and middling gulfs 10⅞@11c. The stock on hand is light.

From Philadelphia, Pa.: The situation has not changed. There is little speculative trading, and spinners are buying only to meet actual wants. Prices are the same as a week ago for spot sales.

From Cincinnati, Ohio: Offerings of cotton have been light and prices are well sustained. Receipts to date are 13,000 bales less than last year.

From Louisville, Ky.: Cotton sales are large this week at full quotations.

From St. Louis, Mo.: Cotton is dull, but values are a little stronger. The stock on hand is light.

From Baltimore, Md.: Some business is doing in the better grades of cotton, and the market is easy.

From Wilmington, N. C.: Cotton firm. First bale received Wednesday.

From Savannah, Ga.: Cotton market is quiet. The stock on hand and on shipboard is 2,887 bales.

From New Orleans, La.: Since Thursday of last week the cotton movement has been small. Spots are off 1/16c. on good middling and middling fair. Futures declined 6 to 8 points on Septembers to Januarys inclusive. Better India crop reports, northern goods movements, beneficial rains in some sections, and a large visible supply are given as the causes of the decline. The average crop estimate is 6,500,000 bales; some estimates are as low as 6,400,000 bales.

From Galveston, Tex.: New cotton is arriving quite briskly for the season.

WOOL.

The situation has not materially changed during the past week. The seaboard markets are generally represented as quieter, but a very fair amount of wool is changing hands. Long staple wools, both washed and unwashed, are in brisk demand and scarce, as supplies are taken as fast as graded. Prices on this description hold firm, but show no improvement, although spinners are crowded with orders, and on some kinds of yarn are getting an advance on July quotations. Territorial wools are selling fairly, but at comparatively low prices. The general market is not strong, although the rates current at primary points are relatively above those now ruling on the seaboard, and owners of wool in eastern markets are not, as a general thing, inclined to force business. At the same time, there are occasional indications of weakness, and large buyers secure concessions on some grades or the advantage of a better selection at old prices. The condition of the goods trade is improving, but production and stocks still exceed demand in some lines, and the position as a whole is not satisfactory. Manufacturers are therefore inclined to caution, and will not anticipate requirements except under some special inducement or for lines of production that, like worsteds, are assured of a ready market.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There has been a good trade in worsted wools, and territorial wools have been marketed more freely at comparatively low prices, but other descriptions have ruled quiet. The week's business aggregates 1,300,000 pounds. Prices unchanged, but, if anything, in buyer's favor.

From Cincinnati, Ohio: Receipts of wool from the country are moderate. The milling demand is confined to graded stock. Prices are unchanged and buyers plenty.

From San Francisco, Cal.: Wool is moving off on eastern account, but heavy stocks keep prices low.

From Boston, Mass.: The wool market is steady with a fair demand. The sales of the week have been 2,451,800 pounds of all kinds. Prices are unchanged. Ohio and Pennsylvania have been selling at 36c. for X, and 37@39c. for XX and XX and above. Michigan X fleeces have been in moderate demand and sales at 33@35c., as to quality and condition, but 34c. is a fair quotation for average lots. Combing and delaine fleeces are firm and in demand. Sales of Michigan and Ohio fine delaine at 38@40c., and fine and No. 1 combing at 42@44c. per pound. Unwashed wools continue in demand, and sales of Texas, territory and western to a fair extent at prices indicating no change. The principal sales have been in the range of 23@28c. per pound for fine and medium grades. California wool continues quiet and prices unchanged. Pulled wools have been in fair demand and sales of choice eastern and Maine supers at 40@43c., and common and good supers at 20@38c. per pound. The movement in foreign wool has been of no importance. Carpet wools continue dull.

IRON.

The market at New York for American pig iron shows no appreciable change from last week. Dealers do not look for the advance in the fall which they expected about six weeks ago. The business doing is of a very conservative nature. It was thought that by the middle of August an advance in the face of the autumn demand would be fully warranted, but it is now admitted that any such disposition of prices would be met by no sales. Buyers continue to purchase in 20 or 50 ton lots, and prices last named are still quoted, viz., $22 @ $23 for No. 1 X., the latter representing special brands, and $19.50 @ $20 for No. 2 X., the latter on a few extra brands only. The arrivals of Scotch pig iron during the week have been the largest within a like period for some time—3,000 tons, mostly, if not all sold prior to arrival. The sales to arrive have not improved over previous weeks. The Scotch brands continue firm at previous quotations, viz., from $21 for Eglinton to $23.50 for Coltness. The demand is moderate, but fairly steady. Bar iron has gained in strength during the week, owing mainly to the better position in which the Pittsburgh mills find themselves through a revival in the demand reported from that city. Cincinnati and Chicago also report a marked gain in the request and a visible improvement in the iron market in consequence. Cleveland and St. Louis do not mention this change, and Philadelphia has not experienced the gain reported from Pittsburgh. Details on that point will be found in the special dispatches printed below. Steel rails have experienced no change worthy of note. The mills are filled with orders, and early deliveries will not be contracted for at the inside quotations. Other features of the market remain about as last reported.

THE BRITISH IRON TRADE.

[By Cable to BRADSTREET'S.]

From London: Cleveland pig is offered to the end of the year at 38s. 9d. The markets are steady but not much is doing.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The market is very quiet as a rule. Pig is steady, but consumption is not up to average. Structural iron and plates are under good inquiry and negotiations are progressing for heavy requirements. Steel rails are firm for small lots for early delivery, but large transactions are expected to be closed in a few days for winter delivery at lower prices. Nails are quiet but firm.

From Pittsburgh, Pa.: In pig iron there is a better felling and more inquiry, and consumers are rather more disposed to buy. Gray forge, neutral, is quoted at $18 and $18.50, and foundry at $19 to $20. The market for merchant bar is reported in a much improved condition. There is a large increase in orders, which are promptly filled. Many mills are refusing to sell at present prices beyond October 1, though no radical change in prices is expected. The nail factories are again in operation, and as a rule are shipping nails as fast as produced, and it is believed trade will now be brisk until the winter dullness comes on. Prices are well maintained, and no reason is known why they should go lower unless there is a further decline in pig iron, which is not likely.

From Cleveland, Ohio: There is nothing new to note in iron circles. The improved tone of the pig iron market noted last week still exists, but the actual demand as yet shows little if any real improvement.

From Cincinnati, Ohio: There is a fair demand for pig iron and the market is firmer. Makers show no disposition to increase product above consumption. Bar and sheet sell well and prices are firmer.

From Chicago, Ill.: There is a good order trade in hardware. Iron and nails are unchanged. Orders are chiefly for small lots. Pig iron is more active. Stocks reduced. Some lots have been withdrawn from sale, the owners anticipating higher prices in the near future.

From St. Louis, Mo.: Manufactured iron is in increased sale at unchanged rates, which are not strong, although advances are expected by some. Pig iron rather quieter than heretofore.

From Louisville, Ky.: Iron and hardware are jobbing actively.

From Detroit, Mich.: In iron but little change is noted. The feeling is somewhat better and the outlook brighter, but prices are unchanged.

COAL.

The anthracite coal trade, while not in any sense active, is still getting rid of a great deal of coal. The production each week is very heavy and still stocks do not accumulate. Yet the comparatively moderate pace at which the product goes into consumption may be noted by the slack movement reported in western lake shipments from Buffalo, by which route is being consigned the bulk of the new distribution westward. On this point dispatches printed below give further details. The advance in circular rates made last week by the Pennsylvania Company has not thus far been backed by like advances by the other parties to the Anthracite Coal Association; but the belief is current that the 1st of September will witness a general advance of about twenty-five cents per ton all along the line. The existing rates do not bring in more than the July circular prices, net, which had been steadily shaded ever since they were made. Buffalo advices do not report much improvement as yet over July rates. The announced September advance is expected to raise the level to the July standard. The bituminous trade is dull. There is some improvement in manufacturing sizes, and a good deal of this variety is going into consumption. It is reported (in advance of the official record) that the output of anthracite last week amounted to 730,000 tons, or about 50,000 in excess of the previous week. This brings the year's aggregate up to 17,605,000 tons, a gain of nearly 1,200,000 tons as against a like period in 1882.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: The coal market is not fully opened, and stocks on hand are light.

From Buffalo, N. Y.: The anthracite coal trade presents no new features, the movement being only a moderate one. Stocks are light, while shipments have fallen off to nearly last year's tonnage, being by lake to date 637,000 tons, as compared with 634,000 tons in a like portion of 1882, and 443,000 in 1881. Prices are subject to some concessions from the August circular, the full June rates being about the figures obtained. Freights are weak, on a basis of 70c. to Chicago.

PETROLEUM.

The speculative petroleum market has been without special interest during the past week. The statement made late last week by the Philadelphia *Press* that the Standard Oil Company had absorbed in some way the Tidewater Pipe Line Company, its only rival in storing and transporting oil, is still regarded as true by the trade at New York, as was noted in BRADSTREET'S report made on Saturday the 18th inst. "The unexpected" was the natural result, and prices of refined were marked down ⅜c. per gallon, while the market was steady and the demand fair. The motive of the Standard people in doing this is not apparent, unless they desired to discourage a belief in the statement respecting the United and Tidewater Pipe Line companies. The pipe-line certificate market has sawed up and down during the week within a narrow range, and outside of a few long and short combinations of a scalping order no trading has been done. It is a noteworthy fact that ever since the retirement of Mr. Keene and his friends to Wall street, after his successful tilt with the Standard Oil Company on the Petroleum Exchange, speculative interest in petroleum has been at a low ebb. Prices have moved sluggishly, being influenced apparently rather by manipulation or little buying spurts rather than by the statistical position of the product or by other considerations of importance.

On Friday the same dullness which was noted on the petroleum exchanges during the greater portion of the week again prevailed. Outside orders had fallen away to a marked extent, and the bids were in the main from brokers themselves. In the language of Wall street the petroleum exchanges have been suffering from a severe attack of room-trading. Prices went off a little yesterday. They opened at $1.08½ bid, and steadily declined to $1.07¾ at 12:30 P. M., opening at 1:30 again at $1.07⅞, where they were stubbornly maintained for half an hour. Exporters were out of the market and all lines very dull indeed. At the close the bid was $1.07½, against $1.10 at the close on Friday of last week, a decrease of 2½c. for the week. The market closed weak.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, Aug. 18	1.10⅝	1.11	1.09⅝	1.10
Monday, Aug. 20	1.09½	1.10¼	1.09½	1.09¾
Tuesday, Aug. 21	1.09¾	1.09⅞	1.08¼	1.08¼
Wednesday, Aug. 22	1.07⅞	1.09¼	1.07½	1.07½
Thursday, Aug. 23	1.09⅛	1.09¼	1.08½	1.08½
Friday, Aug. 24	1.08½	1.08½	1.07⅞	1.07½

Refined oil has been reduced, as stated above, ⅜c. on various grades during the week. The change was unexpected as the market was steady.

Exporters are not at present in the market to any extent. The request for crude in barrels has also fallen away.

	July 27.	*Aug. 3.*	*Aug. 10.*	*Aug. 17.*	*Aug. 24.*
Certif's, crude	1.08¾	1.08	1.08⅞	1.10	1.07½
Refined, 110°	7½	7¼	7⅜	7⅞	7½
Refined, 70°	7⅜	7⅜	7½	8	7⅜
Crude, in bbls	6½@7½	6⅝@7⅜	6¼@7¾	6⅞@7⅞	6⅞@7⅞
Case, plain	9⅛	9	9	9⅜	9
Naphtha	5	5	5	5¼	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending August 18, was 13,630,260 gallons, against 12,637,109 in the preceding week. The total export from the United States since January 1 was 396,752,989 gallons, against 412,186,593 gallons in the corresponding portion of 1882, a decline in the current year of 15,433,604 gallons. The total exported from New York city during the week ended August 18 was 12,825,978, and during the year, to that date, 326,801,108, against 326,512,581 gallons in a like portion of 1882. The decrease in shipments on the year from New York alone, as compared with 1882, was but 288,527 gallons (crude equivalent), or less than 2 per cent. of the total decline recorded thus far in the year.

A telegram from Titusville, Pa., states that the United Pipe Line Company has sent circulars to the various petroleum exchanges of the country proposing that the exchanges each appoint gaugers of their own to accompany the United Pipe Line gaugers on their annual inspection in order to verify the figures given to the oil trade by the company and to inspect it books. The net stocks held by the United Pipe Lines, according to the statement made on the 10th, were 33,995,765 barrels. The gauging of all oil tanks will be accomplished on September 1, and it is proposed that oil exchanges appoint, on their own behalf, ninety-one gaugers, sixteen inspectors, and a number of clerks to accompany the United Pipe Line officials.

OCEAN FREIGHTS.

The past week has been a slow one in the ocean freights market. Saturday last witnessed a moderate demand for room for provisions and produce at weak rates, and some business was transacted. Petroleum charters were in request, but little or no grain room was sought. Grain rates declined early in the present week and the business done was not large in any line. On vessels to load for New Zealand, for China and Japan rates were stronger and more business was done. Towards the close of the week more grain room was demanded in steamers for the United Kingdom. Future engagements for north Russian ports and for Great Britain for petroleum charters were also firm and shippers urgent. But few exports of petroleum or grain were made later in the week. Baltimore has been doing better, relatively speaking, and Philadelphia has also improved.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The regular Liverpool line steamers have their grain room engaged to September 1. Sail tonnage for grain is scarce, but there are several "tramp" steamers in port seeking cargoes. The stiff rates asked retards business. Oil vessels are not plenty, and demand is fair at firm rates.

From San Francisco, Cal.: Ocean freights are advancing.

From Baltimore, Md.: Numerous wheat charters, both steam and sail, are reported in the freights market, and rates are firm.

From Wilmington, N. C.: Ocean freights, foreign spot tonnage scarce; coastwise quiet.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There has been a fair jobbing movement, and the market is in a satisfactory condition so far as the volume of sales are concerned. Manufacturers are receiving some duplicate orders for heavy goods and the shops are still busy, but large contracts are nearly all closed, and after this month we shall begin to hear of the issuing of spring samples. Buyers continue to urge speedy shipments, and goods are being turned out from factories in large quantities.

From Chicago, Ill.: Boots and shoes are a little more active.

From Omaha, Neb.: Boots and shoes are being shipped into the country, and the trade is brisk.

From Savannah, Ga.: Boots and shoes have been in heavy demand, and many cases are being shipped to all parts of the country.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Leather is steady and in fair consumption.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Whisky is awaiting the action of the export association. Its status at present is unchanged.

From Peoria, Ill.: It is likely that the distillers' pool, which expires September 1, will be renewed with capacity increased 25 per cent.

From Louisville, Ky.: Whiskies are dull and unchanged. A movement is on foot to organize a whisky exchange.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: There is no unusual stir in tobacco. Offerings are a little in excess of last year and prices realized are considerably less, but apparently satisfactory to the producer.

From Louisville, Ky.: Leaf tobacco receipts are light and the market is firm and active all through.

From St. Louis, Mo.: Tobacco shows no improvement and offerings are trifling.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Naval stores opened and closed quiet for all grades. Spirits on hand to-day are 10,901 barrels and 70,241 barrels of rosins.

From Wilmington, N. C.: Spirits of turpentine advancing. Rosins easing. Crude steady.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Minneapolis, Minn.: No change in the lumber market. Trade is quiet. The lumber mills are all running, but the logs are coming down slowly and under serious difficulties.

From Wilmington, N. C.: Timber and lumber quiet. Shingles firm.

THE HEMP MARKET.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Kentucky hemp is well sought after, though prices are unchanged. Stocks are fair, principally dressed.

SPECIAL CALIFORNIA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: Exchange is 10c. premium, and advices from China and Japan by the last steamer present no new features. Tea is rather firmer.

SPECIAL NEW ORLEANS TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Though the accounts from the country, in regard to drouth, report a probability of a smaller yield of cottonseed, holders have reduced prices of cottonseed products by forcing on to the market the stock which is said to be large, especially of oil. Crude is 28@30c, refined 39@41c. Coffee is strong; fair is 9¼c. Sugar is quiet; clarified have slightly improved. Molasses is nominal. Stocks of both have been considerably reduced. Increasing receipts of rice and the moderate demand are easing the market. Fair to prime is 5¼@5¾c.

THE CHICAGO COMMERCIAL SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, August 22.—There is a very marked improvement in the legitimate trade of the city, and like advices come from other points. Bankers report a decided increase in the demand for bank favors, the requests from merchants and grain receivers being quite liberal, and rates have hardened with the enlarged demand; paper that would have commanded money a week since at 4@4½ per cent. now pays 5 on call, and very few time loans are made below 6 per cent. The flow of money to the grain districts has already assumed liberal proportions and promises to materially expand within the next fortnight. Exchange on New York has declined to a point where the discount renders it optionary with bankers as to whether they sell their bills or order funds by express. The jobbing trade in dry goods is steadily improving, orders being on the increase, and there are more buyers in person. Collections are also better, and leading houses say they have no cause for complaint as regards payments. Boots and shoes are rather more active. Leather is quiet, with sales strictly confined to the immediate wants of manufacturers. The consumption, however, is very fair and prices steady. Building hardware is slightly more active, and sales of miscellaneous goods in the same line are meeting the anticipations of jobbers. Iron and nails are without change. Country stocks are small, but retailers are conservative and restrict their orders to current wants. Pig iron maintains its previous quiet position. The blowing out of the large furnaces at Bayview, near Milwaukee, yesterday will further materially curtail the production in the northwest. The consumption is fair, but workers buy slow and the outlook for anything more than a fair jobbing trade is by no means flattering. Coal dealers complain that buyers are slow in giving orders for future supplies, but prices are without change. The lumber trade is quiet and sales not up to anticipations of dealers. This is largely attributable to the construction of a number of railroads into the pine regions, which gives the mills more direct and cheaper communication with the chief consuming sections of the west. Dealers, however, are hopeful of a largely increased trade as the season advances. The arrivals of wool are quite liberal and the demand slow. Hides are dull, and dealers predict lower prices. The grain markets are sluggish. Wheat is arriving more freely, yet the receipts are scarcely up to the expectations; but as the harvest of the spring season will soon be over there are ample reasons for predicting an early and large increase in receipts. The shipments show a heavier volume than at any previous time the current year; but unfortunately for the good of the trade the bulk of the stock going out consists of forced shipments, *i. e.*, they are made by those who last spring attempted to bull the market and corner the shorts, and in so doing got caught with a big load, which they have ever since been holding in anticipation of a buying demand from customers, which has failed to come, and as a last resort they are sending it out, resolved, no doubt to try some other market. There are some orders here for new spring and red winter, but they are chiefly limited at prices that prevent their execution. Corn shows increased arrivals, the shipping demand for No. 2 is decreasing, and the indications point to accumulating stocks. The crop outlook is also good, if we except that it is a little behind average years in maturity, and this latter fact renders many of the shorts nervous, and the buying by such parties to fill contracts stiffens the market. The provisions trade has received a stimulant from the small receipts of hogs, which induced free covering of contracts by shorts and caused a marked advance in pork, lard and meats, but the appreciation checked the shipping demand from consuming points, and when the urgent shorts were filled, the market became weak, and prices showed a declining tendency at the close of to-day's market. The following shows the stocks of

GRAIN IN CHICAGO ON DATES NAMED.

	Aug. 18, 1883.	*Aug. 19, 1882.*	*Aug. 20, 1881.*	*Aug. 20, 1880.*
Wheat, bushels	5,237,000	486,000	3,885,000	1,760,000
Corn, bushels	1,598 000	1,256,000	4,074,000	3,184,000
Oats, bushels	238,000	194,000	1,334,000	98,000
Rye, bushels	328,000	113,000	150,000	103,000
Barley, bushels	24,000	4,000	27,000	63,000
Total bushels	7,336,000	2,053,000	9,486,000	5,218,000

The large stocks of wheat and oats here in 1881 were due to an August corner in those articles, which prevented shipments.

ADDITIONAL MEMORANDA FROM THE AUGUST COTTON REPORT.

NORTH CAROLINA.

From Randolph county: We have had no rain for the past six weeks, and the crop is bound to be light.

From Robeson county: A six weeks' drouth has injured the crop greatly, and the outlook now does not point to more than two-thirds of a crop.

From Wake county: Cotton is suffering from drouth at the present time, and should we not get rain in a very few days the crop will be cut off considerably.

From Wayne county: The crop is shedding badly for want of rain.

SOUTH CAROLINA.

From Marlborough county: The crop will not be over two-thirds of last year's.

From Oconee county: I do not think that over half a crop can be made in this county this year, owing to dry weather.

From Pickens county: Cotton is cut off 50 per cent. by drouth. Have had no rain to speak of in six weeks.

GEORGIA.

From Jefferson county: The present outlook points to about 60 per cent. of an average crop.

From Meriwether county: The crop will be from 25 to 50 per cent. short of last year.

From Newton county: Owing to drouth not over half a crop will be made.

From Oconee county: It will be impossible in this section to make more than half a crop, owing to dry weather.

From Troup county: We think the crop will be short at least 25 per cent. this year.

ALABAMA.

From Perry county: We think that the crop will be short 25 per cent., owing to dry weather and worms.

From Pickens county: The prospects look worse than for ten years, owing to protracted drouth.

From Russell county: I do not think over two-thirds of last year's crop will be made, owing to injury from dry weather.

From Sumter county: The outlook is gloomy, from lack of rain, of which there seems to be no prospect.

From Tuscaloosa county: Ten weeks of drouth have cut cotton off at least 50 per cent.

MISSISSIPPI.

From Winston county: Our cotton crop has been cut short from 50 to 75 per cent. by drouth.

From Yalobusha county: Owing to drouth cotton on the hills will be very short, but on bottoms as good as last year.

From Yazoo county: Prospects look bad, owing to continued drouth.

TEXAS.

From Walker county: The drouth has played fearful havoc with cotton since last report.

From Williamson county: In my estimation cotton is cut short at least one-half by dry weather, shedding and worms.

From Wise county: The seasons for cotton have never been better in this county. It suffered a little from the 20th ult. to the 1st inst. for want of rain, but we have had a good rain or two since, and the prospect at present for a heavy yield is very good.

TRADE EMBARRASSMENTS.

There were 179 failures in the United States reported to BRADSTREET'S during the past week, 5 more than the preceding week, 47 more than the corresponding week of 1882, and 100 more than the same week of 1881. Compared with the previous week the middle states had 36, a decrease of 6; New England states 30, an increase of 1; southern states 26, an increase of 7; western states 58, an increase of 8; Pacific states and territories 29, a decrease of 5; Canada and the Provinces 23, an increase of 3. The important failures were Schott & Knight, stock brokers, New York and Philadelphia; The Norwood (N. Y.) Lumber Company; The Boston Sewing Machine and Cabinet Company and J. F. Paul & Co., lumber, Boston; Silas Merchant, manufacturer of ice machines, Cleveland, Ohio; Charles H. Bishop & Co., commission flour, grain, etc., Cincinnati. In the principal trades they were as follows: Grocers 35; general trades 20; liquors 12; manufacturers 12; hotels and restaurants 11; clothing 10; dry goods 9; hardware 7; tobacco and cigars 5; shoes 4; jewelry 4; lumber 4; fancy goods 4; millinery 3; coal 3; furniture 3; leather 2; harness 2; butchers 2; gents' furnishing goods 2; drugs 2; produce and provisions 2; hats 1; stockbroker 1; bank 1.

ARIZONA.

TUSCON.—R. Velez & Co., dry goods, have assigned.

CALIFORNIA.

BRIDGEPORT.—W H. Stanton, saloon, is reported to have failed.

MODESTO.—H. L. Bradford, publisher, has been attached for purchase money.

NICOLAUS.—J. Nagler, saloon, has assigned.

SAN FRANCISCO.—Robert C. Brooks, distillery, has been sold out by the sheriff.

SAN FRANCISCO.—M. F. Campbell, mining, has filed a petition in insolvency.

SAN FRANCISCO.—Joseph Durham, grocer, has filed a petition in insolvency.

SAN FRANCISCO.—L. Faure, restaurant, has been closed by the sheriff.

SAN FRANCISCO.—Griffith & Flannigan, saloon, are advertised to be sold out by the sheriff.

SAN FRANCISCO.—J. Haworth, wood and coal, has been sold out by the sheriff.

SAN FRANCISCO.—H. McCausland, restaurant, is in insolvency.

SAN FRANCISCO.—P. McEtte, saloon, has assigned.

SAN FRANCISCO.—Henry Mahlmann, saloon, has been closed by the sheriff.

SAN FRANCISCO.—H. Rubin, cigars, has been attached.

SAN FRANCISCO.—William Wissing, butcher, has been closed by the sheriff.

SAN JOSE.—James L. Davies, grocer, has filed a petition in insolvency.

TULARE.—W. C. Kirkman, general store, has assigned.

COLORADO.

CRESTED BUTTE.—Abraham Heiligers, dry goods and clothing, has been attached for $3,000. He has a branch at Irwin.

DENVER.—The Grand Hotel, J. Meagher, manager, has been closed out under a chattel mortgage.

DENVER.—Morris & O'Connor, hats, have assigned. Liabilities $4,000; assets $7,000.

WHITE PINE.—J. H. Ballard & Co., grocers, have assigned to H. C. Crawford, and it is thought will probably pay 25 cents.

CONNECTICUT.

HARTFORD.—Application has been made for the appointment of a trustee for Thomas King, cigar manufacturer.

NEW HARTFORD.—Michael Buckley, restaurant, has been attached.

NEW HAVEN.—Application has been made for the appointment of a trustee for John F. Shea, grocer.

STAMFORD.—James H. Knapp, ice, has assigned.

DAKOTA.

FARGO.—J. B. Chapin, hotel, has assigned. Liabilities about $60,000. His assets are chiefly real estate, heavily encumbered.

FARGO.—C. F. Lacy, jeweler, has been closed by the sheriff.

LARIMORE.—Paulson & Hanson, general store, have been attached.

LISBON.—Moore & Harris, general store, have assigned.

DISTRICT OF COLUMBIA.

GEORGETOWN.—E. T. Gibbons, grocer, has failed and closed up.

FLORIDA.

LAKE CITY.—Thompson & Hart, saw mill, have assigned. Liabilities $20,000; nominal assets $30,000.

GEORGIA.

MOUNT PLEASANT.—J. B. Robinson, naval stores, has failed and closed out.

SAVANNAH.—S. G. Haines & Brother, grain and flour, are reported financially embarrassed.

ILLINOIS.

AURORA.—The stock of Mrs. G. B. Putnam, fancy goods, has been taken on a chattel mortgage and bill of sale.

CANTON.—C. W. Kent & Co., dry goods, have been closed by creditors.

CHICAGO.—Clark & Edwards, printers, confessed judgment for $4,588, and have been closed by the sheriff.

CHICAGO.—Philip Drosclowitz, tailors' trimmings, has failed.

MOUNT STERLING.—W. R. Graves, grocer, has assigned.

ROCK ISLAND.—Cramer & Yerbury, plumbers, have been closed out on judgment.

INDIANA.

EVANSVILLE.—John Wymond, wall paper, has been sold out by the sheriff for $1,775.

INDIANAPOLIS.—Receiver Landers, of the Indiana Banking Company, has been removed, and William Wallace appointed in his place.

IOWA.

CLINTON.—Carroll & Belknap, grocers, have been closed on a chattel mortgage.

GRISWOLD.—Threlkled & Yentsey, clothing, have mortgaged all their property.

GUTHRIE CENTER.—Houghton, Everett & Houghton, lumber, etc., owe about $16,000. It is thought the assets will be sufficient to pay in full as soon as they can be made available.

SIBLEY.—C. M. Woodhouse, harness, has been closed by the sheriff.

STANTON.—A. Nyquest, grocer, has failed.

WATERLOO.—W. H. Strasburger, clothing, has been closed by the sheriff.

WATERLOO.—Teagarden & Hoffman, creamery, are reported to have failed, the result of depression in the butter market. Liabilities reported at $6,000; preferred claims $4,500.

KANSAS.

BURLINGAME.—Thomas Fenlon, hardware, has failed and sold out.

CAWKER CITY.—Mrs. F. M. Finkbine, millinery, has been attached.

FRANKLIN.—Elwell & Lawrence, grocers, have been attached and assigned.

WYANDOTTE.—F. C. Achtenacht, grocer, has failed.

KENTUCKY.

BUTLER.—The Twilight Star Co-operative Company has assigned.

COVINGTON.—Abbott, Moorehead & Co., carriages, have assigned to William Goebel.

LOUISVILLE.—Martin McGrath, shoe manufacturer, has been attached for $964.

LOUISVILLE.—The Standard Grocery Company has assigned to Henry Stuckey.

MAYSVILLE.—L. A. Pearce, millinery, has assigned.

LOUISIANA.

NEW ORLEANS.—J. Pelletier, cigars, is advertised to be sold out by the sheriff.

MAINE.

HOULTON.—Horace Chaloner, market, has failed. Liabilities estimated at $1,500; assets $400.

MARYLAND.

BALTIMORE.—Isaac Brenner, grocer, is reported to have assigned to Allen E. Forrester.

BALTIMORE.—Charles H. Gogel, icecream, has filed a petition in insolvency.

BALTIMORE.—Christian W. Keidel, stoves, has filed a petition in insolvency.

CAMBRIDGE.—L. W. Bothum, stoves, has assigned to William H. Hopkins.

CAMBRIDGE.—E. J. Parks, general store, has failed.

MASSACHUSETTS.

BOSTON.—W. E. Bicknell & Co., grocers, offer 25 cents, which it is thought will be accepted.

BOSTON.—The Boston Sewing Machine & Cabinet Company has failed. It was incorporated in New York, July 16, 1880, with a capital stock of $100,000, which was subsequently increased to $500,000. It is said that $150,000 cash has been invested in the business. A number of wealthy men were stockholders. J. P. Paul, lumber dealer, was the leading spirit in the business.

BOSTON.—At a meeting of the creditors of C. W. Clements, wholesale boots and shoes, on the 22d inst., he proposed to pay the merchandise creditors in full to the amount of $12,000, to pay the holders of indorsed notes in cash and by installments yearly to the amount of $538,135, either 50 per cent. within four years, 45 per cent. within three years, 37½ per cent. within two years, 33⅓ per cent. within one year, or 25 per cent. in cash. A creditor moved to make a settlement for 55 per cent., to be paid in four years, but it was voted down. It was voted to leave the acceptance of Mr. Clements' various propositions to the creditors' option, no preference being allowed.

BOSTON.—George W. Dean, fruits and provisions, has failed and is in insolvency. Liabilities $21,947; assets $4,251.

BOSTON.—The German American Company has been sold out by the sheriff.

BOSTON.—Hersey, Whittier & Wyman, hide and leather commission and tanners, at a meeting of creditors on the 17th inst. showed liabilities as follows: Firm notes $225,267; firm notes indorsed in failed firms $259,456; open accounts $9,023; total, $493,747. Indorsements in an average list of business notes $140,827; assets, hides $6,576; leather in store and in process of manufacture $220,509; accounts and notes receivable $74,418; cash $5,827; total $307,322. A committee was appointed to examine into the accounts and advise with the assignee.

BOSTON.—W. E. Parker & Co., gents' furnishing goods, has failed. Liabilities about $15,000.

BOSTON.—J. F. Paul, trading as J. F. Paul & Co., lumber, failed on the 20th inst. He failed in 1876, compromising at 25 cents. He has been cramped financially for a long time past, on account of carrying on the sewing machine business, being largely interested in the Boston Sewing Machine & Cabinet Company. His liabilities are reported at $70,000.

BOSTON.—Proctor A. Roberts, hotel, has failed and is in insolvency. Liabilities $2,606; no assets.

BOSTON.—James Stevenson, commission, has been petitioned into insolvency by the Bank of New Brunswick.

BOSTON.—The Whipple Music Company has assigned.

BOSTON.—At a meeting of the creditors of Wright, Worster & Co., wool, the statement showed liabilities $671,000, of which $462,000 is direct, and $209,000 contingent (in the shape of endorsements on trade paper, discounted at bank); of the direct liabilities $80,000 is owed Mr. Worster's father; $120,000 owed other parties also bears the father's indorsement and will be paid in full. The assets nominally aggregate $168,000, $45,000 being good accounts, $59,000 merchandise, $3,000 stock in a manufacturing company, $1,000 cash. These assets are exclusive of $76,000 invested in a cattle ranch on the Pacific coast and $57,000 invested in mining stocks. Notes for nearly $76,000 have been issued on account of the ranch; these are included in the $462,000. It was stated at the meeting that beside the $57,000 mentioned above, $150,000 had been lost in speculation in pork and provisions. The firm has a claim of $200,000 against Mr. Worster, and this is supposed to represent disastrous speculations with the firm's money. Affairs have been placed in the hands of an investigating committee.

DANVERS.—Thomas E. Dougherty, shoe manufacturer, has failed.

FITCHBURG.—W. H. Baker, furniture, has been attached.

GLOUCESTER.—Benjamin P. Caswell, confectioner, has assigned. Liabilities about $8,000; assets $700.

HOLLISTON.—Richard Feehely, manufacturer of boots and shoes, has failed.

LYNN.—C. B. Frothingham, tailor, has filed a petition in insolvency

LYNN.—Samuel Gale, Jr., shoe manufacturer, is in insolvency.

LYNN.—George N. Nichols, laundry, is reported to have failed. Liabilities $2,500.

SHELBURNE FALLS.—The Cushman Cigar Company has been attached.

SHELBURNE FALLS.—E. P. Hadley, shoes, has settled with his creditors at 50 cents.

SPRINGFIELD.—H. W. Payne, harness, offers 10 cents. Liabilities $12,000; assets, stock, $400 mortgage and book accounts.

STONEHAM.—Michael H. Fitzgerald, currier, has failed, and it is thought will pay little. His property is mortgaged for $11,000.

WINTHROP.—John McNaught, provisions, has filed a petition in insolvency. Liabilities about $2,200, of which $500 is secured by mortgages on store, teams and fixtures. There are no other assets.

WORCESTER.—Edward I. Perry, drugs, is in insolvency. Liabilities $14,000; nominal assets $2,000; actual assets about $1,000.

MICHIGAN.

EAST SAGINAW.—H. Geiger & Co., notions, have failed.

FENTON.—J. P. Colwell, threshers, has been attached.

GRAND RAPIDS.—Burger & Prahl, grocers, sold out to a brother of Burger's, and have both left town. Liabilities $700.

MECOSTA.—L. D. Cooley, dry goods and groceries, is reported offering 30 cents.

MUSKEGON.—A. M. King, grocer, had his stock taken on a chattel mortgage. Liabilities $1,700; assets $300.

REED CITY.—E. L. Mort, tanner, is reported to have left town.

TAWAS CITY.—N. & W. Ramage, grocers, have failed.

MINNESOTA.

AUSTIN.—Bullis & Beatty, restaurant and grocery, have been closed by the sheriff.

DULUTH.—Fish Brothers & Hall, lumber, have assigned.

ST. PAUL.—Clarence Jones, jeweler, has assigned.

MISSISSIPPI.

MOSS POINT.—H. N. Cudabac, general store, has been closed on attachment for $1,932. The claim is disputed.

MISSOURI.

KANSAS CITY.—D. Batavia, clothing, etc., has been attached.

LAMAR.—M. J. Gregory, jeweler, has assigned.

ST. LOUIS.—John C. Mackin, groceries and liquors, has failed.

ST. LOUIS.—P. Scholz, picture frames, has assigned to William F. Wernse. Assets $3,000.

NEBRASKA.

FREMONT.—E. A. Lawrence & Co., grocers, have been closed by the sheriff. Liabilities $5,000; assets about $4,700.

OMAHA.—P. H. McGuire, saloon, has mortgaged his place for $8,000, and the same property has also been attached for $1,000 by creditors.

NEVADA.

CANDALARIA.—Netherton Brothers, general store, have been attached.

NEW JERSEY.

ATLANTIC CITY.—Imlay & Stewart, Arlington Hotel, have been closed by the sheriff by H. Imlay, the senior partner. Mr. Stewart is reported to have left town.

NEWARK.—G. W. Skinner, grocer, has failed.

WORTENDYKE.—John Reynold has been appointed receiver of the Wortendyke Manufacturing Company, silks and cotton goods. C. A. Wortendyke, the president, was arrested on the 17th inst. in a civil suit by John C. Phillips & Co., creditors for $16,000, for obtaining goods under alleged false pretenses, but was released on $18,000 bail. A meeting of creditors was held on that day, at which Mr. Wortendyke made a proposition for a settlement of his merchandise debts in three years' time, in monthly payments, beginning six months hence; to give a new mortgage for $200,000 to secure bonds to run twenty years, and take up the previous mortgage and floating indebtedness. It was stated that the Metropolitan National Bank of New York would take the whole amount of the bonds. The statement made by Mr. Wortendyke was unsatisfactory and the proposition was declined. Messrs. Phillips immediately got out a warrant for his arrest. Ammidown & Smith, who hold a mortgage for $55,000, it is said, propose to foreclose it.

NEW MEXICO.

ALBUQUERQUE.—B. Ruppe, drugs, is reported to have left town, and the store is in the hands of the sheriff.

SANTA FE.—Edward McElroy, saloon, has been closed on a chattel mortgage. He is reported to have left town.

NEW YORK.

AUBURN.—Michael Madden, dry goods, has assigned to F. M. Smith. Liabilities about $15,000; preferences $6,500.

BUFFALO.—R. H. Lawson, hardware, has assigned to Marcus L. Schwartz.

BUFFALO.—William Wright, millinery, has assigned to George Headway.

COBLESKILL.—H. A. Moeller, grocer, has been closed by the sheriff in favor of his mother.

COLLEGE POINT.—Charles J. Freygang, saloon, has been closed by the sheriff.

DE KALB JUNCTION.—George E. Gibbons, general store, has assigned to E. M. Craig, preferring J. & G. N. Crouse $1,000. Liabilities $12,000; actual assets about $4,000.

LYONS.—R. A. Hubbard, dry goods, has assigned, giving preferences for $14,159, the largest being as follows: Lyons National Bank $7,733; Mrs. George H. Thomas $3,000; Nathan Cobb $1,605.

NEW YORK CITY.—Cecilia Bowski, corsets, assigned on the 18th inst. to Ernest G. Schweig, preferring her husband, Otto Bowski, for $2,000.

NEW YORK CITY.—William Dunbar, merchant tailor, assigned on the 23d inst. to Charles F. Richards.

NEW YORK CITY.—Henry Feibel, grocers' and bakers, supplies, assigned on the 21st inst. to J. H. Hildreth, giving preferences to Henry Rickens $2,700; Charles Desselt $500; Sophia Feibel $1,848; H. Heineberger $603; total $5,651. On July 23 he claimed capital invested over $7,000; stock $3,000; outstanding $6,000.

NEW YORK CITY.—A. S. Jones, oil broker, suspended on the 23d inst. Liabilities reported at $3,000.

NEW YORK CITY.—Mitchell Levy, gents' furnishing goods, assigned on the 22d inst. to Solomon Levy, giving preferences to Hellman & Herrman $1,374; Philip Platt $2,862; Plonskey & Simon $386; Joel B. Kaufman $1,275; total $5,897. Liabilities $7,982; nominal assets $7,469; actual assets $6,918.

NEW YORK CITY.—The schedules of John McCoy, liquors, show liabilities $6,253; nominal assets $2,671; actual assets $2,142.

NEW YORK CITY.—Schott & Knight, stock brokers, suspended on the 21st inst., the result of the recent depression in stocks and failure of customers to put up margins. They were reported embarrassed for several days before they suspended, and efforts to obtain funds to continue were unsuccessful. They settled their differences at the Stock Exchange previous to the notice of suspension. The liabilities are reported at about $70,000. They have a house in Philadelphia.

NEW YORK CITY.—The statement of E. C. Stedman & Co., bankers and brokers, shows: Assets—cash and cash items $7,313; securities on hand or pledged $64,626; balance due the firm $19,057; total $90,997. Liabilities—due banks on loans $55,000; due miscellaneous creditors $62,940.83; total $117,940.

NORWOOD.—The Norwood Lumber Company has assigned. Liabilities about $60,000, of which $40,000 is said to be due the banks at Ogdensburg and Malone. President Brainard, of the suspended St. Albans (Vt.) Trust Company, was the principal owner of the concern. The employees were preferred and have been paid off by the assignee.

SCHENECTADY.—G. M. Bostwick, grocer, has assigned to Robert C. Dorn, giving preferences for $2,742.

NORTH CAROLINA.

GREENSBORO.—Small & Co., dry goods, have assigned. Liabilities about $9,000; assets estimated at about the same figures.

HILLSBORO.—James Y. Whitted, tobacco, has given a trust deed for $23,000 to C. M. Hawkins. He claims assets of a like amount, and liabilities $17,000. He says he gave the deed under compulsory circumstances, while he only owed $12,230, the balance being for bills held against actual shipments. He hopes to arrange matters shortly.

OHIO.

CINCINNATI.—Charles H. Bishop & Co., commission flour, grain, etc., Bishop Brothers, formerly commission grain, and George W. Bishop individually, all assigned on the 23d inst. to George W. Trowbridge. George W. Bishop has been in the business for over thirty years, and was senior partner in Bishop Brothers, who quit business about August 1, 1882. In January, 1882, he became a partner with his son, Charles H. Bishop, the latter having established the business of C. H. Bishop & Co. June 23, 1879. George W. Bishop only a few weeks ago claimed a net worth of at least $400,000, his son having $16,000 in the business. C. H. Bishop & Co. gave a realty mortgage for $64,000 before they assigned.

CLEVELAND.—A. Kolbenhayer, dry goods, has been attached. He previously gave a chattel mortgage for $604.

CLEVELAND.—Silas Merchant, manufacturer of ice machines, assigned on the 20th inst. to Moses G. Watterson. He recently gave a chattel mortgage for $57,000 to secure money advanced.

COLUMBUS.—Frederick J. Emrich, grocer, has assigned to J. P. Morrow.

COLUMBUS.—Elizabeth J. Walker (Wm. Walker, agent), clothing, has assigned.

DE GRAFF.—A. J. Smith, restaurant, has been closed by the sheriff.

KENTON.—W. H. Moses, clothing, has assigned.

LIMA.—The Lima Wheel Company has assigned to John Carnes and C. Woolworth. Liabilities about $19,000; assets $35,000. It is said it will pay in full.

NILES.—Mary J. Hemmings, grocer, has assigned.

NILES.—The Niles Mining Company, coal, has assigned to R. W. Ratliff, owing to the failure of the Ward Iron Company and A. G. Bently & Co. The capital stock was $20,000.

PORTSMOUTH.—George Massetter & Co., saw mill, have failed.

WARREN.—The Second National Bank suspended on the 17th inst., the cashier, K. M. Fitch, having confessed to the loss of $80,000 of the bank's funds in stock speculations. He was subsequently arrested in Boston. The bank inspector thinks the assets are sufficient to pay the depositors in full, leaving about 30 to 50 per cent. for the stockholders. An assessment of 75 per cent. has been levied on the stockholders to enable it to resume.

OREGON.

GARDINER.—E. H. Burchard, general store, is reported financially embarrassed.

INDEPENDENCE.—The liabilities of E. Poppleton, general store, are $51,500; assets $36,000.

NEWPORT.—Walling & Wright, tinsmiths, are advertised to be sold out by the sheriff.

PORTLAND.—John A. Bradley, carriage maker, has been attached, and is reported to have left town.

PENNSYLVANIA.

ALLEGHENY.—Michael Grogan, grocer, has assigned to Robert Craig.

ALLEGHENY CITY.—The liabilities of Michael Heilman, shoes, are about $2,400; actual assets $1,500.

APOLLO.—Moses Horne, grocer, has been sold out by the sheriff.

BRADFORD.—Frawley & Ryan, grocers, have been closed by the sheriff.

CAMERON.—W. L. Herron, grocer, has been sold out by the sheriff.

CANNONSBURG.—Adams & Van Eman, general store, have been closed by the sheriff.

CENTRE MORELAND.—J. S. Sickler, general store, has been sold out by the sheriff.

FORESTVILLE.—W. C. Bryson, general store, has been sold out by the sheriff.

HAZLETON.—Thomas Job, stationer, has been closed by the sheriff.

LANCASTER.—The Lancaster Watch Company, it is said, has resumed business with a capital stock of $248,000, all paid in.

MILLBURN.—S. K. Sankey & Co., manufacturers of agricultural implements, have been closed by the sheriff.

PARKER CITY.—Mrs. Agnes M. Prest, grocer, has been closed by the sheriff.

PHILADELPHIA.—Barber, Cochran & Co., manufacturers of yarns, whose offer to settle at 25 cents cash having been declined by their creditors, were sold out by the sheriff on the 16th inst. It is said their effects were bought in by Joseph G. Kitchen for about $6,000, his claim, including the purchase of William Arrott's claim of $5,500, amounting to about $8,000. Liabilities were placed at $20,000.

PHILADELPHIA.—Execution has been issued against Harry C. Cook, coal, for a judgment for $12,150.

PHILADELPHIA.—Daniel M. Karcher's Sons, manufacturers of furniture and upholstery, have assigned to Frank S. Simpson and the Philadelphia Trust, Safe Deposit and Insurance Company. The Corn Exchange Bank has judgments for $2,500 and $5,000, and D. Noblit $10,000. Liabilities about $50,000.

PHILADELPHIA.—Judgment for $19,777 has been entered against John W. Le Maistre, white goods, and execution was issued. In May he was granted an extension of four, eight and twelve months.

PHILADELPHIA.—W. H. Miller & Co., stock brokers, who failed on the 11th inst., have paid the board about $8,000 and resumed their seat. They propose to pay in full. Liabilities are about $15,000, including the $8,000 paid the board. They claim to have more owing to them than would meet their obligations. They resumed business on the 18th inst. It is said their suspension was caused by their endeavors to assist their customers.

PHILADELPHIA.—Schott & Knight, stock brokers, who have a branch office at 6 Wall street, New York, suspended payment on the 21st inst. at the New York office, where Mr. Schott has been in charge since they commenced business, November 27th last.

PITTSBURGH.—Dobbs & Brother, manufacturers of bent work, have been closed by the sheriff.

PITTSBURGH.—Execution has been issued against William Ladley, tailor, for $2,157.

PITTSBURGH.—L. J. Sablodowsky, saloon, has been closed by the sheriff.

READING.—Execution has been issued against W. H. Harrison, general store, on a judgment for $560.

ROGERSVILLE.—George A. Bayard, general store, has been closed by the sheriff.

WALNUT.—W. S. Anderson, groceries and hotel, has been closed by the sheriff.

WATERFORD.—W. W. Kibbe, manufacturer of hay rakes, has been closed by the sheriff.

WEST MIDDLESEX.—Wm Jones, general store, is in the hands of the sheriff, and he offers 50 cents.

RHODE ISLAND.

PROVIDENCE.—Henry A. Curran, proprietor of the Seery Manufacturing Company, jewelry, has assigned to A. E. Jennings.

PROVIDENCE.—George A. Mumford, marble, has assigned to J. P. Mumford.

PROVIDENCE.—Pepper, Arnold & Co., carriage makers, have assigned.

PROVIDENCE.—John R. Read, axle washers, was attached for $4,000 and assigned.

SOUTH CAROLINA.

BAMBERG.—C. Sahlman, Jr., & Co. (agents), general store, have assigned.

TENNESSEE.

GALLATIN.—L. Rosenberg, dry goods and clothing, assigned on the 22d inst. Liabilities $3,500; assets $1,800.

RED BOILING SPRINGS.—R. O. Mulligan, manufacturer of handles, has failed.

SPRINGFIELD.—Alfred Pike, grocer, has assigned. Liabilities $900; assets $400.

TROY.—The Western Furniture Company has assigned.

TEXAS.

DALLAS.—Joseph Boylosh, saloon, has been attached for $1,500.

GALVESTON.—Carl Schwarz, wholesale liquors, has assigned to Isadore Lovenberg. Liabilities $39,226, of which $30,000 is due the bank; assets $29,839, consisting of stock $15,109; accounts $12,030; real estate $2,700.

UTAH.

MELFORD.—B. F. Grant & Co., general store, have assigned to W. G. Taylor, giving preferences for $16,000. Liabilities $30,000; nominal assets $35,000.

VERMONT.

ST. ALBANS.—Charles W. Rich has been appointed receiver of the St. Albans Trust Company.

VIRGINIA.

CLAREMONT.—Parsons & Smith, general store, have assigned.

NORFOLK.—All the creditors of Mrs. R. T. James, hotel, have signed a release and extended time for payment. The deeds of trust, except that to secure J. Z. Lowe $9,755, have been released. Business will go on as usual.

NORFOLK.—J. G. Spruill (agent), cigar manufacturer, has failed and offers 25 cents. Liabilities about $5,000; actual assets $1,500. It is said all but one of the creditors have agreed to the compromise.

WASHINGTON TERRITORY.

DAYTON.—H. M. Deal, notions, has been closed by attachment.

SEATTLE.—I. M. Hall, grocer, has turned over stock to a creditor.

SPRAGUE.—Byrne & Calihan, hotel, are reported to have left town.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, SEPTEMBER 1, 1883.

NOTES OF THE WEEK.

The mercantile failures in the United States reported to BRADSTREET'S this week number 126, against 179 last week, 110 for the corresponding week in 1882, and 104 for 1881. The number reported for the week ending yesterday is the smallest for any single week since October 14, 1882. For the third quarter of 1882 the average weekly return was 128, and for the same period of 1881 the weekly failures numbered 87. For the second quarter of 1883 the weekly return was 162, and for the first quarter of the same year 245. The failures reported for the week were unimportant. The increased number of trade disasters which followed upon the assignments in the leather trade of Boston had their origin further back. For the lack of a better excuse the flurry in leather was put down as the immediate cause. The country has now received the full effect thereof, and the report for this week would seem to give full proof that the country is in no danger of a credit storm and widespread disaster. The week also marks the return to Wall street of a general belief in improving prices, and the promise now is that the bulls are for a time to have the advantage. Their lead would be great but for the deep distrust which long-continued abuses in railway direction have brought about. The need of the day is some form of investment in which to place the funds which have been forced out of government bonds and other like securities. Railway stocks should meet this want, but the thimble-rigging of our chief railway managers stands in the way. Gradually, of course, this hindrance will be materially lessened, for the veriest railway plunderer tends naturally to conservatism when once his game is scarce. But, for the time being, the evil is great.

The stock market has assumed a somewhat improved tone and a steadier position. The general decline and weakness continued until Tuesday, when prices began to slowly advance. A few stocks were picked out by the bears for attack, but the remainder of the list was surrendered to the upward movement. The course of the market is not so strong that it may not be arrested at any time, although it will be able to resist any attempt to force a heavy decline. Purchases for long or permanent holding have not begun yet, and until they do settled figures are not looked for by operators.

A case of considerable interest was tried last week in Wyandotte, Kan. It appears that a firm of bankers at Olathe failed recently with $80,000 liabilities and merely nominal assets. The head of the firm was indicted under a recent statute of the state making it felony for a banker to receive deposits knowing his bank to be in failing condition. After a change of venue to Wyandotte the defendant was found guilty of the offense, the extreme penalty for which, under the state laws, was five years imprisonment. It is encouraging to witness the success of an application of the criminal law to offenses like that of the convicted banker. As we have often insisted, modern developments have been such as to render acts of this nature far more dangerous than the more open and violent breaches of the penal code, and they should everywhere be classed among the more heinous offenses under the criminal law. The community is still far from having a proper sense of the importance of this matter. As a leading English commercial journal well remarked some time ago, there are few things more shocking to the sense of justice or more detrimental to the real interests of the community than the disproportion in point both of certainty and of severity between the penal consequences of ordinary larceny and of commercial fraud.

We have sought to direct attention, as occasion offered, to the striking contrast existing between the present mode of conducting Philadelphia's finances and that of other American cities. Philadelphia is doing business for cash, while New York, Brooklyn and almost all the remaining large cities are continuing the loose credit system which has done so much to demoralize their finances. Just now the preliminary budget for Philadelphia is being made up by the City Controller. This advance budget consists of the estimates for 1884, the new tax values and various calculations by the Controller showing what given tax rates will yield. It happens that the estimates of the several departments foot up some $5,000,000 in excess of the appropriations for the current fiscal year. The councilmen, therefore, have either to cut these estimates down or to increase the tax rate to meet them. Councils have a power of taxation which is practically absolute, but they have no way of raising money save by taxation. They are, therefore, confronted by a business problem of the first magnitude: How to secure the highest appropriations and the lowest tax levy while having no resource save taxation. Formerly the excess of appropriations was met by selling treasury warrants. This power has now been taken away, and the councilmen must get money, if at all, in exchange for tax receipts. The result is a good deal of friction in councils, and membership therein is no longer the prize it was to unscrupulous politicians. It will be at once interesting and instructive to watch the work of Philadelphia's councils during the ensuing weeks in their endeavor to make ends meet while providing for the actual needs of the city.

Even the venders of infallible medicinal remedies have been careful to recognize the force of the modern distrust of everything claiming to be a panacea, and in introducing their specifics they are solicitous to have it understood that these are not warranted to cure every ailment. The Greenback-Labor party appears to be much behind the times in readiness to accommodate itself to this wholesome prejudice. At a convention just held in Pennsylvania a platform was adopted which, referring to the party's "well-known opposition to all forms of monopoly in transportation and telegraph," regrets the inefficiency of restraining legislation when applied to these monopolies, and calls upon all parties having in view the control of these monopolies to consider whether "full acceptance of the old greenback doctrine that all money should be issued by the government and made equal in volume to the business wants of the country would not, through the construction of parallel and competing lines, effectually destroy these and kindred monopolies." It would indeed be difficult for any one but a Greenbacker to recognize the connection between the evils referred to and the remedy proposed in this resolution. The tariff plank in this singular platform is amusing in the extreme. It declares in favor of protection, and charges the bankers of the country, whom it regards as the most dangerous monopolists, with having caused the reduction of the duties on imports by the last Congress "for the purpose of relieving themselves of the payment of taxes and to perpetuate the national debt."

The session of Parliament just closed was hardly an eventful one in any sense. In many respects it was disappointing. The bill providing for the municipal government of the metropolis was not presented, and the attempt to codify the law of criminal procedure broke down. The session, as a whole, went far to render evident the fact that Parliament is overburdened with the multitude of its duties, and that some way must be found for relieving it if it would keep pace with even the more important matters pressing for attention from all parts of the empire. Some measures of great public interest were passed, however, and among these the Bankruptcy act was the most important. This measure alone would amply suffice to redeem the session from the charge of barrenness. With the leading features of the English act our readers have been already made familiar, and we need not enlarge upon them here. Our own legislators will find much that is suggestive in the methods adopted by Parliament for dealing with the difficult problems which must be reckoned with in framing a bankrupt law. It is to be hoped that the example of the great commercial community across the sea will have the effect of stimulating Congress to give this country a uniform insolvent system—a measure of which it stands much in need.

The death of the Legitimist claimant of the French throne made scarcely a ripple on the surface of French politics. The nation was too busy prosecuting its material schemes in the East to concern itself with the romance of history embodied in the dead Count's life. In Annam the French appear to have had everything their own way recently. They captured certain forts and batteries at the mouth of the Hué river, and thus cut off the Annamese capital from communication with the provinces. This important capture was followed by the submission of the king, and a treaty of peace has been the result. Under this treaty the Annamese are to pay the cost of the war and to permit the French to retain the forts on the Hué river pending payment. The Annamese also agree to carry out the treaty of 1874, which virtually establishes a French protectorate over Tonquin. France is to be allowed to station residents in all the chief towns of Tonquin. Cochin-Chinese money is to have currency throughout Annam. The customs and taxation system is to be regulated by conferences, to attend which a French envoy is about to go to Hué. Annam is to receive 2,500,000 francs annually from the customs receipts. The Annamites have requested that the French legation at Hué be reopened at the earliest possible day, and a French agent has been appointed to proceed thither and assume charge of affairs.

AMERICAN COMPETITION IN FOOD PRODUCTION.

The Department of Agriculture has been investigating the question of American competition with European agriculture, and in a report just issued has collected statistics bearing upon the subject and expressions of opinion relating thereto from the countries most affected. The figures show that the progress made by the United States in the exportation of products of agriculture during the last three decades has been enormous; that the increase in the number of farms has been constant during the same period, and that the progress in grain growing has entirely outstripped the advance in population. The attention of the old world has been attracted to these circumstances in consequence of the diminished production of European agriculture during the past ten years and an increase of population during the same period. The enlarged demands upon our surplus food products were met at prices which precluded the competition of the European farmers, and great distress among the agricultural population of western Europe resulted. Remedies for the untoward condition of affairs have been sought in every direction; the need of improved scientific methods in agriculture has been proclaimed, and government assistance has been invoked. In Great Britain, a country deeply interested in this matter, a royal commission was appointed to consider the question, and it in turn sent commissioners to this country to investigate the elements of American competition and to determine to what extent these are of a permanent nature. The British commissioners in their published reports take on the whole a hopeful view of the effect of American competition on British agriculture, though in acknowledging that any estimate of the prime cost of American wheat in England will depend materially on the cost of supply from the west rather than on the cost of production on the farms immediately surrounding the great centers of population and industry they would seem to recognize that the factor with which they have to deal is one not easily measured.

The agriculturists of France and Germany, as well as those of England, have been for some years feeling the pressure of this competition. The press of these countries has contained numerous discussions of the situation, and pamphlets have been written on the question by economists. The general opinion of these writers appears to be that as far as can now be seen there is nothing to indicate a prospective slackening of American competition in Europe. Dr. Peez, a member of the Austrian Reichsrath, who has given the question especial study, says that hereafter England's wheat fields, at least, will lie in America, and that out of the great production of this country she has forged a new weapon against the Continental industries. He thinks that the present pressure will be still more keenly felt in the future by the other European countries, and that even crop failures in America can hardly check permanently the stream of shipments now that it is started. Max Wirth, a well known economic writer, declares that the circumstances under which America produces grain are so favorable as to make the cost of production 33⅓ per cent. less than an average in Europe; that the wheat areas are extending, and that in consequence of improved means of communication the rates of transportation are lower than in Europe, and are expected to be still further reduced. He concludes that the farmers of central and western Europe are attacked by a competition which threatens to reach a crisis such as can be met only by organized measures for relief. These measures, according to the general opinion of those concerning themselves with the discussion of the question, should consist not in prohibitory enactments, but in improvements in agricultural methods and in facilities for transportation.

We have heretofore drawn attention to the main facts referred to above and have pointed out their important bearing upon the future commercial policy of this country. In discussing the reasons for the change of public opinion upon the tariff question some time ago, we said: "The immense productive development of the country, and the position which it has given us and must secure to us among cheap food-producing nations, is perhaps the most important of these. This will necessitate an enlarged market for our commodities such as would be impossible under a severely restrictive system. If we will not buy we cannot sell; by prohibiting importations exportations will be prevented, and thus the producers will be deprived of a market, which will be all the more necessary to them as their operations expand, unless, indeed, production is checked by a shortsighted policy. The position of the United States, as will be seen from this, must naturally force it to adopt a liberal policy." The essential soundness of this position is becoming more apparent as time goes on. A striking commentary upon it is found in the pamphlet of Dr. Peez, who advocated a system of international protection against American and Russian competition. Contrasting the policy of Great Britain with that of Russia and the United States, he complains of the latter: "They force their way into commerce, flood Europe with farm products and then close their markets to European manufactures. Europe would overlook a few bad features arising from the wholesale shipments from Russia and America and receive with open arms their productions if the latter could only be paid for by European manufactures. The trouble, the injustice, lies in the want of reciprocity."

RAILWAY OPERATIONS IN 1882.

The figures given in Poor's Manual of the Railroads of the United States for 1883 show that the activity in railroad affairs during 1882 was still more extraordinary than in 1881. During the year 11,591 miles of railroad were constructed, the greatest number for any one year. At the close of 1882 the railroads of the country had a mileage of 113,329 miles. The amount of share capital issued by the several companies up to the close of their respective fiscal years was $3,456,078,196, an increase from the previous year of $385,254,585. The funded debts of the several companies amounted to $3,184,415,201, an increase from the previous year of $352,554,496. Their floating or unfunded debts amounted to $255,170,962, an increase of $42,404,965 over the previous year. The gross earnings of all the roads for their several fiscal years of 1882 were $770,356,716, an increase from the preceding year of $67,066,511. Of the gross receipts $202,140,775 were received from passengers, $506,367,247 from freight, and $61,848,734 from miscellaneous sources. The net earnings for the year were $310,682,877, an increase of $24,929,109 over the previous year. The amount of interest paid was $149,295,380, an increase of $20,708,078 over the previous year. The amount of dividends paid was $102,031,434, an increase of $9,687,244 over the previous year. Mr. Poor admits that the figures of mileage given in the previous numbers of the Manual were probably somewhat in excess of its actual extent, owing to duplications made by the companies. He acknowledges also that the amount of earnings given in the Manual for 1881 was undoubtedly too large, owing in part to the same cause. The statistics for 1882, however, he thinks, may be regarded as correct, special exertions having been made to secure exact figures for the mileage.

The passenger traffic was most active in the New England group of states, where the number of passengers transported by railroads during the past year was 16.3 times greater than the whole population of the section. In the middle group of states, omitting the New York city elevated railroads from the computation, the passenger traffic was less in proportion, the number carried being somewhat less than 10 times the population. In the west the number transported was a little more than 4 times greater than the population. The southern group exhibits the smallest development of the passenger traffic, the number transported being less than the population. The freight traffic showed the greatest activity in the middle group of states, where the number of tons moved averaged 13.6 per head of population. On the railroads of Pennsylvania the average was highest, the number of tons moved per head being 23.4. The New England and the western groups were about on a par in regard to the activity of the freight traffic—the number of tons moved per head being 7—though the volume of such traffic was much greater in the west. In the case of freight, as in that of passenger traffic, the southern group exhibits the smallest development, the number of tons moved per head being 1.56. The cost of moving passengers was least in the New England group of states, where it was 2.1 cents per mile, and greatest in the western group, where it was 3.2 cents per mile. The cost of moving freights was least in the middle states, where it was 1 cent per ton per mile, and greatest on the railroads of the Pacific group, where it was 3.1 cents per mile.

Mr. Poor's introduction to the present edition of his Manual is conceived in a sober and conservative spirit, and in this respect it compares favorably with the somewhat polemical introductions with which his last two isssues—those for 1881 and 1882—were prefaced. This is more as it should be. A book claiming to be in any sense reliable as a statistical compend should not be put forth as an appendix to the plea of an advocate. In this regard the editor of the Manual has made some concession to a sentiment which, as we have heretofore pointed out, has been gaining unexpected strength in many directions. He even takes occasion to direct attention to some glaring facts which go far to explain and in the main to justify the feeling of hostility with which the operations of certain railroad managers are regarded. He shows, for instance, that while upon a safe estimate the actual cash expenditure on all the railroads of the United States during the past three years did not exceed $1,050,000,000, the increase of share capital and indebtedness during the same period amounted to $2,023,646.842, a sum $973,646,842 in excess of the actual cash expenditure. In view of Mr. Poor's well known position in relation to the railroads, it is safe to say that his statement does not misrepresent the facts of the matter to the prejudice of the railroad interest. Such an enormous increase of liabilities over actual cash outlay is, as he remarks, "well calculated to create a distrust of all securities, good and bad." This fact alone, if no other were at hand, is a striking commentary on our persistent contention regarding the pressing need of reform in the methods of corporate management in this country.

The consideration of this point leads us to raise a question, not without interest to the public, namely, what is the value of the Manual under discussion as a guide to investors in railway securities? With reference to the needs of this class the book does not seem to be of much value. It is true that it contains a great amount and variety of statistical information regarding railroads, and as a directory for those actively interested in the business of the railroads it is no doubt highly useful and, within certain limits, indispensable. But in regard to the information most requisite for the investor either it is deficient or much of the information given labors under the suspicion of being colored, it being derived in the main from the managers of the companies, who are interested in making the best possible exhibits for their respective roads. That such exhibits are often unreliable in the extreme a dearly-bought experience has gone far to convince the public; and while there is no strict and general supervision of the accounts of railroads, there does not seem to be much possibility of an improvement in this respect. Dividends are still paid with borrowed money, and reports of earnings continue to be suppressed or doctored. In view of the present condition of railway management in this country it will be seen that for the purposes of the investor a close and searching scrutiny of the present financial status and the past history of particular corporate enterprises is essential, and this information the Manual before us does not supply.

THE WAGES QUESTION IN MASSACHUSETTS.

In the fourteenth annual report of the Massachusetts Bureau of Statistics of Labor some statistics of wages, profits and earnings are presented in a novel manner. Wage statistics are usually given in detail for the individual, or in averages for an industry, city or state. In the presentation referred to the establishment or factory is taken as the unit, and we are supplied with an opportunity to compare factory with factory. An examination of these statistics discloses some facts in relation to wages which seem particularly valuable.

Twenty-one industries, employing 207,793 persons out of 352,255, the grand total of the state's operatives, are given in detail, but it will be sufficient for our present purpose to consider one industry and the state aggregate. The figures we present are drawn directly from the bureau report and manifestly only relate to wages in Massachusetts.

In 1880, in the worsted goods industry in Massachusetts, there were 16 establishments, employing 2,488 persons, of which 995 were men, 1,219 were women, and 274 youth and children—that is, 60 per. cent. were women and children. The average yearly earnings were $290, or $5.57 per week for each employé, whether man, woman or child. The actual average yearly

earnings paid in 15 of the factories were as follows: $249, $245, $250, $204, $222, $315, $292, $317, $313, $465, $315, $380, $468, $329, $210—that is, in 6 of the factories the wages were below the average, and in 9 they were above. This would seem to show the unfairness of applying a general average to a local case. For instance, the operatives receiving $204 per year are not improved in their financial condition by being informed that the average wages in their industry is $290, or the highest $468.

The bureau in its discussion of the question of profits of manufacturers allowed them 6 per cent. of the capital invested as interest, and 10 per cent. of the value of product for all expenses of carrying on business. In the worsted industry the average yearly product for each employé was $2,003, made up as follows:

Value of materials used by each employe	$1,384 67
Wages paid each employe	290 64
Interest and expenses (as above)	243.18
Net profit to manufacturer on each employe	84.21
Average yearly product for each employe	$2,003.00

The interest, expenses and net profit aggregates $327.69 for each operative, as against $290.64 in wages. If the operative received all, or $618.33, it would amount to $11.85 per week. That is, if the average weekly wage of operatives in the worsted goods industry in Massachusetts was $11.85 it would allow of no return to the manufacturer, excepting for the value of the materials used by each employé.

The bureau allowance for interest of 6 per cent. on the capital invested, and thereafter an equal division between manufacturer and employé, results as given below:

Value of materials (each employe)	$1,384.67
Six per cent. on $753, capital invested for each employe	43.15
One-half of balance to manufacturer	287 57
One-half of balance to operative	287.58
Average yearly product for each employe	$2,003.00

The employé does not gain by this industrial partnership. His *wages* were $290.64. His profits are $287.58, or a net loss to each employé of $3.06, and a corresponding net gain to the manufacturer. In other words, in the worsted goods industry in Massachusetts the wage system gives the operative more on an average than would an equal division between manufacturer and operative, after allowing the former for the cost of materials and 6 per cent. on capital invested. It is manifest that the manufacturer makes his half on *each* of his operatives, and that his aggregate is a very large sum. This is true, but we have seen that if the operative took *all*, he could secure but $618.33 per year, or $11.85 per week, and from this would have to be deducted all interest charges and expenses for carrying on the business.

An examination of the sixteen establishments in detail brings important facts to light. We find that eight establishments made a net profit over and above the 6 per cent. for interest and 10 per cent. for expenses. In these establishments there were 931 employés. On the half-to-operative plan each would get $432.07 annually, but in the other establishments, with 1,557 employés, this plan would give each operative but $199.97 annually Obviously, it would only pay the employé to become an industrial partner in those firms which are making a good profit. In case business should be disastrous the wage system seems to have manifest advantages, especially as wages constitute a preferred claim at law. It would be manifestly impossible to have an elastic partnership between manufacturer and operative by which the operative should receive good *wages* when business is unprofitable and good *profits* when it is remunerative. There would probably be no difference of opinion on this point between political economists and workingmen who intelligently consider the situation.

The bureau results, which we have recapitulated in the preceding statements, as regards the worsted industry in Massachusetts, are fully sustained by the state figures for all industries. We present two showings for comparison with those for the worsted industry:

ALL INDUSTRIES—STATE OF MASSACHUSETTS.

Value of materials used by each employe	$1,098 55
Wages paid each employe	361.58
Interest and expenses	239.92
Net profit to manufacturer on each employe	97.95
Average yearly product for each employe	$1,792.00

On the half-to-manufacturer and half-to-operative plan:

Value of materials used by each employe	$1,098.55
Six per cent. on capital invested ($882.46) for each employe	51.75
One-half to manufacturer	320.85
One-half to employe	320.85
Average yearly product for each employe	$1,792.00

As in the case of the worsted industry, the half-and-half plan gives less to the employé for profits than the ruling wages, the annual loss to each operative being $43.73.

The possibilities of the prevailing wage system and of some system of industrial partnership, as regards the wages of employés in the manufacturing establishments of Massachusetts, are strongly outlined by the preceding exposition of facts that we have drawn from the bureau report. We propose to apply the bureau's plan of reasoning and method of treatment to the leading industries of the United States at some future day.

FOREIGN TRADE OF THE UNITED STATES AND GREAT BRITAIN.

The total value of exports and imports of the United States during the fiscal year ended June 30 was $1,546,928,485, a sum in excess of that of any preceding year. The heaviest total prior to the past fiscal year was in the twelve months ending June 30, 1881, when it amounted to $1,545,041,974. In the succeeding year it fell to $1,475,181,831. Fifteen years ago the aggregate exports and imports amounted to $639,389,339, of which $281,952,899 was the value of the exports and $357,436,440 of the imports, the former amounting to about 57 per cent. of the latter. In the fiscal year recently closed the total exports were valued at $823,805,819 and the imports at $723,122,666. The value of the former in fifteen years had therefore risen from a sum equivalent to but 57 per cent. of the imports to a total exceeding the imports by $100,683,153, which leaves the total value of the imports equivalent to but about 88 per cent. of the exports. The total value of exports and imports has risen from $639,389,339, in 1868, to a sum two and one-half times as great, indicating an average annual increase in our foreign trade since 1868 of about $60,000,000. The average annual gain in exports (approximately) per annum has been about $36,000,000 and in importations a little over $24,000,000. The remarkable excess in the growth of the exports, as compared with the imports, may be readily explained as occurring within the period in which the greatest expansion has occurred in the cultivation of cotton, wheat and Indian corn, the packing and curing of hog and other animal products, and the production of petroleum, all of which have been produced far in excess of the home demand, and have gone to swell the exports. To approach more nearly to the concrete, it may be mentioned that during the ten years ended June 30, 1882, 78 per cent. of our exports of merchandise consisted of the products of agriculture. During the fiscal year ended June 30, 1883, the value of the exports of leading agricultural products, as compared with the values of the same in the preceding fiscal year, were as follows:

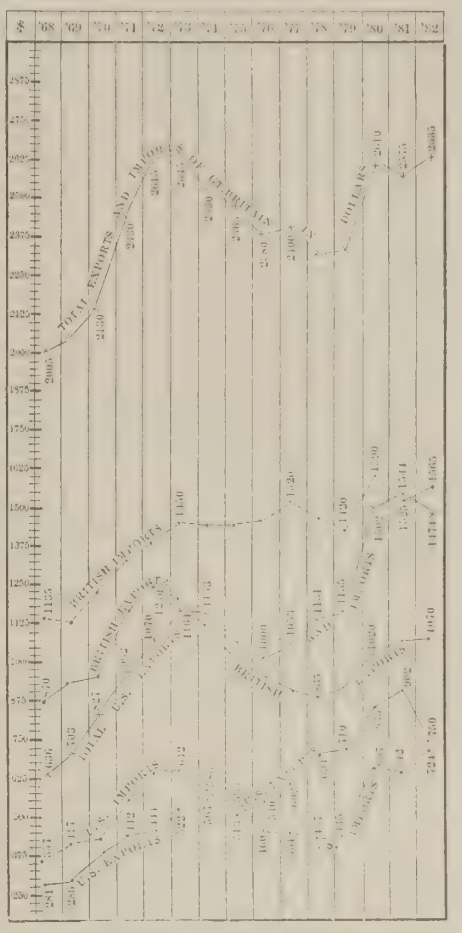
EXPORTS—FISCAL YEARS.

	1882-83.	1881-82.	*Increase.*
Cotton	$247,326,021	$199,812,644	$7,513,977
Wheat and wheat flour	174,703,830	149,304,773	25,399,057
Corn—cornmeal	27,730,860	29,840,031	*2,103,141
Meat, prov. & dairy prod'ts.	99,644,621	114,464,720	*14,819,805
Petroleum	44,913,028	51,232,700	*6,319,672

*Decrease.

This table shows a total value of exports of products named in the past fiscal year amounting to $594,324,980, as compared with $544,653,880 in the preceding year, a gain of $49,670,000. The total gain in exports during the last fiscal year, as compared with that preceding, was from $750,542,257 in 1881-82 to $823,805,819 in 1882-83, or $73,263,562, some $13,000,000 in excess of the annual average increase mentioned above. The heavy shipments recorded are the more noticeable inasmuch as it was not until October, 1882, that the exports of merchandise began to show any perceptible increase over those in the corresponding portion of the preceding year—owing to the diminished crops prior to that season. The harvest of 1882 having been bountiful the middle of last autumn witnessed the effects in the record of exports. It is estimated that the gain in the production of cotton in the season of 1882, as compared with the preceding year, was 28.8 per cent., in wheat 32.6 per cent., corn 35.3 per cent., in rye 44.7 per cent., in oats 17.2 per cent., and barley 18.9 per cent.

The value of the imports of merchandise in 1882-83—$723,122,666—has been exceeded but once before, in the preceding fiscal year, when it was $724,639,574, or $1,516,908 in excess. The decline in the value of receipts of foreign products in 1882-83 of over $1,500,000, simultaneously with the gain in shipments from this country to the value of over $73,000,000, will doubtless gratify that class which regard a heavy export surplus (compared with imports) as the desideratum in foreign trade. It calls for imports of gold coin and bullion, and the absence of the latter during a twelve-month has at times appeared to cause those referred to much uneasiness. In the table given above it has been shown that the past fiscal year's exports of cotton and of wheat and wheat flour were considerably in excess of those of the preceding year, while the shipments of corn and cornmeal, provisions and petroleum declined, the whole indicating a net increase equivalent to about five-sevenths of the excess of exports in 1882-83, as compared with those of 1881-82. The corresponding exhibit of the past year's importations is not complete, as published in the recently issued preliminary report by the National Bureau of Statistics, the showing being for eleven months of the fiscal year only, or to May 31 last. In that period the variations of the value of imports, as compared with the first eleven months of 1881-82, were:



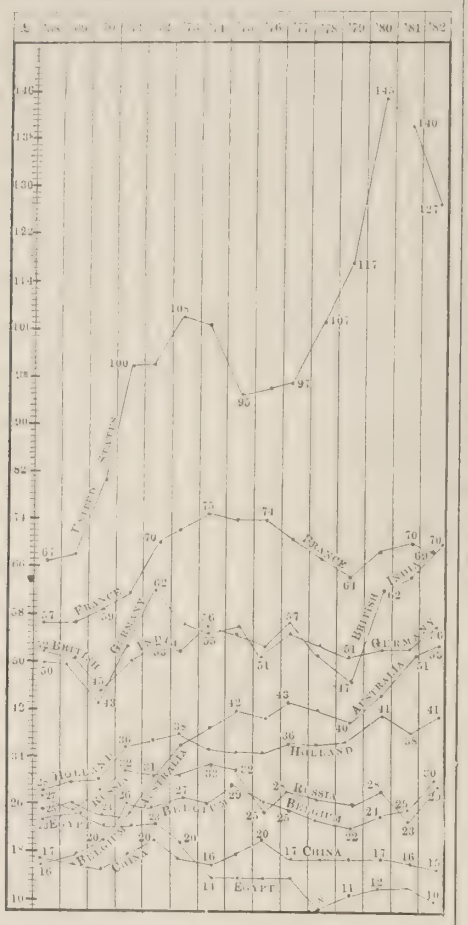
IMPORTS—FISCAL YEARS, 11 MONTHS.

	1882-83	1881-82	*Increase.*
Sugar and molasses	$87,155,837	$84,966,192	2,189,645
Iron, steel and manufactures	37,414,310	47,417,223	*10,002,913
Wool and manufactures	50,054,041	44,856,527	5,797,114
Coffee	30,761,022	42,322,496	*3,561,474

*Decrease.

The above shows a total value of importations in eleven months of the past fiscal year amounting to $213,986,810 as against $219,564,438 in the corresponding portion of 1881-82, a net decline of $5,577,628, as against but little over one and a half million dollars total net decline on the whole year's importations. The value of the other principal commodities imported in the eleven months did not vary much from those in a like portion of 1881-82.

In concluding this interesting report Mr. Nimmo, Chief of the Bureau of Statistics, discusses the gradual decrease in the rate of transportation in the United States during the past fifteen years—the period specified at the beginning of this article, and during which the growth of the foreign commerce of the United States has made such rapid strides. Improved facilities for transportation on the Mississippi, the lakes and the canals, together with enlightened policies for managing the same, competition between railways, etc., have accomplished the gain made in this respect. Special arrangements for through shipment not only between interior lines but between rail and canal and the ocean-going steamships and vessels have, to a large extent, added efficiency and economy to the service. It is noted that but eighteen years ago managers of the east and west trunk lines were in doubt as to whether grain could be profitably carried from Chicago to New York. But in 1882, 80.2 per cent. of the total grain receipts at the Atlantic seaports was brought there by rail, and but 19.8 per cent. by lake, canal and Hudson river. Even as late as in 1869 the rail rate per bushel for wheat from Chicago to New York was from 30 to 42 cents, while in 1882 the average annual rate was but 14.6 cents per bushel. The lake-and-rail route from Chicago to New York (via Buffalo) has witnessed a like reduction in carrying charges, the same being from 25.3 cents per bushel in 1868 to 8.7 cents in 1882. The average steamer rate for wheat per bushel, from New York to Liverpool, for the calendar year 1868, was 14.36 cents; in 1871 it was 16.32 cents, in 1873 21.12 cents, in 1877 13.86 cents, in 1878 15.22 cents, in 1880 11.76 cents, in 1881 8.16 cents, and in 1882 7.76 cents. For six months ended June 30 last it was 9.08 cents. The net decline in steamer rates in grain, therefore, is at least 25 per cent. in fifteen years past, against a decline of 50 per cent. in interior transportation rates by rail. This naturally favors the outward movement of the surplus production of the United States—primarily to Great Britain, our principal customer. A comparison of the annual fluctuations of the value of exports and imports (in millions of dollars) of the United States and of Great Britain, during each of the past fifteen years, together with the variations of the total of the exports and imports of each, is as follows:



From this it will be noted that the total of the exports and imports of Great Britain in 1868 was valued at over $2,005,000,000, as against $639,389,339 aggregate exports and imports on the part of the United States—that is, it was about three times as large. The British exports in 1868 were valued at $370,000,000, as compared with $281,000,000 here, about the same proportion, and the British imports were valued at $1,135,000,000, as against about $357,000,000, also about three times as great. In 1882 (calendar year) the aggregate British exports and imports were valued at about $2,635,000,000, or but (say) $635,000,000 in excess of fifteen years ago, a gain of about 30 per cent. The total value of the exports and imports of the United States in the fiscal year last past was $1,546,000,000, or nearly five-ninths of the British total December 31 last. This shows a material gain over the British rate of increase in fifteen years, the American total now amounting to nearly 59 per cent. of the British, as against about 33 per cent. fifteen years ago. The value of British exports in 1882, or $1,070,000,000, was about one and one-quarter times as large as the total exports from the United States in the last fiscal year ($823,000,000), against three times as much fifteen years ago, and the total of British imports, $1,565,000,000, was little over twice as large as those into the United States (which were valued at $723,000,000), against three times as much in 1868.

The British imports per capita in 1868 amounted to £9 12s. 10d.; of domestic products their exports per capita in the same year amounted to £5 17s. 4d., and of foreign and colonial products to £1 11s. 1d. The total British imports per capita in 1882 amounted to £11 14s. 1d., and the total exports of domestic products to £6 16s. 10d., leaving £1 16s. 11d. as the value of British exports of foreign and colonial products in 1882. The gain per annum per capita in exports of domestic products was 4s. 5¼d.; in the exports of foreign and colonial products for fifteen years the annual gain was 4⅔d. per capita.

The "Statistical Abstract for the United Kingdom" from 1868 to 1882, inclusive (calendar years), corresponding very nearly to our Bureau of Statistics' annual report, contains some specially interesting data in reference to British foreign trade during the period named, and particularly as to the accounts with the leading foreign countries with which extensive commercial relations are maintained. From the figures furnished in the Statistical Abstract the following chart has been prepared, showing the annual fluctuations in the total value of Great Britain's foreign trade with the ten more important countries. The figures given represent

millions of pounds and are used in the rough, discarding fractions of a million:

The preëminence of the United States, both as a buyer and seller, is noted at once, the first place having been steadily maintained during the whole of the fifteen years covered by the chart. During that time the grand totals of sales and purchases between these two great English-speaking nations have ranged from £66,000,000 in 1868 (calendar year) to £127,000,000 in 1882, or nearly double the former sum. The highest point touched was in 1880, £145,000,000, whence the decline in the following year was to £140,000,000. The aggregate transactions between Great Britain and the United States for the fifteen years amounted to over £1,554,000,000, or an average of nearly £104,000,000 per annum. In 1868 France ranked second, with a total of £57,000,000 trade with Great Britain. In fifteen years that sum had grown to £69,000,000, the aggregate for the whole period indicating an annual average trade with the English of nearly £68,000,000. France had, however, dropped to third place in 1882, owing to the rapid development of commercial relations between the mother country and British India, the latter coming to the front with an aggregate of £70,000,000, against the £69,000,000 of France in 1882. France's heaviest dealings with the British were in 1874, when the total was £75,000,000. From that the sum dropped to £64,000,000 in 1879, touched £70,000,000 in 1881, and fell back £1,000,000 in the following year. British India, which ranked third in 1868, with a total of £52,000,000 exports to and imports from Great Britain, enjoyed no appreciable advance for six years. In 1874 the figures were £56,000,000; in 1877, £57,000,000; in 1880, £62,000,000, since which (in two years) there was a steady and rapid advance to £70,000,000 in 1882. The aggregate value of the foreign trade between the two countries for the fifteen years indicates an annual average of about £55,000,000. Germany stood fourth in the list in 1882, as it did in 1868, the advance in the value of total trade between that country and Great Britain being from £50,000,000 to £56,000,000. Only twice previously during the period covered did Germany's aggregate sales and purchases in the United Kingdom equal the total last given—in 1873 and in 1875. The annual average value of transactions from 1868 to 1882 was nearly £54,000,000. Holland's trade was the most important to Great Britain after that of Germany, showing in 1868 a total of £28,000,000. This increased to £41,000,000 in 1882, but Holland had nevertheless dropped from fifth to sixth place in consequence of the extended commercial relations of the mother country with another of her dependencies, Australia, which, with £25,000,000 trade with Great Britain in 1868, had increased the same to £53,000,000 fifteen years later. This marks the most rapid increase of trading on the part of the United Kingdom with any of the countries in the list, it having more than doubled in the period noted. Russia's total in 1868, £26,000,000, advanced to £29,000,000 in fifteen years, which dropped that country from sixth to eighth place among the ten at the close of 1882. Egypt, with £23,000,000 of British trade in 1868, declined to £10,000,000 in 1882, and by so doing fell from eighth to tenth place. The Chinese trade with the British decreased also from £17,000,000 to £15,000,000, but continued as ninth in rank. Belgium has been constantly gaining as a trader with Great Britain. The total exports and imports between them rose from a total of £16,000,000 in 1868 to £30,000,000, or nearly twice as much, in 1882, advancing that nation's position from tenth to seventh place among the countries noted. The gains made in Great Britain's trade with her leading dependencies, Australia and British India, are conspicuous. The former's advance in this respect has relatively exceeded that made by the United States. That of British India comes third as to rate of advancement, and Belgium's fourth. The British foothold in China and Egypt appears to have become less stable. The variations in the value of the British exports and imports (with the countries named) during the period from 1868 to 1882, inclusive, will be found in the table here given:

VALUE OF THE BRITISH EXPORTS TO AND IMPORTS FROM THE COUNTRIES NAMED, IN MILLIONS OF £'S.

		1868.	1869.	1870.	1871.	1872.	1873.	1874.	1875.	1876.	1877.	1878.	1879.	1880.	1881.	1882.

	Imports	8	9	11	13	13	15	15	15	14	13	12	10	11	12	15

The first four countries given in the table show British exports in excess of importations continuously. In the case of Holland, while Great Britain sent goods thither in excess of receipts therefrom, from 1868 to 1875, inclusive, since the latter date the "balance of trade" has been reversed, and the Dutch have sold more to Great Britain than they bought. The British have sold from one-third to a little less than one-third as much as they have purchased from Russia, but, while sending a trifle more to Australia in 1868 than they took in return, they sold about 12½ per cent. more than they bought in 1882. British exports to Egypt in 1868 were a little in excess of 33⅓ per cent. of the imports therefrom in value, but fifteen years later they had declined to but 25 per cent. thereof. In the case of China the situation has not varied much, the exports thereto continuing at about one-half the imports. The record as refers to Belgium has continued remarkably even, showing £8,000,000 of exports against a like value of imports in 1868; £14,000,000 of the former, against £15,000,000 of the latter in 1875, and £15,000,000 each in 1882. The determinate character of the exhibit from the ten countries and Great Britain, with respect to the latter's foreign trade, may be inferred from the fact that the aggregate of British exports to and imports from the former in 1868 was about £362,000,000 out of a grand total with all countries of £522,000,000, or about $^{9}/_{13}$; in 1882 the total foreign trade of Great Britain amounted to £719,000,000, and with the ten countries to £500,000,000, the latter equaling about $^{10}/_{14}$ of the whole. The aggregate trade of the British colonies and dependencies with the mother country, notwithstanding the rapid strides made by Australia and British India, has not more than maintained its proportion of the aggregate commerce of Great Britain. The colonies possessed about one-fourth of the whole (about £120,700,000) in 1868, and nearly the same proportion fifteen years later, the aggregate value then being about £191,700,000.

OCCASIONAL NOTES.

The passage of the Tariff act has not had the effect of satisfying or stifling the popular demand for revenue reform, as is apparent from many current indications. The free-traders have evidently abated none of their activity. Quite recently a free-trade convention was held in Detroit, and now another one is promised in the west. The Missouri Free-trade League has issued a circular inviting all persons opposed to a protective tariff, especially those in the west, to meet in conference at St. Louis on October 2. The purpose of the meeting is to bring together those desirous of taking active steps to secure the overthrow of protection, in order that plans looking to that result may be discussed, and that organization and coöperation in the work may be promoted. Organizations opposed to protection are requested to send delegates. The conference is to be entirely informal and non-partisan, and all persons in sympathy are invited to take part in the proceedings. The conference has the approval of various free-trade organizations throughout the country — among others, of the American Free-trade League, the New York Free-trade Club and the Iowa Free-trade League.

This season's exhibit of the National Mining and Industrial Exposition at Denver exceeds in interest that of last year. All the departments are larger, with the exception of those devoted to articles for sale. The collection of ores and minerals, which is the main feature of the exposition, is the largest ever gathered in one place. The principal mining localities of Colorado are fully represented, as are also those of the other states and territories where mining is to any extent engaged in. Machinery is well represented in all lines. Curious mineral formations from the Yellowstone Park and other places are prominently displayed. A striking exhibit is made by the Richmond & Danville Railway Company of ores and minerals from Virginia, North Carolina and Georgia. The Union Pacific Company likewise makes an interesting display from many localities along its lines and branches. The art department, which is also to be classed among the features of the exposition, includes mainly the works of western artists. A fine display of garden specimens is made by the Colorado State Horticultural Society. The same society promises an interesting exhibit of agricultural products later on. The attendance increases as the season advances, and it is expected that the results of the exposition in a financial way will be satisfactory.

Thanks to the ingenuity of man, many, perhaps most, of the luxuries of life bid fair to become common property. Efforts to annihilate distance and to overcome the influences of climate are meeting with an increasing degree of success. The cost of the ostrich feather, hitherto an expensive article, owing to the difficulty of procuring it, is likely to be very sensibly reduced by means of the system of ostrich farming, which is now becoming quite an extensive industry. Ostrich farms are now being started in the west, in Africa, in Australia, and in India. One farm of 5,000 acres has been purchased in Australia for this purpose. A recent item in a London paper was to the effect that a "consignment" of feathers from a farm in New South Wales was ready for shipment. Under the circumstances it is unlikely that the prices of the feathers can long continue as high as they are at present. They command as high prices now as ever they did, it is true, but the fact is noteworthy that the price of birds for breeding purposes has fallen from 200 to 500 per cent.

In connection with this it is interesting to notice that the United States National Museum has received from Messrs. McKesson & Robbins, of New York, a contribution representing the first successful attempts at sponge cultivation on the American coast. This contribution, as we learn from *Science*, consisted of four specimens, all of the finest, or sheeps' wool, variety, which were raised from cuttings at Key West, Fla. Three of these specimens were placed in tide-ways, and grew from four to six times their former bulk within a period of six months, though the actual growth exhibited was for two months only, fully four months having elapsed before the sponges recovered from the injury done them in the cutting. The other was planted in a cove where there was little or no current, and its increase in size was very slight. Two hundred and sixteen specimens in all were planted at the same date, and at the last accounts those remaining were doing well. This is a very satisfactory showing indeed, but there is a serious obstacle to the artificial cultivation of sponge at Key West in the presence of sponge-fishermen, who infest every part of the region where sponges are likely to grow, there being no legal protection for the would-be culturist against intruders. This difficulty, however, might be remedied by judicious legislation in the interest of cultivators.

The uses of forged telegrams are not by any means exhausted in securing desirable proxies in political conventions, as appears from some recent intelligence from across the water. Quite recently some forged telegrams were sent from Dublin to London purporting to give orders to buy certain stocks and sell others. The fraud was detected through some irregularity in the sending, but this circumstance was merely accidental. In a great number of instances the chances would be in favor of the fraud being successful. The *Pall Mall Gazette* recalls the fact that some years ago a series of false telegrams, affecting the credit of the Argentine Republic, got into circulation, and that at least one individual prominently concerned in the fabrication of those telegrams is still actively wire-pulling in South American affairs. This, it must be admitted, is a rather serious matter for persons likely to be victimized by manipulators such as the individual referred to by the *Gazette*, and we are glad to see that steps are to be taken to make the way of these transgressors hard. The English Postmaster-General proposes to introduce a clause in the Post-office Protection bill making it a misdemeanor to forge or utter a false telegram. An energetic enforcement of such a law would without doubt do much to secure the public against a very dangerous class of frauds, and in a great commercial community some such provision is rendered a necessity by modern circumstances. In such communities the common highwayman is less to be feared than the more secret, and therefore the more dangerous, foes of property.

The promoting of electric lighting companies in England seems to have been at least temporarily overdone, as appears from the following, which appears in a number of the *Pall Mall Gazette* just at hand: "The prospects of electric lighting, notwithstanding the success of the applications for provisional orders, do not appear to be looking up. The Brush Company yesterday issued a circular calling up another £1 per share, a demand which sent down the price of their stock 10s. immediately. That electric lighting has a great future before it is indubitable, but whether the existing shareholders are likely to reap any great benefit from the development of the new illuminant is very doubtful. In this, as in other things, the pioneers, unless they have very good hearts and long purses, are not likely to reap such a harvest as will be gathered by those who come after them. Simultaneously with this fall in electric stocks it may be noted that gas shares have risen considerably.

A correspondent of the London *Times*, referring to the enormous increase in the consumption of sugar in the United Kingdom during the last ten years, states that of 1,000,000 tons consumed in 1882, 400,000 tons were beet-root sugar imported from the continent. The value of the beet-root sugar imported into England the writer estimates at £10,000,000. He complains of the neglect of the manufacture of beet-root sugar in Great Britain, notwithstanding that, as has been proven, sugar-beets can be grown there to advantage. Lately, he says, the continental growers have improved the sugar-beet, and in Germany an economical process has been discovered for the recovery of sugar from beet-root molasses, or any solution of sugar, by the use of strontia, the alkaline earth of which strontium is the metallic basis. By the use of this process, it seems, very large profits are now being made in Germany, and refineries in different parts of the continent, notably in France and Russia, are adopting the process rapidly. The writer calls attention to the fact that a large deposit of strontia has been proved to exist in England. He recommends the adoption of the new process, and urges that a sufficient quantity of land be devoted to raising the sugar-beet. He estimates that it 1,200,000 acres of suitable land could be brought under beet cultivation the whole of the beet-root sugar consumed in the kingdom could be produced at home, and that a large proportion, if not the whole, of this land

could be obtained in Ireland. The suggestion seems to be worthy the attention of British agriculturists, it having been demonstrated by a series of trials that 78 per cent. of the beets grown in Ireland were rich enough to be worked.

The irrepressible and irresistible activity of the British race is receiving fresh illustrations every day. In 1881 a charter was granted to a company for the district of North Borneo, far away in the South Pacific. Notwithstanding the short space of time that has elapsed since then these modern Romans have apparently succeeded in revolutionizing the condition of affairs there. We learn from an English journal that a large staff of surveyors are employed in defining boundaries, marking off lots and laying out roads. Prospecting, jungle clearing, lime burning and brick making are being carried on with vigor. Steam saw mills are in operation. New discoveries of coal have been made and a pearl fishery has been found. Trade is springing up, and Elopura, the new capital, is rapidly becoming an important town. But these particulars have reference to the merely material side of life in a new country. In addition, proper provision appears to have been made for the gratification of the associative emotions of the colonists. Thus we learn that a club has already been established at the capital, and that a Masonic lodge under the Hong Kong district is to be established without delay. Truly the world moves rapidly nowadays, and doubtless before long the British laureate's unfortunate comparison between the advantages of living in Europe and in Cathay will receive a practical disproof from men of his own race and speech.

A statistical report recently issued by the French Minister of Finance gives an interesting account of the past and present condition of landed property in France. The whole territory of that country contains 528,572 square kilometers, or 52,857,199 hectares, equal in English measurement to 132,142,977 acres. About 5 per cent. of this space is taken up by roads, towns, rivers and streams. Of the land remaining after deducting this 5 per cent., 1½ per cent. consists of land of the highest quality, such as gardens, orchards, hemp fields, etc.; cultivable lands constitute 50 per cent., grass lands nearly 10 per cent., vineyards 5 per cent., woods a little over 16 per cent., and "landes" and waste ground somewhat more than 13 per cent. The large extent of waste ground is due in part to the number of mountain chains which traverse the interior. Since the completion of the land survey in 1850 a great advance has been made in the disposition and value of the land, waste lands having been reclaimed to the extent of 1,400,000 hectares. The vineyards show an increase of over 10 per cent. notwithstanding the ravages of the phylloxera. The selling value of land in France has increased in all the departments but 5 per cent. since the survey of 1850. In the department of the Seine the value of the land has increased tenfold. This, of course, is owing more to the proximity of the metropolis than to any agricultural improvement. It is noteworthy that the three departments which have gained most next to the Seine were formerly three of the poorest, showing that much has been done to reclaim the most unpromising land in the country. The average value of a hectare throughout the whole of France increased from 1,276f. in 1851 to 1,830f. in 1879.

Attention has of late been attracted to the ravages of the locusts in various countries of Europe. Notwithstanding the fact that these insects have numerous enemies, and are destroyed in large quantities by birds of prey and all sorts of animals, their numbers give no sign of decreasing. Until recently very little systematic effort has been made to oppose their advance. In Cyprus, under Turkish rule in 1867 and under British rule in 1880, organized efforts were made for the eradication of this plague. In 1867 Said Pasha adopted the expedient of compelling each ratepayer to collect enough locust eggs to fill a large measure. These were then destroyed. This expedient proved very successful, and was adopted by the British authorities in 1880 with this modification, that the measure of locusts eggs was reduced in size. When the measure fixed by the government was not filled a fine was imposed. This gave rise to a trade in locusts' eggs, those who were unfortunate in their search for the eggs buying their share from their more fortunate or more industrious neighbors. In 1880, as a result of this system, 236 tons of eggs were collected. In the spring of last year it is said that more than 12,000 tons of locusts were destroyed in a single district. This year the plans for the destruction of the locusts have been changed, and instead of collecting the eggs preparations are being made for exterminating them when they commence their march. It is hoped that as the population increases and cultivation extends the locusts will be altogether driven out of Cyprus.

SPECIAL CORRESPONDENCE.

THE GAS AND WATER SUPPLIES OF LONDON.

London, August 18.—Sir William Harcourt recently seized a tempting opportunity to inform the London vestries that they were entirely helpless bodies, that the government of London was antiquated and utterly incapable of effective combination for purposes of metropolitan improvement, that in consequence they were at the mercy of the water companies—as a natural deduction he should have added of the gas companies, and the railway and tramway companies as well—and the only remedy for this state of chaos into which the greatest metropolis had drifted was the Government bill, which ought to have been introduced in the session now closing and is promised for next year. One would have thought, to read the Home Secretary's pungent remarks, that London lay at the mercy of a host of undertakings which could unchecked at their leisure extort money which they were not entitled to from the pockets of the inhabitants, and for which they need offer no adequate return. Yet with all this it may be affirmed that in the matters of cheap locomotion, cheap gas, and, considering the difficulties in the way, cheap water supplies, there are few metropolitan cities in the world that are so advantageously situated, and whether the realization of Sir William Harcourt's plans will succeed in improving that position in any material degree is a matter which is at any rate open to doubt. That either the gas or water companies could do anything which they were not entitled to do by acts of Parliament, carefully considered when they were passed and effectively criticised by the Metropolitan Board of Works, is not for a moment to be supposed, and under such circumstances Sir William Harcourt must be considered to have a little overstepped the mark in his efforts to prove the necessity for a measure which he had greatly at heart.

The histories of the gas and water supplies of London are worth recounting. The directors of the great Gaslight and Coke Company, in their report just issued, have considered the present time, when the concern has been in existence nearly three-quarters of a century, a suitable occasion for making a statement concerning the prominent features of their undertaking. The company was established, under the name of the Chartered Gas Company, in 1810, with a capital of £200,000. For many years it could barely hold its own, the price of gas being almost prohibitive to the general consumer, remaining for a long period at about 15s. per 1,000 cubic feet. When, however, it was seen that a profitable business might be conducted by the manufacture and sale of gas rival companies were started in various parts of London, and were actually competing with one another over the same ground, as no regular districts had been marked out. But in 1859 the thirteen companies which supplied the metropolis agreed to confine their operations to separate districts, and the Metropolis Gas act of 1860 sanctioned this arrangement. The act, which may be said to have assured the prosperity of the gas companies, provided that in return for the monopoly thus given the dividends payable to the proprietors were not to exceed 10 per cent. per annum. If profits were made in excess of this rate the price of gas was to be reduced. After this act became law the position of the thirteen companies rapidly improved, and in the course of two or three years they were all paying the maximum dividend of 10 per cent., the average price of gas being about 4s. 6d. per 1,000 feet. It may be observed that of the thirteen companies those which had been the most recently established were in far the best financial position. They were able when started to benefit by the older companies' experience, consequently their capital accounts were relatively less, and it was soon found that some of the companies could pay the 10 per cent. dividend while charging less for their gas. This gave rise to invidious comparisons and to a great deal of public grumbling.

Under these circumstances the chartered company—the oldest company of the thirteen—commenced, with the tacit approval of the Board of Trade, a policy of amalgamation. Beginning by absorbing some of the smaller concerns, it has gone on until at the present time there is only one other company in existence north of the Thames within the metropolitan district proper, and one south of the river, this latter concern, however, having been formed by the amalgamation of three undertakings, and supplying all the south of London. At the present time negotiations are on foot between the Gaslight & Coke Company and these two other undertakings, which it is understood will result in their absorption at an early date, and then the entire metropolis will be in the hands of one company possessing some 2,500 miles of mains for the supply of 270,000 private consumers and 65,000 street lamps, the whole occupying an area of about 100 square miles. The coal carbonized in the course of the year will be close upon 2,000,000 tons, which at 10,400 cubic feet of gas per ton of coal, represents nearly 21,000,000,000 of cubic feet of gas supplied in the course of the twelve months. If, as is supposed, the suburban Brentford Company is also taken over these figures will have to be further increased. The question arises does this great undertaking—for we will consider that the final amalgamations have been arranged—prey upon the helpless metropolis after the fashion suggested by Sir William Harcourt? In the first place these companies pay rates and taxes to an extent exceeding £150,000 a year, while in addition the city of London takes upward of £100,000 a year in the shape of coal dues, or 1s. 8d. per ton on all the coal imported into London for this purpose. Thus a quarter of a million and upwards is contributed by the gas companies in rates and taxes alone, while, including the latest reduction announced by the Gaslight & Coke Company, the highest charge per 1,000 feet will be 3s., and over a considerable area only 2s. 10d., that is, under 70c. per 1,000 feet, with an illuminating power exceeding sixteen candles, and with heavy fines imposed should a high standard of purity and illuminating power not be reached at all periods of the day. These tests are made several times daily, and the fines if imposed come off the dividends. This at any rate hardly looks like the greatest gas company in the world dictating to the London consumers in the matter of their gas supplies.

On one other point it is necessary to speak in respect to the management of this company. In 1875, it being found that while the gas companies had largely reduced the price of gas below their legal maximum they were carrying very large sums to reserve, it was arranged that certain of the companies should be enabled to pay dividends upon a sliding scale, measured by the price of gas to the consumer. North of the Thames the companies were empowered to pay 10 per cent. when the charge to the consumer was 3s. 9d.; south of the Thames this initial price was fixed at 3s. 6d. Every penny per thousand feet taken off this price to the consumer entitles the company to pay an extra ¼ per cent. to the shareholders, and already this sliding scale has been found to work so well that the companies are working from ninepence to elevenpence below, while paying increased dividends. Thus it may be said that the gas supply of the metropolis is not only economical to the consumer and a considerable aid to local taxation, but is also highly profitable to the shareholders.

The water companies can show no such record of prosperity as this. Most of them have been much longer in existence than the gas companies have been, and yet they are paying much smaller dividends. The New River Company is, of course, paying a high rate—nearly 12 per cent.—but for a century and a half after it was started even this company found it hard work to make a living. Good water was also a difficulty in the way of London consumers, and the New River Company was started to remedy an admitted evil as far back as 1619. But as London expanded there was found to be a difficulty in the way of supplying the entire area from Hertfordshire, and in 1723 the Chelsea Company was started, while the Lambeth Company dates from the year of American Independence. In the first ten years of this century four more companies were established to supply new suburbs with water, and there is only one company—the Southwark & Vauxhall—which has been in existence much less than three-quarters of a century. With regard to the New River Company there is no maximum dividend prescribed by Parliament, though there are maximum rates to the consumer, while the seven remaining companies are entitled to pay 10 per cent. plus such arrears as would make their past dividends up to the 10 per cent. maximum. This, of course, would empower them to pay dividends much in excess of 10 per cent. over a very considerable period, nevertheless the fact remains that only two of them are as yet paying so much as 10 per cent., while the majority as yet yield to their shareholders from 7½ to 8½ per cent. These are certainly not large dividends for companies which have been in existence so long, and which were for a long time without dividends at all. For instance, the Chelsea Company, which dates back a century and a half, is now paying but 7¼ per cent., and as an investment the original subscribers and their descendants must have fared badly indeed. When, in 1880, there was the outcry about purchasing the water companies, there seemed to be an impression abroad that they could be picked up comparatively cheap. But the companies, when negotiated with, considered that their shareholders were entitled to receive from the "Metropolitan Water Trust," which it was proposed to establish, dividends equal to what they were then paying, plus a gradual increase such as would probably accrue to them in the course of a dozen years. It was not contended by the opponents of the bill that this increase would not accrue, but the outcry raised against it was to a large extent due to the great rise in market values which such guarantees on the part of the metropolis would naturally command. The ratepayers thought they could purchase on terms yielding a lower rate of dividend to water stockholders, because the security offered was better, while the stockholders demanded the dividends they were then entitled to without consideration of the market value of their principal. Lord Beaconsfield's government tried to arrange a compromise, and were treated very much as Mr. Gladstone's government were treated over the Suez canal business. The local authorities are still hankering after the property of the water companies; but whether, if they got it, the supply would be improved, or the price cheapened to the consumer, is very problematical. At present the supply is very fair, though the price might be cheaper, and consumers have the satisfaction of speaking ill of the companies, which would be a useless matter if any corporation had the control of the supply.

BRAZILIAN COMMERCIAL AND FINANCIAL AFFAIRS.

Rio de Janeiro, July 28.—According to the last *relatorio* of the Minister of Finance the foreign trade of Brazil (official values) during the fiscal years 1880–81 and 1881–82 was approximately as follows, the minister stating that full reports had not been received from all the provinces:

	1880–81.	1881–82.
Imports	180,458,700 $ 000	184,113,300 $ 000
Exports	233,567,700 $ 000	216,709,800 $ 000
Total (reis)	414,026,400 $ 000	400,823,100 $ 000

From this it will be seen that the total foreign trade of this country is about reis 400,000,000 $ 000, or, in round numbers, about $200,000,000 at the par of exchange. During the last fiscal year (1882–83), although no general statistics of that year have yet been compiled, it is certain that the above totals were greatly reduced. The imports were considerably decreased because of the general stagnation in business and the increase in taxation. Toward the end of 1882 a new surtax of 10 per cent. was imposed on imports, and the customs warehouse charges were largely increased. The immediate result of this step was a decrease in imports, both on account of the enhanced cost of goods and the additional costs of storage here. Under the new warehouse charges importers are limiting their receipts to current demands, and are keeping their stocks reduced to the narrowest limits possible. In exports, with the exception of coffee, and possibly rubber, there was also a large falling off, owing to the failure of crops in the northern provinces and to the general decline in many branches of industry. In the rubber trade it is possible that the exportation was also reduced through the attempt to "corner" the market, though at the same time production has gone on steadily increasing. The customs revenue, however, shows a large increase, though how much of this is due to enhanced values it is difficult to state.

In the absence of complete and trustworthy statistics it is impossible to form any accurate opinion as to the trade of the whole empire. The official reports, complete as they ever appear, are always from three to five years behind, and the customs returns from the provinces are both irregular and confusing. They are neither accurate nor uniform. If one desires to know the aggregate customs receipts of all the provinces it is essential first to know all about each individual custom-house, in order to be able to separate the general from the provincial and special receipts. For instance, the custom-house at Manáos, on the Amazon, collects a special tax of 3 per cent. on exports for the subsidized steamship company. At Pará there is a tax—the *ver-o-peso*—which does not figure in the returns from any other port. Then at Pará the revenue is collected at a custom-house and a *collectoria;* at Maranhão at a custom-house and provincial treasury; at Pernambuco and Bahia at a

custom-house, *recebedoria* and *collectoria*, the last-named port dividing them into general and provincial; and at Santos and other southern ports at a custom-house and *mesa de rendas*. All this is probably clear enough to one who knows all about each port and just what differences there are between these various offices for the collection of revenue. Notwithstanding all this confusing of terms, however, it is well known that the custom-houses of Pará and Santos will show an increase in receipts, while the three important ones of Rio de Janeiro, Bahia and Pernambuco will show a considerable decrease. Taken all together, the customs receipts of last year will show a large falling off from the two or three preceding years.

The causes of all this are legion—political, financial and industrial. For the last three or four years the state of business in this country has been steadily going from bad to worse. The long credit system gave facilities for transacting business long after the interior became really insolvent, and thus postponed the crash. Recently, however, the importers have begun to realize the extra hazardous character of this system of long credits, and have therefore been steadily cutting them down. Five years ago a "cash" house (and "cash" here means five or six months' credit) was the exception; now the long-credit house is the exception, and business is being as rapidly reduced to a cash basis as outstanding credits will permit. This step, however, was postponed too long, for the outstanding credits are still enormous and the interior is now practically bankrupt.

Three years ago great difficulties were encountered in making collections in the provinces. There was very little money afloat, the masses were earning nothing, and everyone was in debt. There is no man in Brazil so poor that he cannot owe money to some one, and not infrequently for amounts ridiculously disproportionate to his station and means. This state of affairs was principally due to the bad management and extravagance of the large coffee and sugar planters, upon whose industries nearly the entire business of central Brazil depends. Demoralized by the pernicious influences of African slavery, and recklessly over-confident because of the prosperity enjoyed by the coffee and cotton planters during the years of high prices caused by the American civil war, the great proprietors of the country plunged headlong into extravagant expenditures. They lived in the cities and spent their money in idle indulgence. Fortunes were wasted at the gaming table or lavished upon French courtesans, and even to this day there is not a city or village in the whole empire which is not thoroughly debauched, and in which these two evils are not openly countenanced and encouraged. And while all this has been going on the plantations have been left to slave cultivation and to the care of overseers, neither of which is conducive to efficient or economical management. The inevitable result is that the great majority of these plantations are heavily mortgaged, and for years their spendthrift proprietors have been keeping up appearances by borrowing money on their future crops—sometimes two years in advance. And now when low prices and hard times have come the banks have begun to gather in their loans and exact better security, the coffee *commissarios* are stopping their advances and realizing on those already made, and the merchants are stopping or shortening their credits. As might have been foreseen, a great scarcity of money is at once experienced all through the interior. This year, at the time when the proceeds of the coffee crop usually come down to liquidate accounts and make purchases, no money was forthcoming; the crop had in great part gone to square up old debts. Naturally, everyone is now experiencing great difficulty in getting money, and the planters most of all. They are, therefore, beating their breasts in the ante-rooms of the Department of Agriculture and the Chamber of Deputies, clamoring for loan banks, industrial guarantees, bounties, subsidies, anything to save them from the impending ruin and to enable them to live upon borrowed capital at public expense. And as this is a government of planters they are getting all they want, even to loans from the public treasury for private use.

In such a state of affairs, of which this general outline conveys only the faintest idea, what basis can there be for any sound business? Those who are here are compelled to remain and face the crisis as best they can; those who are still out of it will find it politic to stay out. Not that no business is doing and will continue to be done, nor that there are no opportunities for profitable enterprise, but simply because no safe business can now be done in Brazil except on a rigid cash basis and without fixed investments which can be caught in the impending crash.

NEW ORLEANS ANNUAL TRADE REVIEW.

New Orleans, August 25.—Though the business movement of the past year has been less rapid and full than was anticipated, it has nevertheless been fair in the aggregate and quite satisfactory in some lines.

The principal commercial features of the year have been the following: The continuance of the remarkable success of our cotton future business; the marked increase in manufacturing enterprises, especially in a small way; the revival of the grain trade; the number of new buildings built and in course of erection; and last, but not least, the vast improvement in the river and rail transportation and handling facilities. The machine shops, foundries, sugar, cotton, rice and other mills have also shown great improvement, if not in the increase of numbers, at least in the addition of new machinery and improved appliances for the various articles turned out by them. Altogether the past has been fair, the present is good, and the future is generally considered as very favorable.

The clearing-house statement shows the business movement to have been $514,506,891, an increase of $13,030,119 over last year. Early in the fall money was tight, ruling at one time, for A1, as high as 12@15 per cent. per annum. Subsequently it declined to 10@12, and is now quoted at about 8 per cent., but as usual at the approach of the fall season the market hardens on account of the preparations for moving the crops. Exchange has been without any marked feature, with the exception that, owing to the falling off in shipments, especially of cotton, the advance looked for was not realized. The feeling in securities generally has been rather tame, with the exception of occasional spurts of short duration. Louisiana sevens have been sold as low as 58 and as high as 67¼. Premiums have touched 76 and 86. Stocks, as a rule, have been well maintained, and the dividends paid have been fairly satisfactory.

The cotton movement of the past year was altogether different from that of the previous season, which gave full scope to speculation on account of its shortness. The past year showed a gradual decline in prices, owing to the full crop. The receipts of cotton have increased considerably, which is attributed to the enlarged rail movement. The net receipts this year comprise 1,676,000 bales, against 1,177,037 last year, and the exports, according to the United States custom house figures, from August 1, 1882, to August 1, 1883, were as follows:

	Bales.	*Pounds.*	*Value.*
1882–83	1,601,097	777,379,641	$70,665,176
1881–82	1,200,523	554,607,146	62,390,097
1880–81	1,624,283	777,911,102	85,735,091

During the year the highest prices of middling were 12½c., and the lowest 9 9/16c. The sales of spots summed up 1,295,000 bales, against 1,233,078 in 1881–82, and 1,385,125 in 1880–81. The sales of futures comprised 11,750,000 bales, against 16,171,000 in 1881–82, and 10,115,800 in 1880–'81.

The sugar crop was more than double that of last year, comprising 241,000 hogsheads, weighing 303,000,000 pounds, and containing 184,000,000 pounds of brown and 118,000,000 pounds of clarifieds, with the net weight of brown 1,300 pounds, and that of clarifieds 1,230 pounds per hogshead. The crop of molasses was 15,716,755 gallons, against 9,691,104 last year. Prime sugar sold at 6½@6⅞c.; choice, 6¼@7¼c.; yellow clarified, 7⅜@8¼c.; white clarified, 7⅞@8c. Molasses ruled at 30@51c. for fancy and 40@58c. for choice.

The rice crop amounted to 182,000 barrels clean this year, weighing 43,000,000 pounds, against 241,000 barrels clean last year, weighing 55,500,000 pounds. The average weight per barrel was 230 pounds. Prime ruled at 5½@6¼c. and choice at 5¾@6¾c.

There has been considerable increase in the grain and flour trade. In fact, if it were not for the necessity for quarantine the breadstuffs movement would assume quite large proportions not only with European ports, but also with Mexico, Central and South America and the gulf ports.

The receipts of breadstuffs during the past year were as follows:

	1882-83.	1881-82.
Flour, barrels	800,000	760,000
Wheat, bushels	6,200,000	3 37 ,6 7
Corn, bushels	7,600,000	3,235,183
Oats, sacks	750,000	603,000

The prices of flour during the year were $4.50@$4.62½ for family, $5@$6.12½ for choice, and $5.20@$6.37½ for fancy. Bulk corn ruled at 53@61½c. and wheat at $1.03@$1.56. The following were the exports of wheat and corn from August 1, 1882, to August 1, 1883, according to the United States custom-house figures:

	1882-83		1881-82	
	Bushels	*Value.*	*Bushels.*	*Value*
Corn	6,897,738	$4,366,175	827,871	$555,670
Wheat	6,940,772	7,455,961	1,364,700	1,705,201

The exports of flour were 85,000 barrels, valued at about $500,000.

The trade in provisions has also increased considerably during the past year. Prices were about the same as last year up to the time of the panic, since which they have followed the course of the Chicago market. Pork ruled at $23.50@$13.50; bacon 11¼@7c.; dry-salted shoulders 10⅞@6½c.; hams 17½@11½c.; lard 13¼@9c.

RECEIPTS.

	1882-83.	1881-82.
Pork, barrels	46,000	38,593
Lard, kegs	43,030	32,886
Lard, tierces	24,000	16,400
Cheese, boxes	46,000	49,000
Butter, packages	68,000	56,000
Beef, barrels	24,000	7,300
Hams, tierces	10,000	9,500
Bacon, tierces and boxes	17,000	20,000

EXPORTS.

	1882-83, *pounds.*	1881-82, *pounds.*
Pork	429,544	226,711
Lard	165,538	38,774
Cheese	24,043	45,295
Butter	51,230	29,500
Beef	61,615	21,000
Hams	50,129	31,413
Bacon	67,797	79,255

The trade in dry goods, drugs, hardware and merchandise generally, has been fair throughout the season, and, although recently all lines have been reduced to a summer basis, the fall outlook is considered remarkably good.

The total value of imports have been about $9,500,000, against $12,000,000 last year, while the total exports sum up $95,230,000, against $68,200,000 last year.

During the past year 1,152 vessels, carrying 1,062,880 tons, have been entered at this port, against 897 vessels last year, carrying 998,079 tons. The number of vessels cleared during the same time were 1,153, carrying 1,063,267 tons, against 953 vessels last year, carrying 1,038,857 tons.

In the early months of the commercial year the trade was somewhat dull and stagnant, prices continuing to fall from the elevated position attained during the summer months—and not until 1883 had opened could there be said to have been any great improvement. Since January 1 the increase has continued up to a late date, when total non-intercourse was commanded by the Board of Health with all foreign ports of Mexico, South America and West India islands. The foreign shipments from points on the Mississippi sound, for the year ending July 31, represent a movement of 24,000,000 superficial and over 1,000,000 cubic feet of lumber and timber, valued at five hundred and odd thousand dollars; from this city 6,000,000 superficial feet, valued at $150,000.

The local improvements made during last year in new buildings exceed those of any year for a long time. The valuation placed on the same exceeds $3,000,000. The amount of improvements, for which plans and specifications are already proposed, but which will be contracted for in the next three months, is in excess of $1,000,000, not including anything connected with the new Cotton Exchange.

The receipts of lumber for the year aggregate 125,000,000 feet. Stock on hand 18,000,000 feet.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

A debtor by judgment in a federal court cannot be subjected to garnishment at the suit of a creditor who proceeds against him in a state court, according to the opinion of United States Circuit Judge McCrary in the case of Henry vs. The Gold Park Mining Company.

The word "Samaritan" cannot be made a trade-mark for medicines, as in the combination "Samaritan's Root and Herb Juices," according to the opinion of the Pennsylvania Supreme Court in Desmond's appeal, decided on the 16th ult. The court said that the appropriation of the word "Samaritan" in one combination of words would not prevent its being used in all other combinations.

A suit by a national bank against a county treasurer to enjoin the collection of an excessive tax upon its personal property, alleged to be made in violation of the act of Congress permitting the state to tax national banks, presents a case arising under a law of Congress, and is therefore maintainable in a federal court, according to the decision of the United States Circuit Court for the Southern District of Ohio in the case of the Union National Bank vs. Miller.

Where a warehouseman gives a party a receipt for goods conditioned to be delivered to him on payment of charges, and not undertaking to hold or deliver to his order, the mere indorsement over of such receipt to a third person will not constitute the warehouseman a bailee for the latter, according to the opinion of the Massachusetts Supreme Court in the recent case of Hallgarten vs. Oldham. Judge Holmes said that the only way in which a document can be a symbol of goods in a bailee's hands for the purposes of delivery to a purchaser is by his consent to become the purchaser's bailee.

At the final hearing in the suit of the American Bell Telephone Company vs. Dolbear et al. in the United States Circuit Court at Boston Judge Lowell has just rendered a decree in favor of the complainant. At the former hearing, reported in BRADSTREET'S February 3, it was decided that the defendant, whatever the merits of his telephone might be, employed in it a part, at least, of Bell's process. No additional evidence was given at the final hearing, so that the latter was hardly more than a matter of form. The doctrine which Judge Lowell applied to the facts of the case was declared in a recent decision of the Supreme Court of the United States, and was to the effect that if a certain machine or organization is capable of a certain use only under unusual and so to speak abnormal conditions, so that a person of skill and knowledge in the art to which it relates, or a person using the machine, would not, unless by accident, discover that it was capable of such a mode of operation, it should not be considered an anticipation of a machine or organization which is founded upon such a mode of operation.

In his decision in the case of the Chinese laborer Ah Shong, Judge Nelson, of the United States District Court, holds in effect that the Anti-Chinese act of May 6, 1882, was directed against the Chinese not as a race but as a nationality. Ah Shong was born of Chinese parentage in Hong Kong, after its cession by China to Great Britain in 1842, and was therefore a British subject. He was shipped in December last as a carpenter under shipping articles, according to which he was to serve in that capacity until the return of the vessel to her port of discharge. On June 19, the vessel being in Boston harbor, Ah Shong went ashore and refused to return on board the vessel. After a careful examination of our treaty relations with China the judge arrived at the conclusion that the inhibitions of the act of May 6, 1882, are not to be construed as applying to persons of the Chinese race who are not and never were subjects of or residents within the Chinese empire; that Ah Shong was a person of that description, and that therefore his landing was not a violation of the act.

In 1881, one Dice entered into an agreement with the Joliet Manufacturing Company, according to which he was to work for the company named for the term of five years "in such capacity pertaining to the manufacture of shellers and powers, and disposing of the same as the company may consider for their best interest." The contract further provided that Dice "will work for the best interests of the company in every way that he can, and in whatever way such aid can be given shall belong to the company—that is improvements that he may make or cause to be made." While Dice was employed under this agreement the company added to its business the manufacture of "check-rowers," an attachment to a machine for planting corn. Dice was assigned to the superintendence of the manufacture of "check-rowers," and afterward made known to the company that he had conceived an improvement in "check-rowers." Upon the suggestion of Dice, the company directed him to employ his time in perfecting the invention for its benefit, and this was done—Dice perfecting his invention, and in the meantime receiving full pay for his time and services according to the contract. The company brought a suit in chancery to compel Dice to assign to it his invention, and to enjoin him from selling or assigning the same to any other person or persons. An inferior court granted the relief sought, but its decision was reversed by the Illinois Supreme Court, in the case of The Joliet Manufacturing Company vs. Dice. The Supreme Court declared the general rule to be that where a mechanic, in laboring for an employer in the construction of a machine, invents a valuable improvement, the invention is the property of the inventor and not that of his employer. The law inclines so strongly to the rule that the invention shall be the property of the inventor that nothing short of a clear and specific contract to that effect will vest the property of the invention in the employer to the exclusion of the inventor. In the opinion of the court no such specific contract was shown in the case under consideration. The contract between Dice and the company had reference only to the

manufacture of "shellers and powers," and provided that improvements made by him therein should belong to the company. It could not be held to cover the improvements made in "check-rowers."

The meaning of the word "author" in relation to the law of copyright was under consideration in the English Court of Appeals in the recent case of Nottage et al. vs. Jackson. The plaintiffs, carrying on business as the London Stereoscopic Company, sued the defendant for the infringement of their alleged copyright in a photograph of the Australian Cricket Team who visited England last year. The defendant it appeared had purchased a copy of the photograph, had had it reprinted in Germany, and was selling the copies for his own profit. The defendant contended that the plaintiffs had no copyright, inasmuch as although registered as proprietors and authors under the Copyright act they were not in fact the "authors" within the meaning of that act and could not properly claim protection. The photograph it appeared was taken by an artist in the employ of the plaintiffs. The defendant had judgment in the court below, and this decision was confirmed by the Court of Appeal on the 2d ult. As will be seen from the opinion of the court it is a point of no small difficulty to determine the authorship of a photograph. The Master of the Rolls said that it was plain that the plaintiffs could only be entitled to the copyright if they were the "authors" of the photograph within the act. If the plaintiffs were right, then two persons or any number of persons might be registered as authors, and in that case how long was the copyright to endure? Again, was it to be held that a person who kept a photographic establishment, but never went near it himself, was the author of the photographs taken there? On the other hand, could only the actual operator who prepared the plate or removed the cap from the camera be said to be the author? If the matter were to be viewed in that way, then, strictly speaking, the sun was the author. The only manner of arriving at a proper construction of the statute was to see who was most nearly the effective cause of the taking of the picture, and the person who superintended the actual operation most nearly answered that description. It was a question of fact in each case who that person was. At any rate, the plaintiffs did not answer the description in the present instance, and they could not be held to be the authors of the photograph.

In the case of Lee vs. the St. Paul, Minneapolis & Manitoba Railway Company, decided recently by the Supreme Court of Minnesota, it appeared that the plaintiff shipped at Chicago, by the Chicago & Northwestern Railroad, a car-load of stoves consigned to himself at Moorhead, Minn. The stoves were carried over the Chicago & Northwestern and Omaha railroads to St. Paul and thence to their destination over the defendant's line. The defendant, instead of transferring them to its own cars at St. Paul, allowed them to be carried over its own road in the car in which they had been carried from Chicago and billed them through in that car from St. Paul to Moorhead without opening it or inspecting the contents. When the car was opened upon reaching its destination the stoves were found to be badly broken. Plaintiff sued the defendant for damages and recovered judgment. This judgment and an order denying a new trial were affirmed by the Supreme Court, which in the course of its opinion said: Where goods have been transported by several successive carriers, and it appears that they were in good condition when delivered to the first carrier, the jury may presume, in the absence of evidence to the contrary, that the goods reached the hands of the last carrier in the same condition as when delivered to the first carrier on the line. This rule is founded upon important considerations of public policy. This rule is not modified or changed by the fact that the last carrier, instead of transferring the goods, transported them over its line in the foreign car in which it received them. As a matter of convenience to the carriers themselves this is usually done where the freight is received in car-loads for a common destination. To indulge in a different presumption in such cases would, as business is now conducted, practically abrogate the rule referred to. We can see no distinction in this respect between goods transported by the car-load in a locked car and goods transported in a package nailed or otherwise fastened up. If there be any difference, it would be in favor of applying the rule more strictly in the former case than in the latter; for we see no reason why the carrier would not have the right to open the car for the purpose of inspecting the contents—a right which they might not have in the case of closed packages. Of course we are not now speaking of cars in transit from a foreign country in bond and under the seal of the United States Custom House authorities.

BUSINESS NOTES.

There were 199 failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* for the week ending August 11, against 199 in the corresponding week in 1882 and 253 in the like week in 1881. The total for England and Wales was 177, against 180 and 229 in the corresponding weeks respectively in 1882 and 1881. The total for Scotland was 22, against 11 and 18. None were reported from Ireland. In the corresponding weeks in 1882 and 1881, respectively, there were 8 and 6.

The Corn Exchange National Bank of Chicago has been organized with a capital of $1,000,000; Sidney A. Kent president; Orson Smith cashier. The National Bank of El Dorado, Kan., has been organized with a capital of $50,000; John Foutch president; F. P. Gillespie cashier. The Traders' Bank of Kansas City, Mo., has been incorporated with an authorized capital of $600,000. The Thornton Banking Company of Nevada, Mo., has increased the capital stock from $50,000 to $100,000. The Second National Bank of Bedford, Ind., has surrendered its charter after an existence of only twenty days. Grinstead & Bradley, bankers, of Lexington, Ky., have been succeeded by the Third National Bank. The First National Bank of Leslie, Mich., has elected M. E. Rumsey president, in place of A. Walker. The Sycamore (Ill.) National Bank has elected Everell F. Dutton president, in place of James S. Waterman. Charles L. Thayer has resigned as president of the National City Bank of Boston, on account of ill health; Samuel R. Payson succeeds him.

The New Orleans *Times-Democrat*, in calling to mind the progress made in preparing for the forthcoming World's Industrial and Cotton Centennial Exposition, to be held at that city, remarks that New Orleans has now grappled with the project in dead earnest, and has gone so far as to ask the President to issue a proclamation announcing that the exposition will be opened on the day set by the act of Congress. As is natural to expect, it is noted that New Orleans will derive advantages from the exposition of no less importance than those which will be reaped by the entire south. The former is the chief cotton market of the south, and is the best place for an exhibition which is to show the great staple in all its manifold phases of production and manufacture.

The Minneapolis *Northwestern Miller* estimates that the present daily production of flour from the mills at that city is 26,660 barrels, against 21,250 barrels daily one year ago, an excess of 5,410 barrels. The *Pioneer Press* indulges in some speculation as to what these figures mean, and furnishes the following result: "The number of bushels of wheat required to make the 26,660 barrels of flour per day would be 133,300, the transportation of which would take 266 cars, or a solid train of a mile and three-quarters in length. Beside the flour, the daily product of millstuff would be 1,400 tons, to haul both of which would require 328 cars and 16 locomotives, or more than two miles of solid train. At an average price of $4 per barrel for flour and $8 per ton for millstuff, the total daily production of the mills amounts to $117,728, or nearly $37,000,000 in the course of a year."

An exchange states that the republic of Guatemala has arranged with a well-known Ceylon planter to select seeds for 5,000,000 cinchona trees. It is added that Central America has been explored for 1,000 miles in order to determine the best sites for planting the same, and the journal giving currency to the statement adds "that the rapid increase in the number of uses to which cinchona bark is put, not only for the manufacture of quinine and as an ingredient in the substitute for hops, but also for various commercial purposes, has led President Barrios of Guatemala to try this experiment. The cinchona tree was introduced into India in 1879, at the instance of the British government, and the culture was so profitable that not only has the original investment of £150,000 been repaid, but the trees have been valued at £1,000,000. The cinchona tree requires a tropical climate and a plentiful rainfall." While this tree will not grow in the United States it is thought it might be cultivated with profit in Mexico.

The Northern Pacific Railroad was practically completed last week by the union of the eastern and western track extensions at a point fifty-five miles west of Helena, Mon. It is reported that during twenty days to and including that on which the line was made continuous from Minneapolis to the Pacific fifty miles of track had been laid, which, it is unnecessary to add, is rapid track-laying. The feat acquires significance from the alleged completion of the last nine miles and 350 feet in twenty-four hours by the united forces of the two gangs of workmen. Meanwhile Mr. Villard and his German guests and others have gone west to participate in the formal ceremonies to take place September 8, when the golden spike is to be driven and speeches are to be made, while the foreigners have an opportunity to observe the excellent lands which the company has for sale cheap and the journalists in the party send home glowing accounts of the great future in store for America's northwest. It has been remarked that Mr. Villard's party are, singularly, almost all from Germany. But some captious critic has explained this by saying that the bulk of our immigrants, and certainly a most desirable variety of them, are also, and for some time are likely to continue to be, from Germany.

The New York Produce Exchange annual report for 1882 furnishes some interesting statistics relative to the exports of breadstuffs. The foreign shipments of flour from September 1, 1881, to September 1, 1882, amounted to 3,657,355 barrels. Great Britain took 2,201,038 barrels and the German, Dutch and Belgian ports 238,599 barrels. Flour exports have fallen off during the last year as compared with the two years preceding. From September 1, 1880, to September 1, 1881, 5,174,976 barrels were exported, while from September, 1879, to September, 1880, our total exports were 4,113,854 barrels. From September 1, 1881, to the same period in 1882 the total exports of wheat were 35,114,128 bushels. Great Britain took 21,733,663 bushels, or about 60 per cent. of the whole. Corn exports during the last named period were 14,260,411 bushels, Great Britain taking 9,451,673 bushels. From September 1, 1880, to September 1, 1881, our exports were 40,923,845; but from September 1, 1879, to September 1, 1880, there were exported 45,981,100 bushels. The grain shipments from New York to Europe were, in 1882, 46,162,738 bushels, of which 26,694,846 were sent to Great Britain and 5,287,451 to Belgium; Sweden ranking last, taking only 57,729 bushels. The total quantity was transported by 1,069 steamers and 240 sailing vessels. In 1881 there were 72,276,312 bushels carried by 1,302 steamers and 554 sailing vessels.

The city of Portland, Ore., the western terminus of the new Northern Pacific Railway, contains about 35,000 population, and a spirit which for enterprise permits no competition among even the ambitious metropolitan cities of the west and northwest. Every new move is made with reference to the actual or supposed wants of a city much larger than Portland now is—and in every way does the idea shoot forth that Oregon's metropolis, while relatively large is to be a "future great" after the true Kansas City and Denver pattern. A late copy of the *Northwest News* of Portland—a new journal by the way, which has the finger-marks of success already upon it—gives up considerable space to a description of the new flour mills and elevators now building there. This is a most important step for the north Pacific coast, and should prove a very prosperous venture for those interested. The structures are on the east bank of the Willamette river. The mill building is now complete and the contractors are placing the machinery in position. The elevator building is partially completed only. Six weeks more will see the building done, and the mill will doubtless be in running order by October, when it is expected that all buildings will have been completed and preparations made for producing flour. The elevator and warehouses are all of the late and approved patterns, and, as to size, are believed to exceed any on the coast, with a possible (but unknown) exception in California. The capacity of the flouring mill is over 1,000 barrels per day, and that of the elevators and conveyors is 500 bushels per hour. The total cost of the mill, elevator, wharf, machinery, etc., is estimated at $190,000.

The growth of the installment plan of making purchases in New York city has attained large proportions. Beginning nominally with the furniture and piano trades, it has extended into almost all retail departments. Several prominent house-furnishing establishments have been making a specialty of trading on the basis of many small and long-deferred payments after a merely nominal payment in cash down. The welcome features of this plan, in a large city like New York, and where the cost of living is high, have naturally brought it not only a very heavy patronage, but have fostered abuses. Irresponsible parties canvass the city and make sales to private individuals of furniture, pianos, domestic utensils, dresses, dress goods, clothing, millinery, and other desirable articles, with or without a part payment in advance. Then follows oftentimes a constant nagging of the foolish purchaser on partial payments. In not a few instances the reputed salesmen of the goods forcibly repossess themselves of goods on which there has been a default in payments, without recourse to the law. These instances, of course, are included under the abuses to which the system has been subjected, for there are a number of responsible and respectable houses dealing on the installment plan with whom no difficulty within the limits of the bond—the lease—need be expected. The overdoing of the installment plan has suggested to some furniture dealers the wisdom of a return to the cash payment system again. To this legislative action at Albany is suggested, and it is announced that such an act has been drafted. The act aims to protect the purchaser while it does not infringe upon the vendor's rights, and secures a just distribution of the proceeds of the property in case the owner should make default. It will make a purchaser of property, after the payment of certain sums, the owner of such property, and it will not be lawful for the person from whom it is purchased to remove or recover possession except as prescribed in the act. Where an installment due remains unpaid for three days after payment is demanded action may be brought for the amount due. If the plaintiff obtains a judgment execution may be issued against the property, and it shall be exempt from levy and sale. No more property shall be levied on or sold than will pay fees, with the cost and charges for selling. In no case shall an auctioneer be employed at the request of the debtor. In many respects these provisions will commend themselves to the time-purchaser. Dealers may well be expected to regard them differently.

About two weeks ago a correspondent of the Philadelphia *Press* had an interesting conversation with Captain James B. Eads, the eminent engineer, the builder of the St. Louis bridge across the Mississippi and of the jetties at the mouth of that river. Captain Eads intimated that he considered all attempts to get Congress to guarantee 6 per cent. interest on $50,000,000 capital stock of the proposed Tehuantepec Ship Railway Company as now useless, but said that if he lived five years longer the railway will surely be built. He expects to enlist English capital, and thinks the time will come "when Americans will regret that Congress did not accept my (his) proposition." The isthmus of Tehuantepec is 1,200 miles north, on an air line, from the isthmus of Panama, and the proposed route across it is 160 miles long. Four surveying parties have gone entirely over the ground. This was necessary, as by the terms of the concession work was to have been begun prior to May, 1883. Ten years were allowed in which to complete the railway, and Captain Eads thinks the work can be completed within four years when once begun. There is very little grade to overcome—the heaviest being but fifty-three feet to the mile. As to the impracticability of lifting a large ship out of the water and carrying it in a car, it is related that vessels of the largest tonnage, loaded, can be taken from the water and carried upon railways, and that it is done frequently at Liverpool, Malta, Bombay and other ports. The conditions being the same the journey can, of course, be prolonged. In explaining the details of a journey of a ship on land the captain stated that a very simple arrangement of supports under the ship enables the weight to be distributed equally upon all of the wheels. The wheels will be sufficient in number to reduce the load upon each to considerably less than that imposed by the driving wheels of some of the locomotives now in use. As the railway will be practically straight, the wheels can be placed much closer together than in the ordinary railway trains, and as the speed will be limited to ten miles per hour smaller wheels can be used. Where it is necessary to change the direction of the road turn-tables will be used on which the ship and locomotives can be turned to avoid curves. Only two such turn-tables will be needed. The railway will be built to accommodate the largest ships now employed between England and the north Pacific coast. Four tracks are included in the plan, and for a loaded ship of 5,000 tons the car will be 400 feet long, will weigh 600 tons, and have 140 wheels, twenty-six inches in diameter, on each rail. Incidentally it was thrown out that propositions have come to Mr. Eads from England to know his terms for building a ship railway across the isthmus of Suez. He says it would cost from $25,000,000 to $30,000,000, while the Suez canal cost $100,000,000.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

Distrust has by no means vanished from the stock market, but the general feeling is better than it has been at any time since the heavy liquidation was precipitated. The events of the week have demonstrated that the crisis is passed. This remark does not imply that there is going to be a steady and uninterrupted advance. It means that there is no likelihood of what might be termed a shake-up, one way or the other. Prices are not apt to go up with a bound nor down with a crash. In periods of comparative quiet the figures rise and fall within a reasonable limit without creating excitement. That, in a measure, is the idea that may be imparted. After the experience that Wall street has had it can hardly be expected that the market will move on uneventfully. There are certain elements, some of them disturbing, that will produce changes more marked than would be seen in a period of tranquillity, but not calculated to create apprehension of direful consequences. The panicky tone so distinguishable two weeks ago is missing now. Its place has been taken by a feeling more of the nature of mild security. Bear attacks no longer beat down the entire list, but merely the vulnerable stocks. A good explanation of this is found in the incontrovertible fact that many of the securities have touched points below which the worst of reasons would not send them. They cannot go lower, and if they serve no other purpose they perform the work of keeping the market on a basis that permits the founding of a belief upon which some reliance can be placed. The stocks that are classed fancy are fairly well known, and no warning is needed to exercise care in handling them. Their precarious nature keeps conservative speculators away from them. The venturesome operators who take hold of them do so at their own risk and with a full understanding of the doubt that hangs over them.

The bears have not done with the market, although their front is not as strong as it was. Instead of hammering at the list they have picked out a few stocks to assail. As a rule there is more reason in bear arguments than bull. The bulls are inclined to be visionary, while the bears take the hard facts and use them to the best advantage. There is usually some reason for the attacks of the bears, and that was what has made their raids so successful. Leaving the remainder of the list alone they have picked out special objects of attack, and appear to be determined to keep at them until they drag them down to a level with the remainder of the list. The stocks that they think too high are the Vanderbilts, the Villards and the coal stocks. There are two of the Gould stocks that the bears look upon with disfavor. They are Missouri Pacific and Western Union; but Mr. Gould has protected them so well, to the neglect of the others, thus far that they have enjoyed partial immunity. Louisville & Nashville, another mercurial stock, is one that the bears are disposed to deal ungently with. They do not like it, and evince a strong inclination to make trouble for it. The attempt to recover back taxes from it, together with other roads, and the positive grounds taken by the Controller of the state of Tennessee, who makes the demand, as to the legality of his position, have militated against the stock. Then, again, the hands that the road is in are not intended to inspire confidence in it. The men who control it are regarded as essentially speculators. People fear to touch the stock, as they cannot form any substantial idea what will be done with it. How the men who manage railroad properties may use their power is aptly illustrated in the case of the Denver & Rio Grande Railroad. The salary of the president is $25,000 a year. The statement is made, and remains uncontradicted, that the road has in some years yielded the president $50,000 outside of his salary. This has been brought about by speculation. Denver has always been an active stock, and it has been in the power of the president to depress it at will. For instance, he might remark to a friend that he was considering the advisability of making a new issue of bonds. The friend could not keep what he had been told to himself, and in a short time the depressing words would be circulated from one end of the street to the other. The consequence would be the stock would tumble at a rate that would astonish those who did not happen to know the reason. If a reporter went to the president to confirm the statement that reached his ears, the president would utter an indignant denial, and accuse the bears of concocting the story to put down the stock. Before the denial could be made as general as the discouraging words, the president would have bought largely and would sell out at a handsome profit on the advance that followed. Another thing that has militated against Louisville and Nashville has been the movements of H. Victor Newcomb, who used to be a controlling spirit in the road, but who was forced out. He is believed by operators to be short of the stock, and, as his sources of information regarding the road are supposed to be the best, much significance is attached to his attitude, which has had great effect on dealers in the stock.

Of the Vanderbilt's, Lake Shore and New York Central are the bear cards. The former has suffered terribly. It has been driven down below par every day since Monday. Wednesday, for the first time, it closed below par—at 99¾. W. K. Vanderbilt was down town that day and was reported a heavy seller of Lake Shore and New York Central, and Lackawanna, Reading and Michigan Central besides. New York Central opened that day at 115⅛ and closed at 114¾. An announcement was made, on what was alleged to be good authority, that the directors were considering a reduction of the Lake Shore quarterly dividend from 2 to 1½ per cent. That was not without effect. New York Central did not escape the influence of the report. If Lake Shore reduced its dividend it was argued that New York Central must do likewise. Besides, the reports of earnings were taken to show that the road could not earn 8 per cent. New York Central depends more upon Lake Shore than any of the other roads. The partial stagnation in the coal and iron trade and the competition of the water routes have influenced the tonnage of Lake Shore. The pool troubles have made matters worse. The Lake Shore has not been receiving the amount of business it ought to in comparison with competing lines, the Grand Trunk and Erie among others. The latter two, particularly the former, have been receiving more than their share, and have been accused of cutting the rates to secure traffic. Charges were preferred to Commissioner Fink on Thursday against the Erie Railroad by the New York Central. Its western connections were said to have been doing the cutting. As for the Grand Trunk, that has been accused of cutting ever since the trunk-line pool was formed, and the accusation has been borne out by the figures. A disruption of the pool would be something serious, and until this possibility is dissipated there will be effective arguments against Lake Shore and New York Central. These roads are among the solid ones, and when their stocks give way there is some cause for it.

The Villards are regarded still as inflated stocks. With all the hammering they have endured the bears insist that they must drop lower. In the first place they say there is not the business on the roads, the Northern Pacific in particular, to sustain them, and will not be for years. They are looked upon as being so much overcapitalized that their proper valuation demands a large decrease in the prices. There is too much mystery about the actual conditions of the Villards to warrant prudent men in trusting to them. The stories that Northern Pacific has a debt of $17,000,000 and that the Oregon Transcontinental is to issue $15,000,000 in debenture bonds have helped the stocks on their downward course. That no reply has been made to the assertion that the $40,000,000 of Oregon Trancontinental stock paid in is not in the treasury, but pledged as collateral security for loans, has confirmed the belief that there is a good deal of truth in it, and has added to the depression. Considerable significance is extracted from the decline of the Villards in the very midst of the boom gotten up on the occasion of the opening of the Northern Pacific.

The coal stocks, Lackawanna, Reading and Jersey Central, are credited with being too high, for one reason, that large supplies of coal are accumulated at the termini of the roads and other storage points. The advance in the price of coal in view of this is not thought to be warranted, although the time for an increase in consumption is approaching. Outside of Missouri Pacific and Western Union the Gould stocks have been raided down the scale until they are helpless. Whether Missouri Pacific and Western will be attacked is not certain. If they are, the chances are Mr. Gould will stand firmly by them, unless he sees an opportunity to profit by letting them go down. Nearly every one is disposed to think that there is some reason for delay in naming a president for Denver & Rio Grande. The managers handle the stock to further their personal ends, and that they have some job in hand is accepted as a fact. There is still good picking in Denver for the insiders, and they will probably make the best of their knowledge.

At this writing the tendency, with the exceptions named, is upward. How long it will last can only be determined by events. Another decline is expected. It will not be a sharp, sudden nor heavy one, unless the advance is too rapid and large, which it is not thought will be the case. A quick rise, after what the street has gone through, is not natural and cannot be lasting. After the recovery that is at present in progress, well-informed operators say there must be a decline though not serious. A zig-zag market is what is mapped out for the next few weeks. Much will depend on the corn crop. Only frost can dispel the calculations made. The crop, judging from the advices, will be an average but not unusually large one. If it proves as it is expected it will there will be a steady market and prices will range as a rule near the existing figures for some time. The market closed Saturday weak, with a fractional decline from the day before. Monday things looked ugly. Prices were knocked down. The Villards and the coal stocks offered no resistance. There was a rally in the afternoon, attended by a slight recovery, but values generally closed from ¾ to 3⅛ lower. The next day stocks, except the bear cards, began to exhibit strength, and from that time figures slowly advanced. Until a demand sets in for long or permanent holding, however, there cannot easily be any substantial advance.

The loan market has been easy during the week. Call loans have averaged the same as they did last week, from 2 to 2½ per cent., and time loans 5 per cent. The call from the west induces the belief that the rate will increase before long. Foreign exchange presents no new features. The market has been quiet and firm. There has been scarcely any change in the figures since last week. In the government bond market there has been a steady business. No great activity has prevailed. The following were the closing quotations yesterday:

	Aug. 24, bid.	Aug. 31, bid.	Aug. 31, asked.
U. S. 4½s 1891, registered	112¼	..	..
U. S. coupon	113⅜	112¼	112⅜
U. S. 4s 1907, registered	110⅜	113⅜	113½
U. S. 4s 1907, coupon	119⅜	119⅜	119½

The bank statement last week showed that the banks had been gainers from the Treasury operations for the previous two weeks. The movement of money to the interior is shown to have been large, caused in a great measure by the demand to move the crops. The surplus reserve was reduced $1,057,825, bringing it down to $5,821,805. The following are the changes in the items:

	Aug. 18.	Aug. 25.	Differences.
Loans	$329,449,700	$327,595,600	Dec. $1,854,100
Specie	61,236,900	59,829,300	Dec. 1,407,400
Legal-tenders	26,549,500	25,312,000	Dec. 1,237,500
Deposits	323,626,200	317,277,900	Dec. 6,438,300
Circulation	15,545,000	15,618,600	Inc. 73,600

The proportion of total reserve to liabilities is now 26.83 per cent., against 25.36 per cent. in the same week of 1882.

From Savannah, Ga.: The money market is easy on good commercial paper. The demand is fair. Little is doing in stocks and bonds. More investments are being made in real estate.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

Special telegrams to BRADSTREET'S this week state that a distinct improvement has taken place in the fall trade movement reported one week ago. At Minneapolis, St. Paul and Kansas City the prospects are brightest for an early and full volume of trade. While trading has been greatly curtailed of late in the northwest, the harvest of wheat is now about completed, and farmers in that region have never been better able to supply their wants than at present. The call for dry goods from Boston, New York and Philadelphia is a conspicuous feature of the week's report, and duplicate as well as new orders by mail are building up a large total of transactions. In the south the most favorable reports respecting general trade come from Savannah. Chicago, Louisville, Peoria, Ill., and Burlington, Iowa, are enjoying a good seasonable trade. From Chicago large sums are being shipped by the banks to the interior in response to the liberal receipts of produce by rail from the entire region tributary to that city. Business is said to be steadily improving at all of the cities named, and the report is made that the outlook for the fall trade is very favorable indeed. At Cleveland and St. Louis but a moderate volume of business has been transacted of late, although there are no depressing influences perceptible. Pittsburgh has been similarly affected. At Cincinnati, Detroit, Milwaukee, Evansville and Topeka but a moderate degree of animation has been observed. The general industrial situation has not changed materially, and the building strikes in New York continue. The wheat market has been dull and depressed. This has been caused by heavy receipts at the west, excellent harvesting weather and lower cables from Europe. Corn, for similar reasons, has latterly shown some weakness, and speculation has been restricted. There is yet time for frost to injure this cereal, but ten days of weather like that of the past week will insure more than a full average crop, although its quality may have to be called in question. Provisions have been weak, after more strength and slightly higher prices earlier in the week. The neglect of consumers as well as speculators, and heavy stocks abroad, in connection with continued increased receipts of hogs at the west, are responsible for this. Anthracite coal has been advanced 10@25c. per ton for domestic sizes for eastern shipment. The consumption continues at about the average of the past month. At the west the movement is active and prices steady. Petroleum has been weak and lower in the face of the expected August report of operations from the producing regions, which turned out to be very bearish. Its effect had been discounted, however, before its publication. There is talk of a turn in prices of certificates of crude, which is probably founded on a belief that some movement must come after a month's dalliance at $1.07@$1.08. Ocean freights have been irregular at an average about equal to that of the preceding week. The wool trade has continued fairly active at firm prices. There were 148 failures reported to BRADSTREET'S during the past week, of which 126 were in the United States and 22 in Canada. The total in this country is the smallest number in any one week since October 14, 1882, is 53 less than last week, but 16 more than in the corresponding week in 1882, and 22 more than in the like week in 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Money is in good demand at 6 per cent.; collections are easier and the trade outlook is much improved. Sales are steadily increasing and general business looking up.

From Boston, Mass.: General trade shows a further gain, and in most of the leading branches the fall movement is well under way. The weather has been quite cool, which has the effect of stimulating orders from all parts of New England. In all kinds of manufactured goods the jobbing trade has been particularly active, and so far August business is fully as large as for the same month last year. The wool sales foot up nearly as large as last week and prices rule steady. In financial circles there is a confident feeling that the weak spots have all been revealed, and that business as it now stands is on a healthy basis. The money market is working comfortably, with an easier feeling at the close than at the beginning of the week.

From Philadelphia, Pa.: There is increased activity in nearly all branches of jobbing trade and the indications are favorable for further improvement in the early part of September. Merchants are encouraged by glowing accounts from western correspondents and a substantial increase of orders in many lines, and generally take a hopeful view of the situation. Money is more abundant and easier. Collections, as a rule, are reported satisfactory.

From Cincinnati, Ohio: The improvement in trade is light, owing to local causes. Politics and the city finances have each contributed to the trade disturbance, and a general quietude rests upon all lines except among those engaged in the preparations for the approaching exposition. Merchants and manufacturers in all lines are preparing to receive their customers upon that occasion. Interest has advanced to 6 per cent. on call loans and 7 on prime paper.

From Cleveland, Ohio: Collections throughout the month have not compared favorably with August of last year, and the jobbing trade has been a little quiet. The outlook for fall business is regarded fairly promising by most merchants. The money market is a little close, though for legitimate wants the supply is ample.

From Evansville, Ind.: Trade is quiet and rather inactive, and collections are reported somewhat slow. The banks say that they are unable to supply the demand for money. The outlook for the fall trade is good.

From Louisville, Ky.: The fall business is steadily improving. Many buyers are visiting this market, and jobbing houses are briskly employed. Money is in fair regular demand and in sufficient supply. Rates are firm at 7 per cent. Exchange is scarce at 75c. premium.

From St. Louis, Mo.: General trade shows a moderate improvement. Collections are easy from almost all directions. Money continues active, and the principal demand is from the cotton interest, jobbing and manufacturing lines. New York exchange is par to 50c. discount; prime commercial bills $1 discount.

From Kansas City, Mo.: Jobbers in every line report the heaviest trade in the history of the city, the increase over that of past seasons ranging from 25 to 40 per cent. Collections are good, and the outlook is excellent.

From Peoria, Ill.: A general improvement in trade is reported in all lines, though collections are backward. The opening of the fair will enliven retail trade.

From Detroit, Mich.: In general trade circles it has been comparatively quiet, but with business up to the average for the season.

From Burlington, Iowa: Business generally is reported as steadily increasing in volume. All lines are doing a satisfactory trade, though jobbers are the most favored. The retail trade is quiet as yet.

From Milwaukee, Wis.: The merchandise markets are steady. Sales are fair and collections satisfactory. Money easy at 6 to 8 per cent.

From St. Paul, Minn.: General trade improved and healthy, though city merchants are not pressing sales. Most customers are as conservative as sellers. Last year farmers bought more than they wanted because of grain in the fields, which in some sections did not finally yield well. This drove debtors to the danger line in credits. Having learned a lesson, they are now at the other extreme restricting purchases till they can actually see the threshed grain in the granaries. Crops being late, the regular fall trade is retarded, though confidence is now stronger. Money is in active demand, the banks discriminating on paper to accumulate loanable funds for future demand for crop movements. Collections are improving according to the approach to harvest completion.

From Minneapolis, Minn.: There is a marked increase in demand for goods at jobbing houses. Country dealers are in the city in large force, and are free buyers, as country stocks are now much reduced under the policy pursued during the last six months. The country trade was never in a more heathy condition than to-day, and a very large fall trade is assured. There is increased activity in all lines of jobbing. The money market is active and works rather close. Bankers are fortifying themselves preparatory to the movement of the wheat crop, when the call for money will be active and eastern exchange steady.

From Topeka, Kan.: General trade is quiet. Collections are good. Provisions are in fair demand.

From San Francisco, Cal.: The outlook for trade is excellent. There are no special features to note. Fall trade is having a healthy opening.

From Baltimore, Md.: In some departments of trade there is more activity noticeable, although the general volume of business is not materially changed.

From Norfolk, Va.: Trade generally is getting a little more active. Most branches feel the influence of the approaching busy season. It is feared the drouth will affect the maturing crops. Collections are only fair. Money is easy.

From Wilmington, N. C.: General business is improving and the outlook is favorable.

From Savannah, Ga.: Trade in all wholesale lines for the past few days has shown an increased activity, and retail business has slightly improved.

From Galveston, Tex.: The general jobbing trade is active.

From Chicago, Ill.: Money easy at 5@7; demand for legitimate business fair. Speculation is light. Exchange is 50c. discount. Shipments of money to the country are liberal. Groceries are steady, with a slight improvement on last week. Linseed oil is in small supply and firmly held.

INDUSTRIAL.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Workmen in all branches appear to be fully employed, and there are very few labor troubles in this section.

BREADSTUFFS ABROAD.

Cables from London during the earlier portion of the week did nothing in aid of the longs on wheat, who, while in a large majority on 'change, found the general situation against them. The weather in the United Kingdom, which began pleasantly, ended less so, but orders were few and prices found the upward path strewn with many obstacles. The news from the European wheat regions is no more satisfactory than has been chronicled in these columns for some weeks past. The European wheat crop, as a whole, is decidedly below an average. Australia's crop is no more satisfactory, being below an average. India and Egypt alone have good crops among foreign wheat growers of note. The Indian wheat harvest is, of course, not definitely known; but judging from the liberal shipments thence the yield has been a good one. In the twelve months ended June 30, 1883, the shipments from India reached a total of about 24,000,000 bushels, against 37,072,000 bushels in the previous year. What they may be in the coming season seems to be a question of price; high prices would doubtless attract a quantity equal to, and perhaps above, that in 1881-82, and low prices have a contrary effect. In the United Kingdom the imports from India in the past twelve months have been 13,096,000 bushels. Late continental wheat crop advices are, that in France the reports have remained unfavorable as a whole, and, though threshing in the north will have to be awaited before coming to a final decision as to the total yield, the most reliable reports agree in stating that the minimum deficiency compared with last year will be 80,000,000 bushels, but the quality promises to be superior to that of last year. In Germany the continued rain is stated to be disastrous in its effect upon the crops, as well as in Austria-Hungary, where it is evident that there will be a decided deficiency in the wheat and rye crops compared with last year. In the Danubian principalities wheat and maize are likewise reported to be seriously deficient, while from Russia the advices are less unanimous in declaring for a large crop. The London *Miller* finds reason to place confidence in lower estimates of the wheat crop in the United States, saying: "The Atlantic Milling Company, of St. Louis, estimates the total wheat crop at 390,000,000 bushels only. We do not attach much importance to this estimate, but we are bound to say that the latest intelligence is not favorable to a belief in as good a yield as was expected a fortnight ago. Then the most serious estimates put forward were those of 430,000,000 to 450,000,000 bushels; now 410,000,000 to 430,000,000 bushels is about the range." In discussing the situation abroad, not only from the standpoint of the impracticability of estimating the Indian surplus, but in reference to the recent advance in prices here and abroad (a fortnight ago), the London *Millers' Gazette* says that there was plenty of ground for the appreciation in prices, and remains plenty of ground for a future further one, on the sole basis of the prospective almost general deficiency in the crops, which in America, France, England, Germany, Austria-Hungary and Roumania amounts from 200,000,000 to 240,000,000 bushels compared with last year. "Against this deficiency good stocks can weigh but little."

The quantity of grain in passage for the United Kingdom, August 30, as reported by Beerbohm's cable, was as follows:

	Wheat. Qrs.	*Maize. Qrs.*
To the United Kingdom	1,975,000	300,000
To continent	560,000	65,000
Total quarters	2,535,000	365,000
Equal bushels	20,280,000	2,902,000

Compared with the previous week:

	Wheat, Qrs.	*Maize, Qrs.*
To the United Kingdom	1,725,000	230,000
To continent	590,000	45,000
Total quarters	2,315,000	275,000
Equal bushels	18,520,000	2,200,000
Increase, bushels	1,760,000	720,000

AMERICAN WHEAT MARKETS.

On Saturday last, as may be expected at this period, the volume of orders was restricted. This lack of support, in connection with lower prices abroad and good weather in the west, at home, conspired to depress prices. On Monday, after a decline at the opening, renewed buying buoyed up prices and left them 1c. higher than at the close on Saturday. Tuesday again was an unsatisfactory day, for, while the majority of operators appeared to be on the long side of the market, prices fell away. Exporters continued indifferent, and shipments were not noticeable. On Wednesday the bidding was far from being animated. Trading at New York was rather of the scalping order, though some large transactions were noted at the west. The market advanced slightly, but closed near where it left off last Friday, at $1.17 for August. Exporters exhibited no more animation, and the local demand was light. On Thursday the better weather here and lower cables from abroad depressed prices, which went off ½c. Friday revealed no special strength, and the tendency was lower. The export demand was not conspicuous.

It is noted in the New York Produce Exchange circular that the movement of winter wheat has probably reached its maximum, and that receipts at the ports will show less and less of the same from now on. This is applied particularly to wheat from Ohio, Indiana and Illinois, and from Kansas, "where the crop has been fair." In reference to the last remark we print the following abstract from the July report of the secretary of the Kansas State Board of Agriculture: "The area harvested in 1883 is larger than that of 1882 by 14,520 acres, an increase of only 1 per cent. The average yield of the wheat crop has been difficult to determine this year. The southeastern portion of the state, having a fair proportion of the area, has been especially difficult, and it is only now, while the crop is being threshed, that the yield can be approximated with any degree of certainty. On the uplands in this section, where the crop had no protection from the severe storms of winter, the yield from that small proportion of the area that was harvested did not exceed six bushels per acre—hardly enough product to remunerate for the labor expended. On the bottoms a different state of things has existed. The crop was partially sheltered, it was generally sown earlier, and more care was taken in its cultivation." The movement of the harvested spring wheat has been fairly active, but none was recorded of consequence at Duluth last week.

The winter wheat movement has been more noticeable at Detroit. It is also worthy of note that the receipts at the lake ports and the exports from the Atlantic ports have been very nearly equal during the past two weeks.

The receipts of wheat at tide-water for the week ending August 25 increased to 2,680,749 bushels from August 18, when they were 2,095,635 bushels. The exports from the Atlantic ports for the week ended August 25 amounted to 2,334,738 bushels, against 1,785,398 bushels August 18. From September 1, 1882, to August 25, the exports of wheat from the Atlantic ports were 70,327,662 bushels, against 62,168,741 bushels in a corresponding portion of the preceding year, a gain of 8,158,921 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended August 25 amounted to 3,000,910 bushels, against 2,546,933 bushels in the preceding week, and the shipments to 2,408,440 bushels, against 1,920,264 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) August 25, as against the preceding week, showed a decrease of 543,286 bushels.

The course of the wheat market at New York and Chicago during the past week has been as follows:

	AT NEW YORK.				AT CHICAGO.	
	Aug.	*Sept.*	*Oct.*	*Nov.*	*Sept.*	*Oct.*
Fri. Aug. 24	$1.17⅛	$1.17⅜	$1.19⅜	....	$1.01¾	$1.03½
Sat. Aug. 25	1.16¾	1.16⅞	1.19¼	1.21⅜	1.01	1.02¾
Mon. Aug. 27	1.17⅜	1.17⅞	1.20¼	1.22½	1.01⅜	1.03¼
Tues. Aug. 28	1.17	1.17¼	1.19½	1.21⅝	1.01½	1.02⅝
Wed. Aug. 29	1.17	1.17¼	1.19⅜	1.21⅜	1.00¾	1.02¾
Thur. Aug. 30	1.16¾	1.16¾	1.19⅜	1.21⅜	1.00¾	1.02¾

At 1 P.M. Friday, August wheat at Chicago was quoted at $1.00, and September at $1.02.

INDIAN CORN.

Saturday evening's closing quotations for August corn showed no change from that of Friday, 63c. bid. Transactions were limited, reports of damage

from drouth and the possibilities of injury from an early frost inspiring a due amount of caution. The market was weaker at the close through less demand for cash corn. There was a fractional advance on Monday. Transactions were heavier, and appeared to be due to the advantage taken of reports of cooler weather west by the long interest. The critical condition of the crop naturally showed itself in the trading by a leaning to the bull side. There was no material change in the situation on Tuesday. The longs still bought heavily, but no news of importance came to hand and no change in the situation was made known. Wednesday witnessed a decline of about ¼c. for corn. Trading was dull, due mainly to buyers having withdrawn in the face of heavy purchases by a few houses. The demand for spot has been a declining one. On Thursday there was a decline of ¼c. in speculative values of corn owing to reports as to the grain having received no damage as yet in the northwest. Corn options were weaker and off ¼c. again on Friday, but cash corn was firmer and up ¼c. There was a fair inquiry from shippers.

The receipts of Indian corn at the Atlantic ports for the week ended August 25 were 1,189,970 bushels, against 1,440,482 in the preceding week, while the exports from the same points amounted to 1,260,424, against 1,048,355 bushels. From September 1 last to August 25 the exports of Indian corn were 47,548,074 bushels, against 25,731,230 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, August 25, had decreased 1,058,511 bushels as compared with August 18. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending August 25, were 2,750,488 bushels, against 2,731,576 the week preceding, and the shipments were 1,934,767 bushels, against 2,487,561 in the preceding week.

The closing prices of Indian corn at New York and at Chicago at 1 P. M. for the past week were:

	—At New York—			—Chicago.—	
	Aug.	Sept.	Oct.	Aug.	Sept
Friday, August 24.....	.64⅛	.63⅛	.63⅜	.50⅜	.50
Saturday, August 25...	.63½	.62⅞	.63	.50¼	.49¾
Monday, August 27...	.63½	.63⅜	.63⅝	.50¾	.50⅜
Tuesday, August 28...	.63⅛	.63	.63½	.50¼	.49⅞
Wednesday, August 29.	.63	.62⅞	.63⅜	.50⅛	.49⅞
Thursday, August 30..	.62½	.62	.63	.50¼	.50

Corn at Chicago at 1 P.M. yesterday was for September 49½c. and for October 49¼c.

The prices of breadstuffs in New York last evening, as against those of the Friday preceding, as compared with the same at a like date in 1882, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

	Aug. 24.	Aug. 31.
No. 2 flour	$2.50 @3.60	$2.50 @3.45

AMERICAN BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The grain markets have been very quiet and the dealings in flour have been limited to the supply of current home wants. Shippers have been unable to do much in either wheat or corn. Orders from the other side are mostly at lower rates, and there is an evident tendency on the part of foreign buyers to hold out of the market as long as possible with a view to depressing prices. Stocks here are accumulating although the visible supply for the whole country has decreased. The net result of the week's business has been a fractional decline in both wheat and corn. Spot oats are 5c. lower on increasing supplies.

From Cincinnati, Ohio: Flour is dull and possibly weaker. Receipts have been light, and new flour has been taken by consumers on arrival. There is no accumulation of stocks. Receipts of grain are light and prices lower. The market is variable.

From Chicago, Ill.: Wheat is depressed by increasing receipts, fine harvest reports and lower foreign markets. Outside speculators and shippers refuse to buy. Trade is chiefly local. Corn is depressed by large receipts, warm weather and a good crop outlook; prices are declining. Oats are weak and depressed; receipts are large. Speculative trading is light and stocks are increasing. Country elevators are reported rapidly filling up.

From Louisville, Ky.: Breadstuffs are dull and easy. Wheat receipts are moderate and the demand is slow. Agricultural interests are suffering from the drouth in many portions of Kentucky.

From St. Louis, Mo.: Flour is steady with a good order demand, but no export movement. Wheat receipts are excellent on a strong active market. Corn receipts are only fair, with a light shipping movement and the market dull, especially in futures.

From Topeka, Kan.: The wheat market is stronger than last week and improving. Flour is in strong demand and millers have all they can do.

From Minneapolis, Minn.: There is very little new wheat selling and the market is unsettled. Buyers are holding off and nervous as to the future.

From San Francisco, Cal.: Wheat is weaker.

From Baltimore, Md.: The corn market was dull, receipts comparatively small and prices merely nominal.

Wilmington, N. C.: Grain and breadstuffs are steady.

From Savannah, Ga.: The grain and hay market is well stocked, and a large supply has been thrown on the market by the banks through the failure of a prominent dealer. Produce has continued steady, with very fair sales.

From New Orleans, La.: There is scarcely any movement in grain. Grain is quiet.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Evansville, Ind.: The crop prospect is good and merchants predict a heavy fall trade. Farmers are beginning to prepare for wheat sowing.

From Milwaukee, Wis.: Crop reports from all parts of the northwest continue favorable. New wheat from Iowa is arriving moderately. No. 3 spring is of good quality, better than last year. New No. 2 from Minnesota weighs fifty-eight pounds, and has been sold to local millers at $1.11, or 8c. higher than old. Threshing in Dodge county, Wis., shows good wheat, spring averaging sixteen and winter eight bushels per acre. The weather is brilliant and warm, and was never better for farmers. Wisconsin has a larger crop than last year. Business is light for this time of the year, but receipts of wheat are increasing steadily, and the outlook for the autumn trade is bright.

From Minneapolis, Minn.: The weather is cloudy, with some local rains, but no injury to the crops has resulted. The wheat harvest is about completed, with a good portion in stack. Threshing is progressing in some localities, but is not general so far. The yield is larger than was anticipated in this section. Minnesota and Dakota were visited by drouth in June, but early July rains worked wonders in bringing out the wheat plant, and now a full average crop has been harvested. It is safe to place the aggregate crop of Minnesota and Dakota at 5,000,000 to 6,000,000 bushels more than last year. The quality is much better. Oats and barley show a large yield, as proven by threshing. Corn is doing well, but late, and there is danger of injury by frost.

From Toledo, Ohio: The crop prospects are not up to expectation, and collections will be slow this fall.

From Peoria, Ill.: Grain receipts are heavy.

From Topeka, Kan.: The prospects are good for a large corn crop.

From Wilmington, N. C.: Growing grain advices favor an improved outlook.

THE HOP CROP.

[By Telegraph to BRADSTREET'S.]

From Malone, N. Y.: Picking has barely begun here. The crop will be larger than early estimates, probably 9,000 or 10,000 bales altogether in the county, while there is considerable honeydew and lice. The quality of but few yards is affected. Not 1 per cent. has been hurt, and propitious weather gives hope that the bulk of the crop will be good. The greatest danger is from too early picking.

From Oneonta, N. Y.: The prospects are that the hop crop will be larger and of better quality than expected ten days ago. Think there will be as many pounds harvested as last year. The quality is not even. Harvesting has generally commenced.

From Watertown, N. Y.: The weather has been bad, but is better now. There is some mold and plenty of lice, and the crop is not as good as last year.

From Waterville, N. Y.: The hop crop in Sangerfield and Marshall is heavy and good. It is poorer in the southern part of Sangerfield. Picking has commenced in most yards. Fears of vermin are allayed, as weather is much more favorable. The lice are reported dying. The condition in Otsego county is bad. The condition in this vicinity is good. The quantity is one-fourth to one-third more than last year. Picking is general this week. Lice decreasing.

From Madison, Wis.: Hops good, better than they have been for several years.

PROVISIONS.

The past week's dealings in hog products and provisions has, on the whole, been a very dull one. Speculators have been indifferent or timid, and the position of stocks abroad is such that exporters have paid no attention to the situation or prices here. After a fairly firm opening on Saturday and Monday prices fell away to a certain extent. The receipts of hogs at the west continue large, and in most respects the statistical position of the market, combined with the apathy of traders and dealers, has militated against firmness or better prices. On Thursday a small improvement in prices of pork and lard was noted, in sympathy with a more noticeable advance at Chicago. But the movement was not due to any legitimate influence. The provision market on Friday continued dull and practically unchanged.

The exports of provisions for the season, responding to the prevalent lower range of quotations, are showing an excess as compared with the corresponding time in 1882.

The Chicago shipments for the past four weeks have been, as compared with corresponding time last year, 6,700 barrels less of pork, 22,100,000 pounds gross more of meats, and 9,900,000 pounds gross more of lard—in all about 22,100,000 pounds net of product increase in shipments, while the manufacture has increased during the same time about 19,000,000 pounds, compared with corresponding period last year.

Special reports to the Cincinnati *Price Curren* show the number of hogs packed from March 1 to date and latest mail dates, at the undermentioned places, with comparisons, as follows:

	—March 1 to Aug. 22—	
	1883.	1882.
Chicago	1,295,000	1,300,000
Kansas City	429,699	240,000
Indianapolis	144,500	98,000
Cincinnati	76,000	41,500
St. Louis	175,000	145,000
Cedar Rapids	121,732	137,294
Cleveland, Ohio	89,000	112,500
Milwaukee	61,000	84,500
Sioux City, Iowa	46,820	57,462
Ottumwa, Iowa	33,620	45,910
Keokuk, Iowa	22,701	12,846
St. Joseph, Mo	17,000	20,000
Nebraska City, Neb	10,000	....
Above and all other places	2,610,000	2,423,000
To last week	2,570,000	2,365,000

The exports of leading hog products from the principal Atlantic and gulf ports for the week ending August 18, with comparisons, were as follows:

	Pork, barrels.	Bacon, pounds.	Lard, pounds
New York	2,271	5,447,195	5,160,390
Boston	266	1,456,865	432,720
Portland	..	....	....
Montreal	100	843,500	216,920
Philadelphia	..	1,600,000	20,000
Baltimore	125	2,990	188,513
New Orleans	94	2,200	330
Totals	2,856	9,344,751	6,019,481
Previous week	4,562	10,174,628	7,350,745

The total quantity of hog product exported from the above-mentioned places from November 1, 1882, to August 25, 1883, was as follows:

	1882–83, pounds.	1881–82. pounds.
Pork	39,030,200	42,186,200
Bacon	361,432,973	333,302,504
Lard	234,711,989	205,666,885
Totals	625,115,162	581,155,589

Prices of lard and mess pork at New York during the week were as follows:

	Lard, per lb., —September.—		Pork, per bbl., —spot mess.—	
	This week.	Last week.	This week.	Last week.
Saturday, Aug. 25	8.60c.	8.76c.	$14.00	$14.25
Monday, Aug. 27	8.80	8.90	14.00	14.50
Tuesday, Aug. 28	8.79	8.90	14.00	14.50
Wednesday, Aug. 29	8.72	9.00	14.00	14.25
Thursday, Aug. 30	8.76	8.85	14.00	14.25
Friday, Aug. 31	8.70	8.65	13.75	14.00

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Hog products are in good consumptive demand but generally at lower rates. Dairy produce is more active, and cheese is ½@¾c. per pound higher. The supply of peaches in this market is small, but business is checked by the high prices. Other fruits are plentiful and selling fairly.

From Cincinnati, Ohio: Provisions and hog products are practically without any change.

From Chicago, Ill.: Pork is dull and weak, the demand being chiefly to settle contracts. There is no demand from speculators to hold. Lard is weak and depressed by the decreasing shipping demand and better receipts of hogs. Prices are the lowest of the week. Short-rib and sides are selling fairly to shippers. Prices are declining in sympathy with pork and lard. Hogs are firm. Sales are slow and the quality fine.

From St. Louis, Mo.: Provisions are dull and downward, with no signs of early improvement, though short spasms of activity occur. Cattle receipts are light and sell well. Hogs are in good offering and active with a downward tendency.

From Kansas City, Mo.: Provisions are active. The jobbing demand is good and prices are a little firmer. Cattle receipts are liberal and the market is rather dull. There is no material change in values. Hogs are rather weak. The partial decline of 5c. is sustained, owing to the decline in pork and unfavorable eastern advices.

From Wilmington, N. C.: Meats are declining.

From New Orleans, La.: Provisions are quiet.

THE NEW YORK DRY GOODS MARKET.

The domestic commission merchants report a slight increase of business over the previous week. This was expected. The demand was not very strong, but of a steady nature, and though prices are rather low, the week's business is pronounced satisfactory. The importing houses and jobbers report business for the week of good proportions. There are many retail buyers in the market representing large and small houses from all parts of the country, and though the bills purchased are not extensive, still the large number makes up a good total of sales for the week. On the whole, there seems to be a very healthy tone in the market. Auction sales of large quantities of goods still continue, and prices obtained, though naturally lower than at regular sales, seem satisfactory. The easy facility with which 17,000 packages of staple cotton goods were disposed of last week in one day with the demand unsatisfied is a strong evidence of the low stocks at present carried. On Wednesday last 7,000 packages of woolens were readily sold at auction by order of Knower & Thomas. For next week the attention of buyers is called to the extensive sale of blankets, comprising 6,500 packages, to be disposed of by order of Mitchell Brothers through Wilmerding, Hoguet & Co., on Wednesday. The same auction firm will sell on Tuesday 18,000 rugs, by order of Sylvester, Hilton & Co. These sales will doubtless be largely attended.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Dry goods have a better tone.

From Boston, Mass.: Dry goods jobbers have had the busiest week of the season. Liberal orders have been received from the west and New England, and all kinds of seasonable goods have met with a free distribution. Country dealers have run stocks very low and are now in a hurry to get goods. All are operating cautiously, however, and taking only what they want for immediate use. With agents trade continues quiet, but it is a little better than the previous week. The recent auction sale of cottons has not materially affected values, and, taking all things into consideration, the results are satisfactory. Woolens are quiet.

From Providence, R. I. The print cloth market is quiet and steady, sales being light; 64s are quoted at 3½c., less 1 per cent., and 56x60s 3 1/16c. There are about 125,000 pieces on hand.

From Rochester, N. Y.: Dry goods jobbers report trade during the past week very satisfactory and fully 20 per cent. in excess of trade during the corresponding week last year. Collections fair. Retail trade in the same line continues dull.

From Philadelphia, Pa.: Jobbers are doing a good trade on small orders for miscellaneous assortments. Package lots are moving quietly to a liberal aggregate, but there is no particular activity to note in this branch of the trade. Nearby retailers are beginning to operate more freely. The general outlook is good.

From Pittsburgh, Pa.: The dry goods trade is satisfactory, and, if anything, rather better than at same time last year. Collections fair.

From Cincinnati, Ohio: The dry goods trade has increased in volume under a fair demand for staples. Woolens are quiet.

From Columbus, Ohio: Dry goods fairly good.

From Toledo, Ohio: The dry goods trade is satisfactory.

From Louisville, Ky.: Dry goods are moving freely and the season is progressing satisfactorily.

From St. Louis, Mo.: Dry goods are selling freely at steady values.

From Kansas City, Mo.: Dry goods dealers report the fall trade the largest ever had, and an increase over the same period of last year of 30 per cent.

From Chicago, Ill.: Dry goods are active, the attendance of country buyers is liberal, and mail orders are large. Collections are good. Jobbers are confident of a large and healthy fall trade. Millinery and fancy goods are receiving more attention. There is a good business in hats, caps and clothing. Sales for the month are materially above those for August last year.

From Peoria, Ill.: The dry goods trade is very active.

From Burlington, Iowa: Dry goods are moving well, the demand covering a large variety of fabrics. Collections are fair. The weather is very favorable for business.

From Detroit, Mich.: Dry goods merchants reported nothing new. Trade and collections are fair, but an improvement is looked for.

From Minneapolis, Minn.: There is a marked increase in the country demand for dry goods.

From St. Paul, Minn.: Dry goods are more active, and purchases are liberal for immediate wants, modified by conservatism. The fall trade in the northwest will be later than usual, owing to delayed crops. The demand is good for woolens, fancy dress prints, dress ginghams and cool weather staples.

From Topeka, Kan.: The dry goods trade is improving and the outlook is good.

From Baltimore, Md.: The jobbing trade in dry goods has somewhat increased, and the outlook is promising. Collections are reported good, and a better feeling seems to exist. An encouraging feature in the trade is the caution manifested in buying, and there appears to be a disposition on the part of some to buy more liberally for cash.

From Wilmington, N. C.: In dry goods but little is doing.

From Norfolk, Va.: Dry goods jobbing is fairly active.

From Savannah, Ga.: The dry goods wholesale trade is very active. Stocks are full and desirable. The shipments made this week so far exceed previous reports. The retail trade has not fully opened.

From Galveston, Tex.: The dry goods trade is good.

CLOTHING.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The clothing trade is progressing satisfactory and shows a still further increase. Manufacturers are well satisfied with August's business and appear confident that the fall trade will turn out well. They say they have no trouble with collections, and from advices received country dealers are all in a sound condition.

From St. Paul, Minn.: Clothing and gents' furnishing goods are having a fine healthy trade, mostly on orders. There is no pressure by merchants to sell. Collections are better.

From Savannah, Ga.: Clothing at wholesale has been fairly good, and the demand, through orders from the country, is increasing.

COTTON.

The market for spot cotton at New York for the week has been quiet and steady at slightly better figures, the price having advanced a point on Saturday and another on Monday, but on Tuesday it fell off one and has since remained unchanged, closing last evening at 10⅛c., against 10 1/16c. last Friday for middling uplands. Sales have been mostly for export and to spinners in small lots. The week's sales are as follows: For export, 3,202 bales; for consumption, 6,155, and for speculation, 100, making an aggregate of 9,457 bales, against 6,755 last week. The deliveries on contract amount to 1,800 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	7 9-10c.	7½c.	10½c.
Strict ordinary	8	8 15-16	10 15-16
Good ordinary	8 13-16	8¾	11¾
Strict good ordinary	9⅜	9 5-16	12 3-16
Low middling	9¾	9 11-16	12 9-16
Strict low middling	9 15-16	9⅞	12¾
Middling	10⅛	10 1-16	12⅞
Good middling	10¾	10 7-16	13¼
Strict good middling	10¾	10 11-16	13½
Middling fair	11¼	11 3-16	14
Fair	12	11 15-16	14¾

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	7	6 15-16	10⅛
Strictly good ordinary	7 13-16	7⅞	11 15-16
Low middling	8½	8 7-16	11⅝
Middling	9½	9 7-16	12 9-16

The market for spot cotton closed steady.

The future market has been steady, while dealings have been of fair proportion, but mostly on account of room traders. The closing prices last night were somewhat better than those of last Friday, near months showing an advance of 14 points and later months 17. The total sales for the week aggregate 441,600 bales against 375,200 last week, and 274,000 for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
September	10.10	10.01	12 39
October	10.14	10.00	11 80
November	10.18	10.03	11 62
December	10.25	10.09	11.61
January	10.35	10.19	11 69
February	10.49	10.31	11.80
March	10.01	10.43	11.92
April	10.72	10.55	12 04
May	10.84	10.67	12 10
June	10.95	....	12.27

The market for futures closed steady.

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
Galveston	4,097	9 9-16	12
New Orleans	4,450	9⅜	12⅜
Mobile	100	9⅜	12½
Savannah	1,235	9 7-16	11 15-16
Charleston	410	9⅜	12¼
Norfolk	2,528	9¾	12⅝
Baltimore	1,617	10⅛	15 15-16

The total receipts of cotton at the ports since September 1 are 5,975,666 bales, against 4,673,636 last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	863,104	449,679
New Orleans	1,071,524	1,177,135
Mobile	311,962	263,629
Savannah	817,630	735,436
Charleston	563,018	496,971
Wilmington	129,140	133,746
Norfolk	798,035	611,989
Baltimore	86,848	36,234
New York	152,184	172,923
Boston	192,201	232,671
Philadelphia	99,141	83,593

Below will be found the receipts for each day of the week ending August 24, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	2,095	2,742	575	1,758	2,447	2,484
New Orleans	237	1,184	746	488	254	702
Mobile	....	79	4	....	19	113
Savannah	574	611	433	452	374	920
Charleston	71	78	213	199	150	651
Wilmington	4	3	10	6	25	93
Norfolk	132	138	21	29	231	231
Baltimore	....	....	...	210	363	....
New York	....	....	....	....	14	....
Boston	....	...	....	...	40	....
Philadelphia	....	....	....	....	.. .	3
Totals	3,113	4,845	2,002	3,142	3,917	5,197
This day last week	1,481	2,230	2,765	1,373	1,687	1,175
This day last year	2,685	4,815	2,569	3,163	4,748	4,425

The total receipts at the ports for the week were 22,937 bales, against 11,341 last week and 23,017 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 6,427 bales, against 4,109 bales last week and 7,184 bales for the corresponding week last year. The shipments for the week were 7,830 bales, against 6,775 bales last week and 8,261 bales for the corresponding week last year. The stocks for the week were 40,239 bales, against 40,106 last week and 10,775 for the same week last year.

The market at Liverpool for prompt delivery uplands shows no material change. There was a moderate inquiry which was freely supplied, while quotations remained unchanged through the week and closed at 5⅝d. for middling uplands last night.

The future market has been quiet with slightly improved prices. The closing quotations yesterday show an average advance of 4 points for near months and 5 points for later ones from those of Friday last.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week	*Last week.*	*Last year.*
September	5 40-64d.	5 36-64d.	7 3-64
September-October	5 36-64	5 35-64	6 55-64
October-November	5 38-64	5 34-64	6 4-64
November December	5 37-64	5 32-64	6 36-64
December-January	5 39-64	5 33-64	....
January-February	5 41-64	5 36-64	6 36-64
February-March	5 44-64	....	....

The market for futures closed quiet.

The sales for the week at Liverpool were 47,500 bales (of which 33,500 were American), against 46,000 (of which 29,000 were American) last year. The sales for export were 4,500 bales, against 4,000 bales last year. The sales for speculation were 4,100 bales, against 3,900 bales last year. The amount forwarded was 4,700 bales, against 4,400 bales last year. The stock in port is 867,000 bales (of which 591,000 are American), against 621,000 bales (of which 298,000 were American) last year. The total imports for the week were 29,500 bales (of which 19,000 were American), against 39,000 bales (of which 14,500 were American) last year, and the amount afloat 123,000 bales (of which 16,000 are American), against 171,000 bales (of which 22,000 were American) last year.

The Manchester market closed dull.

The Havre market remains unchanged.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is quiet and steady, and sales are reported light. Middling uplands are worth 10⅝c., and middling gulfs 10⅞@11c. The stock on hand is light.

From Philadelphia, Pa.: Spinners are buying cautiously and only for near wants. The market closes steady and without change for spot sales.

From Cincinnati, Ohio: In cotton little has been done. The demand appears to be confined to medium and lower grades.

From Louisville, Ky.: Cotton is quiet but steady, with a fair spinning demand.

From St. Louis, Mo.: Cotton is steady but very quiet. The stock on hand is light.

From Baltimore, Md.: Cotton is quiet and steady, and buyers are taking only what they need.

From Wilmington, N. C.: Cotton is dull, and receipts are increasing.

From Savannah, Ga.: Cotton continues quiet. Sales are improving. The stock of upland on hand and on shipboard is 3,483 bales.

From New Orleans, La.: Since Thursday the cotton movement has been moderate. Spots have advanced, low ordinary and ordinary, 1/16c.; good ordinary, 3/16c.; low middling to good middling, inclusive, 1/16c. Septembers declined 7 points, and for the balance of the year advanced 9 to 11 points. Crop estimates are now as low as 6,000,000 bales; 6,250,000 bales is the favorite.

THE GROWING COTTON CROP.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Reports from the growing cotton are more encouraging.

From Galveston, Tex.: The weather still continues hot and dry. New cotton is coming in slowly.

WOOL.

There has been a fairly good trade in wool in all the eastern markets during the past week. Some large lines of foreign carpet wools have been taken by manufacturers at comparatively low rates, and there has been more inquiry for fine washed fleeces and all grades of long staple wools. Some lots of quarter-blood combing fleeces have brought a fractional advance, and the tendency has been rather more in sellers' favor on the more desirable lots of washed clothing wools, although there has been no material change in prices. An improving demand for woolen goods of all kinds encourages a more hopeful feeling among buyers, and, as wool is available at reasonably low rates (in some cases lower rates in the eastern markets than in the country), consumers are meeting near requirements with more confidence. The situation, as a whole, is rather better and more encouraging than a week ago, and some parties are holding stocks above current rates in the belief that the market will improve later in the fall. As a general thing, however, demand is freely met at old prices, although there is less disposition to accept business at concessions. A slight decline is noted in Australian wools at the colonial sales in London. Domestic interior markets continue firm.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There has been a steady demand for wool this week, and the sales have been a good average, amounting to 2,415,000 pounds of all kinds. Prices of Ohio and Pennsylvania fleeces are quite firm and range from 36@37c. for X and 37@39c. for XX and XX and above. A lot of 80,000 pounds Indiana wool sold at 31c., and considerable Michigan at 33⅓@35c. for coarse and choice. A fair quotation for good average Michigan X is from 34@34½c. per pound. Combing and delaine fleeces are very firm and have been in demand at rather better prices. The sales of Ohio delaine have been at 40@41½c. per pound, and Michigan at 38@39c. Fine and No. 1 combing have been sold at 42@44c. per pound. In unwashed wools there has been considerable doing, with sales of Texas, territory and western at previous prices, the best fine and medium wools ranging from 23@28c. per pound. California wool is very quiet here, and no sales of any importance. Pulled wools have been in steady demand and prices remain the same. Choice eastern and Maine supers have been sold at 40@43c., and common and good supers at 20@38c. per pound. Foreign wools have been comparatively quiet, and no sales of any magnitude. Carpet wools are rather more inquired for, and some 500,000 pounds Syrian and Persian have been sold in New York.

From Philadelphia, Pa.: There has been a better inquiry for fine clothing and one-quarter blood combing wools at improving prices and a fair general demand for all descriptions. The market closes firm, with an improved feeling apparent among the trade.

From Louisville, Ky.: Wool is steady and receipts are small. Hides are dull.

IRON.

There is no improvement to note in the price of American pig iron in eastern markets. Orders for the same continue to be of from 10 to 25 ton lots, and buyers can scarcely be induced to take in excess of their immediate requirements. Yet the business (total) done in August (at New York) will average nearly if not quite one-third in excess of that in August, 1882. July last was likewise largely ahead of the same month of the preceding year. Prices are about $3 per ton lower now than then, which tells its own story. Dealers are not making much but can carry on this sort of trading for some time to come. While there is no immediate prospect of an advance there is every reason to believe that prices will go up before they go down, and holders are encouraged thereby. At the west there is relatively more activity, but nothing which in any way tends to cause an upward movement in prices. The general improvement in the iron market at Pittsburgh is continued, and Chicago and St. Louis show firmness somewhat in excess of that exhibited here. Yet New York dealers continue confident of the future. The sales of Scotch pig iron during the week have not varied from the nominal amount sold from week to week for some months past. The product is firm and unchanged in price. Some few outside lots have been sold at less than full rates, but were so disposed of owing to circumstances which exercised a special influence and which have no bearing on the general market. The receipts for the week were about 1,500 tons. There are no new features to report respecting other branches of the trade other than those mentioned in special telegrams given below.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Pittsburgh, Pa.: The market for merchant bar iron is in much the same condition reported last week. Nearly all the mills are in operation and are shipping all they produce. In sheets there is a large demand, as is usual at this period of the year. There have been large orders for skelp iron placed within the past few days, and offers refused for additional specifications at same price. It is believed if buyers felt assured that rates could not be shaded large orders for stock would be placed, as there is very little iron in the hands of consumers. There is a fairly active demand for structural iron, though not so large as at the corresponding period last year. Nails continue in very fair demand, and while there has been some addition to stocks on hand leading sizes are scarce and prices steady.

From Philadelphia, Pa.: Continued dullness pervades this market. Foundry irons are unchanged, but salable only in small lots. Bessemer and Spiegeleisen are dull, buyers holding off for lower prices. Merchant bar is steady and in fair demand. Plate is scarce and wanted.

From Cincinnati, Ohio: Iron is in better demand. Stocks of some lines of pig are very light, principally car-wheel grades. Manufactured iron is quiet, with fair stock in warehouses.

From Cleveland, Ohio: The iron markets show but little real change. Prices are firm at the light increase over a month ago, but as yet the demand is light.

From Chicago, Ill.: Hardware is fairly active. The demand for bar iron is improving and for nails is better. Jobbing trade stocks are moderate and evenly assorted.

From Peoria, Ill.: In hardware there is a steady increase of sales.

From Detroit, Mich.: The iron mills report a large volume of business, but no changes in prices are looked for. A good feeling prevails, however.

From St. Louis, Mo.: Iron rates are unchanged, with a good demand, which is mostly for small lots.

From St. Paul, Minn.: Hardware is active.

COAL.

The first of the month has brought with it the expected advance of from 10c. to 25c. per ton on domestic sizes for eastern shipment. There was not a corresponding advance on steam sizes, owing to that variety being in direct competition with the bi-

tuminous coals, which are being mined so freely and sold so low. The advance noted was made by the Reading Company, and met with some dissent from the Pennsylvania Company, which advanced rates from 10c. to 15c. two weeks ago. It is reported that the Reading and Delaware companies are very short of stocks, and this is given as a reason for an advance. There is no serious claim made that the last advance made will be realized. In fact, circular rates all through the year have been used generally as levers, by means of which to pull prices on sales up to the point named in the preceding schedule rates. Anthracite coal at the west is more active and steady. The scarcity of water in some of the New England milling regions has caused an excessive quantity of coal to be used there. Low water in the Ohio has also exercised the expected influence on the price of Pittsburgh coals at Cincinnati and elsewhere below along the river.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal market is firmer than last week, and while prices have not advanced as yet it is said that such will be the case the first of the month.

From Cincinnati, Ohio: The coal market is active with a low river and strong consumptive demand.

From Pittsburgh, Pa.: Coal is higher.

From Chicago, Ill.: Coal is more active and with a steadier feeling.

PETROLEUM.

The past week in petroleum circles has been as dull and insignificant as in some other lines of speculative trade. The market for certificates of crude left off on Friday night of last week at $1.07½, against $1.10 August 17, $1,08⅞ August 10, and $1.08 on August 3. This does not record very spirited speculation during the past month. The variations in the quotations since Friday last have continued the general apathy shown previously, those at the close ranging as low as $1.06¼ on Tuesday, and up to $1.07¾ on Thursday. An anticipated bear report of operations in the regions during August had a certain influence over prices during the week, but the orders to buy have generally been from brokers themselves. The exports for the week ending August 25 showed a remarkable gain in shipments from this port, although the total is still over 15,000,000 gallons below the corresponding date last year. To-day the annual gauging of the oil in the tanks of the United Pipe Line Company will be made by that company's officials, assisted, at their own request, by representatives of the petroleum exchanges. The result will be awaited with interest inasmuch as there has been some severe criticism of the United Pipe Line annual returns in the past.

The effect of the month's report of operations in the producing regions had been discounted prior to its publication on Friday, which may, in part, account for the heaviness of the market in the few preceding days. The report as published yesterday, together with that of the preceding months of the year, is as follows:

	Wells completed.	*Wells drilling.*	*Rigs up and building.*	*New product'n, barrels.*
January	124	126	131	2 789
February	131	150	153	1,994
March	146	211	205	4,113
April	215	206	212	3,076
May	235	197	170	3,676
June	231	230	145	3,495
July	261	202	232	3,842
August	309	315	201	4,207

The average number of barrels produced per day per well (of the new production), was 13⅘ in August, as compared with 15⅜ in June and 14¾ in July. The market for pipe-line certificates opened yesterday at $1.08⅜, and under the influence of few outside orders and but little support from brokers declined to $1.07¾ at the close at noon. The afternoon session opened at $1.07⅞. At the close of the day the price bid was $1.08⅜, against $1.07½ at the close on Friday of last week, an increase of ⅞c. on the week. It appears as if the evidence presented to the mind of the New York petroleum broker as to the alleged absorption of the Tidewater Pipe Line by the United Pipe Line Company was not of the best, for many of the leading brokers here now express the belief that, while efforts at a pooling arrangement or other business arrangement may have been attempted, no purchase was intended or took place. The market closed firm.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, Aug. 25	1.07	1.07½	1.06⅜	1.07¼
Monday, Aug. 27	1.07⅜	1.07¾	1.06⅜	1.07½
Tuesday, Aug. 28	1.06⅝	1.06¾	1.05⅜	1.06¼
Wednesday, Aug. 29	1.06⅜	1.07½	1.06¼	1.07⅛
Thursday, Aug. 30	1.07¼	1.08¼	1.07⅜	1.07¾
Friday, Aug. 31	1.08⅛	1.08½	1.07⅜	1.08⅜

Refined oil was dull during the week, and until Thursday continued unchanged in price, when an advance of ⅛c. per gallon was made. A few sales were made, but the business done was not significant. The demand for crude, on the whole, has been light. Case oil has sustained an advance, and naphtha remains in print with quotations appended and no comment.

The closing quotations last evening for certificates of crude, refined oil, oil in cases, crude in barrels per gallon, and for naphtha, as compared with like days in preceding weeks, were as follows:

	Aug. 3.	*Aug. 10.*	*Aug. 17.*	*Aug. 24.*	*Aug. 31*
Certifi's, crude	1.08	1.08⅞	1.10	1.07½	1.08⅜
Refined, 110°	7¼	7⅛	7⅞	7½	7¾
Refined, 70°	7⅜	7½	8	7⅜	7⅞
Crude, in bbls	6⅝@7⅜	6¾@7¾	6⅞@7⅞	6⅞@7⅞	7¼@7⅞
Case, plain	9	9	9⅜	9	9¼
Naphtha	5	5	5¼	5¼	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending August 25, was 11,321,940 gallons, against 13,630,260 in the preceding week. The total export from the United States since January 1 was 408,074,929 gallons, against 423,311,210 gallons in the corresponding portion of 1882, a decline in the current year of 15,236,281 gallons. The total exported from New York city during the week ended August 25 was 10,369,197, and during the year, to that date, 337,170,305, against 334,980,090 gallons in a like portion of 1882. This shows an increase in shipments on the year from New York alone, as compared with 1882, of 2,190,215 gallons (crude equivalent) as against a decline from the country at large of 15,236,281 gallons. New York's tendency to monopolize the export trade in petroleum therefore appears to be increasing.

OCEAN FREIGHTS.

Grain charters began the week very dull, and little inquired for. Steamer rates were improved. The demands for charters for the Asiatic and East India trade for petroleum were noticeable, and rates were firmly held. The chartering line, however, has been sparingly dealt in. Provisions, grain and petroleum, the principal commodities going abroad, were not pushed for room, but the outward movement was less noticeable than for some time recently. Irregularity and unsteadiness in rates characterized the close of the week. Any degree of liberality in offerings or any conspicuous demand was offset by a corresponding movement in rates for charters or room on the berth, and the week, on the whole, closes with a comparatively restricted business, and with the general average of rates paid in no special degree varied from those of the week preceding.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Petroleum charters are firm under a steady inquiry and limited supply of tonnage. Grain rates are lower in absence of demand, with more steamers offering, but only a few sailing vessels are in port open to charter.

From Baltimore, Md.: There is a dull market for ocean freights, and in the absence of inquiries from shippers rates were quoted only nominal.

From Wilmington, N. C.: Foreign freights are firm; coastwise nominal.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There is an active shipping movement, and jobbers are still selling liberal bills of goods, but the large business is drawing to a close. Manufacturers on heavy boots will continue well employed on contracts and duplicates during most of September, but on light work the shops are nearing the end. Spring samples are in course of preparation and will be out after next week. The fall trade so far has been ahead of last year, and the season is drawing to a satisfactory close, notwithstanding the late failures. Shipments for the week, 73,973 cases.

From Toledo, Ohio: Boot and shoe orders are in excess of last year's sales.

From Chicago, Ill.: Boots and shoes are fairly active. Stocks are full and a heavy fall trade is predicted.

From St. Paul, Minn.: Boot and shoe sales are increasing.

From Baltimore, Md.: Some boot and shoe jobbers report their trade largely in excess of last year's, and they see every reason to look forward to a brisk and thriving business being done in their line.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Leather is receiving more attention. Dealers say that trade is on a healthy basis, but profits are small.

From Baltimore, Md.: The leather market is firm, with a good inquiry for rough stock, which is scarce.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Whisky is unchanged.

From Louisville, Ky.: Whiskies are steady in tone and trade has improved with distributing houses.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Tobacco is unchanged in general features. Good reports are heard about the growing crops in this section.

From Louisville, Ky.: Leaf tobacco is in active demand for all grades; prices are strong; receipts are decreasing. The cool summer and prevailing drouth have reduced the condition of the crops. Unfavorable reports come from the Green river and Kentucky river districts.

From St. Louis, Mo.: Tobacco is in fine offering, but buyers and sellers are apart and little is selling.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Lumber is firm, owing to many of the eastern mills being idle for want of water. The furniture trade is improving.

From Cleveland, Ohio: Lumber and building materials are active.

From Minneapolis, Minn.: The lumber market is rather quiet but steady under prospects of a large fall demand. The lumber mills are not running on full time, having shut down Thursday owing to low water in the river, which retards the floating of logs from above. Unless there is abundant rain the season's cut will be 20 to 45 per cent. short of last year.

From Wilmington, N. C.: Timber receipts sell promptly; lumber is quiet; shingles firm.

From St. Paul, Minn.: Lumber sales have largely increased.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: The rosins trade, although not active, is sufficient to take receipts as they arrive. Later, when freight room becomes plentiful, a speedy reduction of stocks is expected. Spirits closed strong at 38c. Stocks in the United States ports and London are about 5,000 casks less than at the same time last year.

From Wilmington, N. C.: Spirits of turpentine are firm at a decline. Rosins are steady. Tar is unchanged. Crude turpentine is irregular.

HORSES AND MULES.

[By Telegraph to BRADSTREET'S.]

From St. Louis, Mo.: Horses are in limited supply and large demand. Mules are in good offering but not much wanted, and a decline has set in.

SPECIAL NEW ORLEANS TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar and molasses are dull. Rice is steady. Coffee is firm at 9½c. Cottonseed products are dull.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, August 29.—Business at the banks is moving very smoothly. The demand for money from all branches of legitimate trade is gradually increasing, but the low ebb of speculation has reduced the requests for discounts from representatives of that branch of business to a minimum point, and the institutions whose customers are largely composed of speculative operators complain of an absence of satisfactory patronage. The jobbing trade in all seasonable lines of dry goods and notions shows steady progress toward autumn activity. The attendance of country merchants from near-by and distant sections is daily becoming more marked, and there is an appreciable increase in the number and size of the mail orders. The sales of furnishing and miscellaneous fancy goods show material gains. The millinery houses are as yet doing very little, as it is too early in the season for a free or even fair movement in such lines. They are, however, doing as much as customary at this season, and the managers of the largest establishments say they are justified in preparing for an active and large fall business. Hats, caps and clothing are moving more freely, on orders from the near-by trade, and the sales of full bills to distant sections are steadily increasing. There is a fair increase in the boot and shoe trade, and as with other lines the the largest bills are going to the far west and southwest. As yet, however, there is nothing to denote an animated trade. Tanners and finishers report a fair line of orders for leather from manufacturers, but the tone of the market is very quiet. Hardware, cutlery, metals and tinners' stock are receiving an increased attention from nearly all quarters, and some houses express surprise at what they term such an early development of the fall trade, the orders for many being in advance of ordinary seasons. Bar iron is doing fairly in the way of jobbing orders, but there is not what might be called an active movement and prices are close. Nails meet a very good order sale for the season, but, as with iron, buyers are cautious and stocks ordered as wanted for instant sale. Pig iron is reported to be doing better, the demand from consumers being fair, stocks well under control, and there is no disposition to press sales of favorite makes. There are, however, no signs of an immediate boom, and workers appear content to take their chances and are buying as their necessities demand. The situation of the wheat market is daily being weakened by increasing receipts, an absence of any considerable shipping demand, in connection with large stocks and flattering harvest advices from the northwest, and the market has shown a gradual softening accompanied by a tendency to lower prices. The closing sales to-day show a decline of nearly 2c. from the ruling figure at the date of my last letter. Exporters still assert that prices are too high to warrant purchases for that purpose, and are idle. Corn has shown a fair degree of steadiness, values being largely supported by a shipping demand, but stocks are increasing. The receipts since the 22d were larger than for any equal number of days this year. This, in connection with prospects of warm weather, causes a weak feeling, and prices close at the lowest sales of the week. The volume of speculative trading in provisions is very small and prices are lower, the chief transactions in pork and lard being in the way of covering short sales, and the general verdict is that the former must sell lower before the close of the season, as stocks are large and the consumptive demand moderate. Lard is generally regarded as worth the money at which it is selling, but there is no disposition to buy for an advance, as there is nothing in the outlook to justify a large improvement in prices, trade being too small. The statistical situation has also been weakened within the past week by the importation of 12,000 to 12,000 tierces from Milwaukee to fill sales for September. This, it is said, will increase the stock at the close of this week to nearly 50,000 tierces. Short-rib and other sides are selling freely to shippers, but prices are adversely influenced by the weakness in pork and prospect of an early increase in the receipts of hogs, and the market closes weak at a sharp decline, although the current figures are far below the cost of production at present prices for hogs. The quality of the hogs arriving is very fine for the season, and with good corn crops for the current year it is said the increase in weights during the packing season will be fully 10 per cent. over last year.

THE GROWTH OF AUSTRALIA.

Responding to the toast of "The pastoral, agricultural, commercial, manufacturing and mining interests of Australia," at a recent colonial banquet, Mr. G. R. Dibbs said: "There is no doubt that the pastoral interest of Australasia is the greatest of all. In 1816 this colony exported only 13,000 pounds weight of wool; in 1882 the total export of Australia was over 414,000,000 pounds weight. In 1816 the value of the wool exported was £600, and in 1882 it amounted to no less a sum than £21,000,000. Then, in 1882, the whole colonies exported 25,000 tons of tallow. In 1816 there were no boiling-down establishments, and consequently there was no tallow. In 1882 they exported 10,000 tons of meat to the old country, a fact which again points to the enormous importance of the pastoral industries. But if you will study the history of the early colonization of these shores, when Australia was represented by a small settlement at Port Jackson, it will be found that in 1788 the live stock of the colony consisted of one bull, five cows and a calf, about seven horses, seventy-four pigs and three hundred head of poultry. To-day in Australasia we are running 75,000,000 sheep, 9,000,000 cattle, and I find that we have also besides that live stock in other forms that cannot be counted. In 1881 I find from the aggregate returns that we had 4,000,000 acres of ground under cultivation, and that the product of wheat in 1882, taken as a whole, was over 31,000,000 bushels. We have also established in this district the vine industry, which, by the way, has spread over nearly the whole colonies, and, judging from the testimonials which the owners of Australian vineyards received at the Exhibition of Bordeaux, we may find that export may, in the course of a few years, amount to millions sterling. Now as to the commercial interests. The railways and the pastoral and the agricultural industries would be a failure if their handmaiden, commerce, did not step in between them. What was the trade of the whole of Australia in 1882? The volume for the whole of Australasia exceeded £115,000,000."

MEXICAN EXPORTS.

The following statements are taken from the *Mexican Financier*, of July 28: Sugar is an article for which the soil and climate of Mexico are adapted to give a large production, but, on account of the difficulties of transportation from the places where it is raised to the seaports, little is now left over from the large home consumption. Under the stimulus of the opening up of sugar-growing regions by the railways, and of the reciprocity treaty with the United States, should it be ratified in the coming autumn, the production of sugar may be expected to increase largely. During the year in question Mexico exported 3,785,565 kilograms (those of our readers accustomed to reckoning in pounds may form an approximate by reckoning two pounds to one kilogram), valued at $266,075.60. Of the total amount England took $201,066.87, and the United States $63,793.63. Substantially nothing went to any other country. With a reciprocity treaty a large amount of sugar will, of course, go to the United States in the course of a few years. Coffee is another staple of which much is expected. Of this 10,447,804 kilograms, worth $2,414,538.20, were exported, making it one of the most important of our products. The United States bought nearly all of Mexico's coffee, $2,086,231.36; Germany took $138,221.25; France and Spain came next; England, which does not care much for coffee, coming last. Tobacco is another Mexican staple from which much is expected if the reciprocity treaty with the United States comes to pass, on account of the fine quality of the article raised in this country. Of manufactured tobacco 122,798 kilograms, worth $226,952.46, were exported. England was the best manufactured tobacco customer, taking $104,850.20, while the United States took $95.499.26. Of leaf tobacco there were exported 228,687 kilograms, worth $124,300.70. The United States took the largest part of this, $56,709.30, making that country altogether the best tobacco customer of Mexico, while Germany came close behind with $54,794. Living animals formed a considerable item in exports. The United States took the entire amount of horses exported, 9,444, valued at $78,887, and mostly going across the Rio Grande. Of beef-cattle 30,995, worth $252,745.50, were exported. The most of these went to the United States, going across the boundary to the amount of $195,734.50. Spain took $54,761, probably for Cuba. Cattle can be made one of the most important and profitable of Mexico's exports, for this country has an immense cattle-raising capacity.

Indigo was exported to the extent of 120,598 kilograms, worth $204,798. The most of this went to England, France and Germany. Owing to the great rubber corner in the United States considerable attention has been called to the rubber-producing resources of Mexico. The amount of rubber, or caou'chouc, exported was 129,504 kilograms, worth $114,455.92. The most of this went to the United States, $97,373.58.

The fruit trade of Mexico is capable of large development, but last year only 1,128,673 kilograms were exported, amounting to $43,523.19. Acapulco was the principal port for the trade, exporting $35,330.28. The United States took $40,754.19. It is likely that this year's figures will show a considerable increase in the way of fruit exports from Sonora, the opening of the Sonora railway having developed a considerable trade in oranges to the United States. Dyewoods form one of the most important articles of export, the trade for the year amounting to 36,734.74 tons, amounting in value to $705,269.64.

It is shown by this report that the United States is by far the best customer of Mexico, just as Mexico buys more from the United States than from any other country. The total exportation to the United States was $13,760,861.85, including $5,451,731.13 in precious metals and $8,309,130.73 in regular exports, while England, the next on the list, makes a total showing of $10,284,374.85, but taking away the $8,696,379.07 in precious metals sent to that country, the ordinary trade sinks to the comparatively small sum of $1,587,995.78. The table showing the exports of the republic for the five years from July 1, 1877 to June 30, 1882, affords some instructive comparisons, showing a steady increase in the regular exports of the country through the entire period, the figures being $6,701,061.35 for '77–8, $8,406,860.69 for '78–9, $10,627,220.73 for '79–80, $10,674,694.37 for '80–1, and $12,c19,526.06 for '81–2, giving the gratifying result that the regular exports have nearly doubled in the past five years.

The amount of precious metals exported shows a decrease from $22,584,599.55 in 1877–8 to $17,063,767.33 in 1881–2.

Among the important articles of export which may be mentioned as having shown a remarkable increase in these five years are henequin, which has risen from $1,078,075.22 to $2,672,106.72; coffee, from $1,242,041.40 to $2,414,538.20; skins, from $997,043.21 to $1,708,554.15; vanilla, from $312,109.46 to $780,830.47; ixtle, $346,196.56 to $620,199.24; tobacco, $86,713.27 to $351,253.17; living animals, $30,099 to $337,681; indigo, $61,523.60 to $204,798; caoutchouc or rubber, $9,055.96 to $114,455.92. Woods appear to have remained about stationary. Sugar shows a slight falling off, and orchilla, the famous dyestuff, a remarkable fluctuation. In 1877–8 the export was $228,145.73, in 1880–1 it had declined to $15,314.85, and in 1881–2 it advanced to $115,617.68.

CO-OPERATION IN ENGLAND.

The fifteenth annual report of the Central Coöperative Board, embodying returns from the, coöperative societies of the United Kingdom for the year ending December last, has just been issued. The board received returns from 730 coöperative societies in England and Wales, 5 in Ireland, 2 in the Isle of Man, and 197 in Scotland. The total number of societies making returns in 1882 was 934, as against 990 in 1881 and 952 in 1880. The total share and loan capital increased from £7,075,072 in 1880 to £7,827,119 in 1881, and £7,958,947 in 1882, an increase in the two years of 12½ per cent. The amount of sales during the year increased from £21,652,920 in 1880 to £24,246,652 in 1881, and £25,552,484 in 1882, an increase in the two years of 18 per cent. The total net profits increased from £1,897,620 in 1881 to £2,019,362 in 1882, an increase of 6½ per cent. The figures do not include returns from all the societies existing at the end of the year, only three-fourths of the whole number on an average making returns to the central board. The progress of the coöperative movement becomes very apparent when the returns extending over a number of years are compared. The number of societies has increased from 322 in 1862 to 1,237 in 1881; the membership has grown from 90,341 to 698,790, and the share and loan capital from £483,522 to £7,505,637. The sales have increased from £2,333,523 in 1862 to £24,810,789 in 1881, and the annual net profit from £165,562 to £2,088,029, exclusive of interest on capital. Taking profits and interest together, the figures show an average for the 1,237 societies of 30 per cent. per annum on the share and loan capital employed during last year.

TRADE EMBARRASSMENTS.

There were 126 failures in the United States reported to BRADSTREET'S during the past week, 53 less than the preceding week, 16 more than the corresponding week of 1882, and 22 more than the same week of 1881. The number reported is the smallest for any single week since October 14, 1882, and there were no failures of importance. Compared with the previous week the middle states had 29, a decrease of 7; New England states 27, a decrease of 3; southern states 23, a decrease of 3; western states 32, a decrease of 26; Pacific states and territories 15, a decrease of 14; Canada and the Provinces 22, a decrease of 1. In the principal trades they were as follows: Grocers 22; general traders 16; manufacturers 13; liquors 12; drugs 6; bakers and confectioners 4; shoes 4; jewelry 3; produce and provisions 3; hotels and restaurants 3; clothing 2; hardware 2; tobacco and cigars 2; hats 2; grain, flour, etc., 2; lumber 2; coal 2; furniture 2; butchers 2.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

FINANCIAL.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, SEPTEMBER 8, 1883.

NOTES OF THE WEEK.

Values have increased on the stock market during the entire week. There has been a slight buying for long or permanent holding, but not enough to produce the advance that has taken place. The prices have been put up solely by speculation, aided by the belief that the bottom was reached in the last general decline. Rallies have been the distinguishing feature. The opening each day has been weak and spiritless, but in the last hours the bull cards have been forced up, and the remainder of the list followed. Every day has recorded a gain over the previous one. The impression prevails among the conservative operators that stocks have been pushed forward too fast and must fall back, although it is not thought they will lose all they have recovered. The railroad pools are unsettled, and as the season when business is heaviest is approaching the effect is to detract from the real strength of the market and leave it feverish.

The power of subpena, which was conferred last winter on the Philadelphia councils, is already bearing good fruit. The investigation into the methods of getting money out of the Philadelphia treasury by means of the writ of mandamus from the courts is developing ugly facts regarding the administration of the late city solicitor, Mr. C. H. T. Collis. The points thus far brought out go far to prove that a ring existed for robbing the city, consisting of the city solicitor, the highway officials and the lawyer representing a real or imaginary creditor of the city. This complete, it was only necessary for the lawyer to bring suit against the city, when the city solicitor would confess judgment. A writ would then be issued and paid from any funds in the treasury not otherwise appropriated. Honest bills for street construction or repairing were multiplied in amount or bills wholly false were presented. It is safe to say that of the $1,000,000 taken from the Philadelphia treasury in the manner indicated during 1876 and 1877 fully one-half was stolen. The councils' committee have already brought forth sufficient evidence to warrant legal proceedings against the late city solicitor, and it is given out that action in the courts will be at once entered upon. Beyond this, the new trustees of the Philadelphia Gas Trust are finding evidence of additional robberies. It is very probable that Philadelphia is not yet at the end of the disclosures as to past robberies. Under the loose credit system which prevailed for so long, about everything in the way of peculation was possible. Concealment was easy until a return to cash business prompted close inquiry regarding the city's income and outgo. The continued developments in Philadelphia are of exceeding interest to other American cities struggling with the evils bred by the loose credit system.

The completion of the Northern Pacific Railroad, which is attracting so much attention at present, lends an added interest to the letter printed in another column, in which Mr. Lorin Blodget recounts the beginnings of that great enterprise. Mr. Blodget was an active participant in the original movements which finally led up to the completed project. He was among the first to call public attention to the value of the country now traversed by the Northern Pacific road and to secure the surveys necessary to locate one or more great roads to the Pacific. It is at once interesting and instructive to recall the difficulties under which the pioneers in this great work labored, arising as well from the want of official and legislative confidence in the undertaking as from natural causes. The brilliant success which has attended the efforts of the later workers in the same field abundantly justified the foresight of the earlier projectors; but, as is usual in such matters, the public memory is rather slippery as far as the names and services of the latter are concerned.

We are glad to learn, from the published reports of the testimony of Mr. Gould and of the president of the Western Union Company, that those gentlemen look with favor upon all organizations of labor having for their objects benevolent and protective ends. While the recent telegraph strike was in progress we pointed out that the path of orderly progress in industry to-day lay in the direction of a more thorough organization of labor, and that the Western Union Company, in refusing to recognize the Telegraphers' Brotherhood, was pursuing a shortsighted policy in direct opposition to the spirit of progress. We showed that through a recognition of the Brotherhood the morale and discipline of the operators might have been improved, and that from this improvement a direct benefit to the company and its interests would have resulted. It will occur to most people that the most practical way in which the gentlemen above named could have shown their sympathy with benevolent and protective labor organizations would have been by averting the strike of the operators (as it could easily have been averted), or, after the strike had begun, by recognizing and treating with the delegated representatives of their employés. The fact is that these gentlemen, by their attitude, did everything in their power to discourage associations of labor of every kind, and when this fact is recollected their late public professions will be felt to have a very hollow sound indeed.

The refusal of the Treasurer of the United States, on Thursday last, to receive a postal note in payment of the express charges on a return package of notes to a national bank will, not unnaturally, draw attention to the exact legal status of this late device. The Treasurer did not inform the bank that the postal note was not a legal tender, but based his refusal to receive it on the ground that he had no facilities for cashing it; that there were no messengers at his disposal to send to the Post Office for that purpose; that the law now provides a convenient and a proper means for him to collect the expressage by deducting the amount from the package returned, and that there was no necessity for introducing a new and complicated system. The Treasurer's grounds for his refusal to receive the note seem to be reasonable, and are no doubt technically justifiable. It would seem clear, at any rate, that no such use as that to which the note in question was sought to be put by the bank was contemplated when the system was introduced.

This will be sufficiently apparent from a brief description of the postal note, which may not be without interest, inasmuch as the new device has not yet become familiar to the general public. A postal note is, in effect, a draft payable to bearer issued by one postmaster upon another, designated on the face of the note, ordering the payment of a certain specified sum less than $5 in amount. A fee of 3 cents is charged for issuing the note. The time of payment is limited to some day within three months from the last day of the month of issue. It is payable either at the office upon which it is drawn or at the office of issue, the same limitation of time being observed. The note must be signed by the person receiving payment. If lost or destroyed no duplicate thereof can be issued. If the note be not paid within the time limited it becomes invalid. In such case the holder, to obtain the amount of the note, less an additional fee of 3 cents, must receipt the same, deliver it to the postmaster at the paying or at the issuing office, and sign an application for a duplicate payable to him by such postmaster, to be issued by the superintendent of the money-order system at Washington. Every postal note contains a notice that, after having once paid the same, by whomsoever presented, the United States will not be liable for any further claim.

The first political convention held in the state of New York this year was that just held by the Greenbackers. This party, though small in body, has yet a great spirit and apparently unlimited persistence. One would have thought that the few members of the party in the state would have given up long ago the expensive exercise of traveling great distances to put before the people expressions of their discontent with the settled financial system of the country. Such, however, is not the case, and, as a result of the activity of the few remaining members of the party in New York, we have the most aggressive platform which will be put before the people of the state this year. The sense of responsibility which the possibility of success imposes on the great parties has plainly been wanting, and, as a consequence, many of the outgivings of the convention are of that ill-considered and extravagant nature common to the utterances of men in a hopeless minority. As usual, they demand the abolition of the national banking system and the payment of the national debt with as great speed as possible. They declare that both the great parties are the servants of the corporations, and that their action in creating and sustaining gigantic money, railroad and land monopolies has been destructive to the prosperity of the country and dangerous to liberty. The resolutions favor the election of more of the public officers by the people as a means of bringing about a true civil-service reform; in other words, the convention expects to cure the evils of the civil service by extending the sphere of influence of its chief bane, rotation in office.

A change has come over French prospects in the East since last week. The Chinese have moved a large body of troops over the frontier. There are reports of hostilities between the Chinese and the French and Annamite forces. These reports have been contradicted, but there can be no doubt that the situation is one of great danger, and that war is not likely to be averted without difficulty.

THE OUTLOOK IN THE JOBBING TRADES.

The prolonged season of depression and stagnation through which the general trade of the country has been passing has several times been reported at an end before such was in reality the case, and for some weeks past reports of the prospective revival in business have been met by reminders that like expectations have been doomed to disappointment heretofore in more than one instance. In order to get at the facts with reference to the condition of the jobbing trade at leading distributing points throughout the United States, BRADSTREET'S has, through its correspondents in those cities, made careful inquiry as well into the condition of stocks of staples, as the state of trade during August, and present prospects for business during the autumn. The very extensive nature of the field covered is made apparent by the 47 replies which we give below in condensed form. An examination of the reports reveals that jobbers have very generally been exercising a marked degree of caution during the past year. This fact is of no less interest than that buyers have vied with them in refraining from anticipating their wants, and, to a large degree, in reducing stocks to a basis more in consonance therewith. The prominent exception to the very general report that stocks are about the same, or noticeably less, than at the corresponding time last year, is in dry goods, stocks of which at many points are reported full, and at some cities to be larger than they were on September 1, 1882. Still, the general statement will hold good that, in considering the jobbing trade as a whole, stocks have been materially reduced during the past commercial year, and wholesale merchants now find themselves in a position to anticipate their known wants without carrying an excessive quantity of goods. Nowhere more than in the northwest, particularly in Minnesota, Wisconsin, Iowa, Nebraska and Dakota, have interior buyers followed with special persistency the plan of taking for immediate wants only and paying cash. The excellent crops which have now been assured to that region have, to a certain extent, removed this tendency to limit desires in making purchases, and the fall trade opens briskly. As may be inferred, Chicago, Minneapolis, St. Paul and Kansas City take first place in reporting totals of August transactions with jobbers in excess of that of August in 1882. At those cities, too, the outlook for a continuance of a brisk business is excellent. In the south, while some fault is found with the prospects of business, owing to the ravages of the drouth and the short cotton crop, there are competent judges who state that the improved position of the southern farmer—in reducing his indebtedness—and the probable enhanced value of his produce, owing to decreased yields, will still leave him in a better financial position than a year ago. In the east, Boston, Philadelphia and Baltimore all appear to be experiencing a greatly improved volume of business, and the outlook at those cities is reported to be for a good average trade. The derangement in the position of the woolen and cotton mills at Philadelphia and the late business embarrassments at Boston have delayed the fall movement in each case, though newly received and increasing orders indicate an active season, even if at small profits. Pittsburgh, Cincinnati, Indianapolis, Cleveland and a few other and smaller cities have not yet felt the full impulse of the fall movement, but merchants at those points are hopeful and confident.

The reports printed below scarcely admit of a doubt that a genuine revival from the bedrock of the preceding commercial season has been begun. The movement does not promise to be rapid nor do the profits—particularly in the older and more thickly settled portions of the country—promise to be large. But it looks very much as if the turning point had been reached.

PORTLAND, ME.

Portland is a prominent distributing center. She has a larger number of wholesale houses in proportion to population than any other city in New England. The spring trade was prosperous, although not as much money was made as for two or three years previous. During July trade was quite dull, but business started up fairly during the last two weeks in August, and merchants are hopeful in regard to the fall trade, dealers carrying small stocks, smaller, perhaps, than last year, as all move cautiously in almost every instance. In dry goods this feature is quite marked. One house which had the largest stock has sold out. A large fall business is not expected as buyers are operating more cautiously than last year, but a satisfactory result is confidently looked for.

BOSTON, MASS.

The fall trade of leading jobbers and manufacturers has gained considerably for the past week or two and is now fully up to last year at this time. The financial disturbance interfered somewhat with movements, but the troubles are now about over, and New England dealers are stocking up moderately. A conservative tone runs through all branches of trade, and while a full fall business is expected there is no indication of any speculation. Country dealers have been carrying small stocks since the first of January, and will no doubt continue this policy. Favorable accounts are received in regard to collections.

Dry goods jobbers stocked up moderately in July with seasonable fabrics, and some large shipments were made to the interior, but the movement from first hands so far has not come fully up to expectation. The jobbing trade started early in August, gradually gained force, and is now quite active. Sales during August were about equal to those of the same month last year, and appear to be in a healthy condition. Interior dealers are buying cautiously, but there is every prospect of an average fall trade. Summer stocks were pretty well cleaned up. Prices of both cotton and woolen fabrics are on a very low basis and no further shrinkage is expected. The auction sales will, it is believed, have a healthful influence on the market. The exports of plain cotton goods at this time are larger than last year.

The clothing trade worked up quite satisfactorily during August, and sales are running ahead of last year. Heavy goods cleaned very close last winter, and country dealers are now ordering with confidence. They run close on summer stocks. Boston holds her position in the clothing trade almost as well as she does in boots and shoes. Manufacturers are very confident of a full fall trade. Financial situation sound.

The fall trade in boots and shoes, which is now drawing to a close, started early and has been quite prosperous so far as the volume of sales is concerned. The smaller manufacturing houses, as usual, complain of small profits, but prices have ruled steady during the season and all well-managed establishments have made some money. More goods than usual have been taken by the southwest. The south also shows some gain. The west has taken a full average. Manufacturers keep close to orders and only small stocks will be carried over. Very conservative about credits.

Trade in fish is smaller than usual owing to the failure of the mackerel catch, which is only a little more than one-third as large up to this time as last year. The catch of cod and other kinds of fish, except mackerel, is as large as usual.

Groceries buyers are operating cautiously, but the jobbing trade is in full force and promises to be fully as large as usual.

Receipts and sales of wool are larger than last year up to this time. The shrinkage in prices imparted an unsatisfactory tone to the market, but values are now believed to be at the lowest point, and a more satisfactory business is expected during the remainder of the season.

NEW YORK CITY.

The outlook in New York for the present season is regarded as encouraging. The prominent jobbing houses of nearly all branches of trade report the month of August as not only exceeding their expectations but sales were 15 to 20 per cent. larger than the corresponding period of 1882. The retailers of the country are believed to be clean as to stocks. Goods purchased last fall were well disposed of, as the winter lapped well into spring, consequently there is but few goods carried over from last year. Their spring and summer trade was not as good. In some branches the interior jobbers lowered prices after the first bills were disposed of, and those of the retailers who had purchased early were necessitated to sell low in order to compete with the reduction. Summer stocks are believed to be fairly well cleaned out, though possibly but little money was made in the summer business. Close observers of the state of trade in the city and throughout the country express it as their opinion that the city jobbing trade this season will be brisk and active—possibly somewhat at the expense of the interior distributor, as more retail purchasers are in the market this season than usual, many of whom have heretofore purchased their entire stock nearer home. The demand at first hands, however, and from importing houses by interior jobbers shows no decrease on previous seasons, and there has been a good, active, healthy trade.

ALBANY, N. Y.

The fall trade with dry goods and fancy goods jobbers is now quite active and liberal orders are coming in. Stocks with country merchants are generally low. The usual stocks are being carried over, and collections are fair.

TROY, N. Y.

The Troy jobbing trade in groceries, dry goods, etc., has been quite dull. Stocks larger than usual. Demand has increased, and dealers now anticipate a good fall trade. There has been a fair demand for linen collars and shirts. In the stove trade sales are quiet, stocks are heavy, and no improvement is expected until later. Within a few days past 2,000 idle ironworkers have resumed work at the mills.

SYRACUSE, N. Y.

The Syracuse jobbing trade has been quiet for six months, a decided decrease having been noticed from the amount of business done during the same period in 1882. Purchases by retailers for some time past have been only sufficient to supply immediate requirements. Collections slow. Prospects for fall trade more lively.

UTICA, N. Y.

Jobbers in all lines as a rule are carrying pretty full stocks, and fall orders are coming in fully as well as anticipated. The clothing trade is especially active, and dry goods fairly so. The trade in all branches is confidently expecting a good fall business.

ROCHESTER, N. Y.

Boot and shoe jobbing is confined to two houses. Trade is reported as large and satisfactory, with collections as good as the average at this season of the year, and prospects for the coming season flattering. Dry goods jobbers report the fall season opening two weeks earlier than usual, with an active demand for goods, and from present indications the volume of business done will exceed all former years. Reports as to collections vary. Grocers report trade steady and collections fully up to the average. Jobbers in hardware have had a good trade; not only has the local demand been unusually large, but the country trade has been likewise. Collections in this line are reported only fair.

BUFFALO, N. Y.

Conservatism has reduced stocks materially. In clothing stocks are lighter and jobbers have purchased cautiously. The fall trade has exceeded expectations. Dry goods stocks are full and well assorted, but in volume will probably not vary much from the usual September aggregate. Trade has been good through the summer months, showing an increase over corresponding months of last year. Boots and shoes do not vary much from usual fall stocks; purchases by jobbers have been lighter than is customary until within past three weeks, when increased sales necessitated many duplicate orders. Hardware stocks are somewhat fuller than at corresponding dates of former years. Values are low, and satisfactory orders are coming in. Saddlery stocks are heavy as trade has been quiet. A better demand is now noted, and the outlook is for a very fair volume. Grocery stocks are full, and in staples heavy; volumes are believed to be sufficiently low to warrant purchasing for future requirements. Stocks of lumber here and at Tonawanda are of an average, large additions having been made in the past thirty days, in anticipation of a good fall trade. Good demand for better grades. The stock of medium and good damaged leather are fairly full, active grades of both the better and poorer qualities being sold well up. An improved feeling is noted.

PHILADELPHIA, PA.

In Philadelphia the jobbing trade in dry goods, notions, hats and caps, boots and shoes, clothing, provisions, groceries, and, in fact, in almost all lines, is entering upon an active season. Sales thus far have been fully up to the average in most departments, and in some have exceeded those for the corresponding period of last year. Nevertheless, there is a good deal of complaint in some quarters that trade is unsatisfactory. This is not due so much to the fact that goods are not selling, or to an unfavorable outlook for the distributive trade as to the changed character of the movement and lessened profits. The latter have been cut down by excessive competition and production in some lines, and by the general depreciation of values that has taken place during the past twelve or fifteen months. Another feature of the business that causes dissatisfaction in certain quarters, although it is really a favorable augury for the future of trade, is the conservatism of buyers. There is no speculation. Country merchants and city retailers have adopted the safe policy of buying little and often. The distribution will reach as large an aggregate in the long run, but is slower, and hence more troublesome, and, in connection with the lessened money value of the goods sold and smaller percentages of profit, gives ground for grumbling. There is no depression, however, and matters are apparently shaping for a brisk trade as soon as the consumptive demand for winter goods starts up. Jobbers are not hampered by surplus stocks. As a rule they bought as sparingly last season as their customers are buying now, and they have carried over but moderate supplies to handicap their movements at the outset of the fall trade. The burden of carrying stocks has rested more generally with manufacturers and commission men than in former years, and they have been the heaviest losers by excessive production in cotton and woolen goods and other lines, although in the effect of the consequent unsettling of prices and of confidence in the markets distributors have necessarily participated.

PITTSBURGH, PA.

Pittsburgh dry goods jobbers are carrying over about the usual quantity of stock customary at this season of the year, in some instances merchants having goods on hand valued a trifle above the average at the corresponding time in previous seasons. The past three months' business has been well up to that of 1882, and some jobbers report gains of from 10 to 25 per cent. The outlook for the fall trade is said to be good. In boots and shoes less buoyancy is manifest, but the past summer will compare favorably with predecessors, and the outlook is good, better than it was in a like period in 1882. Hardware stocks are about an average. The business of the past year has fallen short of the preceding year. Collections are from fair to good only, but the prospects are believed to favor a fair fall business. Stocks of drugs average about the same. Considerable shrinkage has taken place in prices, owing to changes in the tariff and other causes. It is stated that they have probably reached bottom, and an advance may be looked for. Stocks of millinery are about an average, but business is 15 per cent. ahead of that at the corresponding time last year. The prospects for the fall are good. There is no particular change in the stock of clothing carried over as compared with preceding years. The demand for good staple goods is larger.

CHICAGO, ILL.

Bankers report a good, healthy demand for discounts from all branches of legitimate trade. Dry goods jobbers and collateral lines of merchandise estimate the aggregate increase in sales for August at 15 per cent. over the same month in 1882. They were never more fully employed at the opening of fall than at present. Goods will continue to be sold on close margins. Collections, however, will be better, and losses from bad debts smaller. Millinery houses say trade is scarcely opened. Sales are 10 per cent. better than at this date last year, and the percentage of profits about equal. They also express confidence of a better trade. Stocks are ample, but not larger than a year ago. The clothing trade opened earlier than last year, and is fully 12½ per cent. larger. Jobbers say customers carried over less goods than usual, and are buying more. Collections good. The depressed condition of the boot, shoe and leather trade at the east during the early part of summer caused Chicago jobbers to move with more than usual conservatism until the early part of August, since when trade has improved to such an extent as to compel jobbers to increase stocks. Business is more satisfactory than at this date in 1881 and 1882. Stocks are fairly good. Country dealers have carried over less stock than usual. Hats and caps are meeting a good trade, some houses reporting an increase of 20 per

cent. on their sales at this date in 1882. The drug trade shows about the customary volume in staples, while a liberal gain is reported in druggists' sundries of all classes. Hardware and cutlery show a fair increase, estimated variously at 5@15 per cent. over the sales at this date last year. The gain is partly due to light stocks carried over. Stocks are 10 per cent. under last year. Metals and tinners' goods are meeting a fair sale, the general average being up to and some lines ahead of last year. Sales of stamped goods show a large increase. Bar and all classes of refined iron is jobbing fairly. Stocks are much heavier than a year ago, but prices are 20 per cent. less; this and the fact that interior dealers and manufacturers are short of supplies encourages jobbers. Nails selling freely, and stocks are well adjusted. Jobbers regard the situation as satisfactory. The demand for pig iron is good. Stocks are variously estimated at 25 to 50 per cent. below September 1, 1882. As a rule, founders and manufacturers are destitute of supplies. The production in the west and northwest is smaller than a year since. The grocery trade is very active, and the volume of sales steadily on the increase. The lumber trade, which has been considerably behind last year in volume, is rapidly catching up, and, although prices are materially less than last year, yard dealers who manufacture are not disposed to grumble, as they get a good profit, while those who are compelled to buy complain at the very close margins on which stock is sold. It is estimated that there is 5 per cent. more lumber and an equal gain in logs in the northwest over this date in 1882. The leather trade is slowly improving, and, with few exceptions, tanners and dealers say business is on a more healthy basis.

PEORIA, ILL.

The hardware trade has enjoyed active sales, and has prospectively a steady demand. Drugs show an active sale for the past two weeks. Country stocks are light. The bank and share outlook is good. Grocery stocks are rather heavier than last season, with a steady increase in trade. Dry goods show an active improvement for the past few weeks, with a prospective demand equaling last year. Collections are slow.

SPRINGFIELD, ILL.

The jobbing trade here, never extensive, has a better outlook for the fall and winter than it had last year. Jobbers are carrying and purchasing larger stocks. The present and anticipated sales are larger than heretofore.

CINCINNATI, OHIO.

Wholesale stocks as a rule are light; the exception is in dry goods. Fall sales are just beginning, and general stocks are fuller than at any time during the year. In clothing sales have been brisk and stocks unusually reduced. With the coming of the exposition buying will be heavier, and drafts on stocks are expected. In groceries dealers are carrying as light stocks as possible. The condition of trade justifies no other course. Sales are made in comparatively small quantities and with very light margins of profit. The general tendency in all wholesale trade is to a conservative policy. Taken altogether, stocks are much lighter than usual at this time of the year, but current business is steady and the general prospect is fair.

CLEVELAND, OHIO.

Trade is in a healthy condition. Jobbers are satisfied and have no fear of the future. The volume of the grocery trade is from 10 to 15 per cent. less than that of last year. Sales of hardware are larger than last year, but on a steadily declining market and unsatisfactory percentage of profit. The trade in boots, shoes and leather is unsatisfactory as compared with last year. Outlook good. The clothing and woolens trade is better than last year. Collections backward. The dry goods trade is considerably ahead of last year. Stocks are fully up to the average, and collections are better.

TOLEDO, OHIO.

The current demand in all the leading jobbing lines represented at Toledo is good, and the prospective demand is reported to be of a like nature. Sales of dry goods, boots and shoes, hardware, saddlery hardware, clothing, notions and of tobacco and cigars during the past twelve months have been 10 per cent. in excess of the value of like transactions in the preceding commercial year. The wholesale grocery trade as well as that of drugs and of hats and caps have gained 15 per cent. and of candies and confectionery 5 per cent. The value of stocks on hand September 1, 1883, is given as follows: Dry goods $500,000; groceries $110,000; boots and shoes $975,000; drugs $150,000; hardware $390,000; saddlery $250,000; hats and caps $65,000; clothing $115,000; notions $225,000; confectionery $75,000; tobacco and cigars $250,000. No failure has taken place among any of the Toledo houses representing the above lines within the year (with one exception), or, for that matter, for several years.

INDIANAPOLIS, IND.

The amount of stock carried over by the Indianapolis jobbers is about the general average. The trade is disposed to take a cautious and conservative view of fall trade, and while a good business is anticipated, yet there are no indications that the trade will be heavy. Money matters are very close here, and bankers are scrutinizing paper carefully. Profits are small, and the jobbing trade do not expect to make much money this fall. Country merchants are slow in their payments, and failures for the past two years have been numerous; but Indianapolis merchants generally are in a sound condition. The hardware dealers have had a good trade and have made money. Boot and shoe sales have exceeded those of last year, but there has been a lack of activity. Country merchants are not heavy buyers, and are placing their fall orders cautiously.

TERRE HAUTE, IND.

The jobbing trade is in a very hopeful and satisfactory condition. Dry goods and notions dealers have increased their capital recently, and have now 25 to 50 per cent. larger stocks than this time last year, while their sales are reported about the same in proportion. In hardware there seems a slight decline in the volume. There is a decline of about 20 per cent. in stocks of liquor dealers, and also a falling off in cigars and tobacco, both in stocks and demand, while collections are not so satisfactory as last year.

LOUISVILLE, KY.

Fall business has opened with decided activity. Spring and summer stocks of general merchandise have been disposed of as a rule, and July inventories show only a reasonable amount of goods on hand. Jobbers here have made extensive preparations for a large business, and fall stocks are somewhat larger than ordinarily carried. The movement of fall and winter goods is already brisk, orders are coming in freely from salesmen on the road, and the attendance of buyers from every part of the south and southwest is large and increasing. Collections are up to the average, and, based on the agricultural situation, promise to be fair.

DETROIT, MICH.

Dry goods stocks (with the exception of some lines of domestic goods in which the market has been somewhat unsettled) are as complete as usual at this season of the year. Trade in this line increased in August 15 to 20 per cent. over last year, and indications now point to a still further increase. In hardware, stocks are lighter than usual, accounted for on the ground that prices will not advance and may be lower. Purchases of iron within a few days have been made at the lowest point in the season. In groceries and provisions stocks are fully up to average, as are also boots, shoes, clothing, hats and caps. In these latter trades stocks are purchased long in advance of season. Business is satisfactory; a considerable portion of goods being already sold. Jobbers, as a rule, have had a fair increase in sales in 1883 over same period in 1882, and when it is taken into consideration that goods have been so much cheaper the increase is considerable. Conservatism and cautious buying have been the features of the season's business thus far. Collections have not yet improved much, but as considerable money is now being sent to the interior jobbers are looking for much better receipts.

GRAND RAPIDS, MICH.

Dry goods jobbers are carrying fully as large a stock as last year. Sales are increased. Clothing stocks are 10 to 15 per cent. less, and trade is about the same as last year. The boot and shoe trade is healthy, and stocks carried average fully up to those of a year ago. Buying light and frequent. Grocery stocks are 10 per cent. less; the current demand is fully up to the average. Purchases are light. The demand for hardware compares favorably with former years and stocks are full. Trade is light. Saddlery hardware stocks are 15 per cent. less, and outstanding accounts are larger. Collections are slow and buying light.

ST. LOUIS, MO.

The aggregate of goods in St. Louis jobbing stocks is considerably larger than a year ago. The stocks of the older houses are about the same as a year ago, and the instances of considerable increases of stocks are confined to younger houses. Whether because actual consumers in the St. Louis territory have multiplied by reason of immigration, or whether trade there has extended into new consumptive districts, it is certain that the volume of business shows a solid, though moderate, growth. No question is entertained that the coming output of goods by St. Louis jobbers will be largely in excess of last fall's trade. Less buoyancy is felt, however, owing to the decreased margin of profit on most staple goods. Jobbers have followed the decline firmly, and have no fears as to the demand nor as to the probable means of consumers to pay for what they buy. The past summer and the present time show purchases to be largely of the hand-to-mouth description. Stocks are fresh and in very complete assortment.

KANSAS CITY, MO.

The jobbing trade of Kansas City was never in better condition than now. The stocks of dry goods carried by jobbers aggregate $750,000. Considerably broken by heavy sales at the opening of the fall, they are being constantly replenished. Telegraphic orders are necessary almost daily to keep pace with the depletion going on. Sales so far are 33 per cent. greater than during the same period last year, and it is confidently expected that nearly the same proportion of increase will be maintained throughout the season. Collections are reported excellent and the general condition of trade in this line is highly satisfactory. Stocks of clothing in hands of jobbers are valued at $500,000, and in pretty fair condition. The demand for boots and shoes is active and sales have increased considerably over those of the same period last year. Trade in groceries is good and growing. The present condition of the hardware trade is good and sales are increasing steadily. Stocks in hands of jobbers at present aggregate $600,000. The demand is good and prospects very fair. The growth in the agricultural implements and machinery trade has outstripped that of all others, this city having become the principal distributing point for agricultural machinery in this region. Collections good, and the prospective demand is considered excellent. Stocks of lumber are valued at $400,000, and in very fair condition. The current demand is good and prospects very fair. Stocks of cigars and tobacco are valued at $300,000 to $400,000, and are fairly complete; the current demand for cigars is good.

LEAVENWORTH, KAN.

Jobbers' trade in all lines is very good and is opening out briskly thus early in the season. Stocks are fair and the demand good.

TOPEKA, KAN.

Topeka never has enjoyed a very large share of the jobbing trade of this section. Its quota, however, is improving yearly. At present the sales are light, but the volume is increasing daily, and the prospects are for a good trade in the near future. In the smaller country towns the stocks on hand are very low, while the larger towns are better stocked. Hardware and boots and shoes enjoy a better trade than other lines.

BURLINGTON, IOWA.

The condition of the jobbing trade is satisfactory. Stocks are full and fall trade is opening, with favorable results promised. Dry goods stocks will aggregate $200,000; grocers $250,000; boots and shoes $300,000; hardware $200,000; hats, caps and millinery $100,000; saddlery hardware and leather $100,000; clothing $175,000; paper, stock and stationery, $100,000; drugs $225,000; iron and heavy hardware $200,000; lumber $500,000; cigars and tobacco $100,000; wines and liquors $150,000. These figures represent only the stock in jobbers' hands, and include only principal lines. A comparison of the trade thus far in the season shows a gain over the corresponding period last year of from 15 to 20 per cent. in some instances, notably in groceries. The shrinkage in values will offset the surplus amount, but, on the whole, the demand and supply at this point may be said to lie in a very satisfactory condition, and merchants generally feel confident of a large fall business.

MILWAUKEE, WIS.

General outlook in Milwaukee never better. Stocks of merchandise in the interior tributary to this market are light, and, with the increased purchasing power of agriculturists, trade promises to be better than in 1882-3. Collections good, though grain movement is as yet light. Stocks of goods carried by Milwaukee jobbers are estimated as follows: Groceries $1,300,000, which is less than amount carried last season; hats, caps and furs $425,000; drugs, oils, paints and glass $850,000; boots and shoes $1,000,000; dry goods $1,025,000; millinery $175,000; lumber and shingles $12,500,000; coal $2,100,000.

MINNEAPOLIS, MINN.

The general condition of the jobbing trade of the city is prosperous and healthy. For the last six months jobbers, country merchants and consumers have pursued a conservative policy, limiting purchases and sales to actual wants. The percentage of losses has therefore been less than last year. Country stocks are reduced to the minimum and must be replenished early. Dry goods firms report the aggregate of sales for the first eight months of the year some 10 per cent. greater than for the same period in 1882. During the last week in August all report an active demand for goods, at least double that of the same time in any former year. The country trade is sound, and the largest fall trade ever known appears assured. A large area of new territory has been added to the jobbing trade of Minneapolis this year by the construction of new railroads. Since the improved condition of the crops has been noted, jobbers have increased their stocks. The aggregate stocks, including new houses, is probably 50 to 75 per cent. greater than last year. The grocery trade, which has taken the lead of other lines, shows a small increase in the aggregate for the past eight months of the year. More goods have been handled, but values have been 15 to 20 per cent. lower. The trade is in a much more satisfactory condition than ever before on the 1st of September. Stocks are complete and the demand for goods is increasing. Boot and shoe jobbers substantially confirm the statements of the dry goods and grocery dealers. The business of old firms has been increased some 10 to 15 per cent. A prosperous and active fall opening is expected. Hardware houses report a considerable increase over any former year, larger than in some other lines, however, owing to the excessive call for building hardware. In clothing, queensware, drugs, etc., the above remarks will hold good. In all lines of trade the facilities for supplying the fall demand are largely increased; additional capital has been secured, and several new firms have entered the trade.

OMAHA, NEB.

Stocks are not as large as are usually carried. The boot and shoe and clothing and dry goods trades have been shipping large bills of fall goods and thereby reducing stocks, and the large orders for fall goods have been filled. While sales for three months have not been up to expectations, they are now reported quite active.

SALT LAKE CITY, UTAH.

The wholesale merchants of Salt Lake City, anticipating a comparatively dull trade throughout 1883, ordered small stocks for the trade of the past summer and the current fall season. The close of the season will find the leading dry goods merchants with the smallest stocks held for years, and grocery houses now have very moderate quantities of goods on hand. In explanation of this condition of affairs BRADSTREET'S correspondent at Salt Lake City states that the credit system in that territory and in southern Idaho has been considered a safe system upon which to base trade for a decade past. This has been encouraged incidentally by the compactness of religious organization, and the feeling has been cultivated that "a moral basis for credit is sufficient for any amount of leniency toward debtors." But the evil has grown to such magnitude that hundreds of merchants exhibit the greater part of their assets in the form of bills receivable, which in many instances are in excess of the value of stock on hand. The farmers in the region specified have been favored with abundant crops, cattle are in good condition, and prices are up to the average. The feeling, therefore, prevails that the present is a good time to call in the assets referred to, and it is believed that persistent efforts will be made to that end. With accounts thus balanced and small stocks to carry over an excellent trade during the coming year is confidently expected.

BALTIMORE, MD.

The jobbing trade is in a healthy condition. While the general volume of business cannot be said to reach the average of last September, still orders are coming in far better than anticipated, and a good feeling prevails. Stocks are not quite as large as last year, but in most cases they are well assorted and in good condition. Stocks of clothing are larger than for three years past. The demand for several seasons in that line has been for finer goods, stocks of which are the heaviest. But most orders are now said to be for medium and lower grades. In cloth, fine woolens form the bulk of stock, still there is a lot of low grades on hand, though not desirable. Flannel and dress goods assortments are well kept up and in good demand. Stocks of boots, shoes and hats are reported large, but not in excess of those of last year. Collections are slower than in the same month a year ago. The future prospect is thought encouraging, and the entire trade is of the opinion that sales this season will be almost as large as last.

RICHMOND, VA.

Statistics of the jobbing trade at Richmond show a decided advancement. The volume of jobbing business done, as given below, is based on the actual figures in relation to 1881 and 1882, and for

1883 partially on the figures, with careful estimates. The aggregates given do not include the manufactures. Stocks on hand are not full, having been largely reduced by early fall orders. The prospective demand from the country will be fully up to last season, though the earlier indications warranted, in some lines, anticipations of a decided increase, which, in a measure, will be curtailed in consequence of the continued dry weather. Travelers in sections tributary to Richmond report stocks at a safe average, and purchases being conservatively made. The total value of imports of dutiable commodities at Richmond in 1881 was $36,613, against $96,269 for free importations. In 1882 the figures were $55,997 worth of dutiable commodities, against $293,394 of free goods. The value in 1883 (three quarters) was, of dutiable goods $63,572, and of free goods $201,186.

A fair estimate of the condition of the jobbing trade of Richmond may be obtained from the following carefully compiled data. Boots and shoes: The annual sales in 1881 were $869,000; in 1882 were $1,131,000; in 1883 they have been $1,300,000. The value of stock on hand is $450,000. Clothing: Sales in 1881 $300,000; in 1882 $300,000, and in 1883 $300,000. Value of stock on hand $75,000. Confectionery: Sales in 1881 $380,000; in 1882 $400,000; in 1883 $415,000. Value of stock on hand $155,000. Groceries and liquors: Sales in 1881 $8,556,000; in 1882 $10,156,000, and in 1883 $11,283,000. Stock on hand $1,389,000. Hardware: Sales in 1881 $355,000; in 1882 $695,000, and in 1883 $730,000. Stock on hand $270,000. Agricultural implements, etc.: Sales in 1881 $235,000; in 1882 $262,000, and in 1883 $313,000. Stock on hand $225,000. Leather: Sales in 1881 $390,000; in 1882 $380,000, and in 1883 $395,000. Stock on hand $75,000. Crockery: Sales in 1881 $199,000; in 1882 $222,000; in 1883 $240,000. Stock on hand $85,000. Drugs: Sales in 1881 $625,000; in 1882 $740,000; in 1883 $790,000. Stock on hand $195,000. Dry goods and notions: Sales in 1881 $2,471,000; in 1882 $2,451,000; in 1833 $2,570,000. Stock on hand $930,000. Furniture: Sales in 1881 $265,000; in 1882 $255,000; in 1883 $303,000. Stock on hand $130,000. Railway supplies: Sales in 1881 $150,000; in 1882 $170,000; in 1883 $240,000. Stock on hand $103,000. Stoves, house-furnishing and plumbing materials: Sales in 1881 $100,000; in 1882 $125,000; in 1883 $140,000. Stock on hand $300,000. Stationery, paper, etc.: Sales in 1881 $312,000; in 1882 $409,000; in 1883 $496,000. Stock on hand $142,000. Liquors (alone): Sales in 1881 $290,000; in 1882 $430,000; in 1883 $680,000. Stock on hand $125,000.

NORFOLK, VA.

Close connection with the leading markets enables Norfolk merchants to carry light stock and replenish often. They now seem to be in a healthy condition, and the outlook is for a fair business this fall.

WILMINGTON, N. C.

The jobbing trade of the city of Wilmington, N. C., has been good and is increasing. Dry goods fall stocks have been opened and are generally large. Business so far is first rate with a good prospect. The purchasing capacity of the people here has greatly improved. The condition of general trade is good; the value of stocks is $1,000,000. Present demand is fair, and the prospective is very good.

FROM SAVANNAH, GA.

The jobbing trade at present is very good. The outlook is fair, depending upon the crops. The trade are carrying stock valued $3,000,855.

ATLANTA, GA.

Stocks are full, and in dry goods larger than in any preceding year. Demand active, with signs of further increase. Cash transactions numerous and collections very satisfactory. Jobbers are extending territory, notably in Alabama. All branches report trade in a healthier condition than hitherto.

AUGUSTA, GA.

With few exceptions, Augusta's jobbers report trade as good if not better than at the same time last year; some report sales 15 to 25 per cent. larger than for the corresponding months of last year. All have on hand about as much stock as usual at this season. It is said that the cotton crop in the territory adjoining Augusta will be at least one-third lighter than last year, and for this reason the fall trade may be comparatively light. Some look for a better trade, however, as the farmers are less in debt and will get better prices if the crop is short.

MACON, GA.

The best estimates give jobbing stocks on hand valued at $3,377,000. Merchants are increasing stocks, capital and facilities. The country is getting down to a cash basis; small merchants owe less. Collections good. Groceries have suffered because farmers are raising their own provisions. The demand in all lines is good. Summer purchases have been light. While a spirit of conservatism exists, jobbers look for an active trade in the fall.

NEW ORLEANS, LA.

Stocks in all lines are very much reduced. Nearly all the principal jobbing merchants are purchasing goods. An unusually lively movement in all lines is expected, and it is reported that heavy stocks are being purchased. The valuation of domestic produce received at New Orleans during the year ended August 31, 1883, was $28,000,000. The total value of the jobbing trade sales in 1882–83 was $200,018,645, in 1881–82 $159,516,729, in 1880–81 $197,758,175, in 1879–80 $179,771,600, in 1878–79 $127,006,939. The exports of domestic merchandise were valued at $95,230,968, against $69,190,431 last year. The shipments by the Louisville & Nashville Railroad increased 54,000,000 pounds. The Southern Pacific carried 345,000,000 pounds westward freights, and the Illinois Central forwarded 268,000,000 pounds. All the steamboat lines to interior points are said to have increased their business immensely during the past season. The number of vessels cleared in New Orleans shows an increase of 255 over last season, and the tonnage an augmentation of 64,800 tons. Fall trade will not fully open until October 1.

DALLAS, TEX.

The value of Dallas stocks on hand is: Groceries $200,000; dry goods $300,000 to $400,000; hardware $150,000; liquors $100,000; saddlery and saddlery hardware $250,000, and agricultural implements $300,000. Prospective demands will not be so large, owing to the drouth. The cotton crop will be light, and retail merchants cautious. The outlook for the next few months appears to be for a fair average trade.

GALVESTON, TEX.

The amount of jobbing stocks on hand greatly exceeds that at a like period last year. Current demands are somewhat less than last year, but from January to July the general jobbing trade was somewhat in excess of that for the same time last season. The outlook for future trade is not encouraging, owing to the short cotton crop. Merchants generally anticipate a rather dull season.

HOUSTON, TEX.

Houston's trade in lumber is estimated at $4,000,000 during the past commercial year, including rough and dressed lumber, sash, doors and blinds, and building material; in live stock, including an export trade in dressed beef, which promises to become a very important industry, the total will reach $2,000,000. The wholesale grocery trade has aggregated $6,000,000, about 20 per cent. of which goes to supply the local trade. In wholesale dry goods the estimated value of the business of the year is placed at $1,250,000. The trade in hides, wool, tallow and beeswax, during the year, has approximated $400,000. As a grain market Houston assumes some importance, and has handled during the past twelve months an amount equal in value to $1,250,000. About 5,000 hogsheads of Texas sugar has been disposed of in Houston up to September, and 10,000 barrels of Texas molasses. The business in cottonseed oil and cake has increased, the total trade being valued at $250,000. On account of its distributing facilities the city is rapidly growing as a general market.

WACO, TEX.

Notwithstanding the drouth and crop shortage, planters will realize a much better profit this season than last. Wholesale merchants report stocks fully up to last year. Collections are rather slow.

MEMPHIS, TENN.

The wholesale trade at Memphis during the past year has been extended, and is said to have aggregated several million dollars more than that of the year ending September 1, 1882. During the commercial year just ended the total sales in leading wholesale lines by Memphis jobbers have been given as follows: Dry goods $3,500,000; clothing $500,000; boots and shoes $2,250,000; hats and caps $300,000; drugs and medicines $1,050,000; furniture $350,000; queensware and glassware $250,000; hardware and iron $600,000; stoves and tinware $400,000; hides and leather $600,000; tobacco $1,000,000; total $10,800,000. The wholesale grocery trade has increased its business some 25 per cent. during the year, and, it is hardly necessary to add, the total volume of sales is unprecedented. The gain has been mainly in flour, sugar and molasses. The augmented dealings in tobacco have also been very noticeable. The prospects of the Memphis jobbing trade are conceded to be very favorable.

THE ONTARIO TRADE MOVEMENT.

Toronto's trade has been very quiet, and wholesale dealers have curtailed importations. Wholesale stocks are not large, but a fair fall trade is anticipated. Provisions have suffered from the break in hog products and large stocks; outlook is not cheering. Fresh meats are in good consumptive demand. There is quite an active trade in millinery, and the probabilities are that dry goods will soon move freely. As compared with the summer months of last year, sales of dry goods have declined. Groceries and hardware have moved steadily, but orders are small. Collections, with the exception of those due from the northwest, are reported fair.

MONTREAL, QUEBEC.

The general wholesale trade as reported at Montreal, Quebec, is quiet. The outlook for the fall trade is regarded as favoring a fair average only. Merchandise is moving with moderate activity. Groceries are quiet, and hardware and iron are without noticeable change. This is also true of the dry goods trade which may be said to fairly characterize the major portion of the distributive movement from jobbers' hands.

WHEAT PRODUCTION IN THE UNITED STATES AND IN INDIA.

In a letter which we printed last spring a London correspondent presented some interesting comparisons relative to the competition of the United States and India in the British markets, and expressed the opinion that the great distances and heavy freights and canal dues against which the Indian agriculturist had to contend precluded the hope that he could ever seriously compete with America for the supply of Great Britain with cotton and wheat in years when American crops are ordinarily abundant. In some comments upon the letter we pointed out that much might be done in the way of lessening distance and cheapening rates of transportation, and that the very fact that India was able when American crops were short to keep prices down by forwarding unexpected supplies was of more importance than our correspondent was inclined to admit, since it showed that, for the future, the crop outlook in India must be regarded as an important factor in making the prices of American wheat and corn. That our views upon this matter were essentially sound there is now not much reason to doubt. During a comparatively recent period a variety of circumstances have contributed to develop and render available India's conceded powers of production. The government of India has lately set to work to help the agriculturist by securing easier charges on the railways. Morever, the depreciation of silver in the west of Europe, and the large quantities of that metal which were rendered available for use in India, induced increased activity in exportation to Europe.

In a recent article the London *Daily News* takes up the subject, and referring to the circumstances mentioned declares that America is not the ultimate point of interest in the inquiry into the elements of international competition in agricultural production, but that the increasing productive power of India must be reckoned with. The *News* argues that the fertile soil and cheap labor of India will be sufficient to offset the difference in freight charges now existing in favor of America. As the journal referred to points out, the kind of living with which a native of India is satisfied is doubtless far inferior to that which a western farmer regards as necessary, and the rent paid by the Indian agriculturist is probably no grave burden unless he has become enmeshed in the snares of the local money-lenders. Still another consideration (referred to above in another connection) is, that the natives of India will work for silver, troubling themselves in no way about the cheapness of that metal in Europe, whereas the American farmer will work only for gold or its full equivalent. This latter consideration, however, it may be incidentally remarked, will probably be valid only temporarily. Still, making every allowance, it may be easily seen that the circumstances mentioned will exert no little influence on the position of America as the chief source of Europe's food supply. The precise extent of that influence it would be as yet premature to attempt to forecast; there can, however, be little or no doubt that, as we have heretofore pointed out, its effect will be materially felt in the market prices of our cereals.

THE BUSINESS YEAR IN THE SOUTH.

The first of September, marking the close of the commercial year, brings with it the customary "annual reviews" by leading southern journals. These record the total of commercial and industrial transactions throughout a large portion or all of the southern states, with particular reference to the interest which the city at which the journal is printed has in the same with comparisons of like totals for preceding years, and the outlook for the future. The first southern newspaper at hand containing a review of this nature is the Charleston (S. C.) *News and Courier*. The agricultural progress of that state is conspicuous. The acreage of the several crops in the years noted was as follows:

	1867.	1874.	1882.
Corn	816,041	924,454	1,356,305
Cotton	600,000	800,000	1,409,323
Oats	70,900	62,174	362,373
Wheat	145,625	91,905	201,816

It will be seen that between 1867 and 1874 there was an increase in the acreage of corn, but a decrease in the acreage of oats and wheat, while the acreage of cotton increased 33 per cent. Between 1874 and 1882 there was an increase of 46 per cent. in the acreage of corn and of 76 per cent. in cotton, while the acreage of oats was nearly quintupled and the acreage of wheat more than doubled. The yield of these crops in the years named was:

	1867.	1874.	1882.
Corn, bushels	7,834,000	10,169,000	17,045,735
Oats, "	787,000	715,000	7,929,970
Wheat, "	932,000	579,000	1,934,970
Cotton, pounds lint	75,000,000	140,000,000	279,437,156

From this it appears that the yield of corn increased to 250 per cent. of what it was fifteen years ago, that of oats to 1,000 per cent., wheat 200 per cent. and lint cotton nearly 400 per cent. Since 1868 the the number of horses in the state has increased to 60,357, or 150 per cent. of the total in 1868; mules to 67,675, or more than double; milk cows to 139,182, or nearly 2,000 in excess of those in 1868; other cattle to 221,590, or 150 per cent.; sheep and lambs to 207,468, or 115 per cent., and hogs to 590,506, or nearly three times as many.

The city of Charleston has likewise made long strides in the direction of commercial progress. The gross amount of the trade of the city, including the value of the staple products received and of local manufactures, was $75,115,400, against $74,839,904 for the previous year. But it must be recalled that this result was obtained notwithstanding the decline in the price of cotton and of naval stores and a falling away in the wholesale grocery business. The estimated amount of the wholesale and retail trade of the city as given is $29,000,000, against $30,000,000 last year, there being a marked increase in most branches of business. The exports of phosphate rock last year were largely in excess of the exports in 1882, and the amount of South Carolina rock exported

and manufactured was 352,631 tons, against 341,113 tons the year before. New and important works have been erected near Beaufort, and, while some of the mines have suspended operations, the phosphate business as a whole has been profitable. The receipts of spirits of turpentine were 65,914 casks, the largest except in 1882. The receipts of rosin were 285,846 barrels, the highest in a previous year being 258,446 barrels. The cotton receipts amounted to 550,596 bales of upland and 15,497 bales of sea island. These are the largest ever reported except for 1881, when the receipts of uplands were 610,970 bales. The trade in lumber is very important, amounting last year to 40,000,000 feet. New enterprises in Charleston have been frequent during the year, and among them are the Edison Electric Lighting Company, the Stoney Landing Company, the great Charleston cotton mill, the barrel factory, the West Point grist mill, the Charleston Phosphate Company, and the telegraph line to Morris Island. The gain made in industrial lines is shown by the fact that the city enterprises now employ 6,558 persons, against 4,356 last year, while the value of the product is $9,341,400, against $8,116,568 last year. This includes, of course, the manufacture of fertilizers, which amounts to over 100,000 tons annually. Indicative of a great industrial future for the state are the newly organized and very prosperous cotton mills. Late statistics at hand show that these now employ about 4,500 hands, and that the annual value of the total product is about $6,000,000. Four of the mills are operated by steam. The percentage of net profit reported by the different mills ranges from 10 to 21 per cent., and this favorable exhibit naturally enough shows its effect in a report that new cotton mills are now building in several portions of the state. The gain at the city of Columbia is proportionately great and equally gratifying, and the *News and Courier* finds cause for a considerable amount of congratulation upon the outlook for the future as well as the record of the near past. Its watchword appears to be: "Bring the mills to the cotton," which appears to be well chosen to judge from the success already attained in that direction.

Perhaps as interesting a feature of the elaborate record of the business year contained in the mammoth edition of the New Orleans *Times-Democrat* of the 1st inst., is to be found in the interviews with the governors of most of the southern states. These certainly show that the south has learned thoroughly the value of its mineral and forest wealth, as shown by the utilization of the same during the past year, and the preparations for continuing this work in the future. The benefits to be gained from diversified industries are likewise appreciated, and small shops and factories are beginning to dot the entire region. The advantages of more thorough, at the expense, if necessary, of less extensive cultivation of crops, are also brought to the surface, and, in the long run, must count heavily in favor of the south. There is also less of the practice of mortgaging crops in advance, and the colored population is spoken of as being more prosperous than of old. Public schools are more highly prized than they were, as is shown by the willingness with which a heavy school tax is voted. In referring to these lessons which have been learned in the past five or six years, the *Times-Democrat* makes the statement that they have been the cause of a degree of prosperity which is best shown in the statement of the assessment increasing nearly $240,000,000 this year, close on the value of the entire cotton crop, Texas alone adding $150,000,000 to its taxable property in two years, and Arkansas $35,000,000; in the improvement of its farmers, now more prosperous than ever, nearly out of debt, and free from crop mortgages; in the improvement of state finances, where deficits no longer occur, but interests and debts are promptly met and paid, and in the restoration of harmony between the races, and in the end of race and political disturbances. In summarizing the gains made throughout the different states of the south, it is recorded that in Arkansas, in addition to earnest efforts making to rehabilitate the state's finances, the lumber lands are being rapidly purchased by intelligent capitalists, and saw mills are going up to such an extent that within six years the value of the lumber lands there have increased twenty times. In Florida great efforts are making at reclaiming the hitherto unexplored swamp-lands which will come largely into the market as valuable sugar-lands. The immigration there is large, railway building is extensive, and the orange cultivation is making great advances. In Georgia, where the Atlanta exposition did so much to enlighten the country and the world as to its resources, great gains are making. Prominent among them is the duplication of smaller industries. Careful cultivation of all crops and the importance of raising grain crops in the south are fully recognized there. In manufactures it is rather confidently declared to be "a dangerous rival to New England, and is adding 150,000 spindles to its mills each year." In Louisiana, which last year gathered its best crops, the importance of protection from overflow is coming to the front as a very vital question. Its railroads have improved a good deal, but in general manufactures it is not believed to have made the full advance to which it is entitled. There has been a very large amount of railway building in Mississippi, more than in any one previous year. Cotton and woolen mills in that state are flourishing, fourteen in number, and are being added to yearly. The offering of inducements to secure immigration is attracting a great deal of attention and meeting with some success. Tennessee's "bugbear of a troublesome debt having been got rid of, the people look forward to a new era of prosperity." That is the way it is put. In this state mining and manufacturing is receiving great attention, and the development of the iron and coal mines of the state is already enriching its citizens. As might be expected, Texas has made the greatest material progress, being the largest, most populous, and in natural resources the richest of the southwestern states. Its annual assessments increase from $60,000,000 to $100,000,000 per year, thus necessitating a constant decrease in the rate of tax levy. It is noted that the rate to-day is three-tenths of one cent on the dollar, and that an extra session of the legislature has been called to cut it down one-half.

The *Atlanta Constitution* of a like date with that given above reviews the truck farming year in Georgia, and finds that a highly satisfactory result has been attained. Georgia raised about 6,250,000 melons, of which she sent to market all but 1,000,000. This enormous crop, supplemented by the vegetable crop, has paid the farmers about $250,000, which may be considered a surplus above the staple crops. Much of the truck land was used for cotton and corn after the truck crops were taken off. The melon acreage in Georgia will be larger than ever next year, and the shipments correspondingly so. The other varieties of truck are likewise reported to be raised more extensively.

On the whole the agricultural and commercial and industrial progress at the south during the past year has been very marked, and the rate at which the advance is making in several directions bids fair to not only outstrip the pace of northern competitors but to make it decidedly an open question as to whether the practical monopoly in the lines referred to shall remain north or south.

LOUISVILLE AS A COTTON MARKET.

Our correspondent at Louisville, writing under date of August 22, says:

The great Southern Exposition has directed attention to the city whose enterprise has made this huge display a successful fact, and has led to some inquiry into her commercial pursuits.

Louisville has for many years figured among the minor cotton markets, but it is only recently that she has shown any marked gain in importance as a cotton center. Some time ago a house of influence and large wealth was encouraged by the geographical advantages of Louisville's situation to embark in the cotton factorage business. They were followed by other substantial houses, and their efforts were subsequently assisted by the establishment here of a large buyer with valuable Liverpool and eastern spinning connections. The cotton business is, therefore, now rapidly on the increase, and this while Cincinnati and Nashville are yearly losing ground as cotton markets. Several new buying concerns are opening for the approaching new season, and the extension of the business is likely to be material.

Louisville is fortunate in possessing a compress of unusual power and excellence (the one which was on exhibition at the Philadelphia Centennial), and this with the large warehouse and cotton-handling appliances attached secures to shippers and railroads the best possible advantages in this respect.

The following exhibits the ratio of increase in the actual cotton business of Louisville: Net receipts, 1880, 13,000 bales; 1881, 27,000; 1882, 31,000; 1883, 38,000. The receipts in the coming season are expected to exceed 50,000 bales.

The total quantity of cotton passing through Louisville approximates 250,000 bales yearly. In certain other markets cotton simply in transit is mixed up with that locally handled, which gives those markets an entirely fictitious importance statistically.

Considering the close proximity of Louisville to the cotton fields of Tennessee, Alabama and Mississippi, the commercial intimacy of her merchants with the whole south, and her unsurpassed railroad and river connections, Louisville ought long ago to have attained a good position among the large cotton markets, but until recently her merchants have not appreciated her opportunity in this direction. Now, however, it is being recognized, and interest in cotton business is assuming an importance which is likely to yield substantial results.

A large and comprehensive scheme is now on foot for the immediate erection here of an extensive cotton mill, by which the valuable plant, executive and good-will of an eastern concern, whose reputation stands very high, will be transferred to this city. While this will materially assist the advancement of the Louisville cotton market, it affords practical evidence that eastern manufacturers acknowledge the serious competition of southern cotton-spinning enterprise and the growing importance of factories being located in contiguity to the cotton fields. Probably no city affords greater inducements or more favorable considerations for the establishment of cotton mills than Louisville. The climate is especially adapted to cotton spinning, as it contains the necessary moisture to ensure easy and economical spinning—a desideratum with all intelligent and successful spinners—and while the raw material can be bought here at little over its plantation cost and good selection be obtained (which cannot be had in the small interior towns), the manufactured product can be readily sold on the spot at prices which are handsomely remunerative to the manufacturer.

OCCASIONAL NOTES.

Among practical monopolies existing quite independently of financial combination is that of the supply of American nickel, which mainly comes from Pennsylvania mines owned by a single individual, who thus controls the supply of the American product, which, on account of its superior quality to the imported, commands a higher price. Nickel mines are being discovered in this country from time to time, but the uncertainty as to probable yield or the remoteness of the location as affecting freight charges has prevented the investment of capital for their development. The latest discovery, according to a telegram from San Francisco, dated the 3d inst., is of important deposits of nickel ore having been found in Churchill county, Nev., the ore assaying 30 per cent. of pure nickel. However this may be, it is certain that all manufacturers of goods into which nickel enters would welcome competition in the output. The largest proportion of American nickel used is in the Naugatuck valley, Conn. In quantity employed for plating New York follows suit. The reduction made by the tariff on pure nickel and alloys of nickel, will, it is considered, lead to an important increase in German and English importations. Prices of nickel for the past year or two have continued pretty steady.

Some interesting experiments have been recently made in the south which seem to show that it is possible to save cotton from the ravages of the worms which have heretofore done so much damage to the plant. The Atlanta (Ga.) *Constitution* of recent date contains an interview with Commissioner Henderson and Inspector Rogers in which details of the experiments made are given. London purple was the poison used to kill the worms. This was dissolved in water (half a pound to fifty gallons) and was sprinkled over the cotton by means of a pump. The first application succeeded in driving away the worms. A stronger solution was then thrown upon the plant and this caused the death of the eating worms. Where a solution of one pound in sixty gallons of water was used it was found that where it collected in drops it injured the leaves. Inspector Rogers is of the opinion that the proper strength would be found in a solution of one pound of the poison in from eighty to ninety gallons of water. Commissioner Henderson expressed himself as thoroughly convinced of the infallibility of the poison, and he thinks that there is now no reason why the farms of the state should be troubled by the caterpillar. Used in the proper proportion, he says the poison does no harm to the cotton plant, does no injury to the man who puts it on, and effectually kills off the worms. The cost of applying the poison is very slight, and a considerable space can be covered in a short space of time.

The free-traders are not alone in their activity in relation to the still unsolved tariff question. The Metropolitan Industrial League a few days ago appointed a committee to attend the conventions of both political parties in the state of New York, and to urge upon them the adoption of a policy embodying the protection of American labor and the abolition of all internal revenue taxes. The committee is to advocate further the repeal of all burdens upon American ships and the awarding of all ocean mail contracts to the lowest bidder among American ship-owners, the abrogation of all treaties that interfere with a practical enforcement of the Monroe Doctrine, so as to secure the removal of any obstacles that prevent the control by the United States of Central and South American trade, and the establishment of an efficient national bureau of labor statistics. The league is of opinion that an agreement of the parties upon these points would set at rest the free-trade question and prevent calamitous labor disturbances and derangements of business and industrial interests. There are, it will be seen, many influences at work to prevent a division of parties upon the tariff issue; and, judging from the recent utterances of party platforms, an evasion of the question is not unlikely to be the result. The attitude of the parties in the pivotal state of New York regarding the tariff is naturally a subject of no little concern to both free-traders and protectionists, and the declarations of the conventions held there will be awaited with considerable interest.

The Senate Committee on Labor continued its sessions during the last two weeks and listened to a great deal of testimony from all sorts of witnesses regarding the subject of their investigation. Very little that was new or instructive was elicited from the majority of those appearing before the committee. One witness who attracted some attention was Dr. Norvin Green, the president of the Western Union Telegraph Company. He gave the com-

mittee some information concerning the value of the Western Union stock, which, he said, instead of being watered had gone through a process of distillation. The lines of the company, it appears, have been extended sixfold since 1866. Between that year and 1881 Dr. Green said there had been no increase of the company's capital. The receipts of the company he estimated at $19,000,000 and the expenses at $9,900,000. The company is now earning 8 per cent. on $80,000,000 of capital. The witness said that four-tenths of the expenses of the company consisted of salaries, and that, contrary to the statements of the telegraphers, the average wages paid were $70 per month. He opposed government telegraphy, declaring that since the British government had taken hold of telegraphy the progress of invention had been checked in Great Britain.

Touching the attitude of the company toward the Telegraphers' Brotherhood and other similar unions, Dr. Green said that the company looks with disfavor on all organizations going beyond a benevolent and protective limit and menacing the interests of the company. The company, he said, would discourage all such organizations, but he could not undertake to say whether it would attempt to break them up. Concerning the statement that telegraphing work tends to break down the health of the operators, the witness said that he did not think that electricity had any injurious effect upon the health. As a rule, however, operators left the business when they got married, and not many remained in the business for more than ten years. The wages paid, the witness thought, compared favorably with those paid to other skilled laborers. In particular, he ventured to say no female employés, excepting the teachers in the public schools in New York city, received better pay than female operators. The witness said that corporations should encourage benevolent associations among their employés, but in reply to the question whether large corporations ought not to pay their employés better wages, from the broader sense of justice and charity, he said that corporations were organized to make money, and were not of a charitable nature. The directors tried to get their work done cheaply for the benefit of the stockholders. The witness further said that in his opinion the modern method of building railroads through construction companies, composed practically of the same men who owned the roads, was an ingenious method of getting out stock without costing anything. He said, also, that he did not consider any of Western Union's stock as water; it had been distilled.

Mr. John Roach, the shipbuilder, said that the condition of labor has been gradually improving since he began life, and the hours of labor had been reduced. Many among his workmen owned houses of their own. His pay-roll last year was $1,587,000. The witness thought that little good could come from legislation on the labor question; more good could be accomplished through the pulpit and the press. He thought that a convention should be held by capitalists and manufacturers to consider the question, since the feeling of distrust between capital and labor was growing so strong that capitalists were becoming timid in launching out into enterprises. The rate of wages paid by manufacturers was not much regulated by the rate of profits in his opinion. In an experience of forty years his profits did not average over 5 per cent. on a transaction. Mr. Roach said that he was not opposed to trades-unions. He obliged all his men to treat with him individually, however, and allowed no combination of men to run his shops. In some cases he had furnished intelligent workmen with capital so as to enable them to enter the business they were engaged in on their own account. The witness reiterated his well-known views on the subject of free ships, declaring that free trade in shipbuilding would be ruinous to the American laborer. He said that 95 per cent. of what it cost to build a ship was paid for labor.

On many accounts the most interesting testimony given before the Senate Committee was that of Mr. Gould, on Wednesday, when the financier recounted the story of his gradual rise from a poor and obscure boyhood to his present position of power and influence. He expressed general satisfaction with the present arrangements of society, as in the main affording a chance for every sober and industrious man to better his condition. Much of his testimony was devoted to proving the inexpediency of government control of telegraphs. Such control, he thought, would be contrary to our system of government. Under present conditions there was danger, he thought, that the telegraph would become a political machine if placed in the hands of the government. Moreover, unless the government secured the rights of the Western Union it would, in his opinion, be impracticable for it to go into telegraphing. It would hardly be possible, he thought, to operate a line of telegraph independent of the railroads. The railroad facilities are indispensable to the telegraph, for whatever breaks occur in the lines the railroads must be used to reach the spots and repair the damage. Mr. Gould, however, expressed himself as willing that the government should try the management of the telegraph. He would be willing to sell out his interest in the present plant for a reasonable amount, and would be willing to abide by a fair arbitration. He said that the stockholders of Western Union recognized the right of the government to take the property of the company under appraisement. The stock of the company was, he said, largely in the hands of small investors. He did not think there was any more "water" in the stock of Western Union than in that of any other corporation with which he was connected. In reply to a question as to what he thought of a government policy to regulate the charges for fares and freights made by railroads and other corporations, he said that he would have no objection to such a policy provided the government would guarantee good dividends.

The fifth annual exposition of the Toronto Industrial Exhibition Association, which is to be held in that city from the 11th to the 22d inst., bids fair to be the most successful fair ever held in Canada. The circumstances which have led to the holding of annual exhibitions in Toronto afford an example of rare energy and enterprise on the part of the citizens of that city. In 1877 the Provincial Exposition, held annually under the auspices of the government of the Province of Ontario, was held in London, and it was decided to hold the exhibition for 1878 in Toronto. Complaint was made of the want of accommodation, but the city agreed to erect commodious buildings on the understanding that the exhibition of 1879 should be held there also. This agreement was not carried out by the directors of the Provincial Exposition, and some influential citizens of Toronto conceived the idea of holding an annual exposition in order to utilize the accommodations afforded by the buildings erected in 1878. For this purpose a society was incorporated, composed of representatives of the principal commercial and industrial associations in the city. The exhibitions hitherto held under the direction of the association have abundantly justified its foundation. The exhibition grounds cover about sixty acres, and are readily accessible by boat and rail. The buildings are the most commodious in the dominion. The entries made this year are unprecedentedly large, and several exhibitors have been obliged, owing to lack of space, to erect buildings for their own goods. Demands for space in the implement, machinery and live stock departments are largely in excess of the available supply. The display of horses will be one of the features of the exposition. Among the other attractions must be mentioned an electric railway, which is now in course of construction, and which will carry visitors around the grounds. The buildings are to be lighted both by gas and by electricity, a competitive test of the relative powers of these lights being intended. An unusually large number of exhibits have been sent from the United States this year.

The report of the British Controller in Bankruptcy for 1882 shows a continued increase in the number of insolvent estates administered under the Bankruptcy act. During the first ten years under the present act the annual number of cases steadily increased from 5,002 in the year 1870 to 13,113 in the year 1879, from which it decreased to 9,041 in 1882. The figures show a decrease in the large manufacturing centers on the Yorkshire and Lancashire coal fields. The greatest number of insolvencies naturally occurred in the trades in which most persons were engaged, namely, among dealers in provisions and liquors, chiefly small grocers, but the most important fluctuations of increase and decrease during the period referred to have been in the clothing trades, including drapers, shoemakers, etc., and in the building trades, including carpenters, wheelwrights, bricklayers, etc., those two classes having furnished nearly five-eighths of the whole decrease of 4,072 since 1879. While the number of bankruptcies last year decreased 14 per cent. there were 34 per cent. fewer liquidations by arrangement, and 30 per cent. fewer compositions. Under the present act, as appears from the figures, a general increase of insolvency produces a very small increase of the better class of compositions, and a general decrease produces a very large decrease in their number. The opposite rule obtains with the worst class of compositions. An actual increase of the worst compositions occurred in the London bankruptcy district. Such facts as these afford the best possible justification of the determination of Mr. Gladstone's administration in pressing the recent bankruptcy measure through Parliament.

LETTERS TO THE EDITOR.

EARLY HISTORY OF THE NORTHERN PACIFIC RAILROAD.

To the Editor of BRADSTREET'S.

SIR—The completion of the Northern Pacific Railroad is the culmination of a work begun so long ago as almost to cause the great events of the beginning to be forgotten by the participants in the concluding ceremonies. As an active participant in the original movements, begun in 1852, first to call public attention to the value of the country traversed by this road, and then to secure the surveys necessary to locate one or more great roads to the Pacific, I am sure some account of the steps then taken will interest your readers. It will be remembered that Senator Benton was an early and urgent advocate of a railway to the Pacific, and that for several years his great force in Congress concentrated attention to the central belt, and to a line crossing the mountains north of Santa Fé, in fact the only absolutely impracticable district, as was shown by the first reports returned by Captain Gunnison, commanding the central survey, in 1852-'53. Fremont having previously concealed the true condition of this belt, and really aided in the continued misleading of Benton and his followers. The attention of others had been drawn to the more favorable conditions of the upper valley of the Missouri, and to its milder climate, due to the lower altitudes, and also to the proximity of the Pacific coast line to the mountain ranges there, which brought the softening influence of the sea farther into the interior. After studying the earlier reports made by Sir John Richardson and Sir George Simpson, of the Hudson's Bay Company, describing their experience in the country of the Saskatchewan, Athabasca and Mackenzie rivers, the writer availed himself of an opportunity afforded by the presence at Washington of Culbertson and other officers of the American Fur Company, who then occupied the whole of the upper Missouri country with their trading posts, to send thermometers to several points on that river, Fort Union and Fort Benton particularly, then not United States military posts but trading posts of the fur company only. The results of observations made at these posts confirmed the estimate previously entertained of the mildness of the climate, and its full adaptation to occupation and cultivation; showing that for 2,000 miles nearly, of direct departure northward from the latitude of the upper Rio Grande, in northern New Mexico, the climate actually became milder and the country more generally cultivable.

In the meantime representatives of California in Congress urged strenuously the organization of a system of trans-continental surveys, and in December, 1852, James A. McDougall, chairman of the House Committee on the Pacific Railroad, obtained the passage of an act granting $100,000 for the expenses of these surveys, to be conducted by the topographical engineers of the army, and to be organized and directed by the Secretary of War. Under this act for general survey parties were immediately organized, the central line under Captain Gunnison, who went up the Arkansas river valley and traversed the impracticable Benton route, entering the upper Rio Grande valley and going through Coochetope pass to the "Gunnison country," now so called, losing his life by hostile Indians, and his party going to Salt Lake for the winter. Lieutenant Whipple was sent along the Canadian river, on the 35th parallel route, and succeeded in finding a very good line, crossing the Rio Grande at Albuquerque, and the Colorado above Yuma, to San Diego in southern California, not, however, taking the general line now followed by the Southern Pacific. The line still further south, along the Gila, was surveyed by Lieutenant Saxton, and from El Paso eastward, by Lieutenant Pope, but this last was very imperfectly done, and much less attention was for a long time given to this line than recent experience has shown it to deserve.

The great northern line traversing the upper Missouri, and directed to get through to the Pacific as best it could in that direction, was assigned to Major Isaac I. Stevens, and was organized with an ample outfit, as was then supposed, but it was longer in getting through, and later in making its report, than either of the others. It had little sympathy from Jefferson Davis, then Secretary of War, and was embarrassed from want of appropriations, the whole plan of all these surveys having been entirely inadequate. There was, it is true, a further appropriation of $150,000 made by Congress to complete the surveys, then increased by four or five fragmentary lines, but the whole sum was meagre and insufficient for a vast system of trans-continental surveys, and Major Stevens was forced to bear a large personal expenditure, which Congress did not, at least for some years afterward, reimburse. The great and obvious advantages afforded by the mild climate and cultivable country of this northern route, with its lower altitudes and easier grades over the Rocky Mountain ranges, inspired great enthusiasm in the exploring parties, but there was little appreciation in Congress, or on the part of the public generally. And the Hudson's Bay Company, as well as what remained of the American Fur Company, stoutly resisted any other occupancy than their own, and kept before the public the most discouraging statements as to the climate and capacity of the country for cultivation. The writer had the official duty during the period of these surveys of outfitting the several parties with the instruments, then for the first time used in surveys for gradients, or for vertical topography generally, the French mountain barometer being used instead of a line of levels. All the lines and every point at which the altitude above sea level was determined was established from readings of the mercurial barometer alone, and these lines remain, so far as known, base lines of departure for all lateral surveys required in railway construction in the interior.

The great features of contour of the continent determined by these surveys were that the maximum elevation of the interior was in the middle or lower latitudes, and the slope northward was quite as decided and remarkable as that eastward or westward. Many of the tributaries of the Upper Missouri and of the Columbia run northward many hundreds of miles, and the Missouri valley at the foot of the Rocky Mountains, Fort Benton, is but 2,663 feet above the sea, or less than half the average altitude of the plateaux for 2,000 miles southward. This gives to this upper valley a climate as mild as that of Pennsylvania. The average temperature of the several seasons and the year is greater at Fort Benton than at Rochester, N. Y., or at the average of positions in middle Pennsylvania. These were intensely interesting as the first facts determined as to that remote district, but they are now made familiar by the thirty years of War Department and Signal Service observations of climate for the entire interior.

It will be borne in mind that for a long series of years the facts ascertained by these surveys and fully set forth in their reports attracted little attention to that upper country, and the earlier years of the war were especially adverse to any just appreciation of the advantages it offered for settlement or for opening a trans-continental road. But in 1868-69 Jay Cooke began planning for the enterprise, which advanced rapidly and promised early success during the five years following and up to the financial collapse in 1873. Then again a few years of extreme reaction followed, and many thought the hope of a great northern road must be indefinitely postponed.

If those now interested in the splendid success of the present work will revert to the survey reports and scientific publications of thirty years ago they will find that every feature of the present success was fully and definitely outlined at that time. The contour of the whole interior is remarkable, as has been stated, in affording the maximum elevation in the lower latitudes and in reproducing the plains of Russia and Germany in corresponding latitudes here. The great plains of Russia tributary to the Black sea are all north of the latitude of St. Paul, and those of both Russia and Germany sloping to the Baltic are all north of latitude 50° N. latitude, or beyond our northern boundary. All of France is the equivalent in latitude of Oregon and Washington, and all of England is north of Vancouvers Island. We know that on the immediate coast the climates of the north Pacific and the north Atlantic do not essentially differ, and the conditions of the interior of the two continents in like latitudes is modified only by altitude and proximity to the sea.

In general it may be said that the west of Europe is reproduced on these upper plains and on the coast of the Pacific north of San Francisco, and this great road, so much hoped for thirty years ago, is like a great road through central Europe from Odessa to London, with the great advantage of traversing but one empire on its route and not

being compelled to fortify even against the Dominion of Canada, whose government and people, on the whole, may be counted on as friendly.

LORIN BLODGET.

Philadelphia, September 5.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

A creditor having a specific lien upon the income of property which has gone from the debtor's hands into those of a third party may maintain a suit in equity to enforce that lien against such third party, according to the decision of the United States District Court for the Southern District of New York, in the recent case of Ritten vs. The Union Pacific Railway Company.

The Supreme Court of Massachusetts held, in the recent case of Whitwell vs. Winslow, that an instrument reading as follows: "For value received I promise to pay to Elijah Pierce or bearer five hundred dollars, with interest the same as savings banks pay," was not a negotiable instrument, for the reason that there was no certainty in a promise to pay interest at the rate of the dividends of savings banks.

In the case of Gilchrist vs. Brand, recently decided, the Supreme Court of Wisconsin held the rule to be well established that publication of notice of the dissolution of a partnership in a newspaper at the place where the business is carried on is not sufficient to relieve a retiring partner from liability for subsequent transactions in the firm name with one having dealings with the firm prior to the dissolution. In such a case the court held that notice must be brought home to the dealer, or it must appear that facts came to his knowledge sufficient to advise him, or to give him reason to believe, that a dissolution had taken place.

A decision of interest to practical electricians was rendered by Judge Blatchford in the United States Circuit Court for the Southern District of New York on the 29th ult. This was in the case of the Gramme Electrical Company vs. The Armour & Hochhausen Electrical Company, which was a suit in equity brought by the plaintiffs for the infringement of letters patent granted to Z. S. Gramme and another. Judge Blatchford held that the patent granted to the plaintiffs in Austria expired in 1880, before the suit was brought, and that under section 4,887 of the United States Revised Statutes the United States patent expired at the same time. Both having expired before the suit in equity was brought there was no ground for bringing the same.

Some time ago the United States filed a bill in equity, in the District Court at Cheyenne, Wyoming, against one Swan and others, asking for a decree directing the removal of certain fences with which the defendants had inclosed government lands, and praying for an injunction to restrain the defendants from erecting fences on other unoccupied sections of the public domain. Judge Sener rendered a decision in favor of the United States on the 23d ult., holding that the unlawful fencing of large tracts of the public lands constitutes, first, a great public wrong; secondly, a public nuisance; and, thirdly, it is in the nature of a purpresture at common law, and so is remediable by an injunction issuing out of a court of equity.

The relation of the holders of public offices to the legislature was under consideration in the Supreme Court of Wyoming in the recent case of Lee vs. The Board of County Commissioners of Uinta county. The defendant in error sued the plaintiff in error for the recovery of a certain amount of money received by him as register of deeds of the county named during the months of January, February, March, April and May, 1878, which amount plaintiff in error retained instead of returning the same into the county treasury, as provided by an act of the legislative assembly of Wyoming Territory, which went into effect on and after January 1, 1878. The defendant in error had judgment in the District Court, and this judgment was affirmed by the Supreme Court. Chief Justice Sener, in ordering an affirmance, declared that public offices, though salaried, are not held by contract or grant, and that they are under the complete control of the legislature, unless there be some special restraint in the organic act of the territory or the laws of Congress governing the territories. Such offices may be abolished, or the terms thereof or the salaries pertaining thereto may be reduced, or new duties may be imposed.

The question what constitutes an indorsement of negotiable paper was involved in the case of Osgood's Administrators vs. Artt, recently decided by the United States Circuit Court for the Northern District of Illinois. It appeared that in May, 1856, the defendant executed to the Racine & Mississippi Railroad Company his note for $2,500, with interest, and at the same time to secure the payment of the note executed to the company a mortgage upon certain real estate. Subsequently the company made its bond acknowledging its indebtedness to plaintiffs' intestate in the sum of $2,500, with interest, and promising payment of the same. At the same time, as security for the payment of the bond, the company assigned the note and mortgage executed by Artt. When the instruments were delivered to Osgood the bond, note and mortgage were attached firmly together with eyelets, and were numbered with the same number. The note, however, was not indorsed. Osgood had no notice at this time of any defense to the note. An indorsement was subsequently made on the note by the company's authority, but in the meantime Osgood had notice of facts which, it was conceded on the trial, showed a good defense between Artt and the railroad company, viz., an entire failure of consideration, and also fraud upon the part of the company in procuring the execution of the note and mortgage. The court, in ordering judgment for the defendant, said that the rule was well settled that the bona-fide purchaser of negotiable paper payable to order, if he receives the same without indorsement, takes only the rights which the payee has, and therefore takes subject to any defense the payor may rightfully assert as against the payee. Neither the general doctrines of commercial law, however, nor any established exceptions thereto made words of mere assignment and transfer of such paper contained in a separate instrument, executed for a wholly different and distinct purpose, equivalent in effect to an indorsement. Applying these doctrines to the case under discussion, the court held that the transfer of the note in suit by words of assignment in the body of the railroad company's bond did not amount to an indorsement of the note, although the bond, note and mortgage were originally fastened together by eyelets. The plaintiffs intestate, therefore, took the note subject to the defenses existing between the defendant and the railroad company. By indorsement, after receiving notice of the defenses existing between the defendant and the railroad company, he could not acquire any greater rights than the latter possessed.

BUSINESS NOTES.

An exhibition of electrical appliances has recently been opened at Vienna, and the London *Daily News*, after stating it could hardly have been held at a more opportune moment, proceeds to give a column resume of the progress of this great force in its march toward the displacement of less efficient servants of mankind.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* (London), for the week ended August 10, was 213, against 218 in the like week in 1882 and 235 in the corresponding week in 1881. England and Wales had 188, against 198 and 216 respectively in the corresponding weeks in each of the preceding years named; Scotland had 19, against 17 and 16, and Ireland 6, against 3 and 3 in each of the weeks ending August 18 in 1882 and 1881.

The proposed parliamentary legislation respecting the storage of petroleum in London has, during the recess, been followed by an "exhaustive inspection of all the places where petroleum is stored for sale or deposit," not only in London, but in the provinces as well. The *Pall Mall Gazette* says of this: "That such an inquiry should only now be undertaken, with a view to legislation, is a curious illustration of the precipitancy with which the late petroleum bill was introduced into Parliament. To propose to legislate one session and then to spend the recess in accumulating materials to prove the necessity for such legislation next session is a somewhat roundabout mode of procedure."

The latest proposition in the way of competing with established telegraph lines comes under the title of the "Citizens' and Telegraphers' National Union Telegram and Cablegram Company." The capital is expected to be $5,000,000, and no one person is to be permitted to hold more than $100,000 of the stocks, to avoid "monopolistic tendencies." Members of the New York Assembly of the Telegraphers' Brotherhood are quite enthusiastic over the plan, and declare that aid, in the shape of liberal subscriptions to the stock, has been promised in Wall street. Thus far, however, there has been recorded no actual movement in the way of incorporation, organization or subscriptions.

The following national banks have been organized: First National Bank of Manasquan, N. J.; capital $50,000; Charles J. Parker president; John Terhune cashier. First National Bank of Shakopee, Minn.; capital $75,000; Horace B. Strait president; David L. How cashier. The First National Bank of Oswego, Kan.; capital $60,000; J. B. Montgomery vice-president; F. C. Wheeler cashier. The First National Bank of Ellensburgh, Wash. Ter.; J. R. Lewis president; A. W. Engle cashier. First National Bank of Anniston, Ala.; capital $100,000; Duncan T. Parker president; Oliver A. Eelston cashier. The following changes have taken place: National City Bank of Boston, S. R. Payson president in place of C. L. Thayer. First National Bank of Decatur, Tex., J. L. Ullman president in place of H. Greathouse.

The *Paper World* in its last issue presents an elaborate and apparently a carefully prepared table giving the producing capacity of the paper and pulp mills of the United States and Canada, compiled from the paper mill directory of the world, and brought down to August 1, last. The details presented will unquestionably prove of great interest to the trade. The general results noted show that the paper and pulp mills of the United States in operation August 1, 1883, were capable of turning out a product of 7,213,950 pounds daily. If from this be subtracted the various pulps and fibers, it is found that the actual product of paper of all grades is 5,782,400 pounds. The mills of all kinds that are idle and being built have a capacity of 260,800 pounds, which added to the total shows a grand total of 7,474,750 pounds for the United States, and by adding that of all mills in Canada, New Brunswick, Novia Scotia and Manitoba, the product of North America is found to be 7,781,050 pounds.

The imports of silk manufactures at the port of New York for August, as reported by the Silk Association of America, were of less value than those in August in any one of the three years next preceding, the appraised value of the same amounting to $3,806,951, against $5,032,381 in August, 1882, $4,159,267 in August, 1881, and $3,920,829 in 1880. In that month, in 1879, the total was $2,331,007. The variations in value of the various importations in silk manufactures in August, 1883, as compared with August in years preceding, may be noted from the following:

	1883.	1882.	1881.	1880.
Silk piece goods	$2,045,578	$2,806,546	$2,129,962	$2,032,433
Satins	4,741	12,816	26,254	25,567
Crapes	41,733	57,089	48,802	37,046
Pongees	....	634	754	926
Plushes	101,489	148,213	139,305	65,120
Velvets	374,887	325,182	200,722	296,642
Ribbons	289,113	426,637	359,713	476,924
Laces	197,596	496,913	430,810	159,024

Totals	$3,806,951	$5,032,381	$4,159,267	$3,920,829

During last month there were, of silk manufactures imported, goods entered for consumption to the value of $3,170,754; entered for warehouse $636,197; total value landed in New York $3,806,951; withdrawn from warehouse $924,283; value placed on market $4,095,037.

It is noted by the Philadelphia *Press* that the iron and steel ship-building industry of the Delaware river has been rapidly developed since January last. This growth is further said to have been without precedent, and is rendered the more conspicuous in that the proportionate amount of like business done elsewhere in the country is at all times insignificant. During the first half of 1883 the ship-building of the Delaware exceeded the total tonnage constructed there during the entire year of 1882. The total tonnage built in the United States (iron and steel ships only) from 1868 to 1883 has been as follows:

Years.	*No.*	*Tonnage.*	*Years.*	*No.*	*Tonnage.*
1868	..	2,801	1876	25	21,346
1869	..	4,584	1877	7	5,927
1870	..	8,281	1878	32	26,960
1871	..	15,479	1879	24	22,008
1872	20	12,766	1880	31	25,582
1873	25	26,548	1881	42	28,356
1874	23	33,097	1882	43	40,097
1875	20	21,632			

There were built in New York, Philadelphia and Wilmington, Del., during six months of 1882, fourteen vessels, having a displacement of 13,792.48 tons, and an approximate weight of iron in hulls of 10,000 tons. So far this year there have been built at the various yards on the Delaware river 51 iron vessels, 5 of steel and 36 of wood. The total tonnage of the iron and steel vessels was 55,079 tons, or 110,158,000 pounds. The total weight of the iron and steel used in the construction of these vessels was 31,810 tons, or 63,620,689 pounds. There were also built 36 wooden vessels, having an aggregate tonnage of 20,426. If the production during the remainder of the year keeps pace with these figures the total tonnage, estimating partly from present contracts, which are large and numerous, will not fall below 150,000 tons, with an actual weight, represented by steel and iron used in construction, of 180,000,000 pounds, or 90,000 tons.

The British labor market, as reported by the London *Labour News* of August 22, was somewhat unsettled. About 8,000 cotton weavers in Lancashire had struck. The opinion was expressed that the stoppage would be of short duration only. The strike of North Staffordshire colliers completed its fourteenth week, and there was no indication of a speedy termination of the struggle. In other colliery districts work was plentiful. The ironworkers were making full time, although prices were flat. Ship-builders were very busy, and engineers also, although the dispute among engineers at Sunderland was still on. Building, both in London and the country, was very brisk, and promised to be so for some time to come. Railway and tramway building was as active as ever, and navvies were in great demand. At Birmingham hardware manufacturers were busy. At Sheffield the armor-plate mills and other works for heavy goods were actively employed. The cutlery trade, as well as electro-plate manufacturing, was quiet, and the file trade somewhat steady. Another effort was being made to settle the protracted dispute among the grinders, who declined to concede the 10 per cent. reduction already granted by the cutters. The textile trades were depressed in several branches, and the strikes and "rumors of strikes" prevented manufacturers speculating more than absolutely necessary. At Huddersfield some mills were on short time. At Leeds blanket-makers were especially busy, and most of the factories were fairly employed. At Leicester hosiery weavers were getting busy, and spinners were accepting work freely. The Nottingham lace and hosiery works were only partly employed. In the silk trade work-people were only partly employed. Agricultural laborers were very busily employed and in good demand for harvesting. Hop-pickers in Kent were wanted, and emigration kept steadily up to the preceding weekly averages.

The subject of Pacific coast exports is coming into prominence very rapidly, due in greater part to the excessive crops of grain, wheat and barley, and of hops and wine and honey, which are produced in that region. The relative value of such exports with respect to their destinations is of course an interesting point, and one concerning which the San Francisco *Merchant* takes the trouble to give some figures. The San Francisco exports during July were valued as follows:

To Great Britain		$776,430
British possessions—		
Australia	$201,566	
British Columbia	140,683	
New Zealand	18,867—	361,316
To New York		437,985
Elsewhere in America—		
Mexico	89,462	
Central America	76,927	
Panama	14,144	
South America	5,001—	185,574
European continent—		
Belgium	47,200	
France	155	
Germany	82—	47,437
Asia—		
China	193,144	
Japan	20,128	
East Indies	4,066—	217,338
Hawaiian Islands		223,280
Society Islands		4,515
Marquesas Islands		2,680
Fiji Islands		395
Total		$2,156,950

From this exhibit it appears that the Pacific coast sends about twice as much of its surplus products to Great Britain, the British dependencies and to the continent of Europe as to the United States and to other American countries, north and south. The exports to Great Britain are the largest item, but for $77 sent to England in July $43 worth of products went to New York and $22 worth to the Hawaiian Islands. Australia came next, represented by $20, China $19 and British Columbia $14, followed by Mexico close on $9, Central America $7.50. New Zealand followed and is represented by less than $2. The trade with the Hawaiian Islands, Australia, New Zealand, British Columbia, Mexico, Central America and Panama reached within $20,000 of that with Great Britain. Adding that with South America and Pacific islands it fully equalled it. Adding the exports to China and Japan the shipments to England are $200,000 behind. As the shipments to New York in July were valued at $437,985, it appears that the exports to Great Britain in July were little more than one-third of the total exports from San Francisco.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

Advances have distinguished the stock market for a week. Manipulation has probably done more to send up prices than anything else, although natural consequences have tended to start figures from their low places. There has been a very large covering of shorts, and nothing could be more conducive to increased values than this fact. The market has been decidedly speculative. There can be no doubt but that the substantial stocks are now a good purchase. It seems impossible that they can go lower than the points they touched during the heavy liquidation. If purchases are made on that basis, conservative operators think there is little chance of making a mistake. Men whose judgment permits them to be on both sides of the market, as circumstances may dictate, without committing themselves to confirmed bull or bear principles, unite in saying that the market has advanced too rapidly after the depression that created such havoc in the street. It does not look healthy nor long-lived. One thing that argues against it is a peculiar feature that is apparent every day. The market has opened weak and lower each morning, and prices have sagged until noon, when the bulls have taken hold of their specialties and forced them up with a rush. The remainder of the list has followed by infection, and a steady gain has been made. The movement upward has been convulsive, and not of the strong, regular character calculated to inspire confidence. Within the past few days, however, there has been some buying for long or permanent holding. That is a good sign, but it does not represent an amount sufficient to influence the prices. The great volume of business is in active trading for quick turns, and it is upon these transactions that the course of events hinges. The bears have been somewhat appalled by the way stocks have gone since the recovery began, but they have not given up the idea that there must be a reaction.

While the shipments, especially from the west, are increasing and will from this time on be larger, there are disturbing elements that if not checked will offset the benefits of additional tonnage. The pools which have maintained rates and kept the roads from waging unprofitable wars are in an unsettled state. There could be no time of the year when such a state of affairs could be more unfortunate for the railroads. Grain is a low class of freight, and as it will comprise the bulk of traffic east-bound from the west for several months, a war of rates if inaugurated would exert a depressing influence on the market. A meeting of the Joint Executive Committee of the trunk line railroads and their western connections is at this writing in progress at the office of Commissioner Albert Fink. It was called to consider questions that menace the integrity of the pools, especially the Chicago pool, which is undoubtedly the most important of all. The Chicago pool governs the business east-bound out of that city. The roads in it supply the trunk lines with the largest part of their business, and a disruption, it is plain to all, would precipitate consequences that would be grave. The meeting at Commissioner Fink's office was convened ostensibly to make an inquiry into charges of cutting made by the New York Central Railroad against the western connections of the Erie. In this charge the Chicago & Atlantic, the Erie's Chicago line, is not directly implicated. The Erie's St. Louis and other connections are the ones specified, but there are better reasons for taking up the apparent evidences of irregularities in the Chicago pool, which the meeting cannot afford to overlook and probably will not.

The two main Vanderbilt lines from Chicago, the Lake Shore and the Michigan Central, have been falling far behind in their business. They would naturally receive the largest share of the traffic, and that they have not plainly tells of an artificial cause to divert it from them. Their tonnage for the week ending September 1 was only 25.3 per cent. of the whole, and with the other Vanderbilt road, the New York, Chicago & St. Louis, otherwise the Nickel Plate, but 31. In the adjustment of percentages, which took effect July 1, 1882, before the Nickel Plate and the Chicago & Atlantic were opened, the Lake Shore and Michigan Central were awarded 45.5. Naturally, the new lines have taken some business from them, but they ought not by any reasoning to have taken so much. The loss is 14.5. In the award alluded to the Pennsylvania's Chicago roads were allowed 35.5, the Baltimore & Ohio 8, and the Grand Trunk 11. In the showing for last week the Pennsylvania had 34.1, a loss of only 4 per cent., the Baltimore & Ohio 6.3, a loss of 1.7, and the Grand Trunk 14.6, a gain of 3.6. The Nickel Plate carried 5.7 and the Chicago & Atlantic 14, together 19.7. The Erie, before the opening of the Chicago & Atlantic, received much of its business from the Grand Trunk, which, since, instead of falling off, has kept ahead of its percentage. The figures show the Vanderbilt roads to have been the greatest sufferers. They have been honest, and maintained rates, but if the figures prove anything they prove that there is something in the accusations that the Erie and Grand Trunk have been cutting. The Vanderbilt roads have heavy dividends to pay, and will not submit to any underhanded work. Things have come to such a pass already that the directors of the Lake Shore and the New York Central are considering the advisability of reducing the dividends on those stocks. The Vanderbilt roads must have more business, and there is very good authority for saying if they cannot get it in the pool they will adopt a new policy and get it outside. They have the best facilities, and if war breaks out will step in to take the lion's share. There are other and quite as serious difficulties that threaten the pools. Commissioner Fink proposed that roads exceeding their percentages should pay over to the pool 50 per cent. of the excess of gross earnings. That was an incentive to the roads to increase the excess. Then he decided that all the gross earnings in excess should be turned over. That met with resistance. The next device was the diversion of freight from one road to another to even up percentages. Nothing has produced results so likely to put an end to pools as this arrangement. In the southwestern pool the Rock Island Railroad exceeded its percentage. A quantity of sugar was in its freight house in Chicago and was to be shipped by its line. The commissioner of the pool, for the purpose of evening up, directed that the freight should be shipped by another road. The consignor, a Boston sugar refinery, sued out an injunction to prevent its going by the line named by the commissioner. The sugar went by the Rock Island and the road will not defend the suit. The sugar refinery was supposed to be receiving rebates from the Rock Island, which is nothing more or less than cutting in another form, and objected to the diversion because it would lose the rebate if the sugar went by another line. The conclusion of the pool not to defend the suit was an acknowledgment of the illegality of its methods. Another injunction has been secured in Chicago to prevent the diversion of freight eastbound, from the Chicago and Grand Trunk Railroad. The Grand Trunk had exceeded its percentage and the commissioner of the Chicago pool ordered freight to be diverted from it. This case is undecided. The merchants and shippers of Chicago have organized a Freight Bureau to resist diversion which oftimes delays freight. The last injunction was secured on the ground that the Grand Trunk was the shortest line to the point of destination and to divert it would cause loss in consequence of delay. Commissioner Fink has decided to deny shippers the right of through bills of lading and through rates if they will not consent to diversion. Shippers will undoubtedly take the matter to the courts, on the plea of discrimination. If pools cannot divert freight they will be inoperative, and the only service they can perform will be to maintain rates. If they can do no more, the competition to secure business will be apt to break them down entirely. Concessions will be made to shippers to obtain their freight, and rates will be disturbed. The Chesapeake & Ohio is now in operation between Chicago and tide-water, with a line of steamers to New York. The West Shore Railway will open about the close of navigation, and the Lackawanna road remains outside of the pool. These will be disturbing lines, and unless Commissioner Fink can invent strong measures an unsettled period must ensue. The pool problems are subjects for thoughtful consideration in the financial world. The pools do nothing more than to improve the earnings of the railroads. Between New York and Chicago, to say nothing of other parts of the country, many new lines have been built. They draw from the old ones, whose values must be correspondingly affected, and tend to lower rates.

The course of the market yesterday indicated that the jumping up of prices could not continue. The figures were rushed up in the middle of the day, but they broke down later and the market was ragged at the close.

Money continues easy, and the loan market has been steady and quiet. Call loans have averaged as for some time past from 2 to 2½ per cent., and time loans 5 per cent. The flow of money to the west has been uninterrupted, but not of such magnitude as yet as to disturb the market. Foreign exchange is somewhat stronger, but presents no noteworthy features. The figures are unchanged.

Steadiness has prevailed in the government bond market, but no particular activity has been shown. The prices have been firm. The following were the closing quotations yesterday:

	Aug. 31, bid.	Sept. 7, bid.	Sept. 7, asked.
U. S. 4½s 1891, registered	....	112¼	112½
U. S. coupon	112¼	112¼	112½
U. S. 4s 1907, registered	113⅜	118⅜	118½
U. S. 4s 1907, coupon	119⅜	119⅜	119½

The figures of the bank statement last week showed a gain of $17,700 cash, but by reason of the contraction in loans of $1,715,000 there was such a reduction in the deposits that the reserve required by the 25 per cent. rule was reduced $384,500. Thus the surplus reserve was increased $402,200, and left at $6,224,025. The statement indicates a smaller movement of money to the west than in more active seasons. The following are the changes in the items:

	Aug. 25.	Sept. 1.	Differences.
Loans	$327,595,600	$325,880,600	Dec. $1,715,000
Specie	59,829,300	59,951,200	Inc. 121,900
Legal-tenders	25,312,000	25,207,800	Dec. 104,200
Deposits	317,277,900	315,739,900	Dec. 1,538,000
Circulation	15,618,600	15,636,300	Inc. 17,700

The proportion of total reserve to liabilities is now 26.97, against 24.95 in the same week of 1882.

From Baltimore, Md.: In the stock market there has been something doing in Virginias, with only slight advances. Mining fancies are also more animated, but railroad stocks and bonds remain dull.

From New Orleans, La.: Money is stringent. Premium bonds are advancing.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

	Sept. 8, 1882.	Aug. 31, 1883.	Sept. 7, 1883.

COMMERCIAL.

SUMMARY.

Special telegrams to BRADSTREET'S from the principal trade centers of the United States report that the first week in September has witnessed a very general improvement in business. Special mail reports to BRADSTREET'S, published elsewhere in this issue, bear striking testimony to the opinion that the general jobbing trade of the country is experiencing a genuine revival. Stocks of staples in jobbers' hands, with the exception of dry goods, have been kept low, and sales have been kept well in hand and at shorter terms of credit. At the present time the fall demand has not only plainly showed itself, but is visibly increasing. Even from eastern cities, which have been slower to feel the renewed movement than those closer to the great grain and cattle growing regions, word now comes by telegraph that the past week has shown an unexpected gain in orders and shipments. Kansas City, St. Louis, Minneapolis, St. Paul and Chicago are experiencing the full tide of the early fall trade, and late dispatches indicate that Philadelphia, Boston, Cincinnati and Baltimore are in close pursuit. The industrial situation in general remains without special change. The building trades at New York are still at war with the workers in that line who are not trades-unionists, and leading glass manufacturers have not settled the dispute with their employés. On the other hand the striking iron mill hands at Troy, N. Y., some 2,000 in number, have returned to work, and the leading metal industries elsewhere are fairly well employed. At Philadelphia and vicinity the stoppage of a portion of the cotton and woolen mills still continues. Wheat has declined over 2c. per bushel on the New York market during the week, but has sustained a partial recovery since, owing to covering of shorts, a renewed inquiry and reports of unfavorable weather at the west. At Chicago the decline was greater, the maximum being 5c. per bushel. Indian corn, in sympathy with wheat, fell away about a like amount. Excellent maturing weather and reports of a very full prospective crop aided this. Reports yesterday of cooler weather at the west and northwest advanced prices of that cereal, and the movement was aided by heavy shipments from western cities to tidewater. Provisions declined sharply in the first half of the week, but on Thursday and Friday recovered a good portion thereof, closing firm. Arrivals of hogs are more moderate, and the demand is improved. Petroleum has not varied materially in prices of certificates of crude. Refined oil has advanced ¼c., and this has imparted a bullish feeling to the market. The report of the gaugers of the pipe-line tanks, who are being checked by a committee from the various exchanges, is not expected to be ready before the close of the month. The labor of gauging sediment in stocks has advanced but slowly. Ocean freights have been firmer of late. Coal is going off in many instances at less than the August rates, notwithstanding the August advance, but the movement is a full one from the mines. Pig iron is not accumulating, and recent sales, while small, aggregate in excess of like weeks in 1882. Steel rail production is heavy, and some large contracts are in sight. There has been a well-sustained demand for wool in all markets, and values have ruled firm on all descriptions. There were 142 failures in the United States reported to BRADSTREET'S during the past week, 16 more than the preceding week, 21 more than the corresponding week of 1882, and 77 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: General trade is fairly active. Dry goods about the same.

From Boston, Mass.: Some branches have made a further gain, and the general fall movement is up to a full average for the first week in September. There is not as much animation as might be expected, and some parties are disposed to find fault on this score; but buyers are adhering to their cautious policy, and keep strictly within the line of legitimate operations. There is every indication of a healthy business during the month. Advices from the interior are satisfactory, and the anxiety which buyers evince in regard to speedy shipments show that they are bare of goods. Dry goods, boots, shoes, clothing, crockery and furniture are moving quite freely. The sales of wool foot up larger than last week, and prices are firm. The money market is steady, and borrowers in good standing find accommodations easy.

From Buffalo, N. Y.: The improvement in the general trade movement is fully sustained, the volume of business for the past week in nearly all departments being of satisfactory proportions. Values are low and margins close. Credits are scrutinized more closely than usual. Stocks generally are in good shape and well in hand. Banks report plenty of loanable funds, discounts ranging from 6 to 8 per cent.

From Philadelphia, Pa.: General trade has been more active, and the prospects for the near future are encouraging. There are more buyers in the city from various points in the interior, and the nearby trade are larger purchasers of fall and winter goods. Some of the cotton goods mills have started up looms that have been idle for a long time past, and the machinery at work on the better grades of textiles is generally running full time. Other manufacturing interests are represented as in fairly good condition and well employed. Collections, as a rule, are reported reasonably prompt, and the general feeling in trade circles is more hopeful.

From Cincinnati, Ohio: The opening of the exposition and the excitement incident thereto combined to retard trade during the early part of the week. The city is now filled with strangers, many of whom are, in addition to visiting the show, engaged in laying in the fall stock of goods. Banks are easy and money is plenty. Prices in various commodities are unchanged, except in grain and provisions, which are lower. Iron and its products are improving. Stocks are good.

From Cleveland, Ohio: The jobbing trade for the week is satisfactory, stocks generally are equal to last year's, and in most lines merchants are looking for a good business throughout the fall. Collections are still a little backward, but improving.

From Dayton, Ohio: Money is in demand and scarce. Interest is 7⅛ per cent.

From Toledo, Ohio: Fall trade is opening up fairly well. Collections are slow, and money is rather close. Interest is 7@8 per cent. Exchange one-tenth of 1 per cent.

From Indianapolis, Ind.: Trade in most lines is fair, but still lacks vigor and tone. Collections are somewhat improved. The outlook for the fall trade is brightening.

From Chicago, Ill.: Money is in good supply and active at 5@6 per cent. on call and 6@7 per cent. on time. Collections are easy. Exchange is 75c. discount per $1,000. Shipments of money to the country are free. Groceries are more active than for the two previous weeks.

From Louisville, Ky.: Jobbing and manufacturing lines generally report a very active distribution of merchandise and an increase over last year. Speculative branches are dull. Money is steady at 7 per cent. and in fair demand and supply.

From St. Louis, Mo.: Jobbing sales are in good volume all around, and values are remarkably steady in most lines. Collections are fairly easy. The money activity continues on unchanged at 7 and 8 per cent. New York exchange is quiet at par. Prime commercial bills $1 discount.

From Minneapolis, Minn.: All houses engaged in jobbing are crowded with orders. Jobbers of clothing report a large trade, as do jobbers in all lines. The fall trade has opened early considering the late harvest. Collections are fair and equal to the expectations of dealers. Money is rather close, but bankers provide for their customers, and no great inconvenience is felt in the general business. Eastern exchange steady.

From Burlington, Iowa: Trade during the week has been satisfactory. An increasing demand indicates a good fall business, though the fall trade proper is just commenced. Retailers are putting in a full stock generally.

From Lawrence, Kan.: Business remains quiet, although there is confidence that the fall trade will be good, owing to larger crops. Collections are fair, and money is abundant. A fair, but not large, stock of goods is on hand in nearly all lines, and buyers will purchase freely for winter trade.

From Kansas City, Mo.: General trade continues quite active. Collections satisfactory.

From Topeka, Kan.: General trade still remains quiet, but is improving. Money is easy and lending on prime commercial paper at 9 per cent. and on long time mortgages at 7 and 8 per cent. The volume of mortgage loans is less than usual.

From Milwaukee, Wis.: Trade is improving, and collections are fair.

From San Francisco, Cal.: Business generally satisfactory without special feature. The country demand is increasing. Everything indicates a good fall trade.

From Norfolk, Va.: There is no material change in the general outlook. Most lines are moderately active. Cotton is commencing to arrive, and the prospect for a large fall business is good. The weather is cool. Collections are fair.

From Baltimore, Md.: Many country merchants are in the city buying fall goods, and general business is more active. Collections, however, are coming in very slowly, particularly from the west. Money is easy.

From Savannah, Ga.: The activity in the jobbing trade is increasing. The retail trade, while steady, has not fully opened.

From Wilmington, N. C.: General business is good.

From Memphis, Tenn.: General trade continues quiet, but cotton is commencing to come in now, and a good fall trade is anticipated. Money is 8 per cent. Exchange ¼ per cent. premium.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Workmen continue to be fully employed in the manufacturing districts. No serious labor troubles.

From Savannah, Ga.: New buildings are going up daily, and workmen of all classes are in steady demand.

BREADSTUFFS ABROAD.

There has been little in the cables received from the other side to inspire higher prices here, as quotations have not materially changed. Reports as to harvest weather abroad, however, have been twisted so as to look favorably, though how much this will amount to in the face of a decreased yield does not appear. But reports vary. One authority says, "At the right time, the weather has taken a harvest character, during harvest. The crops are being gathered in fine condition, and fair progress is being made with the work of cutting, carting and stacking." Samples of harvesting in leading English wheat counties are many of them good, while a few are of course inferior. On the other hand, another British journal of late date says: "There has been no improvement in the crop prospects in any of the principal European countries. Here in England some reports say that the prospect grows worse daily, and that the threshing machine will show deceptions in yield quite unexpected. Certain it is that there has been a lamentable want of sunshine and warmth, and the grain threatens to be consequently deficient in bread-making properties, as well as in quantity. In July the temperature was decidedly lower than in the two previous years, and, so far, August has not made up for July's deficiency in this respect." The annual crop returns published by the *Mark Lane Express* show that the British crops, with the single exception of wheat, are at least as good as they were last year, and better than they have been for the previous ten years. The deficiency in the wheat yield of France is now admitted, and farmers are firm in their demands, an advance of about 3c. per bushel having been quoted. In Austria-Hungary the threshings of new wheat and rye proved disappointing, and the weather having been damp new deliveries were out of condition. In Russia there has continued to be an essential difference between southern and northern trade. The latter has been vigorous, the southern lethargic. The Odessa market has been a little more lively than at the commencement of August. In the Netherlands wheat has had an upward tendency, which it has shared with rye. In Germany the price of wheat and rye has advanced at all the markets.

On all hands abroad, now, at the close of the cereal season, it is declared that deficiency in the world's production of food grains is sufficient to justify a firmness in price and ultimately, if not immediately, an advance. The prospects for the European farmer are therefore considered brighter than for some years past. One journal says that considering the date of the season, the markets remain strong. Prices are advancing rather than receding, granary stocks are very large, whilst imports remain heavy, and wheat is being gathered. From this the use of crop statistics is declared to have been fully justified.

The quantity of wheat and maize on passage to the United Kingdom, as per Beerbohm's cable, September 6, 1883, was:

	Wheat. Qrs.	*Maize. Qrs.*
To the United Kingdom	1,775,000	270,000
To continent	620,000	95,000
Total quarters	2,395,000	365,000
Equal bushels	19,160,000	2,920,000
Compared with the previous week:		
To the United Kingdom	1,975,000	300,000
To continent	562,000	65,000
Total quarters	2,537,000	365,000
Equal bushels	20,280,000	2,920,000
Increase, bushels	.....	.....
Decrease, bushels	1,120,000	.....

England's imports of wheat and wheat flour for the twelve months ended August 31 have been about 160,000,000 bushels. The average price of English wheat in the 187 towns in England and Wales for the week ended August 18, 1883, was 72d, or 144c. per quarter—or 18c. per bushel cheaper than the average price for the corresponding weeks for the last ten years. The Produce Exchange circular says that the heavy stocks of wheat and flour in the United Kingdom is the immediate cause of so wide a difference in the average price. The net imports of wheat and wheat flour into France for the twelve months ended July 31, 1883, were equal to 41,216,640 bushels of wheat, against 44,480,000 bushels in 1881–82 and 58,154,700 bushels in 1880–81 at the corresponding period. The net imports of wheat and flour over exports of German empire for the seven months ended July 31, 1883, were 8,513,475 bushels, against 7,556,227 bushels for the corresponding seven months in 1882. Belgium, during the seven months ended July 31, 1883, imported 14,400,000 bushels of wheat, against 13,700,000 bushels the corresponding time in 1882.

AMERICAN WHEAT MARKETS.

During the earlier portion of the week there was some steadiness observable in the New York wheat market, but it soon succumbed to easier cables and lack of export orders, and prices dropped within an eighth of 2c. per bushel by Wednesday night. At Chicago the decline was even more severe, amounting to 4¾c. per bushel.

An active buying to cover advanced prices of wheat on Thursday as shown in table below. On Friday there was a stronger holding, and a further gain was made.

Speculation has been moderate. Farmers have held back their wheat, owing to the declining markets. Exporters have made bids, but the latter were so far below what is desired on this side that the sales have been conspicuous by their absence. From all portions of the west encouraging reports of harvest weather are received, and it is highly probable that the wheat crop, such as it is—whether large or small—will be gathered without further damage. The reports of excess yield in Minnesota and Dakota are confirmed, and will go far to offset the recently reported revision of the estimates for the Pacific coast. The wheat crop in Kansas is threshing out much heavier than was expected, and the State Board of Agriculture has revised its former estimate, and now says the crop will aggregate 35,000,000 bushels. Taken altogether, the Canadian wheat crop will prove an average one. Fall wheat, the chief cereal of Ontario, will not turn out to be more than half of that of last year. The net exports over imports of flour and wheat from the United States for the twelve months ended June 30, 1883, are reported to have been equal to 146,724,305 bushels of wheat, against 121,026,922 bushels for the corresponding twelve months of 1881–82.

The receipts of wheat at tide-water for the week ending September 1 decreased to 2,470,257 bushels from August 25, when they were 2,680,749 bushels. The exports from the Atlantic ports for the week ended September 1 amounted to 1,489,809 bushels, against 2,334,738 bushels August 25.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended September 1 amounted to 2,909,574 bushels, against 3,000,910 bushels in the preceding week, and the shipments to 1,626,256 bushels, against 2,408,440 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) September 1, as against the preceding week, showed an increase of 630,547 bushels.

The course of the wheat market at New York and Chicago during the past week has been as follows:

	—AT NEW YORK—				—AT CHICAGO—	
	Sept.	*Oct.*	*Nov.*	*Dec.*	*Sept.*	*Oct.*
Fri. Aug. 31	$1.16½	$1.19	$1.21¼	$1.23¾	$1.00	$1.02
Sat. Sept. 1	1.17	1.19⅛	1.21⅜	1.23⅜	.99	1.01¼
Mon. Sept. 3	1.16¼	1.18⅛	1.20⅜	1.22⅜	.98⅜	1.00¼
Tues. Sept. 4	1.15⅜	1.17	1.19¼	1.21¼	.96⅞	.98⅞
Wed. Sept. 5	1.14⅜	1.15⅞	1.18	1.20	.95¼	.97⅜
Thur. Sept. 6	1 15⅞	1.17¼	1.19⅜	1.21⅜	.96⅜	.98½

At 1 P.M. on Friday, August 31, September wheat at Chicago was quoted at 97½c., and October at 99⅜c., against $1.00 and $1.02 on the preceding Friday.

INDIAN CORN.

The telegraphic reports as to the progress of the Indian corn crop generally are to the effect that no frosts have as yet appeared to prevent the ripening of the ears, and with one week more of like favoring conditions all the information heretofore obtained has pointed to an unprecedentedly large yield, some authorities going higher in their predictions than 1,800,000,000 bushels. In the face of this rather bright outlook there was published on Thursday a "special report" on the Indian corn crop in the Cincinnati *Price-Current*. This is said to make the outlook for the western states favorable

for a gain of 75,000,000 bushels over the total production in that region in 1882. But in the south and elsewhere the yield is reported to be about an equal amount short, so that the entire crop promises to be about the same as last year. "In many sections of Indiana, Illinois and Iowa the growth is backward, owing partly to the use of seed from the west, which is late in maturing." This, if it proves to be correct, will probably mean a total yield of Indian corn of about 1,700,000,000 bushels, for it has been pretty generally conceded that the Agricultural Bureau estimates for 1882 were rather under than equal to the actual outturn. On the other hand, however, the Kansas State Board of Agriculture has just made public its September report, in which that state is credited with the largest corn crop on record—said to aggregate fully 200,000,000 bushels. During the earlier portion of the week the price of Indian corn in the New York market fell off in consequence of less demand, excellent weather at the west, and the general prevalence of opinion here that the yield is, with deferred frosts, to be a large one. Later in the week cooler weather and better demand from abroad steadied prices a little.

An increased shipping demand at the west and a natural sympathy with the advance in wheat brought prices up a little on Thursday. The covering of shorts also favored higher prices. On Friday a decline set in, but with the reaction, prices gained on those of Thursday, where they remained firm at the close.

The receipts of Indian corn at the Atlantic ports for the week ended September 1 were 1,269,072 bushels, against 1,189,970 in the preceding week, while the exports from the same points amounted to 821,783, against 1,290,424 bushels. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, September 1 had increased 1,071,011 bushels as compared with August 25. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending September 1, were 3,681,306 bushels, against 2,750,488 the week preceding, and the shipments were 3,355,049 bushels, against 1,984,767 in the preceding week.

The closing prices at New York and at Chicago at 1 P. M. for the past week were:

	At New York.			Chicago.	
	Sept.	Oct.	Nov.	Sept.	Oct.
Friday, Aug. 31	.62⅛	.62⅝	.62⅛	.49½	.49¼
Saturday, Sept 1	.63¼	.62⅛	.61¾	.48⅞	.48½
Monday, Sept. 3	.61¼	.61½	.61⅛	.47⅞	.47¼
Tuesday, Sept. 4	.60½	.60½	.60⅛	.47⅜	.46⅜
Wednesday, Sept. 5	.60⅝	.60½	.60⅛	.47¾	.46⅞
Thursday, Sept. 6	.61	.61⅛	.60¾	.48⅜	.47½

Corn at Chicago at 1 P.M. yesterday was for September 49½c. and for October 48¾c., against 49½c., and 49¼c. for the options named on the preceding Friday.

The prices of breadstuffs in New York last evening, as against those of the Friday preceding, as compared with the same at a like date in 1882, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

	Aug. 31.	Sept. 7.

THE BREADSTUFFS MARKETS.
[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Winter flours are plentiful and a shade lower, but springs are scarce and firm. Stocks of corn have been almost exhausted to meet the requirements of shippers on old contracts, but very little new business has been done for export. Wheat has ruled dull on foreign account, and speculation was very bearish until Thursday, when there was a sharp advance, but the net result of the week's business is a decline from last week's prices. There is not much activity in the market.

From Chicago, Ill.: Wheat is neglected by shippers, but more is doing on speculative account. Wheat has advanced 2c. on the lowest price of the week. There is an increasing feeling that prices are low enough for the present. Corn is more active, and has advanced 2c. on the lowest prices of the week. There is a large demand from shippers. Freight contracts during the past twenty-four hours amount to over 1,000,000 bushels. Receipts are large and fully absorbed by shipments. Oats are firm, and there is an active shipping and speculative demand. Rye is firm. The demand for export is good. Receipts are heavy.

From Louisville, Ky.: Grain and flour are dull and lower. The receipts of wheat last month were 387,000 bushels, against 706,000 bushels same month last year.

From St. Louis, Mo.: Both wheat and corn are steadily declining, and receipts are light. All high grades of flour are duller than previously, but low grades are in good southern order demand.

From Kansas City, Mo.: Flour is quiet and weak. Wheat is weak and lower. Corn is firm.

From Minneapolis, Minn.: Considerable new wheat is being offered, but the market is dull, millers not bidding on large lots, only buying for present use. The market is weak and lower; $1.07 was the price Thursday for No. 1 hard, but large lots could not be sold at that figure, and with liberal receipts lower prices must rule unless there is a more active demand for flour.

From Milwaukee, Wis.: The markets are demoralized, and wheat has declined 5c. this week. Local millers are doing very little. The export demand for flour is light.

From Topeka, Kan.: Flour is booming and wheat trade is good, but much of the wheat offering is not first class. But little corn is moving and oats is scarce.

From Baltimore, Md.: Transactions in wheat have been limited, and prices have softened.

From Wilmington, N. C.: Grain is firmer. Breadstuffs are easier.

From New Orleans, La.: Flour is quiet. The grain movement is moderately fair, and the market is unchanged.

From Memphis, Tenn.: Flour is firm, with good demand. Corn and oats are steady. Cornmeal is quiet.

THE GROWING GRAIN CROPS.
[By Telegraph to BRADSTREET'S.]

From Indianapolis, Ind.: Prospects for a heavy yield of corn are excellent.

From Louisville, Ky.: Agricultural interests are suffering from continued drouth in portions of Kentucky and southern Indiana. Corn, tobacco and grass crops are being materially shortened.

From St. Louis, Mo.: The weather is superb, and corn is developing finely.

From Milwaukee, Wis.: Reports of threshing in the northwest are more favorable than ever. A field near Wahpeta, Dak., estimated at eighteen bushels two weeks ago, threshed twenty-four bushels to the acre. Similar reports are coming in daily. Some localities in southern Minnesota and central Dakato are less favored, and results at threshing are disappointing The yield is light and quality poor, but such cases are exceptional. In Wisconsin the farmers have largely stacked their wheat, owing to the decline in prices. Where threshing is in progress the results are better than expected. Some farms in Waukesha county will yield twenty-five to thirty-five bushels of spring. The corn outlook is good, the weather being brilliant. There is some complaint of drouth, but it rained Thursday.

From Minneapolis, Minn.: The weather has continued favorable for stacking and threshing grain. Cutting is completed, and threshing is progressing with satisfactory results. The only complaint made is of smut on soft ranches of wheat. Other crops are turning out well. Ten days of good weather will mature a fair corn crop.

From Lawrence, Kan.: The dry weather of the past week is retarding early plowing for wheat.

From Wilmington, N. C.: Growing grain has lost by the drougth one-third.

From Savannah, Ga.: The rice crop is looking well. About 2,000 bushels of new rice have been received, and 5,000 more are expected this week.

PROVISIONS.

The speculative market for hog products and meats has been treated to a genuine decline during the earlier half of the past week. There were no new causes for this. The general impression that the Indian corn crop would be heavy, backed by excessive receipts of good quality hogs at western cities, left a strong impression that a lower range of prices should prevail all around, while the speculative as well as the regular consumptive demand continued slow. The demand by the trade, however, was very slack, both at home and abroad. There was no special gain noted in the New York speculative provisions market on Thursday, and on Friday it showed itself mainly by a slight advance in lard. There was, however, a firmer feeling for spot products, and prices became firmer at an advance at the close on Friday.

The customary September statistics relative to hog products and meats are as follows:

The stocks of hog products at Chicago were:

	September 1,		August 1,	
	1883.	1882.	1883.	1882.
Mess pork, barrels	139,058	140,297	175,010	198,834
Other pork, barrels	5,797	1,780	9,366	1,744
Lard, prime, tierces	48,220	95,779	59,405	116,893
Lard, other, tierces	3,801	1,567	5,537	6,486
Bacon, S. C., pounds	2,472,557	64,000	5,237,019	1,053,986
Bacon, L. C., pounds	4,580,526	2,146,160	4,932,685	2,188,296
Bacon S. R., pounds	24,800,022	8,830,370	33,907,375	13,276,945
D. S. shoulders, pounds	5,688,023	1,203,955	7,573,328	2,651,715
S. P. shoulders, pounds	3,364,440	3,511,140	5,725,352	4,257,780
S. P. hams, pounds	6,877,990	8,937,107	13,867,139	13,319,825
Other meats, pounds	8,682,722	5,544,069	12,017,474	10,531,909

The decrease in stocks during the month of August this year and last, as indicated by the above statement, compares as follows:

	1883.	1882.
Pork, barrels	39,521	52,501
Lard, tierces	12,921	22,020
Bacon, pounds	12,221,874	5,479,637
Shoulders, pounds	4,346,217	2,134,400
Hams, pounds	6,979,449	4,382,718
Other meats, pounds	3,334,752	4,987,840

The stocks of lard at the six principal continental ports, as cabled to the W. J. Wilcox Company, are as follows:

	Sept. 1,		Aug. 1,		July 1,	
	1883.	1882.	1883.	1882.	1883.	1882.
Hamburg	10,000	7,000	10,000	5,000	15,000	4,000
Bremen	7,000	700	4,000	1,500	800	2,000
Stettin	6,000	600	3,500	1,000	5,000	3,000
Antwerp	5,000	7,000	8,000	10,000	5,000	20,000
Havre	7,000	4,000	6,000	5,000	6,000	5,000
Totals	35,000	19,300	31,500	22,500	31,800	34,000

Stocks at the six points increased 3,500 tierces last month, while there was a decrease of 3,200 tierces in the corresponding period last year.

Exports of hog products from the following places for the week ending September 1, 1883:

	Pork, barrels.	Bacon, pounds.	Lard, pounds
New York	2,533	4,132,348	6,405,536
Boston	514	1,486,025	340,333
Portland	...	....	....
Montreal	830	795,000	256,600
Philadelphia	339	861,500	12,500
Baltimore	10	...	157,028
New Orleans	15	1,500	300
Totals	4,241	7,276,373	7,172,297
Previous week	2,856	9,344,751	6,019,481

The total export of hog product from the above-mentioned places from November 1, 1882, to September 1, 1883, was as follows:

	1882-83, pounds.	1881-82. pounds.
Pork	39,848,400	42,751,600
Bacon	358,709,316	337,593,490
Lard	241,884,286	207,772,863
Totals	640,442,032	588,117,953

Prices of lard and mess pork at New York during the week were as follows:

	Lard, per lb., September.		Pork, per bbl., spot mess.	
	This week.	Last week.	This week.	Last week.
Saturday, Sept. 1	8.70c.	8.60c.	$13.75	$14.00
Monday, Sept. 3	8.74	8.80	13.75	14.00
Tuesday, Sept. 4	8 70	8.79	13 75	14 00
Wednesday, Sept, 5.	8.50	8.72	13.50	14.00
Thursday, Sept. 6	8.40	8.76	13.50	14.00
Friday, Sept. 7	8.57	8.70	13.00	13.75

PROVISIONS AND LIVE STOCK.
[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Hog products are generally lower, but the jobbing trade is quite active. Dairy produce is more active. Butter is about 2c. per pound higher, and cheese ¾ @1c. higher than last week. Supplies are light.

From Chicago, Ill.: Provisions are firm. The speculative demand to cover shorts good. Pork has advanced 35c. per barrel; lard 30c. per 100 pounds. Short-ribs are in good shipping and speculative demand and have advanced 30c. Hogs are firm; cattle are steady; receipts of hogs are moderate and the quality is good. Receipts of cattle are large. Quality of range stock was never better. Stall-fed export cattle are scarce.

From Louisville, Ky.: Provisions and live stock are dull.

From St. Louis, Mo.: Provisions are still lower, with small sales. Hogs are in large offering, but very weak and rather inactive. Cattle tend upward and sales are brisk, with good receipts. Mules are selling better, and horses are fairly active.

From Kansas City, Mo.: Provisions are fairly active, but weak on meats and lard.

From Topeka, Kan.: Provisions are in fair demand.

From Baltimore, Md.: The jobbing demand for provisions is good, but speculation continues inanimate.

From Wilmington, N. C.: Meats are steady.

From Savannah, Ga.: The provisions market is steadier, with a very good demand for smoked and dried meats, while meats are dull.

From New Orleans, La.: Provisions are weak.

From Memphis, Tenn.: Cattle receipts during the past week have been very light and prices firm at good figures. Meats and lard are firm.

THE NEW YORK DRY GOODS MARKET.

The first week of September has been very satisfactory to the dry goods merchants in general. Importers and domestic commission houses report good business, and though large bills are the exception the demand has been very general; purchases made on the spot and orders by mail have footed up a good week's business. The mercantile hotels were never so full of buyers, the majority of them being retail dealers from all sections of the country; they are here to buy, too, and not merely on a shopping excursion. The jobbing trade report the week as the best of the season, sales not large in any one instance, but more buyers in the market and consequently a larger number of bills sold. Retailers seem to buy with more confidence than in seasons immediately previous to the present, though evidently not stocking up too heavily; it is regarded a healthy trade, and the jobbers seem very well satisfied with what they call an excellent week's business. The dry goods auction market during the past season has attracted more than the usual attention it receives; this has been owing to the unprecedented large sales of staple goods. The first of these sales, held some six weeks ago, comprised about 14,000 packages of staple cotton goods of popular and well-known makes. The prices obtained were not only very satisfactory, but in many instances exceeded expectation and were so near the list price as to establish a firm tone to the market. There was apparently a slightly increased demand from first hands immediately after the sale.

The second sale of cottons, held quite recently, comprising 17,000 packages, was as largely attended as the first, and though the immense quantity was disposed of in one day without any drag, still the prices obtained suffer in comparison with the preceding sale, though termed a successful one on account of the facility with which such a large quantity of goods was distributed. Still, financially, it was not such a success as its companion.

The sale of woolen goods held two weeks ago can be passed with but slight mention, though of good proportions, amounting to some 7,000 packages. It was well assorted, and mostly of an accumulated nature.

The extensive sale of blankets held on Wednesday, comprising 6,500 cases, aggregating in value over $1,000,000, furnishes for the present the list of large sales this season. Many notable makes were in the catalogue—productions from the Ledyard, Winthrop, Clifton and Sandy Hook mills. The prices obtained are pronounced satisfactory, the present state of the market being taken into consideration. It is understood, however, that they were less than was expected, and ranged from 5 to 20 per cent. below the revised list price of September 1. The attendance was large, and the goods were well scattered. The prices were guaranteed to January 1.

THE DRY GOODS MARKETS.
[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Stocks of dry goods are quite large in all lines, but ample for prospective business.

From Boston, Mass.: There continues to be a brisk jobbing movement in seasonable dry goods, and the volume of trade is fully up with last year at this time. The demand from first hands has increased a little, but agents still complain of the small sales. Prices are pretty well maintained, but there is more or less weakness in inferior grades of both cotton and woolen fabrics which do not meet the popular taste.

From Providence, R. I.: The print cloth market is quiet and steady; 64s are quoted at 3½c. less 1 per cent. and 56x60s at 3½c.

From Philadelphia, Pa.: Jobbers have been busy this week on orders and sales to buyers now in the market, and the outlook is good for the balance of the month. The shipping departments of some houses are working well into the night.

From Cleveland, Ohio: The dry goods trade is exceptionally good, both the volume and results being satisfactory for the season.

From Dayton, Ohio: The dry goods market is reported improving, with prospects of a good fall trade.

From Toledo, Ohio: Dry goods are in good demand.

From Louisville, Ky.: Dry goods jobbers report an increasing attendance of southern buyers. Liberal sales and larger business than last fall. Prices on some articles are slightly reduced by the influence of the eastern auction sales.

From St. Louis, Mo.: Dry goods sales are im-

proving; though values are steady they are very firm.

From Kansas City, Mo.: Dry goods sales maintain the heavy proportionate increase heretofore reported.

From Chicago, Ill.: Dry goods are meeting a large sale. A noticeable feature is the heavy demand for attractive dress fabrics of high quality. Millinery, fancy and furnishing goods are receiving more attention than last week. Carpets and general upholstery goods are active.

From Burlington, Iowa: Dry goods have been somewhat quiet, but orders are now being filled freely, the trade for the season having just opened.

From Minneapolis, Minn.: The dry goods trade shows increased activity. More goods were sent out during the past week than ever before at this season.

From Topeka, Kan.: The dry goods trade is improving.

From Baltimore, Md.: Sales of dry goods have been large. Salesmen are doing well on the road, and there is every prospect for a brisk season. Commission merchants report a satisfactory business. The cool weather has improved the retail trade.

From Norfolk, Va.: Dry goods jobbers are doing a fair business.

From Wilmington, N. C.: The dry goods jobbing trade is brisk; the retail dull.

From Savannah, Ga.: The dry goods market is receiving liberal orders through drummers. Only a few buyers are in the city looking for goods.

From Galveston, Tex.: The dry goods trade is reported fairly active. New York exchange is ¼c. discount.

From Memphis, Tenn.: Dry goods sales are very fair and business is improving.

CLOTHING.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The demand for clothing is ahead of expectation, and some manufacturers say that they are unable to fill orders as fast as wanted. They were rather cautious in making up goods, and are now taxed to their utmost capacity. The demand is much larger than last year at this time.

From Chicago, Ill.: Ready-made clothing and hats and caps are fully as active as last week.

COTTON.

The market for spot cotton at New York for the week has been quiet and steady. Sales have been of fair proportions, and mostly for consumption. Prices remained unchanged until Thursday, when stains advanced ⅛c. Quotations for middling uplands closed last night at 8⅜c., the closing price last Friday. The total sales for the week have been as follows: For export, 1,650 bales; for consumption, 5,619, and for speculation, 845, making a total of 8,114 bales, against 9,457 last week. The deliveries on contract amount to 1,400 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year*
Ordinary	7 11-16c.	7 9-16c.	10 7-16c.
Strict ordinary	8⅛	8	10⅞
Good ordinary	8 15-16	8 13-16	11 11-16
Strict good ordinary	9½	9⅜	12⅛
Low middling	9¾	9¾	12½
Strict low middling	9 15-16	9 15-16	12 11-16
Middling	10⅛	10⅛	12 13-16
Good middling	10½	10¼	13 3-16
Strict good middling	10¾	10¾	13 7-16
Middling fair	11¼	11¼	13 5-16
Fair	12	12	14 11-16

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	7⅞	7	10 1-16
Strictly good ordinary	7 15-16	7 13-16	10⅞
Low middling	8⅜	8½	11 9-16
Middling	9 9-16	9½	12½

The market for spot cotton closed steady.

The future market has been fairly steady and sales have been quite heavy, on Wednesday footing up 157,000. Prices have been higher, the closing quotations last night showing an advance of 8 points for near months and 16 points for later ones over those of one week ago. The sales for the week aggregate 513,400 bales, against 441,600 last week.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
September	10.10	10.10	12.45
October	10.20	10.14	11 84
November	10.29	10.18	11.63
December	10.40	10.25	11.62
January	10.51	10.35	11.69
February	10.63	10.49	11.80
March	10.78	10.61	11.92
April	10.90	10.72	12 03
May	11.00	10.81	12 15
June	11.12	10.95	12 25

The market for futures closed steady.

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
Galveston	7,262	9 11-16	12
New Orleans	7,475	9 11-16	12¼
Mobile	375	9⅝	12⅜
Savannah	7,300	9 9-16	11 11-16
Charleston	2,110	9⅞	12⅛
Norfolk	3,610	9 13-16	12⅜
Baltimore	1,550	10⅛	12¾

The total receipts of cotton at the ports since September 1 are 33,281 bales, against 26,445 last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	9,625	11,232
New Orleans	5,024	1,788
Mobile	635	450
Savannah	9,026	11,307
Charleston	5,234	4,119
Wilmington	750	291
Norfolk	1,429	588
Baltimore	13	137
New York	207	370
Boston	31	291
Philadelphia	112	554

Below will be found the receipts for each day of the week ending September 7, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	720	3,055	911	1,741	896	2,302
New Orleans	124	1,143	878	1,209	729	941
Mobile	101	335	7	58	57	77
Savannah	1,175	1,329	1,385	2,005	1,593	1,599
Charleston	549	991	561	885	1,089	1,159
Wilmington	2	240	125	97	160	135
Norfolk	84	87	74	61	491	632
Baltimore	....	13	....	....	....	....
New York	10	35	46	111	5	....
Boston	....	....	9	....	....	22
Philadelphia	....	....	....	2	9	101
Totals	2,765	7,228	3,996	6,169	4,969	6,968
This day last week	3,113	4,835	2,002	3,142	3,917	5,197
This day last year	2,890	6,005	3,396	5,636	4,493	4,772

The total receipts at the ports for the week were 33,281 bales, against 22,937 last week and 28,630 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 12,413 bales, against 6,743 bales last week and 8,728 bales for the corresponding week last year. The shipments for the week were 13,377 bales, against 8,045 bales last week and 9,462 bales for the corresponding week last year. The stocks for the week were 37,146 bales, against 37,642 last week and 9,291 for the same week last year.

The Liverpool market for prompt delivery uplands has been firm and steady with better prices, quotations advancing on Tuesday from 5⅝d. to 5 11/16d., and has remained unchanged, closing last night at the latter figure.

The market for futures has been quiet and steady with slightly higher prices. The closing quotations yesterday show an average advance of 3 points for near months and 2 points for later ones from those of last Friday.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
September	5 43-64d.	5 40-64d.	7 1-64
September-October	5 41-64	5 38-64	6 56-64
October-November	5 41-64	5 38-64	6 43-64
November-December	5 39-64	5 37-64	6 36-64
December-January	5 41-64	5 39-64	6 36-64
January-February	5 44-64	5 41-64	6 36-64
February-March	5 47-64	5 44-64	....

The market for futures closed quiet.

The sales for the week at Liverpool were 65,000 bales (of which 48,000 were American), against 48,000 (of which 34,500 were American) last year. The sales for export were 11,500 bales, against 5,600 bales last year. The sales for speculation were 2,200 bales, against 1,820 bales last year. The amount forwarded was 5,700 bales, against 3,800 bales last year. The stock in port is 831,000 bales (of which 548,000 are American), against 605,000 bales (of which 267,000 were American) last year. The total imports for the week were 29,000 bales (of which 6,700 were American), against 37,000 bales (of which 8,800 were American) last year, and the amount afloat 106,000 bales (of which 23,000 are American), against 163,000 bales (of which 27,000 were American) last year.

The Manchester market closed quiet and steady.

The Havre market remains unchanged.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is dull, and sales are moderate. Middling uplands are worth 10⅝@10¾c., and middling gulfs 11c. New cotton is quoted ¼c. lower. The stock on hand is light.

From Philadelphia, Pa.: Demand drags. Spinners buy only for actual wants. Prices are unchanged. The yarn trade is a little more active, and the tone of the market is firmer.

From Louisville, Ky.: Cotton values stiffened 1/16c. above last week's quotations under a good demand.

From Baltimore, Md.: Offerings of cotton are free, and the market quiet and steady with a fair demand.

From Wilmington, N. C.: Cotton is firm. Receipts are good and the demand fair.

From New Orleans, La.: The cotton movement has been fairly large for the season, being three times larger than in same period last year. Spots rule firm at 1/16c. advance. Sales are fair for the season. Futures have ruled generally firm, advancing in the first part of the week and declining in the latter part. They closed 6 to 13 points higher than last week. Sales are heavy.

THE GROWING COTTON CROP.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: The cotton crop has been injured by the drouth, say one-fourth. The weather is cool.

From Galveston, Tex.: Have had but little rain, and the weather during the past week continued hot.

WOOL.

The wool trade is in good shape and fairly active. There is no excitement nor speculative feeling, but in a quiet way there is a very fair movement at steady prices. On worsted wools the tendency of values is upward, owing to the brisk demand and moderate supplies. The general position of values is stronger, although there is no quotable improvement. It is felt that the market has touched bottom and that any change that may occur in the near future will be for the better. Manufacturers are meeting near wants with greater confidence. The depression in the goods market has been measurably relieved by the forced distribution of large lines of undesirable goods at auction. This has lifted a considerable accumulation from first hands, and although the prices realized were low and unsatisfactory the prospect that the goods will now pass into consumption influences a better feeling in the wool trade. Desirable productions are represented as selling more freely. All kinds of worsted textures are having a good outlet and the worsted spinners are crowded with orders. Hence the activity and firmness of long staple wools. The carpet mills have had a fairly good fall trade and are now about preparing spring samples. The demand for this class of wool continues very fair. There are more buyers also for fine clothing wools, and high-bred Ohio fleeces are in some cases held for better prices.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The demand for wool is steady, and prices remain unchanged for all clothing fleeces, but combing and delaine wools are firm, and have rather an upward tendency, as this branch of manufacture is more active and prosperous than any other. The sales of the week have been 2,800,000 pounds, and include Ohio and Pennsylvania fleeces at 36@37c. for X, 37@38c. for XX, with XX and above at 39@39½c. per pound. Michigan X fleeces are in fair demand, and sales at 34@34½c. per pound were made, but buyers rather hesitate to pay these prices, although desirable lots are not to be obtained for less. Unwashed wools are in steady demand, and have been selling at previous prices. A lot of 150,000 pounds desirable Texas sold at 26@27c.; 100,000 pounds good northern California at 27c., and other sales at a wide range of prices. The sales of combing and delaine selections have been at 35@41c. for fine delaine, and 42@45c. for fine and No. 1 combing, and all available lots are taken as fast as offered. Pulled wools are firm, and have been in fair demand. The sales of choice eastern and Maine supers have been at 40@43c., and common and good supers at 20@38c. per pound. Foreign wool is quiet, but prices are steady. There is more inquiry for carpet wools, but the bulk of the stock is held above the views of buyers.

From Philadelphia, Pa.: Demand has been fairly active. The week's sales aggregate 1,300,000 pounds all kinds, at steady to strong prices. The outlook is brighter for sellers.

COAL.

The September advance by most of the leading coal companies in prices of domestic coal does not thus far reveal a real advance. It may well be doubted if in any but few instances the full August circular rates have been paid. The Western Anthracite Association has advanced prices 10c. on egg and 15c. per ton on stove and chestnut coals. Trade generally in the anthracite variety has been pretty active, and the movement from the mines east and west is reported to be sufficiently brisk to prevent stocks from accumulating. The total production of anthracite to August 25, during 1883, has been given at 19,024,098 tons, as compared with 17,639,174 tons in the corresponding portion of 1882, showing a net gain during the present year amounting to 1,384,923 tons. The outlook at present is, therefore, for a larger business than ever attained in any preceding year. The correspondent of BRADSTREET'S at Buffalo writes of the coal market there that while no particular activity is noted the quantity of coal going into consumption is large. Since the September circular was issued about full July prices have been obtained. Stocks are low and not accumulating, in spite of the increased production. Western and Canada stocks are said to be light, the quantities at Chicago being estimated at 80,000 tons less than at the corresponding date of last year. Lake freights are steady on a basis of 60c. to Chicago, and a very free movement is looked for from now on to the close of navigation. Shipments by lake to September 1, are 721,000 tons, as compared with 693,000 tons to the corresponding time in 1882, and 505,000 in 1881. Our Chicago correspondent writes that anthracite, at that point, is meeting an increased sale on account of domestic consumption. Stocks are generally reported less than a year ago, and, as a rule, are in good hands.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal market is active. Prices have advanced 50c. within a week. The stock on hand is light. Coal for manufacturing purposes is very dull.

From Chicago, Ill.: Coal is selling more freely and is firm.

IRON.

It is conceded that the general condition of the market at New York for American pig iron is somewhat of an improvement upon that previously reported. Consumers do not anticipate their wants and persist in purchasing in ten and twenty-five ton lots as required, but the sales are much more frequent. One prominent dealer reports that, while he finds sales small and persistently so, he has been gratified in summing up the business for August as well as for July to find that the aggregates exceeded those of the corresponding months in 1882. In this way then is the revival of trade in the raw product making itself felt, for there can be no question whatever that the demand for pig iron is materially in excess of that which existed thirty, sixty or ninety days ago. Prices are firmly held and nominally without change. For small lots of best grades of No. 1 American $22.50@$23 is demanded but to regular customers $22 will secure such iron as may be ordered. Remaining grades are without features worth specifying. At various points in the west a noticeable improvement in pig as well as in certain lines of manufactured iron has taken place. Importations of Scotch pig iron at New York have been rather below the general weekly average, amounting to but about 1,000 tons, against about 1,500 tons per week for some months past. Sales are not large. Some lots of the quantity which reached this port having been landed on distant piers, and being without bidders at the moment, were put into store to avoid sacrifice. There have been no concessions in Scotch pig iron, however, which continues firmly at prices last quoted. Old T rails are very scarce indeed. The nominal quotations are $22.50@$23, but none can be obtained at that figure. Any requirements which are met are securing from 50c. to $1 in excess of the figures given. Perhaps the most striking feature of the domestic iron and steel market at present is to be found in the very heavy production of steel rails which is taking place at present at what was once considered the exceedingly low price of $37.50@$38 per ton. One mill alone is turning out rails at the rate of 150,000 tons per annum. It was not very long ago that the steel rail mills found much fault with the reduction of the tariff on their wares, and the impression went forth that this great domestic industry was to be seriously hampered thereby. They have, however, gone busily to work and are well filled with orders at current rates. It may be added, in reference to pig iron, that stocks are not accumulating, in fact have been somewhat decreased. The above features of the iron and steel markets do not constitute causes for complaint. There is no "boom"—but the trade may be all the better off, notwithstanding.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is moving freely but in lots to cover current requirements. Standard and special brands are either sold up or are held firmly in anticipation of an active demand. There is a brisk inquiry for charcoal and anthracite blooms. Merchant bar is active in retail lots. All mills are at work. Sheet is

strong and active, and plate mills are crowded with orders. Structural iron is in good demand for bridge and ship work. Steel rails unchanged, with a good deal of business waiting a closer adjustment of buyers' and sellers' views.

From Pittsburgh, Pa.: There is a continued fair demand for manufactured iron with some improvement. Prices are unchanged. The orders placed are principally for immediate requirements. The pig iron market is rather weaker with very little doing. Grey forge is $17.5c to $18.00. Old iron rails market is active. Sales have been made at $24.

From Cleveland, Ohio: Iron interests continue dull and the markets present nothing materially new, the condition being about as throughout August.

From Louisville, Ky.: Pig iron is easy. Inquiry fair and current consumption good.

From St. Louis, Mo.: Some concessions have been made on pig iron for big orders, but manufactured iron is firm at previous rates and trade in both continues reasonably good.

From Chicago, Ill.: Pig, bar and angle iron are meeting an average jobbing trade. Nails are in good request, and stocks are not large. Metals and miscellaneous turners goods show increased sales. Steel rails are in moderate request. Orders are not over half of the mill capacity.

AMERICAN HARDWARE.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Staple hardware and cutlery is in better request. Sales have increased 5 per cent. on the last week.

From Louisville, Ky.: Hardware is active.

From Savannah, Ga.: The hardware business has increased and trade is steady.

PETROLEUM.

There has been little of interest to chronicle in the speculative petroleum market during the past week. Prices for certificates of crude have maintained, on the whole, about the general level at which they have stagnated for six weeks past, the details of which are given in the statement printed below. During the middle of the week some interest was manifested in well news, and at the reported failures of one or more ventures prices hardened and the tendency was upward. The public are not yet interested enough to invest, and trading was mostly between those on the floors of the exchanges.

On Friday the market for pipe-line certificates, in the New York Petroleum Exchange, opened at $1.08½. The morning session revealed no new features or causes for marked changes, and none took place. At the close of the morning session the price was $1.08⅛. Sales early in the afternoon were made at $1.07⅞, but transactions were not spirited, and there were no special features to report. At the close the price bid was $1.08, against $1.08⅜ at the close on Friday of last week, a decrease of ⅜c. on the week.

At a meeting of the newly-formed "Conference of Oil Exchanges," held at Lakewood, N. Y., on August 27, the Oil City, Titusville, Bradford and Pittsburgh Oil Exchanges, together with the New York Petroleum Exchange, were each represented and declared to be members of such conference. The members present from the New York Petroleum Exchange were Messrs. S. H. Strong, D. R. Offley and P. B. Crosby. The conference will meet annually on the third Thursday in June. On Thursday last the new set of rules to secure uniformity in business between the oil exchanges was unanimously adopted by the New York Petroleum Exchange. Mr. Nic. Mehlen of this city, who represented the New York Exchange at the associated exchanges' verification of the pipe-line company's gauging, which began September 1, was interviewed by a representative of BRADSTREET'S yesterday, at once upon his arrival from the producing regions in Pennsylvania. Mr. Mehlen said that the results of the gauging cannot be ascertained even by those engaged in the work until the latter part of the month. On the 1st inst., between the hours of 7 A.M. and noon the gauge of the gross quantity of petroleum in tank was taken as to depth only. The Standard Oil Company's agents first ascertained the depth of oil, and their results were then verified or checked by the representatives from the various exchanges. Later in the month the circumference of the various tanks will be ascertained, which will afford the requisite data for determining the gross quantity of oil in each. In the meantime, however, the Standard's inspectors, accompanied by the representatives of the exchanges, have been at work upon the much more difficult task of ascertaining the amount of sediment and dirt in each tank, that portion constituting the unsalable oil. Sixteen sets of exchange inspectors have been busy upon this work, but have not thus far been able to gauge above four or five tanks per day each out of the 1,600 which are to be examined. Mr. Mehlen volunteered the opinion that the forthcoming report on the quantity of oil in stock will be the most complete ever made, and one which must prove of value to the trade. It is expected that a general meeting of the inspectors will be held at Oil City toward the close of the month, when the totals of the inspection will be ascertained and the result made public.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, September 1.....	1.08⅞	1.09¼	1.08¼	1.08¼
Monday, September 3.....	1.08⅜	1.08½	1.07⅜	1.08
Tuesday, September 4	1.08	1.08½	1.06⅞	1.06⅞
Wednesday, September 5.	1.06¾	1.08⅜	1.06¾	1.08⅜
Thursday, September 6.....	1.08⅜	1.08⅞	1.08¼	1.08⅜
Friday, September 7.....	1.08½	1.08⅝	1.07¾	1.08

The demand for refined oil for export has ruled fair during the greater portion of the week and more active toward the close, which induced the advance made on Thursday (to 8⅛c. per gallon for 70°, Abel test). A passing business has been done in other forms of the product. New York's share of the exports from the United States is over 3,000,000 gallons ahead of the total from this port at the corresponding date last year, while the aggregate exports are over 12,000,000 gallons (crude equivalent) behind.

The closing quotations last evening for certificates of crude, refined oil, oil in cases, crude in barrels per gallon, and for naphtha, as compared with like days in preceding weeks, were as follows:

	Aug. 10.	*Aug.* 17.	*Aug.* 24.	*Aug.* 31.	*Sept.* 7.
Certifi's, crude..	1.08⅞	1.10	1.07½	1.08⅜	1.08
Refined, 110°....	7⅞	7⅞	7½	7¾	8
Refined, 700.....	7½	8	7⅝	7⅞	8⅛
Crude, in bbls...	6¾@7¾	6⅞@7⅞	6⅞@7⅞	7¼@7⅞	7⅜@7⅞
Case, plain.....	9	9⅜	9	9¼	9⅜
Naphtha.....	5	5¼	5¼	5¼	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending Sept. 1, was 12,634,708 gallons, against 11,321,940 in the preceding week. The total export from the United States since January 1 was 420,709,637 gallons, against 433,261,181 gallons in the corresponding portion of 1882, a decline in the current year of 12,551,544 gallons. The total exported from New York city during the week ended Sept. 1 was 10,024,432, and during the year, to that date, 347,194,737, against 343,456,652 gallons in a like portion of 1882. This shows an increase in shipments on the year from New York alone, as compared with 1882, of 3,738,085 gallons (crude equivalent) as against a decline from the country at large of 12,551,544 gallons.

OCEAN FREIGHTS.

Beginning with Saturday of last week, the ocean freights market has been very dull during the greater part of the week. Rates on the berth were generally in shippers' favor, with room offering and little of it in demand. Charters were also dull and out of request. The export movement, as may be inferred, was quite light. Baltimore alone was noticeable for a continued shipment of wheat, but even that was relatively restricted. Petroleum had dropped off, and dullness prevailed. On Wednesday and for the remainder of the week specified there was more animation. There was a somewhat freer shipment of produce, and some cargoes of grain were sent abroad. On the whole the ocean freights market has enjoyed but a moderate activity. Rates are firm.

OCEAN FREIGHTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Grain tonnage is in fair supply and dull at lower rates, a number of chartered steamers being open to recharter. Oil freights are very steady, with a moderate supply of vessels and a fair demand.

From Baltimore, Md.: Ocean freights have quieted down again, and rates are merely nominal.

From Wilmington, N. C.: In freights foreign tonnage is scarce and wanted; coastwise dull.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The wholesale fall trade is drawing to a close, but shipments continue on a large scale, and most of the factories will keep their forces employed during September. The business has been large and prices steady during the season.

From Toledo, Ohio: Boots and shoes are selling actively.

From Chicago, Ill.: Boots and shoes show lightly increased sales to near-by and distant buyers.

From Minneapolis, Minn.: The boot and shoe trade shows a good degree of activity.

From Savannah, Ga.: Boots and shoes are in good demand, and for some grades prices have stiffened, the supply of which has been shortened by the failures of leading manufacturers.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Leather is in fair demand, and fine calf is scarce.

From Baltimore, Md.: The leather trade is doing well, and best slaughter sole commands full prices.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Whisky is steady. The consumptive demand is on a liberal scale, and excessive stocks are gradually moving off.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Leaf tobacco receipts are at the lightest average of the season, with small stocks. There is a good general demand, and continued drouth in several tobacco districts. Market stronger.

From St. Louis, Mo.: The tobacco market has strengthened, and large offerings of excellent grade have sold well on a sharp outside demand.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Cleveland, Ohio: The lumber trade continues very brisk. Margins are close, but the volume of trade is heavy and on the whole very satisfactory.

From Chicago, Ill.: Lumber is decidedly more active, and the prospects are for an increased demand.

From Minneapolis, Minn.: There is an increased demand for lumber and a steady market, but manufacturing is slow, there being no rise in the river, and logs are brought down with difficulty.

From Wilmington, N. C.: Timber is firm and lumber is improving. Shingles are firm.

SPECIAL NEW ORLEANS TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar and molasses are dull. Rice is unsettled and buyers and sellers are apart. Fair to prime is 5¼c. to 5¾c. Cottonseed is lower at $11 per ton. Cottonseed oil is unchanged, and coffee is strong at ¼c. up; fair, 10c.

NORTH CAROLINA NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine are unsettled. Rosins are quiet. Tar is firm, and crude steady.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, September 5.—There is a steady but not rapid increase in the demand for money at the banks, and a gradual hardening of rates, 5@6 per cent. being paid by borrowers on gilt-edged paper and collaterals, and 6½@8 by those who make what is termed good business paper. New York exchange is in better supply, and quoted at 70@75c. discount per $1,000, and liberal orders for funds are being telegraphed to New York to supply the deficency caused by increasing shipments of gold and currency to the country. Merchants report a large jobbing trade, and the constant streams of loaded vehicles that pass from the warehouses of jobbers to the railroad stations fully confirm their reports. Collections from the country are liberal, and although goods are unusually cheap and profits small trade is regarded as healthy. The receipts of grain since the date of my last letter have largely increased, the aggregate being heavier than for any equal time in twelve months, and the result of the increase has been plainly marked by a material decline in prices. The receipts of wheat have exceeded the shipping demand; as a result stocks have accumulated and are now larger than were ever before held here at the opening of September, and shippers talk less encouragingly than when prices were 7@8c. higher. There is, however, less disposition among the heretofore strong bears to put out shorts, and many of them have covered and commenced buying for an up turn. It is stated by many of the largest receivers that the present decline will materially check receipts and that only such shippers as have wheat sold for this month at much higher prices will ship their grain in, and many of the latter will prefer to hold at home and buy here to fill sales. Corn has come forward with surprising freedom and has been absorbed by shippers, who have developed an enormous capacity, but the favorable crop outlook and weakness in other articles has induced free selling, and prices declined 3@4c. since the date of my last week's letter. But it has many friends among the strongest houses on 'change, and the fact that they are paying ¾@1c. premium for cash and this month's delivery over October, and taking all that is offered, must be accepted as evidence that they have confidence in its value, and any material decrease in receipts would cause an upward movement in prices. Oats, like corn, continue to come forward with unusual freedom for the season, and, like that grain, they meet a large shipping demand. A favorable feature in connection with the trade is the taking of car-load lots, which are distributed to every part of the east and southeast, where they are evidently wanted for consumption. Prices are lower than at any time in the past two years and a half, and it is predicted that the present severe decline will check receipts. The provisions trade is weak and demoralized. Mess pork has declined $1.25 per barrel since the opening. On Monday all the strong packers were selling freely for near and distant delivery, and the only apparent demand was to cover short sales. Lard fully sympathized with pork, and the closing prices to-day are the lowest of the year, and full ½c. under the ruling figures at the date of my last letter. As with pork, the demand is almost exclusively to fill previous contracts, the call from shippers being light. Meats have fully sympathized with pork and lard in their down course, the decline on short-ribs from the closing price on Monday being 62½c. per 100 pounds; but, unlike pork and lard, they are meeting a large demand for consumption, and there is ample reason for thinking that a certain strong dealer who is known to be a heavy holder, and who virtually controls the shipping trade of the west, has aided in depressing prices as a means of securing additional stock at lower prices. The receipts of hogs are increasing; the quality is very fine, and, supplies being larger than wanted, prices are declining. The receipts of cattle are very heavy, but the demand responds to the supply and prices are strongly supported. This is especially the case in regard to high grade export steers, for which the demand exceeds the supply, and the outlook for a continued large demand is regarded as good. Feeders are also arranging to fatten more than their customary number for the fall and winter markets.

The stocks of grain in Chicago September 1 for three years compare as follows:

	Sept. 1, bushels.	*Sept. 1, bushels.*	*Sept. 1, bushels.*
Wheat	5,291,000	1,180,000	4,303,000
Corn	2,173,000	1,395,000	5,531,000
Oats	603,000	1,187,000	1,211,000
Barley	533,000	179,000	202,000
Rye	21,000	12,000	38,000

LOCOMOTIVE DEVELOPMENT.

At the late meeting of the Institution of Mechanical Engineers in Belgium, the president, Mr. Percy Westmacott, in speaking on the development of high speed, had this to say regarding the locomotive:

"In touching upon speeds, the mind naturally reverts to railway traveling. Here, however, it would seem as if for the present we had reached a maximum. It is surprising how soon the speed of the locomotive was brought up to something approaching its present limit. George Stephenson was laughed at in 1825 for maintaining that trains would be drawn by a locomotive at twelve miles an hour, but the 'Rocket' herself attained a speed of twenty-nine miles an hour at the Rainhill competition in 1829, and long afterward ran four miles in four and a half minutes. In 1834 the average speed of trains on the Liverpool & Manchester Railway was twenty miles an hour; in 1838 it was twenty-five miles an hour. But by 1840 there were engines on the Great Western Railway capable of running fifty miles an hour with a train and eighty miles an hour without. In 1841 we find Stephenson himself ranged on the side of caution, and suggesting that forty miles an hour should be the highest regular speed for trains. In 1851 Mr. Crompton, who had already in 1849 inaugurated the express service of the continent on the Northern Railway of France, conveyed a train twenty miles in nineteen minutes, four miles in the journey being at the rate of seventy-five miles an hour. Thus, it is a remarkable fact that the highest speed at which locomotives run in ordinary practice scarcely seems to have been raised during the last thirty years; on the other hand, the weight of the trains has been perhaps doubled.

"What are the causes which have tended to prevent any improvement in this particular? In the first place it may be said that the permanent way would suffer seriously by further increase in speed; but this could surely be overcome by improving the permanent way itself, which also remains very much in the same condition and of the same construction as it was twenty-five years ago. Again, it may be said that the running at a higher speed would require more powerful engines, and hence that trains now worked by a single engine would require two, or would have to be split up into two trains at a great increase in running expenses. This, however, assumes that it is not possible so to improve the engine that it shall be able to exert a

considerably higher power without an admissible increase in weight. By utilizing a larger part of the total weight of the engine as adhesion weight it would be easy to obtain the amount of adhesion required for the increased tractive force; and for this purpose Mr. Webb's compound locomotive, which enables the number of driving wheels to be increased without the use of coupling-rods, appears to merit particular attention.

"Another point in which improvement may possibly arise in the future should be noticed. On the Russian railways, where both coal and wood are dear, the burning of petroleum has now taken a practical form. Our member, Mr. Thomas Urquhart, has been very successful in this direction, and is now running locomotives regularly which use only petroleum refuse, and which show a marked economy over coal or wood. To test the point he prepared three locomotives of exactly the same type, and started them on successive days under exactly similar conditions of weather, train and section of road. The trips were made both ways, and the results per verst, including fuel required in lighting up, were as follows:

	Cost, copecks.
Anthracite, 52.9 Russian pounds	26.35
Wood, 0.0107 cubic sashin	23.54
Petroleum refuse, 27.36 Russian pounds	11.64

"There is thus in this instance an economy of at least 50 per cent. on the side of petroleum, the boiler pressure being from 120 to 130 pounds, and the gross load over 400 tons. At the same time the weight of fuel used, as against coal, is diminished by about 50 per cent., which is a most important item.

"Although petroleum is scarcely a product of western Europe, we have to notice, on the other hand, the progress which has lately been made in the extraction of oil as a waste product from coal, etc. Mr. Jameson has extracted as much as nine gallons per ton from mere shale. It is suggested that markets for such oil will be difficult to find; but it seems allowable to hazard the idea that we may hereafter see our locomotives, even in England, running with oil fuel, which would be at once much lighter and much more easily renewed than the coal which is used at present, and get rid of the intolerable nuisance of smoke and dirt. There might, in fact, be an oil tank and a water tank side by side at every stopping station, and the engine would replenish her store of fuel at the same time as her store of water."

TRADE EMBARRASSMENTS.

There were 142 failures in the United States reported to BRADSTREET'S during the past week, 16 more than the preceding week, 21 more than the corresponding week of 1882, and 77 more than the same week of 1881. Compared with the previous week the middle states had 24, a decrease of 5; New England states 28, an increase of 1; southern states 19, a decrease of 4; western states 48, an increase of 16; Pacific coast states and territories 23, an increase of 8; Canada and the Provinces 17, a decrease of 5. Among the firms embarrassed are Benjamin Burgess & Sons, commission merchants, C. B. Barrett & Co., wholesale liquors, and Parker & Gannett, agricultural implements, Boston; Butterworth & Co. and Hugh McKenzie, manufacturers of boots and shoes, Cincinnati; Chisholm Brothers & Gunn, mill furnishers, Chicago and Minneapolis; Curme, Dunn & Co., manufacturers of leather, Richmond, Ind.; H. Dudley Coleman & Brother, manufacturers of machinery, New Orleans; The Brazil Bank of Brazil, Ind.; The Warren Savings Bank of Warrenton, N. C.; Fred. Kohbertz & Son, wholesale wines, New York. In the principal trades they were as follows: General traders 16; grocers 15; liquors 12; hotels and restaurants 10; clothing 8; dry goods 6; hardware 6; manufacturers 6; furniture 5; shoes 4; leather 4; fancy goods 3; jewelry 3; produce and provisions 3; lumber 3; drugs 3; bakers and confectioners 3; butchers 3; carriages 3; harness 2; commission 2; grain and flour 2; tobacco and cigars 2; millinery 2

ARIZONA.

TUCSON.—The estate of H. Horton, liquors, has assigned.

CALIFORNIA.

EUREKA.—R. B. Welch has closed out, and called a meeting of creditors.

GRASS VALLEY.—W. C. Burroughs, butcher, has filed a petition in insolvency.

MARYSVILLE.—William L. Lawrence, carriages, etc., has filed a petition in insolvency. He was attached by eastern creditors for $10,000.

MAYFIELD.—Joseph Rosenblum, general store, is in insolvency.

REDDING.—B. Solomon, clothing, has failed.

SAN FRANCISCO.—Otto Borge, restaurant, is advertised to be sold out.

SAN FRANCISCO.—P. Canavan, carriages, is in insolvency.

SAN FRANCISCO.—Joseph H. Graffam, painter, has been closed by the sheriff.

SAN FRANCISCO.—Griffin, Lee & Co., commission, are advertised to be sold out by the sheriff.

SAN FRANCISCO.—C. H. Heininger & Co., smokers' articles, have obtained an extension.

SAN FRANCISCO.—Jamison & Dunn, confectioners, have assigned.

SAN FRANCISCO.—Gustave Krohns, carpenter and builder, has filed a petition in insolvency.

SAN FRANCISCO.—L. A. Nunez, clothing, has been attached, and called a meeting of creditors.

SAN FRANCISCO.—C. F. Porter, varieties, has assigned.

SAN FRANCISCO.—G. G. Smith, produce, is reported to have failed.

SANTA ROSA.—E. Wells, tailor, is in insolveney.

COLORADO.

DENVER.—Jacob Juergens, saloon, has been closed out by creditors.

DENVER.—John Lansing, cigars, is reported to have failed. Liabilities $3,700; actual assets $3,000.

FORT COLLINS.—Helen M. Robbins, millinery, has been attached for $600.

LEADVILLE.—L. A. Braham, clothing, is reported to have failed.

LEADVILLE.—Michael Goldsmith, theatre, has been closed on a mortgage.

LEADVILLE.—George W. Taylor, grocer, has been attached. Liabilities $6,000; nominal assets $2,500; actual assets $1,800.

RICO.—E. S. Norton, hotel, has assigned to L. Pence.

CONNECTICUT.

MERIDEN.—Huntley & Powers, meat market, have assigned.

NEW HAVEN.—C. A. Bradley, hats, has compromised at 25 cents.

DAKOTA.

JAMESTOWN.—Anton Steinbach, furniture, has assigned. Liabilities $11,981; assets $14,438.

DISTRICT OF COLUMBIA.

WASHINGTON.—Matthew Goddard, grocer, has assigned.

WASHINGTON.—R. H. W. Reed, trading as B. W. Reed's Sons, grocers, assigned on the 6th inst. to George C. Payne and Thomas J. Myers, giving preferences for $18,000, chiefly to relatives.

FLORIDA.

JACKSONVILLE.—Dowling & Coxe, general store, are advertised to be sold out by the sheriff.

GEORGIA.

DUBLIN.—G. S. Hooks, general store, has failed and sold out.

SAVANNAH.—S. G. Haynes & Brother, grain and flour mills, are offering to compromise at 45 cents, one-quarter cash and the balance March, 1884, September, 1884, and September, 1885. Most of the creditors have accepted.

IDAHO.

MONTPELIER.—Joseph Lewis, Jr., general store, has sold out under a chattel mortgage to William Quayle, who agrees to pay himself and one other creditor, leaving about $1,500 debts unprovided for.

ILLINOIS.

CHICAGO.—J. D. Brizzolara, fruits and saloon, has been closed by the sheriff.

CHICAGO.—Caspari & Zens, tanners, assigned on the 3d inst. to T. H. Traver. Liabilities $38,713; assets $17,000.

CHICAGO.—Chisholm Brothers & Gunn, mill furnishers, assigned on the 4th inst. to Bradford Hancock. They have a branch at Minneapolis, where they had large contracts. The business was established in 1872. In May last they claimed assets $116,000; liabilities $30,000. Their schedules now show liabilities $65,714; assets $27,666. Poor business and slow collections are assigned as the cause.

CHICAGO.—Coffin, Mattison & Co., furniture, have been closed by the sheriff.

CHICAGO.—Warren C. Howland, organ manufacturer, has been attached for $1,036.

CHICAGO.—H. L. Spangenberg, tanner, has assigned.

EDINBURGH.—S. E. Rehling & Co., grocers, have assigned to R. E. Berry. Assets about $2,000.

MOUNT CARROLL.—Noah Blough, harness, has turned his property over to his creditors and gone out of business. Liabilities $15,000; actual assets $8,000.

WYOMING.—Gilbert & Stuart, grist mill and creamery, assigned to R. S. Williams.

INDIANA.

BRAZIL.—The Brazil Bank has suspended. The Indiana Banking Company was a heavy stockholder in it, and since the failure of the latter there has been a steady drain on the bank, until about $90,000 on deposit have been drawn out. The liabilities are $76,000; assets over $100,000. The general impression is that the bank will be allowed to wind up without litigation.

BRIMFIELD.—Hart Brothers, groceries and hardware, have assigned.

EVANSVILLE.—William Sicker, tailor, owes $2,000; assets $1,200.

LAWRENCEBURG.—John P. Thompson, builder, has assigned.

MICHIGAN CITY.—Kloepfer & Befinger, dry goods, have assigned. Liabilities about $28,000; assets $15,000.

RICHMOND.—A. J. Coffman, leather, has assigned to the Richmond National Bank.

RICHMOND.—Curme, Dunn & Co., Richmond Tannery & Collar Works, have assigned to J. B. Dougan and Judge Bickle. The business was in the form of a stock company, incorporated April 20, 1874, with an authorized capital of $100,000, of which $44,400 was paid in. James E. Thomas, the secretary, was also secretary and treasurer of the suspended Farmers' Bank.

IOWA.

ANAMOSA.—A. L. Wassman & Co., merchant tailors, have been closed on a chattel mortgage for $602.

ANGUS.—Webster & Lent, general store, have assigned.

CORNING.—S. J. Parker, grocer, has been closed on a mortgage.

DENISON.—Knight & Bohart, agricultural implements, were attached on the 1st inst. by creditors. Mr. Bohart is said to have transferred all his lands the day previous, and it is thought the firm have made a bad failure.

ESSEX.—M. Maxwell, restaurant, has closed.

GRISWOLD.—Markham Brothers, agricultural implements, have failed. On the 1st inst. they gave two chattel mortgages for $5,200. They were soon after attached by a Des Moines house for $550, and on the 3d inst. assigned.

MONTEZUMA.—J. G. Crisman, creamery, has given realty mortgages and bills of sale.

PRESCOTT.—J. B. Hashan, restaurant, has closed.

STRAWBERRY.—W. B. Field & Son, hardware, owe $3,000; preferred claims $2,000. They do not continue.

KENTUCKY.

COVINGTON.—R. C. M. Lovell, coal, has compromised at 33 1-3 cents.

HOPKINSVILLE.—Mrs. S. A. Richards, dry goods, has been closed by the sheriff. She purchased the stock of J. D. Ware for $8,100 about two months ago and mortgaged it for purchase money.

LOUISIANA.

LAKE CHARLES.—The creditors of The Lake Charles Lumber Company have refused an offer of 40 cents. Liabilities $84,000; assets $50,000.

NEW ORLEANS.—H. Dudley Coleman & Brother, machinery, ask a respite of one, two and three years, showing liabilities $261,000 and assets $411,800. It is said they have been doing too large a business for their capital.

NEW ORLEANS.—Forcheimer Brothers, wholesale grocers, were unable to arrange matters with their creditors, and will make a surrender of their assets.

NEW ORLEANS.—Alphonse Martin, saw mill, asks an extension. Liabilities $45,000; assets $140,000. He says he was unable to meet his obligations, owing to heavy losses last year and by failure of others.

NEW ORLEANS.—M. Schwartz, hardware, was protested for about $1,200, and suspended.

NEW ORLEANS.—C. R. Van Wickle, cotton pickery, has assigned. Liabilities $3,026; assets $234

RACELAND.—S. Sevin, general store, has failed and been attached.

MAINE.

BREWER.—N. H. Hall, general store, has failed.

CAMDEN.—Dickey & Brown, door manufacturers, are settling in insolvency.

MATTAWAMKEAG.—Ambrose W. Scott, general store, has been attached.

SKOWHEGAN.—William B. Snow, lumber, has been attached.

SOUTH GARDINER.—Bradstreet Brothers, lumber, have been attached.

SOUTHPORT.—Warren Farr, Somerset House, has been attached $1,800 for arrears of rent.

MARYLAND.

BALTIMORE.—J. Henry Knell, Jr., lumber, has assigned.

MASSACHUSETTS.

ATTLEBORO.—Bates & Martin, jewelry, have assigned.

ATTLEBORO.—F. D. Hall, jeweler, has failed. Liabilities are reported at $3,500; no assets.

ATTLEBORO.—Charles M. Robbins, jeweler, has assigned to Frank I. Babcock. Liabilities about $3,000; assets $916.

ATTLEBORO.—George A. Sweeney, hardware, has been attached.

BOSTON.—C. B. Barrett & Co., wholesale liquors, have failed. For several months past the partners have disagreed, and in June arrangements were made with the creditors to pay them 50 cents cash and the balance in thirty days. Mr. Barrett owns considerable real estate, mortgaged for $133,000.

BOSTON.—Benjamin Burgess & Sons, commission merchants, assigned on the 5th inst. to Drexel, Morgan & Co. The failure was a great surprise, the firm ranking high, and claiming to be worth upward of $500,000. They had a large plantation in Cuba, and it is said most of their indebtedness is abroad. The business has been established many years, passing into the third generation. Benjamin Burgess, the founder, died in 1874.

BOSTON.—At a meeting of the creditors of Hersey, Whittier & Wyman, hides and leather, on the 5th inst., the committee reported liabilities $496,000; assets $348,000. The statement of the two New York state firms, which failed in consequence of their suspension, are as follows: Hersey & Co, tanners, Moose River, liabilities $211,000; assets $104,000; apparent dividend 49 per cent. G. M. Botchford & Co., tanners, Otter Lake, liabilities $146,000; assets $39,000; apparent dividend 26 per cent. The creditors chose C. C. Bills as co-assignee and appointed an advisory committee of three.

BOSTON.—The creditors of Parker & Gannett, agricultural implements, held a meeting on the 6th inst. Alfred A. Parker said his partner and brother, James O. Parker, absconded from his home in Williamsport, Pa., July 2. The firm had done a large business, but in the summer it was found that additional capital would be needed, and he wrote his brother, who replied that he knew where he could borrow $15,000 in Williamsport. Whether this money was borrowed by James is not known, but if it was, he took it away with him. Parker made a statement of the firm's condition, showing its liabilities to be $98,626, and the assets $89,690. It was voted that the affairs of the firm be placed in the hands of a committee of the creditors, consisting of John H. Patton, William F. Lawrence, William T. Wood and George S. Taylor, for investigation. No offer of settlement was submitted.

BOSTON.—Wright, Wooster & Co., wool, are in insolvency.

CHARLTON.—Rich Brothers, sash and blinds, have been sold out by the sheriff. Liabilities about $4,000; no assets.

CLINTON.—M. Kinsella, cigars, has been closed by the sheriff.

DANVERS.—Thomas E. Dougherty, shoe manufacturer, owes $7,000.

DEDHAM.—At a meeting of creditors in the insolvency court of S. C. & J. G. Phinney, wholesale boots and shoes, Amos W. Dowing and Charles E. Johnson were appointed assignees.

FALL RIVER.—James Chisnell, dry goods, has failed. Liabilities $3,200; nominal assets $1,500. The stock is mortgaged for $1,770.

GREENFIELD.—A. N. Hull, coal, has compromised at 40 cents and will resume.

HAVERHILL.—William E. Morse, grocer, owes $2,600; nominal assets $600.

HOLYOKE.—George A. Brown, liquors, has been attached.

LAWRENCE.—John Leybourne, furniture, has assigned.

LOWELL.—The liabilities of H. F. Fletcher & Co., bakers, are $4,089; nominal assets $1,828.

LYNN.—George J. Clapp, fancy goods, has failed.

MARBLEHEAD.—J. S. Doane, carpenter, has failed.

NATICK.—William Richards & Co., drugs, owe $5,760; nominal assets $11,000. It is said an offer has been made of $8,000 for the stock.

NEWBURYPORT.—At a meeting of the creditors of Pearson Brothers, bakers, an offer of 25 cents was accepted. Liabilities $13,247; assets $3,385.

NORTH WEYMOUTH.—Benjamin E. Corlew, Bayside House, has been attached.

SPRINGFIELD.—J. B. Hogan, confectioner, has been attached.

WALTHAM.—E. Tracy, provisions, has failed.

MICHIGAN.

LANSING.—George A. Dyer, hotel, has failed.

NILES.—Abraham Young, grocer, has been closed by the sheriff.

UNIONVILLE.—Brydle & Still, clothing, etc., have failed.

MINNESOTA.

KENNEDY.—H. D. Benedict, hotel, is said to have left for Colorado and the stock and furniture have been attached.

MINNEAPOLIS.—Chisholm Brothers & Gunn, mill furnishers, have assigned at Chicago, where the principal house is.

ST. PAUL.—Samuel M. Halliday, paper, etc., has been attached and assigned.

MISSISSIPPI.

CRAWFORD.—B. V. Halbent, general store, was burnt out and lost everything. He had no insurance.

MISSOURI.

FAIRFAX.—Edward J. Graham, blacksmith, has failed and left town.

ST. LOUIS.—E. H. Jerrald & Co., grocers, have sold out and are trying to compromise at 80 cents.

NEBRASKA.

FREMONT.—E. A. Lawrence & Co., grocers, called a meeting of creditors.

NEBRASKA CITY.—C. D. Richardson, shoes, has compromised the execution against him and resumed.

NEW HAMPSHIRE.

CLAREMONT.—C. M. Leet, millinery, has settled at 25 cents. Liabilities $2,500.

NEW JERSEY.

ATLANTIC CITY.—Warner & Pender, Ashland House, have been closed by the sheriff on complaint of local creditors.

NEW MEXICO.

HILLSBOROUGH.—Perrault, Galles & Perkins, general store, have assigned. Liabilities $20,000; assets $35,000.

NEW YORK.

ALBANY.—The schedules of Michael Madden, dry goods, show liabilities $25,077; nominal assets $15,217.

ARCADE.—C. A. Clough, lumber, has assigned.

ARCADE.—J. H. Howard, undertaker, has assigned. Indorsing for others is said to have been the cause of the failure.

BROCKPORT.—Daniel Paine, furniture, has assigned to J. H. Kingsbury, giving preferences for $5,000. Liabilities $10,000; assets $15,000 to $20,000.

BROOKFIELD.—A. J. Stillman, grocer, offers 75 cents. Liabilities $8,000; nominal assets $10,000; actual assets $8,000 preferences $900.

CAMDEN.—Charlotte Wetmore (G. S. Wetmore, agent), grocer, has assigned.

GOUVERNEUR.—G. V. R. McVeagh, grocer, has assigned.

MEXICO.—Mrs. W. O. Johnson, general store, has assigned to Ira D. Johnson.

NEW YORK CITY.—George William Ballou & Co., bankers and brokers, propose to their creditors an extension of six, nine and twelve months, by which their assets can be utilized to the best advantage.

NEW YORK CITY.—Buchow & Brandau, wholesale California wines, assigned on the 5th inst. to Hubert Fischer, giving him a preference for $4,354. They began in 1873, and represented two San Francisco houses.

NEW YORK CITY.—The schedules of E. W. Holbrook & Co., wholesale dry goods, show liabilities $648,646; nominal assets $514,131; actual assets $318,183.

NEW YORK CITY.—Frederick Kohbertz & Son, wholesale wines, assigned on the 5th inst. to Robert A. Greacen, giving a preference to the East River National Bank for $15,593 on promissory notes. The business was established many years ago by Frederick Kohbertz, who died in 1872, leaving the business and property to his wife and son, who have since conducted it.

NEW YORK CITY.—The schedules of Lucas & Merritt, coal, show liabilities $67,379; nominal assets $73,708; actual assets $22.

NEW YORK CITY.—Vernor C. Murray, restaurant, assigned on the 6th inst. to Robert Vosburgh, giving preferences to Peter J. Hickey $2,100; Robert Sturs $500; Robert Vosburgh $1,100; total $3,700. He was the caterer for the Coal & Iron Exchange Building.

NEW YORK CITY.—Dwight Roberts, manufacturer of lathe chucks and engine governors, assigned on the 3d inst. to George F. Hippard, giving preferences to Emma M. Roberts $1,300, J. G. Flagg $14. Liabilities $2,705; nominal assets $6,791; actual assets $4,614.

NEW YORK CITY.—At a meeting of the creditors of Taussig & Hammerschlag, manufacturers of syrups and rock candy, on the 3d inst., the firm proposed to form a stock company with a capital stock of $500,000, the creditors to have $200,000 and the firm the balance, the firm to have three years to redeem the creditors' stock. A committee of five was appointed to form a basis for a settlement. The schedules show liabilities $214,832; nominal assets $149,048; actual assets $38,803.

RIPLEY.—Hiram Eddy, meat market, has assigned.

ROCHESTER.—L. R. Newman, lumber manufacturer, has assigned. A few months ago he claimed assets $120,000; liabilities $32,500.

ROCHESTER.—John Yauch, hats, has assigned to Fred. H. Brown, giving preferences for $1,635.

ROME.—William McPherson, flour and feed, has assigned. Judgment for $3,203 was entered against him.

SARATOGA.—Marvin E. Snyder, confectioner, recently executed a bill of sale to Medora A. Snyder, and judgments have since been docketed against him.

SYRACUSE.—Timothy Sullivan, merchant tailor, has assigned. Judgments for $3,622 were entered against him. Liabilities about $11,000.

SYRACUSE.—Walter J. White, gents' furnishing goods, has given a chattel mortgage for $4,000 to R. K. Davis & Co., of New York, his largest creditors, for whom he will now act as agent. Trade was very poor the past season. The other liabilities are about $1,000.

NORTH CAROLINA.

NEWBERN.—Powers & Duffy, hardware, have assigned.

WARRENTON.—The Warren Savings Bank has suspended. It has been doing business for the past thirteen years, mostly collections. The authorized capital was $50,000, of which $15,000 was paid in.

OHIO.

BLUFFTON.—R. A. Hickey, drugs, has assigned to A. J. Call. Liabilities $2,500; assets $1,500.

CINCINNATI.—Butterworth & Co., manufacturers of boots

and shoes, assigned on the 4th inst. to R. Wooley, Jr., and Powell Crossley. They recently claimed assets of $135,453 and to owe $78,683. It is said they indorsed the paper of Hugh McKenzie, and his embarrassment precipitated their failure. Mr. Butterworth has been in business seventeen years.

CINCINNATI.—Hugh McKenzie, manufacturer of boots and shoes, sold out to The Hugh McKenzie Manufacturing Company, of which he holds nearly nine-tenths of the stock. This was done without the knowledge or consent of his creditors, to whom he has offered stock in the company in liquidation of his liabilities. There have been several meetings of creditors, and suits in attachment have been begun. There is also a question as to the legality of the incorporation. His liabilities are reported at upwards of $175,000.

CINCINNATI.—D. C. Shotts, carriage manufacturer, has assigned.

CLEVELAND.—Bull & Dancy, grocers, have been seized by creditors.

FREMONT.—Charles J. Smith, furniture, has assigned to J. V. Berry.

RAVENNA.—W. S. Elson, dry goods, has been closed by the sheriff.

OREGON.

ASTORIA.—A. M. Johnson & Co., ship chandlers, have been closed on three attachments.

CORVALLIS.—The liabilities of Max Friendley, general store, are $25,600; assets $20,000.

EAST PORTLAND.—The Oregon Pump Works have been closed. Assets small.

PORTLAND.—John Moir & Co., ship chandlers, are reported to have suspended, with liabilities of $10,000. They conveyed real estate $10,000.

PENNSYLVANIA.

DRY RUN.—Eicher & Eby, general store, have had execution issued against them for $1,707.

HARRISBURG.—B. F. Bishop, agent, sewing machines, is advertised to be sold out by the sheriff.

HAZLETON.—Thomas Job, stationer, who was sold out by the sheriff, owes $1,500; actual assets $300. It is said the estate did not realize 25 cents on the judgment of $1,100.

MANSFIELD VALLEY.—William Daley, saloon, has had execution issued against him.

MONROETON.—D. L. Huntley, wagon maker, has been sold out by the sheriff.

PHILADELPHIA.—Judgment for $1,575 has been entered against George Born, manufacturer of carpets, in favor of the National Security Bank, and execution was issued.

PHILADELPHIA.—Harry C. Cook, coal, was sold out by the sheriff, realizing about $3,500.

PHILADELPHIA.—A meeting of the creditors of Daniel M. Karcher's Sons, manufacturers of furniture and upholstery, has been called for the 15th inst. The assets are estimated at $37,000; liabilities $48,000.

PHILADELPHIA.—Judgment to the amount of $1,626 has been entered against Elias Rosenswig, manufacturer of hats and caps, in favor of Benjamin L. Bensin, and execution issued. The liabilities are estimated at about $12,000.

PHILADELPHIA.—Jonathan P. Vandegrift, grocer, is advertised to be sold out by the sheriff on the 10th inst. Judgment for $1,029 in favor of W. A. Vandegrift was entered against him on the 31st ult., and execution issued.

RHODE ISLAND.

PROVIDENCE.—Daniel Mackay, shoes, has assigned to C. M. Van Slyck.

PROVIDENCE.—A. P. Mowry, shoes, has assigned.

TENNESSEE.

BRADFORD.—J. W. Phipps & Co., general store, have assigned.

TEXAS.

DENISON.—Israel Franklin, dry goods, has assigned.

GEORGETOWN.—J. F. Hopper, saloon, has been attached.

LAMPASAS.—D. W. Phillips, notions, has assigned.

MILLICAN.—A. J. Kennedy & Co., saloon, have been attached.

ORANGE.—Burton Brothers, general store, have failed. Liabilities $12,000.

UTAH.

OGDEN CITY.—John J. Brewer, dry goods, &c., has assigned to John H. Weist. Liabilities $3,500; nominal assets $3,000.

VERMONT.

ALBURGH.—R. H. Scott has filed a petition in insolvency. Liabilities about $30,000.

BELLOWS FALLS.—George F. Woods, drugs, is reported settling at 20 cents.

RUTLAND.—R. B. Gary, teas and fruits, has failed.

WAITSFIELD.—Frank C. Evans, drugs, has failed.

VIRGINIA.

DANVILLE.—C. W. Schuff & Co., grocers, have assigned. Liabilities about $4,300; nominal assets $3,000.

PORTSMOUTH.—John Smith, groceries and liquors, is reported to have left town.

WASHINGTON TERRITORY.

POMEROY.—The liabilities of G. T. Parks & Co., notions, are $5,700; assets $4,000.

SEATTLE.—D. A. Jennings, grocer, has compromised. His liabilities were about $75,000. It is said he sunk $30,000 in three logging camps.

WISCONSIN.

BARNEVELD.—Adam Schreber, harness, has failed.

PINE BLUFF.—Brown & Cullen, general store, have failed.

MANITOBA.

BRANDON.—William Senkbiel, shoes, has compromised at 50 cents.

EMERSON.—Marlton & McKay, hotel, have failed and gone out of business.

WINNIPEG.—John F. Campbell, hotel, is reported in the hands of the sheriff.

WINNIPEG.—A. P. Horsman, hardware, has assigned.

NEW BRUNSWICK.

ST. JOHN.—Peters & Sutherland, shoes, have assigned.

ST. JOHN.—A. B. Sheraton, carpets, owe $85,000. The local creditors are all secured, and it is thought the assets will hardly realize enough to pay them, leaving nothing for other creditors.

PROVINCE OF ONTARIO.

AYLMER.—J. E. Pedlow, tinware, is reported offering to compromise.

DUNEGAN.—William Urquhart, general store, has assigned

LONDON.—George B. Guest, harness, has assigned.

LUCAN.—Frank Murro, grocer, is reported to have left town.

NIAGARA.—Thomas P. Blain, dry goods, has assigned.

TORONTO.—James Herson, wholesale and retail provisions, has assigned.

TORONTO.—Fred. Perry, printer, is in financial difficulties.

TORONTO.—Richard Taylor, manufacturer of waste, is advertised to be sold out by the bailiff.

WHITE OAK.—John Archer, general store, is reported to have left town.

PROVINCE OF QUEBEC.

MONTREAL.—Gougeon & Roby, wholesale hides and leather, have failed, and offer 5 cents.

ST. AIME.—P. E. Cartier, general store, has assigned.

STE. ANNE DES PLAINES.—Emile Granger, general

ST. CUNEGONDE.—Mark H. Tomkins, pottery, has assigned.

store, has assigned.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

FINANCIAL.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, SEPTEMBER 15, 1883.

NOTES OF THE WEEK.

The great importance of the inquiry is the explanation of our giving up so much space this week to special reports from cities regarding the condition and outlook of general manufactures. The reports given are in every case the results of close inquiry by our correspondents on the ground. When those who are interested in forcing prices still lower are leaving nothing undone in the way of circulating unwarranted reports, an understanding of the true condition of the country is of the first importance. To this end we have brought together the reports given herewith.

The Chicago *Times* is a good deal exercised over the fact that the weekly reports of mercantile failures given out by BRADSTREET'S do not always agree with other reports given out and purporting to cover equivalent periods of time. The *Times* should understand that the reports published in these columns correspond with the detailed statement given at the same time. The weekly summary of BRADSTREET'S is brought down to Friday of each week at four o'clock, so that all failures received up to that time by mail or wire are included in the summary for the week. Before the Chicago *Times* undertakes to make comparisons it should learn whether other reports are brought down to a late hour on Friday of each week, or whether, through the impulse of news rivalry, they are not made up of a part of one week and half the next. A mercantile failure has been defined in these columns to be that of a trader or manufacturer whose business standing has to be taken into account, as a matter of ordinary record, in the proper conduct of the regular business of a mercantile agency as understood and practiced in the United States. In the conduct of such business all traders having distinctive places in the particular community have to be taken into account. As the standing of all such traders is a matter of record, the failure of any one of them must speedily become known. It follows that the returns of failures are necessarily approximately accurate.

Certain suits have been brought in the New York courts against the firm of F. Shaw & Co., which are likely to draw general attention to some interesting features of the law relating to false representations. The plaintiffs in these suits seek to recover damages from the Shaws for false representations made by them to the Bradstreet Mercantile Agency, and upon which the plaintiffs claim they relied, and in consequence of which they were induced to sell hides to the firm. There would seem to be no difficulty in the way of the plaintiffs' success in these suits. The New York law upon the subject is sufficiently clear, and is quite up to the requirements of the age. It has been held by the court of last resort that the courts can take judicial notice of the business and office of mercantile agencies, and that where any person wilfully makes false representations regarding his financial condition to a mercantile agency he is liable to anybody defrauded in consequence of relying upon those statements in like manner as if the false representations were made directly to the defrauded person.

Stock speculation has been rather dull during the week, and the tone of the market in the main strong. The scare caused by the reports of frost in the corn caused a sharp drop in prices last Saturday, and it is probable that, had not Sunday intervened, there would have been a serious decline as a result of the further dispatches on the same subject which came later. Mr. Gould has taken unusual measures to publicly identify himself with the present manipulation of the market, and the gradual advance of prices which has been forced during the week is therefore attributed to his operations. His presence in various brokers' offices in the street gave confidence to his following, and helped to allay the alarm which was felt among the traders at the frost reports. A well-planned bull movement, to run through the fall months, had been planned and was in execution when that cold wave came.

We present elsewhere a full synopsis of the report of the Treasury Commission appointed to investigate charges of fraud in the importation of sugar under the Hawaiian reciprocity treaty. The groundless character of the charges was made clear to the commission through their visit to San Francisco and Honolulu. The commission's report confirms the accuracy of the statements made by the *Gazette* of Honolulu following upon the visit of the commissioners. There is more than one cause for congratulation over the report of the commission. It goes to show first, that fraudulent transactions at the San Francisco custom house are not so easy of achievement as those who preferred the charges would have the country believe. Such an outcome is at all times welcome. Second, it renders very probable the indefinite continuance of the treaty. The commission find that the annual importation of sugar from the islands can never exceed 100,000 tons unless a better system of cultivation is introduced. This being the limit of importation there should be no cause for alarm from any point of view. We have argued for the continuance of the Hawaiian treaty on political grounds, and, it is believed wisely, having regard to the country's foreign relations.

The inquiry into the frauds on the Philadelphia treasury through the writ of mandamus from the courts is a complicated one from the fact that the then city treasurer, city controller and the chief of the highway department are now dead. The then city solicitor, C. H. T. Collis, comes forward now and virtually declares that, as all bills were attested as correct by the proper officers of the city, he had no other course open to him save to confess judgment. It is not probable that the committee of the Philadelphia councils will learn the whole truth about these matters. When numbers of men have reason to desire concealment means of obscuring past records are not wanting. The robbery by mandamus is one of the most instructive chapters in the history of Philadelphia peculation during the decade preceding 1880. To such an extent had the sale of city warrants come to be the primary dependence of the establishment for funds that the paying out of half a million dollars a year of the cash received from taxes on orders from the courts was not noticed. In other words, the city treasury was not inconvenienced thereby, for the regular warrants on the said treasury were sold in the streets instead of being paid as drawn.

The New York Chamber of Commerce met a few days ago to select one member of a commission to be appointed by President Arthur to investigate the condition of the hog raising and packing industries in this country, and to follow the course of this food staple from the fields and farms to the wharf where it is shipped, or to the shop where it is exposed for domestic consumption. A letter was read from Secretary Frelinghuysen calling attention to the foreign restrictions upon the importation of hog products from the United States on the alleged ground of the prevalence of disease among the swine of this country, and declaring that the government had reached the conviction that the premises upon which the adverse legislation abroad rested were unfounded. The President, the Secretary continued, regarded the matter as one of such urgency that he was unwilling to await action by Congress, but was desirous to lay the results of the investigation before that body at its next session in order that, if needful, legislative action might then be taken. The Chamber of Commerce unanimously voted to recommend Prof. Charles F. Chandler, formerly president of the New York Board of Health, a gentleman whose qualifications for the work of investigation contemplated are widely known.

Our conjecture that the Ohio platform was not unlikely to stand as the model Democratic declaration on the tariff question receives confirmation as time goes on. The tariff plank in that platform, it will be remembered, was made up in about equal parts of free trade and protection, and was the evident result of an attempt to evade the issue between the two policies. It seemed, nevertheless, to find favor among the shifty politicians, for declarations in substance identical with it were subsequently adopted by conventions of the party held in Virginia and Pennsylvania. The New Jersey Democrats have now fallen into line, their convention just held having declared in favor of "a tariff for revenue, limited to the necessary expenditure of the government and so adjusted as to give protection and encouragement to home productive industry and labor without producing or fostering monopolies." The object aimed at in these declarations is naively indicated in some recent utterances of Democratic journals. A circular lately sent out by the Louisville *Courier-Journal* calls upon the recipients to suggest "a tariff plank that the Democrats can win on in 1884." The *Sun*, a very influential Democratic journal, in a leading editorial upon the circular, says that the *Courier-Journal* adopts "a statesmanlike mode of putting the question," and condemns the "doctrinaire politicians" who desire the tariff plank to exactly express their own views without regard to its bearing upon the success of the Democracy. The true Democratic "statesman" apparently will test every declaration upon the tariff by the standard of its likelihood to secure victory for the party. Looked at from this point of view, the Ohio plank certainly offers superior advantages of which the wide-awake "statesmen" throughout the country have not been slow to avail themselves.

THE SHAW FAILURE AND SOME OF ITS LESSONS.

The recent great failure in the leather trade in Boston is fruitful in suggestions. Ordinarily more or less sympathy is manifested in favor of those who have succumbed to the force of circumstances. In this case, however, the fact has been otherwise. The commercial history of New England presents no other example of a financial disaster equaling this in magnitude, and yet no one has been less regretted by the trade except in so far as it has involved the fortunes of persons other than those included in the firm. The reason for this state of affairs is no doubt to be found in the motives and methods of the firm which has just closed its commercial career so ignominiously—motives which, relentlessly pursued, insensibly but inevitably led up to the late catastrophe. The firm seem to have embraced the colossal design of controlling the leather trade of the world. In the pursuit of this vast undertaking they apparently ignored the ordinary considerations of scruple and prudence. They bought up vast tracts of bark lands, even when they did not need them, so as to prevent them falling into the hands of possible competitors. To such an extent did they carry this policy that their real estate dealings alone involved the expenditure of a vast amount of capital, and so recklessly were their dealings of this sort carried on that much of the land bought is comparatively worthless and forms a large item among the unrealizable assets. The results of these and similar methods disclosed themselves in time. The firm gradually lost control of their own business. They were doubtless fleeced by many of their subordinates over whom, from the circumstances of the case, they could exercise no adequate supervision. There can be no doubt that, notwithstanding the confusion in which their affairs had become involved by reason of their unbusinesslike methods, they were aware that they were on the brink of a suspension long before the final crash came. We learn, for instance, that they undertook to raise the credit of their securities by getting possession of and using good business paper, which the makers supposed had taken the ordinary course through bankers' and brokers' hands. The worst part of the story, however, is to come. In the beginning of the year, when they could not have been without some understanding of their condition, they issued a statement showing that they had a large surplus. Similar statements were made in response to inquiries by mercantile agencies, upon whose reports, as they must have known, the business community largely built their reliance. In this way they did their utmost to poison the very sources of credit, with the intent—since men must be held to intend the consequences of their acts--of injuring and defrauding the public. The creditors of the firm and the public were astounded to learn from the statement made by the head of the firm at the creditors' meeting that, while the liabilities of the firm exceeded $7,500,000, the assets, largely nominal, amounted to but little more than $5,000,000. The Shaws, however, were not alone in the effort to conceal from the public the true condition of their affairs. Others who at the very moment of inquiry had funds advanced on account of the firm denied that they had any claims against or dealings with the Shaws. Among those whose singular views of public duty permitted them to adopt this course there were to be found the officers of a bank—an institution which, properly regarded, should be a trustee for the public and a conserver of the credit system.

The story of the failure and of the events that led up to it constitutes one of the most melancholy chapters in the commercial history of the country. The main facts which we have set forth above are sufficient to indicate that the commercial morality which guided the conduct of the defunct firm, and of some of those concerned with them, was of a very low order indeed. It is probably true that the business of the firm rose to its late large proportions through adherence to very different principles from those which marked the conduct of its managers during the period immediately preceding the collapse. The descent in such cases, while easy, is not generally sudden. It would seem as if, toward the last, the members of the firm, feeling themselves about to be overwhelmed by the magnitude and complexity of their operations, gradually became possessed with the recklessness of the gamester, and finally reached a stage when they could peril their own and others' fortunes upon the turn of a desperate hazard. It may, perhaps, be suggested that the business men of Boston and elsewhere who have been victimized by the Shaws have been more or less to blame for their lack of vigilance; but a little reflection will convince anyone that where a firm such as the one under discussion, and those connected or interested with them, conceal or deny or falsify facts, the commercial community is at a decided disadvantage. The extended and complicated relations of modern commerce are only rendered possible by the exercise of trust and confidence in our fellows, and the habit of mind thus induced tends, within certain limitations, to relax the vigilance which should guard against deceit and fraud. It is probable, as we have more than once pointed out, that abuses such as those of which the Shaws have been guilty will never be eradicated until fraudulent devices adopted by persons on the brink of bankruptcy for procuring credit and collusively alienating property shall be dealt with as heinous criminal offenses. The Boston failure and the developments therein which are daily coming to light furnish strong arguments in favor of the adoption of a national bankrupt law under which the transactions of insolvents, both before and after their bankruptcy, might be subjected to a genuine and searching investigation, and under which also commercial fraud of every description might be adequately punished.

The importance of having a uniform bankrupt law for the whole country is a matter upon which we have heretofore dwelt at some length. Certain proceedings subsequent to the failure in the Shaw case show in a very striking way the need of such a law. The firm made an assignment of all their property to a trustee for the benefit of their creditors. Much of their property is in Maine and northern New York, and the creditors in those states are determined, if possible, to secure for themselves as large a share of the assets as possible. The interesting question is thus raised whether, in the absence of a national bankrupt law, the firm's assignment of property in New York and Maine is valid as against local attachments by creditors in those states? The question is one of some difficulty and is likely to give rise to almost endless litigation, which may result in a very unequal distribution of the assets, owing to the different views likely to be taken of the question by the state courts. Under a judicious national bankrupt law this result would not obtain. The failure, though a thing of evil in itself, will not be without some soul of goodness if, in addition to exposing the methods of the collapsed firm, it will strengthen the feeling in favor of a national law for dealing with insolvencies. In particular, it is to be hoped that the lessons of the failure will not be lost upon Congress, and that that body will enact such a measure as will go far to prevent the recurrence of such disasters in the future.

THE CONDITION OF GENERAL MANUFACTURES.

The manufacturing industries of the United States are enjoying a better business than might have been supposed. This is shown by reports from about all important industrial centers printed below. The exhibit is the most complete which has been attempted, and made, as it is, simultaneous with the improved movement in wholesale and jobbing commercial lines, comes with added significance. It appears that with the exception of a few lines of industry orders are being received by manufacturers quite up to the standard of former years, and in many branches in excess thereof. There is even more uniformity in the reports of a good outlook for a full average demand later in the season. The so-called small manufactures throughout the length and breadth of the land, as indicated by the appended reports, are receiving, with some exceptions, a good line of orders, and it is worthy of note that more capital is being invested, new mills and factories and foundries are building, and old ones are enlarging facilities. This is especially true in the southern and in the northwestern states, where the rapid progress of the agricultural industries and the attendant prosperity have created an imperative demand for a home supply of small machinery, repairs and appliances. In the south no more satisfactory evidence than this can be adduced respecting the increasing prosperity of the farmers, planters, storekeepers and others, and the advices as to the improved financial condition of commercial interests in the region specified, due to emancipation from the hands of the money-lender under the mortgaged crop system, requires no fuller corroboration than the strides made there by the advance in small industries and the gain in production of grain crops and provisions, noted in BRADSTREET'S report on the situation printed last week. In the northwest and west — particularly west of the Mississippi — industrial communities are springing up on every hand, and, on the whole, are attended with a fair degree of success. In Wisconsin and Minnesota the manufacturing industries are enjoying a full tide of prosperity—notably the agricultural implement works, foundries, machine shops and establishments for the production of hardware specialties finding ready sale in that region. Chicago industries, under the influence of the demand from the northwest and the west are, in the main, in receipt of a fair amount of orders and are running on full time. Pittsburgh, industrially speaking, is in better shape than one might have been led to believe, considering the drawbacks which have made themselves felt. The glass manufacturers, many of them (as in New Jersey) have a fair trade and are looking for an improvement owing in part to the strikes among glass-makers at the west, which is expected to cause a diversion of trade to the east. Manufactured iron is in better request than for some time past, and, while demands continue to be based largely on present needs, purchases are becoming more frequent, and mills are running on full time. Philadelphia reports an improved industrial situation. The chief disturbance, therefore, to the manufacturing industries of the country continues to be with the mills producing the lower grades of cotton fabrics at Philadelphia, and particularly in New England, as noted in Providence and Boston reports. But even in these the prospect is not as unsatisfactory as it was some time ago. On the whole the industries appear to be moderately well employed, though at narrow margins of profit. Orders are small but frequent and promise to continue in good number. This is a healthful condition at least.

Following is the report in detail:

PORTLAND, ME.

Most manufacturers are prospering. So far there is an increase on one year ago.

MANCHESTER, N. H.

The leather trade is running on full time, but not doing much in wool. The number of orders will about equal those of the corresponding time last year. Prospects are reasonably fair.

NASHUA, N. H.

A leading cooperage firm of Nashua, N. H., say that they have sold $100,000 worth of goods a year for two years, and have not lost $200; also, that the past year has been the poorest in their business for years. They are running on full time now. Orders are about the same as last year, and they think they will have a good fall trade, but at lower prices. A member of one of the heaviest firms of founders states that they are putting in new engines, and the outlook for business is very encouraging. Payments during the past year have been the most satisfactory for many years. At present the foundries in the vicinity of the city named are not heavily employed, but within a week or two they look for a large business.

BOSTON, MASS.

The general manufacturing business of Boston and vicinity is in a fairly satisfactory condition. There is not the rush of some former seasons, but compared with last year there is an improvement. Every leading industry is well supplied with orders, and some have more work than they can conveniently handle. Laborers in all departments are fully employed. Good mechanics are not plentiful, and highly-skilled workmen are scarce. The percentage of idlers is as small as we have ever known it to be at this time of year. Wages are on a fair basis. Compared with profits of business they are perhaps high in some departments; at least, so employers think; but when rents and the general cost of living are taken into consideration the wage class is not overpaid. All classes of iron-workers are busy. Machine shops, boiler works, blacksmiths and nailers are all well employed, though there is a lack of large orders in the two first. The jobbing iron business is quite active. The nail mills are behind orders in several sizes, and their business during the summer has been considerably ahead of last year. They are now partially idle for want of water. The iron trade in pig is rather quiet, but this is owing more to the uncertainty which exists in regard to values than to any curtailment in the consumption, so far as this part of the country is concerned. Architects and builders are pretty well employed. Marble and other stone works are doing a steady business. Manufacturers of furniture, pianos and other household articles of necessity and luxury are all in full blast. Stove and furnace manufacturers had a quiet time early in the season, but are now in full working order and expect a large fall trade. This is an important branch of our industry. Clothing manufacturers find it difficult to get goods made up as fast as they want them. More than half of the garments sold are made in different parts of New England (Maine and New Hampshire principally), and it takes time to distribute and collect. Only the better grades are made, and the shops making them are rushing. Boots and shoes are nearly all manufactured in adjoining towns. The season

now drawing to a close has been quite prosperous so far as quantity of goods made is concerned. Heavy boots and shoes have met with an unusually large sale, and the factories are still busy. Operators have had no idle spells since the first of January. The tanning and currying works have all been running full time, but there is a general complaint of very small profits. The ship-building interest and branches connected therewith have been rather quiet—might say depressed. The six sugar refineries in this city have been running during the season with fair success. The cotton mills in Lowell, Lawrence, Manchester and Fall River are running on full time, except where the scarcity of water prevents, and operatives are well employed. In several departments there is a scarcity of help, and mill managers say that nearly all new applicants are put to work. Several of the woolen mills in New England have been idle, owing to a depressed state of the market for goods, but they are starting up again, and the prospect is that all will be running this fall. Printers and binders are busy, and the book business promises to make a good showing this fall. The hotels are full of transient patrons, and have had an unusually good summer. The two fairs in progress here promise to draw a large number of visitors and benefit our trade and manufactures generally.

HOLYOKE, MASS.

The paper mills at Holyoke, with one or two exceptions, are running on full time. Orders on hand, as compared with last year, are considerably less and margins smaller. Manufacturers are not very enthusiastic over the business outlook in the paper trade, still some of them are taking advantage of the dull time to make improvements and increase the capacity of their mills.

LAWRENCE, MASS.

Among the cotton and woolen manufacturers business has not been very active, but recently has started up with considerable energy. Several of the large mills report a scarcity of help, being unable to obtain sufficient to run all their machinery. With some exceptions on this account, all seem fully employed, and say the orders exceed those of last year. The general outlook seems promising. Two of the largest corporations have made considerable additions to their producing capacity in the shape of new buildings and machinery. Yarn and twine manufacturers report a good trade, being fully employed, with more orders than last fall and a more favorable outlook. Other trades and manufactures here are mostly local and dependent somewhat on the mills. At present time the general feeling is good, appearances indicating at least a fair business.

LYNN, MASS.

Shoe manufacturers seem to be pretty generally employed. Many are not running to their full capacity, but all seem to be doing a fair business and report orders on hand as exceeding those of corresponding period last year. The shipments are also in excess of those of last year. The business does not seem to be "booming," but presents a healthy appearance, being steady and increasing somewhat, as orders are beginning to come in for spring work. The general outlook is good for a fair business. Manufacturers here seem more cautious than heretofore, and, as a rule, make goods only on orders.

HAVERHILL, MASS.

The remarks respecting Lynn manufacturers are applicable to the trade at Haverhill, though the trade at the latter point is generally composed of smaller and more conservative firms. The outlook seems promising for a fair business at moderate profits. Slipper manufacturers report a good trade in winter goods, and collections are satisfactory.

PROVIDENCE, R. I.

The manufacturers of cotton and woolen cloths and yarns and the mechanical industries dependent thereon find the condition of business unsatisfactory. The mills engaged in the manufacture of printing cloths are making no money, and, although they keep their spindles running and help employed, the goods are sold at prices allowing of no margins. While some special tickets of wider goods may do better, some of the print cloth manufacturers claim that in the long run print cloths are as profitable as other makes. The print works have found business depressed and unprofitable for a long time. Manufacturers of woolen goods do not speak more encouragingly, although the stoppage of so many mills during the summer had a tendency to keep stocks down and improve the outlook. A few of the smaller mills are hindered in their work by low water. The system of manufacturing woolen goods so largely on orders makes the risks of repudiation greater. The manufacturing jewelry interest is not as thriving as in former years, and, while the factories are all running, employing many hands, as they always are at this season, the fall trade is not thus far as profitable as was hoped for. All the manufacturers of cloths and metals, however, hope for a material change for the better in a few weeks.

NEW HAVEN, CT.

Manufacturers of finer class carriages enjoyed a business in April, May and June quite equal to that of 1882 and at full prices. They have sold close to production. Other firms (export and jobbing) have had less trade. Stocks on hand are smaller. Few, if any, are running on full time, but the present is their dull season. Collections good. The falling off in trade is mainly in eastern states. Manufacturers of carriage woodwork report this year's business not quite up to that of last. Prices pretty well maintained and collections good. Stocks comparatively light. Some clock manufacturers say they have orders ahead for six to eight weeks' production, and are running on full time. The volume of business is equal to that of 1881, but not to that of 1882, principally in the medium and better grades of goods. Export trade fair. Manufacturers of hardware are generally running on full time. The year's business is quite satisfactory, though some are disposed to press goods on the market.

OTHER CONNECTICUT TOWNS.

And about the same condition of things exists at Waterbury, Minden, Derby, Winsted, Bridgeport, Naugatuck and Seymour. Manufacturers as a rule look for a good demand at reasonable prices.

ALBANY, N. Y.

The general manufacturing interests of this city are extremely active. The production and sale of stoves is somewhat in excess of last fall. Orders are being received daily, and the demand is equal to the supply. Full forces of men are engaged. Stocks on hand are light, and collections fair. Boot and shoe manufacturers report an active business, with orders ahead. Profits small and collections fair. The lumber business has been satisfactory, with increased sales, but on close margins, and will continue more active prior to close of navigation.

BINGHAMTON, N. Y.

Present condition and prospects of the general manufacturing interests are only fair. Collections are slow.

BUFFALO, N. Y.

Manufacturers in general lines appear to be more fully employed than for some time past or at a corresponding period of last year. Competition has narrowed margins to such an extent that a very economical management is necessary to insure a fair profit. The general situation, however, is regarded satisfactory and the outlook promising. Manufacturers of specialties report an equal increase in orders at more satisfactory rates. The increase in capital employed in manufacturing lines is estimated at 10 to 15 per cent. over last year.

ROCHESTER, N. Y.

The manufacture of clothing is a leading branch of business here, and Rochester has of recent years been considered one of the best markets in the country. There are upwards of twenty manufacturers and jobbers of clothing, with an aggregate capital of $2,500,000, employing about 10,000 hands and doing an annual trade of about $8,000,000, finding a market for their product in all parts of the Union. The fall season of 1882 and spring of 1883 were not satisfactory and large stocks were carried over. For the present season comparatively small stocks were manufactured, which have found ready sale, and to-day the stock of clothing in first hands is very light, and will doubtless be closed out at a margin. The trade is now giving attention to the purchase of fabrics to be made up for the spring trade, in regard to which the feeling is confident. The present season is near enough to a close to show that it has been more than ordinarily successful. The only apprehension has been that there will not be goods enough to supply the demand. Boot and shoe manufacturers, with but few exceptions, report that the volume of business this year will exceed the business done in 1882 from 15 to 20 per cent. The fall season opens considerably earlier than usual, and numerous letters are being received from customers asking the immediate shipment of orders that were not to be filled until October. These instances, it is noted, are generally located in the northwest. One house, whose daily average until within a month back was about 1,500 pairs, now reports business so brisk that it requires its hands to work over-time, and the production has been increased to 2,500 pairs daily. This activity is also noted in two other large factories. Other houses report business about up to the average with the season in 1882, but say the spring trade this year was heavier than that of 1882. Much stress is now being laid on crop returns, which influence the trade so far as future collections are concerned very materially. This trade in Rochester gives employment to 4,650 hands, using a capital of about $2,000,000 and doing a business of over $6,000,000 annually. The manufacturers of tobacco in its various forms report trade as in rather a peculiar condition, owing to tax reduction, labor troubles, etc., and but little definite information can be gleaned; neither can any intelligent estimate be given at this time as to the amount of business being done as compared with last year. Manufacturers, however, without exception, unite in saying that prospects for a good winter trade are favorable. Collections at this time are reported only fair. Manufacturers of furniture say that trade has been as good as the average for two or three years back, but lively competition makes margins very close, and but little money is being made this year. Manufacturers of machinery, machinists' tools and general iron-workers report trade for the year active, fully as much business being done as last year, with good prices, and the trade has a healthy look. Collections reported good. The milling interests of Rochester complain of the condition of the trade and margins this year, as compared with the season of 1882. The latter was very satisfactory, the main reason given being that while the wheat crop of 1882 in New York state was exceptionally fine, both in quality and quantity, so much so, in fact, that it commanded a premium of from 12 to 15c. a bushel over western wheat, millers were obliged, in order to find a market for their product, to sell at the same figures demanded for western flour, and consequently with little or no margin and to their loss. This year's wheat crop in New York state is not only very poor in quality, but only about half as large as last year's, which will necessitate the use of western wheat largely by Rochester millers, yet still giving them a fair chance in competition with western manufacturers in eastern markets. The combined capacity of the Rochester mills is 3,100 barrels daily, and at present they are being run at only about two-thirds their actual capacity.

SYRACUSE, N. Y.

Manufacturers generally report business as rather dull. In August it was very quiet, but September shows considerable improvement, and orders are coming in more freely. The wagon manufacturing is depressed, the market being overstocked, and manufacturers find it rather difficult selling this year's production. Last year twenty thousand wagons were made and sold. This year over thirty thousand have been manufactured in the immediate vicinity of Syracuse, including wagons, carts and carriages, and, in addition, twenty-five thousand cutters and sleighs were made. The iron trade is also dull. Prices are low, and most of the furnaces are out of blast. Occasionally some branch of manufacture reports business as good, but this is an exception. The prospect for much improvement does not look very encouraging until next spring. Most of the manufactories are running, but with reduced force and expenses.

UTICA, N. Y.

Cotton and woolen goods form the most important feature in manufactures in Utica and vicinity, Oneida county ranking third in the state in point of production. With perhaps a single exception in woolen goods, the mills have not been running to full capacity, and in both woolens and cottons manufactures seem to have been very much depressed, mainly owing to overproduction with respect to the home demand. The outlook at present is better than a few months ago. The disposition of jobbers seems to have been, all along, to buy only for immediate wants, but the mills are now pretty well sold up, and in some particular styles or textures are sold ahead. Shoes form one of the leading manufacturing industries, and the outlook is for a good fall trade. Earlier orders were placed sparingly, but those coming in now are more satisfactory. Present indications point to a volume of trade equaling that of the fall of 1881 or 1882. Stove manufacturers are busy, working mainly on orders, which for August were in excess of those in the like month in any preceding year. Other lines are reported to be satisfactory.

NEWARK, N. J.

Among the manufacturers of leather, which is principally patent and enameled, and bag, trunk and book-binders' leathers (a leading industry), some dissatisfaction is expressed, and a gloomy view of the situation is taken; but the majority state that the volume of sales will not materially vary from last year, and considerable encouragement is felt for the future from the fact that the price of hides has recently declined, while the prices of the manufactured product remain stationary or with an upward tendency. No "boom" is looked for, but a good feeling prevails. Some leading patent-leather manufacturers say that the carriage and harness manufacturing trade, to which most of their product is sold, is now reported in good condition through the west, old stock having been mostly disposed of and preparations being actively pushed for future manufactures. This lends confidence to the outlook, and though the volume of sales will hardly equal that of last year, the prices obtained are better, except perhaps with a few who seem willing to sell at any price. Prices of hides having declined, it is thought that fully as much money is being made this year as last. The prospect for an increase in the volume of business in the near future is good. The importance of this is realized when it is considered that about nine-tenths of the patent-leather produced in this country is made in Newark. Manufacturers of jewelry have found trade very dull for some months, and by some the business is characterized as flat. But there are other houses which, by extra exertions, have kept their sales about up to the figures of last year, though not without additional expense, and therefore they have not equaled the profits of last year. It is reported that more solid gold jewelry is made in Newark than at any one point in the country. The largest of the jewelry manufacturers are now running with full complements of hands, in expectation of a substantial fall and winter business, though no rush is expected. Saddlery hardware manufacturers report business dull, as it has been for some time past, but the trouble is believed to be principally in the trade itself. The depression is said to be due to the large number engaged in the business and excessive competition. Orders received are small but frequent, and goods are sold at a very small profit, except for specialties. The volume of business is thought to be hardly equal to that of last year, though it does not materially differ. In the manufacture of men's and ladies' fur hats (none of wool) there are about seventy houses engaged in Essex county, N. J., turning out about one-third of the entire production of the United States. The trade last fall in ladies' napped hats was disastrous to manufacturers and dealers alike, and but little will probably be done in that line this year; but in general it is said that orders are about up to the average. Within the past few weeks business has started up very briskly, and a good feeling exists. Manufacturers of steam engines and machinery are running at full capacity, and report business very good, some of them having more orders than they can conveniently fill. Manufacturers of harness and saddlery report the volume of trade as hardly equal to that of last year, which is accounted for by the fact that western and southern dealers are more careful and conservative in their purchases, and are more inclined to await the outcome of the crops before laying in their stocks, whereas they have heretofore purchased regardless of the situation, and oftentimes have been unable to pay at maturity. While this tends to lessen the volume of business at present, it promises much for the future, and factories are running on full time in anticipation of a substantial fall trade. The manufacture of trunks and bags at Newark a few years ago amounted to upward of one-half of the entire production of the world; latterly, however, numerous trunk factories have sprung up in the west and south, and have taken a good share of the business. The leading manufacturers say that their principal customers have not been buying as largely as last year, but that they have extended their list of customers, and that on the whole the volume of sales this year will not vary materially from that of last. Prices are lower, owing to competition. Profits are smaller, and but a fair to good trade is looked for. Boot and shoe manufacturers are busy, and, while the business of the first part of this year was somewhat unsatisfactory, orders are now coming in freely, and no serious complaint is heard. The volume of business is reported about equal to that of last year, with good prospects for the future. The leading manufacturers of hardware specialties report this season's business the best they ever had, dealers buying freely, and, as a rule, with plenty of means to pay promptly. The outlook is good, and manufacturers feel very much encouraged. Varnish manufacturers have had a prosperous season, and are still busy. Prospects are good, and collections up to the average. In the manufacture of pearl, metal and cloth buttons the volume of business does not materially differ from last year, and manufacturers are moderately busy; this industry, however, though of considerable local importance, is dependent largely upon the caprice of fashion and has no particular significance in the general trade situation. The Newark thread factories, employing altogether about 4,000 hands, are very busy, and show a constantly increasing business. Large additions to the existing factories and new factories are now being erected.

ERIE, PA.

Manufacturers of boilers, engines and heavy machinery, which form the most important factor of the manufacturing industry at Erie, report a considerable increase in the volume of business doing over the corresponding date of 1882, and regard the outlook with favor. Collections, as a rule, are satisfactory, but margins small.

PHILADELPHIA, PA.

In general the condition and prospects of the manufacturing trades in this vicinity are improving, but are not uniformly satisfactory. The merchant iron mills are running full time and are not burdened with surplus stocks, but consumers are distrustful about the future of prices and order only in small lots. Their conservatism occasions a good deal of complaint and makes the outlook somewhat uncertain. Machine shops and car works are well employed, with good prospects. The ship-yards are fairly busy. The glass works of New Jersey have started up, with splendid prospects for fall business, owing to the expected diversion of trade from the west, where production will be largely curtailed by the strike of the window and building glass-blowers against a reduction in wages. The soap works are doing a good trade that promises to improve with the advance of the season. Paper mills are running cautiously and ordering raw materials very sparingly. There is general complaint of lack of profit margins in this interest. The textile mills show varying degrees of activity. A good many looms are idle, because of the glutted market for certain styles of cotton goods, and a good many more would doubtless be stopped if manufacturers could see their way clearly to escape greater loss by stoppage than by running with the hope of a favorable change in the situation in the near future. While this unsatisfactory state of affairs prevails in some quarters, notably among mills running on ginghams, cottonades, low grades of cheviots, etc., there has been a manifest improvement of late in other branches of the trade. Manufacturers of the higher grades of cotton dress goods and some kinds of cheviots are getting more orders and are selling their products more freely. Some machinery that has been idle during the past two or three months has been started on this class of goods within a few weeks past. The woolen mills are doing fairly well and confront a good outlook. Worsted spinners and weavers are generally sold for months ahead, and yarns for Jerseys and Jersey cloths are bringing 15@20c. per pound advance over early July prices. The carpet mills have just finished a good season on fall work, and are preparing spring samples with every indication of a prosperous trade.

PITTSBURGH, PA.

The glass (table ware) manufacturers, after the usual July and August stoppage, have enjoyed a demand which is quite brisk. Trade is good in some specialties, while staple articles are more backward. Prices rule low and tend lower. Outlook is for an ordinarily good demand. Present prices are reported by some to afford little or no profit. Some dealers have made money through new specialties. The trouble with most of the manufacturers is excessive production and competition. The window glass and bottle industry business is fair, but not large. Factories are idle, and sales are not pressed. Some of the workmen are still striking. Outlook not very encouraging. One manufacturer, who has just returned from a trip to business centers, finds the trade well supplied. But two factories in the west are in operation; all others are idle, and in all probability will remain so until the wage question is settled. The glass chimney manufacturing industry appears to be in good shape, but not quite up to usual volume, and with extremely low prices. Margins for both manufacturers and dealers very small. The sheet iron and plate industry is not nearly up to the standard at this season. Trade has been dull and prices very low, caused mainly by sharp competition. Outlook not encouraging. A leading manufacturer of iron and heavy hardware finds trade good, with mills and factories running full. Prospects bright for good steady demand through the winter and spring. Boiler plate, sheet, bar and nail manufacturers find trade fair to middling. Prospects fair. All departments going, some single and some double turn. Prices low and close to cost of production. Some structural iron manufacturers have orders to the middle of December, and are refusing more. Do not anticipate any change in price. The outlook for the plow manufacturers this fall is not bright. Cutting of prices in this line appears to encourage buyers to hold off. Some of the plow dealers are believed to have booked orders at less than cost. Bolt manufacturers have been damaged by very low prices. Competition has done this. Prospects are for a good trade. Prices promise to remain low. Tool, plow and spring steel manufacturers are in full operation, running double turn. Business only moderately active for this particular time, and not equal in amount to the corresponding period of last year. Prospect of future business encouraging as to the demand for steel.

CINCINNATI, OHIO.

Some lines of manufactures in Cincinnati have met with drawbacks during the past year, but at the present time the condition is, with few exceptions, all that can be desired. Delay in the whisky extension bill and the failure of that bill to pass caused that industry to lag. Distilleries are now running upon the same basis as in other localities, that is, one-fourth of their capacity. Rolling-mills have done fully as much as the preceding year, and are now busily engaged, having orders ahead for sixty days. Stove foundries have done better, and are running full time, with prospects excellent. The carriage trade, the products of which in this city were valued at $5,000,000 last year, is in better condition than last year, and orders have been received for about thirty days ahead. The thirty soap factories will increase their gross sales this year 10 per cent. The clothing trade is reported far ahead of last year, the production being close to $16,000,000. The paper interests are equally as well prepared for orders, and claim better prospects for fall trade. The city will produce over $2,000,000 worth of manufactured tobacco this year, but will experience, it is thought, only a slight increase, in consequence of delayed congressional legislation and strikes. The furniture trade has increased over last year, and orders are in for some weeks ahead. The quality of work demanded by the consumer is higher, and is cheerfully met with equally as good profits. Leather and its products have met with some temporary embarrassment, but tanners claim to have orders ahead, and shoe factories are running on full time, with plenty of orders. It is thought the value of the product of the shoe factories will exceed $6,000,000 this year. The brewing interest report a satisfactory year. The iron safe trade has continued good, and the four establishments engaged in that product claim orders ahead for two months. In general terms, the products sold in this locality to date exceed those of last year, and the prospects are equally as good for the remainder of the year.

CLEVELAND, OHIO.

The largest steel rail and wire concern in the west reports business never so poor, in their experience, as this year. Orders are few and prospects not encouraging. The stove manufacturing industry is better than last year. Orders are coming in freely, but prices are unsatisfactory, owing to strong competition. The outlook considered excellent. Collections fair. Clothing is not being made up so largely as last year, owing to excess production in 1882, and the consequent surplus on hand. There is only an ordinary trade anticipated by paint manufacturers. Some report business as not so good, and others as fully equal to that of last year. In white lead the volume of trade has been larger, but very unsatisfactory, owing to extremely low prices. Orders are coming in freely, probably to take advantage of cut prices. In mixed paints and colors a conservative feeling prevails, consumers not anticipating their wants to any extent. Hardware manufacturers are working on full time, and the trade is fully equal to that of previous years. Boot and shoe orders are reported by manufacturers as coming in later but fully as numerous as last year. The prospects for a steady, conservative trade are believed good. Reports from manufacturers of furniture harmonize perfectly. Trade is larger by far than last year; more hands employed and collections are good. There are more contracts on hand than ever before for marine engines and machinery. There is no material change in the bolt, nut and tool industry. Business reported very good, but prices are too low to afford satisfactory profits. In general the manufacturers of Cleveland are fairly well satisfied with the present condition and future outlook. While no extraordinary trade is anticipated, and strong competition has reduced prices to a very low basis, still a feeling of confidence prevails.

COLUMBUS, OHIO.

Business with leading manufacturers at Columbus is by no means dull. The majority of factories are working full for their respective seasons, and future prospects are as good as at any time heretofore. Columbus is noted for its buggy manufacturing industry, representatives of which say that they are working full for the season, that orders are in excess of last year (some quote 15 to 20 per cent.), and although the cotton crop, upon which their southern trade largely depends, has not been very good, they claim to have suffered no inconvenience from it as yet, but anticipate some injury as the fall progresses. Still, the general feeling is that the outlook for a late fall and winter southern trade is fair. Collections good. The car manufacturers are the only notable exception to the above, but their trade is considered a little brighter than it was earlier in the year.

DAYTON, OHIO.

Important manufacturing establishments are nearly all actively engaged and report more orders on hand than at the same time last year. Prospects are for a large increase over last year.

SPRINGFIELD, OHIO.

A careful canvass of the leading industrial lines at Springfield, Ohio, made by the correspondent of BRADSTREET'S at that city, resulted in the compilation of the complete and interesting table which accurately represents the situation on September 1. It need only be stated in advance, that in general the condition of Springfield industries will average very fair, and that in some lines, as mentioned, an excellent business is doing. The details are as follows:

	Average number of men employed.	Average weekly wages paid.	Products last year in No. implements, tons, bushels, etc.	Market value of product past year.	Amount invested in buildings and machinery past year.	Prospects for the coming year.
Sewing machines	300	$3,000	.....	$600,000	.....	Good.
Linseed oil	7	70	.....	150,000	.....	Fair.
Turbine wheels, etc.	165	1,750	.....	447,226	.....	Excellent.
Carriages	125	1,200	300	94,000	$35,000	Good.
Tricycles, etc.	60	600	1,500	75,000	18,000	Good.
Publishers and binders	142	1,700	.....	225,000	15,000	Very good.
Lime	53	500	244,500	57,500	6,000	Fair.
Hay rakes, etc.	160	1,600	26,700	590,000	23,000	Good.
Corn planters, etc.	125	1,500	6,000	120,000	35,000	Very fair.
House furnaces	12	200	75	15,000	1,500	Good.
Threshing machines, etc.	200	2,500	500	500,000	50,000	Never better.
Grave vaults	15	160	800	50,000	15,000	Good.
Windmills, etc.	185	2,140	17,800	625,000	85,000	Very good.
Caskets and coffins	75	800	16,300	137,500	.....	Fair.
Wrapping papers	60	600	2,000	85,000	.....	Good.
Cupola furnaces	18	200	Lately started.	.....	30,000	Excellent.
Malleable castings	474	5,180	.....	654,120	.....	Excellent.
Cutter bars and knives	333	3,699	.....	741,691	.....	Excellent.
Reapers and mowers	2,591	23,523	61,000	7,140,000	3,150,000	Very good.
Light gray castings	63	669	1,698	70,650	21,000	Good.
Cultivators, cider presses	308	3,160	.....	653,000	.....	Good.
Miscellaneous	154	1,316	.....	175,000	.....	Good.
Totals	5,625	$55,997	.....	$13,119,755	$3,484,500	.....

By enumeration made during March, 1883, it appears that the population of Springfield was 31,134, as compared with the census returns of 1880, which made it less than 21,000.

TOLEDO, OHIO.

The condition of the manufacturing interests of Toledo, Ohio, will be found carefully summarized in the following: Architectural iron works are behind with orders; running full force extra hours. Boot and shoe manufacturers are unable to fill orders and are employing an extra force. Increase over last year's trade 7 to 9 per cent. Of brick manufacturers the increase of business is from 15 to 20 per cent. Carriage and wagon makers are employing more hands than last year; orders accumulate and the sales show an increase of 5 to 7 per cent. Cigar manufacturers' forces are all employed. Cotton mill orders are 5 per cent. in excess of last year. Men of the edge tool manufacturers are all employed and prospects good, and the engine builders' business is better by 6 per cent. Founders and machinists are running to the full capacity, and orders ahead of last year 6 per cent. Furniture manufacturers' trade is satisfactory, and the works are running on full capacity. The knit goods manufacturers' business shows an increase of 10 per cent. over 1882. Lager beer manufacturers, increase of 5 per cent. over last year. The mill machinery manufacturing business prosperous. The mower and reaper manufacturers are doing a prosperous business, which is increasing. The increase in trade of plow manufacturers is 8 to 10 per cent. and of pump manufacturers 10 per cent.; outlook good. Sash, door and blinds manufacturers' orders accumulate and the business is generally prosperous. The sewing machine manufacturing business is increasing and the outlook is encouraging.

CHICAGO, ILL.

Nearly all branches are fairly and some actively employed; but, as in mercantile pursuits, there is a tendency to conservatism, the disposition being to avoid overproduction, and in most branches goods are not turned out in advance of orders. The steel rail mills are producing less than 50 per cent. of their full capacity, and the same may be said of most other manufacturers of railroad track goods, while car and locomotive materials are in good demand and manufacturers are working well up to their capacity. The bar mills are, with few exceptions, running on full time and report a good demand for products. The nail mills have been running on full time since August 17. Manufacturers of engines, pumps, boilers and all classes of iron piping, elevators and hoisting apparatus, say they have sufficient orders to satisfy their productive capacity. Manufacturers of carriages, buggies and light vehicles are doing a fair amount of work, while makers of heavy farm wagons and trucks are working an extra hour in order to respond to the demand for goods, and dealers in wagon-makers' supplies say they seldom, if ever, had a better country trade. Stove founders are all working full time and a few report an increase of 5@10 per cent. The planing mills and manufacturers of sash, doors and other builders' materials were seldom, if ever, more fully employed on orders. The furniture establishments are fairly employed, and find an average sale for their products. Tanners are putting in about two-thirds of their usual amount of fall stock, and assign an absence of profits during the past two years as a reason for reducing production of leather. The boot and shoe factories are working their full number of hands, and their production is closely sold up. In the minor branches of manufacturing there is an average activity, and most lines of goods are passing from producers to consumers more freely than at this date last year. Yet there is nothing like a rush to turn out goods, and, as a rule, manufacturers say the margin at which goods are sold allows very moderate profits to the producer, hence there is an unusual tendency to look ahead, and raw materials are not secured with old-time freedom, the general disposition being to carry as moderate stocks in manufactured materials as is consistent with the successful conduct of their business, and, as near as can be learned, manufacturers are in fairly good shape.

PEORIA, ILL.

Agricultural implement manufacturing will be on a par with last year, but no increase of trade is looked for. The various corn-planter works are preparing to start up for the winter season, while some other implement manufacturers are about ready to shut down, they having just closed the summer season. The distillery interest will be 5 per cent. heavier than last year. The manufacture of flour will be heavier as the mills are extending their territory. Various other manufactures will about equal last year's business.

QUINCY, ILL.

The condition and prospects of general manufactures are good. Manufacturers are very busy and hopeful.

SPRINGFIELD, ILL.

Manufacturing interests at Springfield are fairly prosperous. All manufacturers are employed to almost full capacity, and, except part of the iron-workers, have been so employed during all of the spring and summer. The outlook is now better for all, including the iron industry, than it was at the corresponding date last year. They are, in most instances, abundantly supplied with orders, and in some increasing their capacity.

DETROIT, MICH.

Manufacturers in leading industries are well employed and have orders ahead sufficient to keep them running from forty to sixty days. The general outlook has much improved since July 15. There is a particular degree of confidence expressed by manufacturers of cars, car wheels, lumber, tobacco, knit goods and boots and shoes. Iron manufacturers are running full and doing a fair business, but with very little profit, though prices are firm. Better things are looked for very soon. Manufacturers consulted, employing from 12,000 to 15,000 persons, anticipate a good, steady, legitimate business for the next four months at least, and there is no indication of any discontinuance after that time. Mechanics and laboring men are all well employed at good wages.

GRAND RAPIDS, MICH.

Manufacturers, as a rule, are carrying less than average stocks at present. Sales are not quite up to those of 1882, and there is a tendency to decrease production.

EVANSVILLE, IND.

Manufacturers report trade in a good, healthy condition, with orders coming in very satisfactorily. In lumber prices are said to be a little off, but sales are good. Furniture and foundry men say they are running on full time, with orders ahead. All report collections only fair, and think the outlook for a good fall trade is promising.

INDIANAPOLIS, IND.

Manufacturers at Indianapolis appear to be busy, employing, in most cases, their usual force, except those that manufacture implements. The manufacturing enterprises appear all to be in a good condition, and all thought to be making money. In some cases collections are found a little slow. There appears no falling off in orders, and the general outlook is encouraging.

TERRE HAUTE, IND.

Manufacturers are all busy, working on full time and with full forces. Demands in all branches are good, but at reduced margins. Prospects are fair but not flattering.

LOUISVILLE, KY.

The operations of manufacturers in the cities of Louisville, Ky., and New Albany and Jeffersonville, Ind., for the first half of 1883 were of good dimensions, and the results were in general satisfactory. Distilleries are nearly all out of operation, the result of overproduction in previous seasons. Plug tobacco manufacturers had a "boom" following the tax reduction in the spring, and are now doing a trade of good regular volume. Furniture manufactories report plenty of orders and brisk employment. Tanneries report a slow movement of leather. Tanners of special grades report business satisfactory, but the industry, on the whole, is not satisfactory. Stove and mantel foundries and nearly all branches of iron report active employment and satisfactory demand for wares. Plows and agricultural implement manufacturers are fully employed, and expect this year's sales to be larger than those of any previous year. Wagon and carriage woodwork makers are running at full capacity, and business is larger than heretofore. Woolen mills (jeans manufacturers) report ready sale. Jeans clothing manufacturers are in good condition, and the business increasing. Shoe manufacturers are enlarging their capacity in accordance with gradually increasing trade. Saddlery and harness manufacturers have good average business. Light margins are noted in many branches; but, on the whole, Louisville manufacturers are in a fairly profitable condition, and on a scale of increasing variety and extent.

ST. LOUIS, MO.

There has been no change in the general condition of and the outlook for the various branches of St. Louis' heavier industries as reported last month in a special letter from that city. There has been some gain in the quantity of business in hand. In the lighter manufacturing lines there is a decided improvement over the degree of activity noted in September, 1882. The summer has been much busier than in 1882. More work is now on the books in advance of immediate capacity than last September. Margins of profit are small. Labor agitation is not prominent. Bankers say that small manufacturers are not discounting any more, if as much, as they did last year.

KANSAS CITY, MO.

The manufacturing industries of Kansas City have not increased in proportion to the heavy gains in jobbing and wholesale business; they are comparatively few in number, and their production, as a rule, is limited to supplying the demands of the immediate vicinity. Manufacturers of stoves are working at full capacity and have orders ahead. The production in this line has doubled within the past twelve months. Current demand is active, prices firm, outlook highly favorable. Manufacturers of agricultural implements and machinery are employed to full capacity, with about four weeks' orders ahead. Current demand good; prices have a downward tendency. There has been a slight increase in production within the past year. Furniture manufacturers report stocks on hand sufficient to last a week or so; are now running about three-fourths of their capacity. Current trade good; prices steady. Increase of production within past year about 20 per cent. Lead pipe manufacturers are working to full capacity, with orders ahead. Increase in production over last year 50 per cent. Current demand good, prices steady. The production of the distilleries averages about the same as last year. Local distillers are running to keep up with orders. The current demand is good, and general outlook fair. Prices firm. Brewers are running at full capacity. The current demand good. Increase of production over last year 25 per cent.

ST. JOSEPH, MO.

St. Joseph is not prominent as a manufacturing center. Its business in this line is confined to three grist mills, two foundries, one machine shop and one woolen mill. Of them it is said that they are turning every wheel and employing all the men they can, except in the case of the woolen mill, which is just getting into a larger building, one of about three times the capacity of the old. They will be employed to their full capacity by October 1.

BURLINGTON, IOWA.

Manufacturing interests are in a healthy condition and steadily advancing. The output is estimated at $5,000,000 for the past year, and the prospects are considered very favorable.

DES MOINES, IOWA.

Manufacturers in different lines report as follows: Oil and paint orders in excess of capacity; prices fair and the market firm. The barbed wire spring trade was heavy; at present is quiet but steady; prices are low. The future depends on the corn crop. The woolen goods demand is strong with steady prices. Foundry and machine shops products are in heavy demand; prices are fair and prospects good. The mill furnishers' trade is good, and the market firm and steady; prospects are good after an unfavorable spring. The demand from starch manufacturers is greater than the capacity; the market is firm and prices are good. The flouring and feed mills trade is excellent; prices are good and prospects are bright. The demand from distilleries is in excess of capacity; pool prices are good. The export trade is fair. The future depends on the corn crop. All are hopeful and confident of large fall trade if present prospects for corn crop are realized.

MILWAUKEE, WIS.

Manufacturing is flourishing. The rolling mills at Bay View are fully occupied on merchant iron, with new orders daily. The pig department is idle. General iron outlook encouraging. The flour mills are not working on full time, owing in part to the scarcity of wheat. Average daily output (past two weeks) only 3,800 barrels. But this is the dull time of the year for the flour mills. The outlook favorable, and jobbers are making inquiries. The hide and leather industry is very quiet, though demand for leather is fair. Jobbers are filling numerous orders. A healthy trade is anticipated. Iron foundries are doing a large business. There is a large demand for harvesting and threshing machinery in Dakota. Smaller manufacturing interests are favorably situated, and have a favorable outlook.

MINNEAPOLIS, MINN.

The milling year closed August 31, and the simple statement of the product of the mills for the first eight months of the year as compared with 1882 will give a good idea of the activity in this line. Total number of barrels produced in 1883 (eight months), 2,183,157; total number of barrels produced in 1882 (eight months), 1,442,589. During the first four or five months prices of flour gave a good return to manufacturers, but since that time until the decline in wheat the business was not remunerative. The new crop year opens, however, with better prospects for manufacturers, and by the 1st of October wheat will be arriving in large quantities. All the mills have been put in perfect order for the fall business. If speculation does not run the price of wheat above its legitimate value for milling a very active fall may be looked for in the milling district, and the year's product will reach 4,000,000 barrels, and may exceed that. Mill owners are in good heart and prepared for the fall run. The manufacture of lumber ranks next in importance to that of flour. The season opened active. Mills started up early, and, with the largest quantity of logs in the upper river ever known, set out for an unusually large cut of lumber, but early in the season the water in the upper river declined, and soon the stage made it difficult to float the logs to the mills. Most of the mills were forced to discharge half their force and run on half time. Consequently the production will be materially lessened from early anticipations, but will not go below the average cut for the last three years. The industry, however, is in a healthy condition. The returns to manufacturers for the last three years have been satisfactory and the trade will not suffer by carrying over 70,000,000 to 100,000,000 feet of logs. Pine timber is fast disappearing from Minnesota and each year becomes more valuable. Iron works and the manufacturers of machinery report a very active season. All firms engaged in this line report a most successful season's trade. Orders have been received in excess of capacity to fill the same, necessitating the shipment of large quantities of machinery from eastern points. There are in the city some eight or ten foundries and machine shops, working from twenty-five to to four hundred men each, with one railroad shop working 1,500 men; all of these have been fully employed, and all report orders enough on the books to keep them occupied during the fall. The increase over 1882 is fully 25 per cent. The manufacture of sash, doors and blinds and other building goods has been larger than in former years. There are twelve large factories in the city which have run upon full time during the season, with the demand for their goods fully equal to their capacity. All report trade healthy and with orders ahead, enough to run through the winter. The manufacture of furniture has assumed large proportions in Minneapolis. Several large factories are running on full time and are unable to fill the orders sent to them; in fact, the capacity is entirely inadequate to supply the demand for shipment to the northwest, although their working forces and machinery have been doubled during the year. Montana, Dakota and Manitoba are large buyers from them. Woolen manufacturers report a fair business; orders have not been as pressing as in some former seasons, but they have had sufficient to keep them running on full time with no accumulation of stock. Manufacturers of boots and shoes have largely increased their forces. Trade opens active and prosperous. The same is true of clothing. Several hundred persons are employed by jobbers in manufacturing. Three paper mills have been running on full time during the season, and report a prosperous business, with no lack of customers for their goods. The manufacture of agricultural implements has become a leading industry. This has become the general distributing point for implements in the northwest. There is not a leading manufacturer in the country who has not established a branch at Minneapolis, and manufacturers find it a desirable location for their works. Over 700 men are employed in making harvesters alone. Plows, cultivators and all of this class of goods are largely made, and with carriage and wagon shops employ 1,000 men. In all these lines goods go out as fast as made, and no dead stock is carried. There are in Minneapolis over 200 smaller establishments engaged in manufacturing. All appear prosperous and growing. The state of the flour-producing industry tells the story for the coopers at Minneapolis, and building will tell it for brickmakers.

ST. PAUL, MINN.

Far from being strictly a wholesale and financial center, St. Paul has developed such manufacturing interests as to more than keep pace with other lines. This year's increase exceeds that of all previous ones. The number of manufacturing establishments in operation in 1882 was 690; employés, 12,200; value of products, $22,350,083. The estimated number of establishments at present is 725; number of employés, 17,000, and value of products, $33,000,000. Every sign points to a steady increase, with local and state demand for state products.

LAWRENCE, KAN.

The manufacturing business at Lawrence is in excellent condition and promises well for the winter. Orders are coming in freely. Flouring mills are running steadily but at reduced profits. Foundry and machine work is brisk. The barbed wire establishments are doing a large amount of work, but on a less margin than ever. There is a ready market for all manufactured goods and has been for the past season. Stocks have not accumulated.

LEAVENWORTH, KAN.

The present condition and prospects of all lines of general manufactures are most excellent, they being very much behind with orders.

TOPEKA, KANS.

The capacity and capital invested in flouring mills have doubled in the last two years, and the industry is enjoying a heavy trade. In agricultural implements there is about $80,000 invested, but having recently started have but limited trade. The foundries are enjoying a good trade, and their capacity and capital invested have increased 70 per cent. during the last year. There is about $30,000 invested in breweries, distilleries and vinegar works, which are not very profitable. There is $20,000 invested in starch works, but this has proved a failure. The Atchison, Topeka & Santa Fé Railroad Company have their shops located here, and have invested in them at present $2,300,000, and are now making large additions. There is a plan on foot to dam the Kansas river in order to provide power to develop manufactures. The general industrial prospect at Topeka is favorable, except foundries and iron works.

OMAHA, NEB.

Factories in all lines are very busy. Manufacturers of clothing and winter goods are much behind on orders, and a number of houses have taken their men off the road until back orders can be filled. The linseed oil manufacturers are now receiving large consignments of flaxseed, and are running their mills to full capacity. Packing houses are not yet very busy, as shipments of hogs are light, but all are looking to a heavy season's business. White lead manufacturers are running to full capacity, with an active demand for goods. Nail manufacturers are running a full set of hands, and claim no surplus stock.

DENVER, COL.

Manufacturers of mining machinery are generally full of orders and doing well. Flouring mills are busy all the time and making money fast. There is but little other manufacturing at Denver, except the smelting works, which are always busy the whole year round.

SALT LAKE CITY, UTAH.

The manufacture of salt is steadily increasing, and the Utah product is gradually displacing all others in the mountain country, except for best dairy uses. There has been a cessation of woolen manufacture on account of accumulation of stock; but the mills of Utah are preparing to resume for a six months' run. In boots and shoes there is a solid increase of at least 20 per cent. over any previous year. The manufacture of iron is steadily increasing. The aggregate of business is not large, but the outlook is promising. Lead smelting has increased 100 per cent. during the past year. The production of hosiery is decreasing. In furniture there is a light increase. In coke the increase is marked. The gain in brick manufacture is 50 per cent.

BALTIMORE, MD.

Manufacturers of all classes of goods are kept busy with orders, and are working on full time. Stocks in general are light, and future prospects bright, still it is not thought that the volume of business will run much if any over the average of last year. The value of boot and shoe and clothing products so far is said to be considerably less than those at the same date in the previous year, while that of tinware and foundries is reported to have increased from 10 to 15 per cent. The manufacturing of fertilizers has also improved slightly. Ladies' and gents' furnishings have been manufactured in large quantities, the demand continues good, and that branch of industry promises to reach large proportions. Cotton and woolen mills are running on regular time, but few have orders ahead and stocks are kept down. General prices are firm, and few complaints are heard against collections.

RICHMOND, VA.

Tobacco manufacturing at Richmond promises greater increase than ever. An appreciation in the price of leaf lessened the volume of manufactured stocks some. The present position is that of supplying the demand and closely anticipating requirements. The value of cigars, cigarettes and manufactured tobacco in 1881 was $10,417,025, and in 1882 was $7,098,200. The total this year would have equaled that of 1881 but for the tobacco agitation. As it is, $8,000,000 to $8,500,000 are estimated as the total. The iron industries show an aggregate in 1883 less than that of 1881 or 1882. There has been no falling off in the amount of business done; facilities have been increased, and greater capital employed. The diminution in total values has been brought about by the decrease in cost of raw material. The value of the business done during 1881 was $4,749,000; in 1882, $4,548,000, and in 1883, $3,300,000. The nail industry has not been able to keep up with orders. The flour mills are working night and day. The value of business done by them during 1881 was $3,303,416; in 1882, $3,375,065, and in 1883, $3,826,085. It is estimated that two-thirds of the flour produced is exported, traffic with South America being heavy. The value of the barrel and keg industry has gained 25 per cent. in the year. That of the cotton factories has grown from $390,000 in 1881 to $410,000 in 1882, and to $430,000 in 1883. The woodenware product has gained 50 per cent. Fertilizers have fallen away some as against 1882, and fully one-sixth as against 1881. Sash and blinds have increased from $135,000 in 1881 to $143,000 in 1883. Jute bagging has increased from $49,000 in 1881 to $54,000 in 1882, and to $60,000 in 1883. Furniture and mattresses have gained one-third since 1881. Carriages, wagons, etc., one-sixth, with a total in 1883 of $175,000. The tobacco box product is about $160,000, the same as in 1881, but one-seventh in excess of 1882.

NORFOLK, VA.

The various branches of manufacture at Norfolk are doing a fair business. It is noted that there is a favorable opportunity here for investment in cotton, cottonseed oil and peanut oil factories. About 30,000 tons of guano are manufactured annually at Norfolk, and, with the establishment here of acid chambers (which is favorably regarded), it is expected that the total output will be quadrupled.

WILMINGTON, N. C.

Wilmington cotton mills manufacture about 2,000,000 yards of print cloth per annum. The Navassa Guano Company manufactures, say, 20,000 tons per year. The tobacco factory, say, 500,000 pounds per year. The rice mills have a capacity

of, say, 600,000 bushels a year. There are also four grain mills, two flour mills, a fiber factory, seven turpentine distilleries, two rosin oil distilleries, sash and blind factory, etc. A careful inquiry reveals that Wilmington's industries generally have been and are fully employed, and that the outlook for future business has never been better.

SAVANNAH, GA.

The condition of Savannah manufacturers is good and prospects are brightening. Savannah is not, however, strictly speaking, a manufacturing town.

ATLANTA, GA.

Atlanta manufacturers are busy and many have increased their facilities. New industries have been established and additional plant constructed, and the general feeling is hopeful. Cotton factories are actively employed, though on smaller margins of profit than have been known for the past three or four years. Cotton gin and press builders report a good demand on the whole, but in some sections curtailed by the poor outlook of the maturing crop. Furniture manufactures manifest a decided improvement. Plows and agricultural implements are becoming a more important item in the manufacturing interests of the city; sales are increasing, and there is some tendency on the part of the farmers and planters to buy the more expensive grades. Paper manufacturing has been profitable and orders are abundant. Money has also been made in the flour-milling business. Wood-working machinery shows an active demand. A new enterprise is on foot to manufacture cotton and woolen factory supplies (in hard wood), with abundant capital and good prospects of success. One firm of iron bridge builders has lately increased their facilities, and are obtaining a share of the bridge building throughout the country. Carriage builders, manufacturers of fertilizers and sulphuric acid, soapmakers and cracker factories and others are all participating in a fairly prosperous season, and anticipating a continued demand, remunerative prices and satisfactory collections.

AUGUSTA, GA.

Manufacturers of cotton goods, yarns, etc., complain of dull trade. Business is not as good as last year at the same date. Orders on hand are light and profits small, and prospects are not bright. Manufacturers of lumber, brick and machinery have about all they can do and fair prospects for the immediate future.

MACON, GA.

The manufacturing industry of Macon is relatively small, being confined to one cotton mill, with 16,500 spindles, and spinning 10,000 bales per annum; two iron foundries, with about $100,000 worth of trade each per annum, and other manufactories, including planing mill, etc., averaging about $200,000 more. Small industries are rapidly springing up and doing well. Recently candy, box and sock factories have begun operations, and all have orders far in excess of their capacity.

BIRMINGHAM, ALA.

Every manufactory at Birmingham is working to its full capacity, and prospects are as bright as ever.

MONTGOMERY, ALA.

The present condition and prospects of general manufactures at Montgomery were never more prosperous or promising.

SELMA, ALA.

The condition of general manufacturers is good. All establishments are working on full time and have orders ahead. The general outlook is good, and there is a fine opening for new enterprises.

NEW ORLEANS, LA.

The increase in manufactures in New Orleans has been considerable during the past year, and if not so much in the number of enterprises, at least in the addition of new appliances and in the field of operation. The number of new concerns chartered during the commercial year ending Sept. 1, 1883, was fifteen, the capital being $2,000,000. The charters issued were mostly for small establishments, which are rapidly springing up not only in the city proper but also in the environs and in various parts of the state. The people generally are awakening to a keen realization of the wide and fertile field before them, awaiting only slight development to be rich with remunerative return, as the raw material is near at hand, climatic influences favorable and the prices of wages fairly moderate. Indeed, there is every reason for the remarkable success of the enterprises already established and of those contemplated. Besides there is a wide and easily accessible territory for the sale of southern manufactured articles in Mexico, Texas, the islands, and South and Central America. The communications with those countries are much shorter than by the Atlantic ports. Freights also will undoubtedly be reduced to meet the requirements necessary for the development of the trade contemplated.

GALVESTON, TEX.

The four manufactories at Galveston (one flouring mill, one barrel factory, one iron foundry and one cottonseed oil mill) are all doing a large and profitable business. Prospects are good.

CHATTANOOGA, TENN.

The condition and prospects of general manufacturers of Chattanooga were never in the history of the city so flattering as now. They are crowded with large orders in advance to overflowing. The gain is reported as 100 per cent. better han at this date last year. Nothing like it has ever been experienced here, and the good effect spreads to all departments of trade.

MEMPHIS, TENN.

The largest manufacturing interests in Memphis are the cottonseed oil mills, in which $1,500,000 are invested. They yield good dividends each year and are in full progress. The lumber interests come next with $1,000,000 invested, and a large and growing business. Iron manufactures show great improvement, and the capital now invested is about $600,000. A very hopeful feeling prevails regarding the growth of this interest. It is estimated that Memphis has $5,500,000 invested in manufactures, and that its growth in the past year will compare most favorably with any city in the country.

NASHVILLE, TENN.

General manufactures are in good condition, and the prospects are flattering.

MONTREAL, CANADA.

The general tendency in Canada is to reduce the products of the various branches of manufacture, as various conservative houses predict some stagnation in trade. This applies to almost all branches, and it is thought that with careful handling such action will have a very beneficial effect. Canadian cotton manufacturers have come to the conclusion that at the present rate of production the market, if not already overstocked, soon will be. A meeting of those chiefly interested was held in Montreal recently, and the result of their deliberations has been the adoption of short time by the producers, and the manufacturing of other cotton fabrics where practicable. It is also expected that prices will shortly be advanced, as a serious decline has taken place in the price of cottons since January last, in some cases as much as 20 per cent. Whether this will have the desired effect is a matter of doubt, as during the last few years several large mills have been added to the producing power of the country, and, as we have no foreign outlet, the matter appears to be rather difficult of settlement. The iron industry has shown little change during the past year. A fair amount of orders are coming to hand. Outlook encouraging. Several boot and shoe manufacturers are curtailing production, while others regard the outlook as encouraging. It is believed that the demand in the northwest is not likely to be as large as during the past two years. Outlook is fair. The tweed and woolen factories are working on full time. Production for a year to come promises a full average. On the other hand retail stocks are in excess of the average. The wholesale clothing manufacturers have been very active the past two or three years. The major portion of the goods sold in the northwest has been manufactured in Montreal. But the Manitoba demand has as suddenly ceased as it began, and the more conservative manufacturers have decided to curtail operations. It is estimated the reduction will at least show a falling off of from 25 to 30 per cent. Less woolens are being imported.

TORONTO, ONTARIO.

The manufacturing interests of Toronto are small as compared with some other cities in the Dominion. During the past year or two, however, there has been a slight increase, and the value of the yearly product is estimated at $16,000,000 to $18,000,000. The most capital is invested in the manufacture of spirits, ales, etc., followed by iron works, agricultural implements and the like. A good business is reported by such manufacturers, and the outlook is considered fair. The customary number of workmen are employed, and they are still on full time. A movement of special interest to Canadians, and one that affects cotton manufacturers in particular, has been announced. At a meeting of cotton manufacturers in Montreal, all the mills in Canada being represented, it was decided to restrict the production of that article, the mills to run four days only during each week. The large stocks on hand and the slow sales make it necessary that this should be done. The woolen manufacturing interest, too, is not in such a healthy condition as those interested would like to see it.

OCCASIONAL NOTES.

In a recent article the *Pall Mall Gazette* touches upon the question of American and Indian competition in the supply of wheat, and says that it is not wonderful that the United States, with twelve times the railroad mileage of India, should send Great Britain six times as much breadstuffs as India does, and still supply her as cheaply as any other country under the sun. The *Gazette* thinks that if by some means the villages could be brought into communication with the arteries of commerce there would be no question as to the power of India to supply wheat so cheaply and abundantly as to compete on superior terms even with the well-served districts of western America. In its opinion India, to be properly developed as a wheat-producing country, should be threaded through and through with railways. There are in the whole of British India about 10,000 miles of railway, all of which, with only the most trifling exceptions, have been laid down either by the state or by companies having a state guarantee of the interest on their capital. The construction of railways has not gone on very rapidly in India of late, Parliament having limited the amount to be borrowed annually for public works. The journal quoted, however, points to the fact that for the last two years the lines in India, including those made for strategic purposes alone, without reference to commercial results, have paid very well, and expresses the opinion that within ten years the outlay, if judicious, would be adding greatly to the revenue of India. The *Gazette* adds: A great deal could also be effected toward economy and improvement in the system on which the lines work. Proper conveniences for clearing and storing grain have also to be introduced generally. It has to be remembered that the new railways required by India must above all things be built and worked on economical principles, because, if they are to do any good for their proprietors and the country, their charges must be low. At present iron is cheap, and the opportunity for the cheap construction of Indian railways is so far a good one. By the employment of native labor the lines could be worked very cheaply. The field for progress before the Indian government in this direction is very wide. What is needed is the courage to guarantee capital, and the energy to direct it with effect and economy to the construction of railways in the districts now crying out for want of them.

The influence of art on industry was the subject of the interesting address in which Lord Carlingford recently opened the exhibition at the Manchester Corporation Art Gallery. It was intended, he said, that the art gallery should be something more than a collection of pictures. That a true conception of the objects of such a collection was attained was, he said, rendered plain by the fact that extremely valuable collections of specimens of textile art and of reproductions of art studies had been obtained. The speaker contrasted the condition of things in relation to art industry in England with that in France, and said that as far as art teaching was concerned the latter country had nothing to compare with what was in existence in England, but that, on the other hand, the French were more sensible of the value of collections of examples of artistic products bearing upon industry. In some of the chief cities valuable collections of artistic products bearing on manufactures were gathered, and were, as results showed, consulted frequently and with profit by masters and men. He encouraged the citizens and artisans of Manchester to take pattern after their French rivals in this respect. The subject treated of by Lord Carlingford is one of increasing interest and importance, and his advice has wide applicability here as well as in England. Indeed, much has already been done to show the advantages of a closer union between art and industry and there are indications in plenty that the teaching has not been without success.

A correspondent in London, Ont., informs us that the crops in that section, with the exception of wheat and potatoes, have turned out fairly, and that the farmers are not complaining. Of wheat only half an average crop is expected, and in several districts the potatoes have rotted. The satisfactory condition of the other crops, however, leaves no room for depressing anticipations. Dairy farming and husbandry seem to be gaining in favor among the agricultural population. Business in the section appears to be entering on a period of activity. The feeling in money circles is hopeful, and a project is on foot to establish a new bank. The whole of the stock, amounting to $1,000,000, has been already taken, most of it at a premium, and it is now intended to raise the capital stock to $2,000,000. Notwithstanding the fact that there are six chartered banks already doing business there, there is thought to be ample room for the new institution. London appears to be devoting considerable energy to manufacturing enterprise. A large combination has just been effected for the promotion of the trade in agricultural implements. It has been formed by the absorption of several extensive local factories and manufacturing companies. Its field of operation is to be chiefly in the Canadian northwest territories. The importance of London will doubtless be much enhanced by the building of the London junction of the Credit Valley Railway, which is expected to take place within three or four months.

SPECIAL CORRESPONDENCE.

THE HAWAIIAN SUGAR REPORT.

Washington, September 13.—The report of the Treasury Commission, appointed under a resolution of the last Congress to investigate various charges with regard to alleged frauds and irregularities practiced in connection with the importation of sugars into this country under the treaty with the Sandwich Islands, is at last accessible. The charges have been made in an indefinite manner for years. At the last Congress they were made more specific, and were formulated in the minority report of the House Committee on Foreign Affairs, which was presented by Representative Belmont, of New York. The committee was engaged in inquiring as to the advisability of giving notice of the abrogation of the Hawaiian treaty, and it was deemed advisable that the investigation which has just been made should be ordered, that Congress might have a more intelligent basis for action. The charges were in substance these:

First. That the class of sugars imported since the treaty went into effect differs from that contemplated in the language of the treaty itself and from the importations from the Hawaiian islands prior to said treaty; that, in fact, the process of manufacture in the islands had radically changed, vacuum-pans and centrifugals having been substituted for the open kettles and ordinary methods of purging muscovado sugars.

Second. That sugars from other countries were imported into the Sandwich Islands and fraudulently exported to the United States as Hawaiian sugars.

The report, briefly stated, does not find that any of these charges are sustained. The facts and arguments by which the commission reached its conclusions seem plain and reasonable. The commission gives the following explanation of the apparent difference in the character of the importations before and after the treaty: "It appears that up to 1875 most of the better grades of Sandwich Island sugars were sold in the markets of the Pacific coast directly for consumption. Early in that year the San Francisco refiners made contracts to purchase the greater part of the crop of the islands, and arranged with the planters to make as large a proportion as possible dark in color, to meet the then existing tariff. After the treaty was promulgated, the proportions of the several grades became about the same as before said arrangement was entered into. With this exception, it does not appear that there is any substantial difference in the character of the sugars imported prior to and since the treaty, nor is there any evidence that the importations under the treaty were not such sugars as were 'commonly imported and known as Sandwich Island sugars' prior to 1876."

The commission suggests that possibly the reason why refiners have thought that the character of the manufacture had changed is to be found in the improper use of the word "muscovado." They say: "No muscovado sugar had been made in the islands for more than twenty years prior to the treaty. Centrifugals were manufactured and introduced in the islands as early as 1850 or 1851, and have been in use exclusively for purging sugars ever since that date. Vacuum-pans were also generally used as early as 1865, and in 1870 but few planters boiled their sugars in the open train. In 1875 there were but one or possibly two mills which retained the open train, and every mill started since that date has been equipped with vacuum-pans and centrifugals. The process of sugar-making is, therefore, unquestionably the same as prior to the treaty, and accounts for the fact, previously ascertained, that the quality of the sugars was substantially the same before as since the treaty. * * * In the absence of any knowledge of these sugars in the eastern markets, the refiners and merchants were doubtless justified in the inference that the term 'muscovado' was introduced because the islands produced drained sugars of this character. The non-importation under the treaty of this class of sugar naturally led to the belief that the process of

manufacture had undergone a change. The fact is, however, as before stated, that for twenty years or more prior to the treaty no muscovado sugar had been made in the islands. Why the term 'muscovado' was used we are not informed. It certainly had no place in the treaty, and has tended to mislead since, if not at the time of its adoption."

The second charge, that sugars are imported from the East Indies and China into the Sandwich Islands, and then reshipped to the United States as of Hawaiian growth and manufacture, is also found not to be sustained. The commission were unable to obtain any proof or specific accusation that such was the case, while they were of the opinion that the conditions were such as to render fraudulent attempts of that character improbable, if not impossible. They find the increased importations due entirely to the stimulating influence of the treaty, and that that stimulus is the equivalent of the entire amount of the duty remitted—some $60 per ton! The collateral reasons which bring them to this conclusion are these:

"After a thorough examination of the matter, we are convinced of the utter impracticability of such operations. The formation of the islands is such as in itself to forbid the successful smuggling of sugar. There is but one port in the kingdom where a vessel can lie with safety, viz., Honolulu. All the others are open roadsteads, at which landings must be made in boats, and at some of them this is attended with no little risk, even at the most favorable season. The landing of sugar at either of these ports in boats through the surf would be a tedious operation, and, from the nature of the coast, must be conducted by daylight. In a state of society such as exists on the islands, where every new arrival or unusual event attracts universal attention, the presence of a sugar-laden vessel and the landing of her cargo would of necessity involve such publicity as to preclude the possible success of the venture, to say nothing of its necessary afterhandling and reshipment to the United States. This could only be accomplished by collusion between the shippers and the United States and Hawaiian officials, of which there is no evidence nor grounds for suspicion.

"It is a significant fact that, while vague charges of frauds of this nature are made, no specific case has ever been brought to the knowledge of either government. The allegation seems to have no other foundation than the fact that there has been a large increase in the quantity of sugars sent to the United States since the treaty; but this increase can be otherwise accounted for. It is the legitimate result of the treaty itself."

The commission also find that the treaty has had the effect to destroy the trade between Portland, Ore., and the Sandwich Islands on account of the San Francisco refinery monopoly; that the Hawaiian planters are benefited by the treaty to the amount of from $50 to $60 per ton (the duty remitted); that the highest possible output of all the Hawaiian islands—under the existing system of cultivation—is 100,000 tons of sugar per annum; that labor contracts are respected; that it is not true that Americans own the monopoly of the planting interest of the islands; that, on the contrary, they own a comparatively small part of the plantations; that rice culture has been stimulated by the treaty even more than sugar.

Possibly the most significant portion of the report is this passage:

"It is charged that the treaty has created a sugar monopoly on the Pacific coast and increased the price to the consumer, but we did not find this statement warranted by the facts. It is true that the remission of the duty by the United States has not inured to the benefit of the consumer on the Pacific coast; but, as before stated, the duty remitted, (which, were there no treaty, would go into the United States Treasury) now goes to the planter, and not to the refiner, who buys nearly the entire product of the islands. The increased cost to the consumer on that coast of refined sugars, as compared with the price paid by consumers in the eastern states (from 2 to 2½c. per pound), is not the result of the treaty, but grows out of a monopoly of the refining business in San Francisco, coupled with the still greater monopoly of railroad transportation."

Those who are opposed to the continuance of the treaty will certainly avail themselves of this statement. If the commission has not sustained the charges of fraud which were made as an instrument to aid in securing the abrogation of the treaty, the commission, they will unquestionably claim, has shown that the treaty does not benefit the Pacific coast by reducing the price of sugar to the consumer; that it does not benefit, certainly, the eastern refiners, and that it seems alone to benefit the owners of the Hawaiian sugar plantations, the large majority of which are not Americans, by enabling them to put in their pockets the entire amount of the duty remitted, or from $50 to $60 per ton.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

A piano, when kept for the use of the guests, is part of the "furniture" of a hotel, according to the decision of the Supreme Court of Errors of Connecticut in the recent case of Crossman vs. Baldwin.

An assignor of property assigned for the benefit of creditors has no such interest in the property as will enable him to sue for an injunction to restrain attachment proceedings brought by a creditor, according to the decision of the Supreme Court of Nebraska, in the recent case of Ashton vs. Jones.

According to the decision of the Vermont Supreme Court, in the recent case of Conway vs. Seamons, a discharge under a state insolvent law does not bar a debt contracted before its passage, the creditor in no way becoming a party to the proceedings in insolvency, nor is such debt discharged though merged in a judgment rendered after the passage of the act.

The Supreme Court of the United States, at its last term, decided in the case of Boese vs. King (recently reported) that an assignment for creditors under state laws made while the federal bankrupt law was in force, and without intent to hinder, delay or defraud creditors, was valid for the purpose of securing an equal distribution of the estate among creditors where no proceedings were instituted under the bankrupt law.

An action was brought upon a bond given by a city treasurer for the faithful performance of official duty, on account of certain alleged misconduct. The sureties on the bond pleaded that the municipality induced and was privy to the misconduct alleged. The Supreme Court of New Jersey recently held, in The Mayor of Newark vs. Dickerson, that the plea was good on demurrer.

The word "capital," when used with reference to partnerships, corporations or joint stock companies, means the capital stock, according to the decision of the California Supreme Court, in the recent case of The City and County of San Francisco vs. The Spring Valley Water Works. The court said that the recognized popular meaning of these words agreed with that of learned text writers and jurists and decided cases.

A question as to the meaning of the words "store fixtures" in a policy of fire insurance was raised in the case of Thurston vs. The Union Insurance Company, recently decided in the United States Circuit Court for the District of New Hampshire. The phrase was interpreted to mean those store fittings or fixed furniture which are peculiarly adapted to make a room a store rather than something else. "Store," said the court, "is the American word for shop or warehouse, and is never applied to a factory."

In the case of Bridges vs. Lanham, recently decided by the Nebraska Supreme Court, it appeared that the plaintiff agreed to construct for the defendant a flume which was to supply water to a corn-feed mill which they intended to build within a specified time. The flume was not completed until several months after the specified time, and no corn-feed mill was ever built. Upon an action by the plaintiff for the value of the flume it was held that the defendant was not entitled to counter-claim as damages the loss of the business they would have had if the flume had been completed as agreed.

The right to enforce a mechanics' lien is not an "interest in real estate," according to the decision of the Iowa Supreme Court in the recent case of Andrews vs. Burdick. Such a lien, said the court, is not a right to the property in question, but is a right to a remedy against the property whereby the real estate is subjected to the payment of the lienor's claim.

In the case of The Revolving Scraper Company vs. Tuttle, recently decided by the same court, it appeared that the trustees of a township sent to a corporation which manufactured scrapers an order for the delivery of a certain number of the scrapers, agreeing to pay for the same within a year. According to the terms of the order the time of payment was to be extended until the taxes for the following year should be collected. The order was signed by the names of the trustees, and a statement to the effect that they were trustees was appended. It further appeared, however, that the credit of the town could not lawfully be pledged for the scrapers. Upon a review of all the circumstances, the court held that the trustees were liable individually.

In the case of Bachelder vs. The Queen Insurance Company, recently decided by the Supreme Court of Massachusetts, the plaintiff sued to recover on a policy of insurance upon certain property destroyed by fire in the spring of 1879. The policy contained a clause prohibiting other insurance. Plaintiff claimed that at the time of procuring the insurance the fact of other insurance, then existing, was stated and known to the defendant company, but it appeared that no agreement in writing waiving the clause in question was had. The trial court directed a verdict for the defendant, and its decision was affirmed by the Supreme Court, on the ground that the plaintiff had not shown a waiver of the breach of condition against other insurance.

BUSINESS NOTES.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* (London) during the week ended August 25 amounted to 201, against 172 and 224 respectively in corresponding weeks in 1882 and 1881. England and Wales had 181, against 157 and 204 in each of the weeks in 1882 and 1881 specified; Scotland had 16, against 12 and 10, and Ireland 4, as compared with 3 and 10.

The First National Bank of Elizabethtown, Ky., has been organized; capital $75,000; J. W. Hays president; J. S. Grimes cashier. The First National Bank of Petersburg, Ill., has been organized; capital $50,000; John A. Brahm president; James M. Robbins cashier. In the Griggsville (Ill.) National Bank, Benjamin Newman has been elected president in place of J. McWilliams. In the National Bank of New England, East Haddam, Conn., Julius Atwood has been elected president in place of T. Gross, Jr.

The St. Paul *Pioneer Press* seized the occasion of the visit of the Villard excursionists to that city and to Minneapolis to present a comparison of the business interests, assessed valuation, etc., of the two cities—which, it is needless to add, rather favored St. Paul. The Minneapolis *Tribune* at once rushed into the breach with statistics, furnished by St. Paul officials, as to that city in order to maintain a claimed superiority in value of real property, general business and number of inhabitants in Minneapolis. The city directories have been pressed into the discussion, and in many respects the pros and cons have been forcibly expressed. The luridity of occasional outbreaks of this character has quite supplanted the former Chicago vs. St. Louis newspaper counter allegations as to relative size and worth. As to the merits of the disputes in either instance, no cautious outsider expresses a straightforward opinion.

In reply to the position maintained by the *Hawaiian Gazette* that a higher grade of sugars than was intended has not been exported from the Sandwich Islands to the United States since the reciprocity treaty went into effect (summarized and discussed by BRADSTREET'S a month ago), the San Francisco *Chronicle* interposes some statistics of its own—some at least which it identifies as reports of Hawaiian sugar exports to this country "from a much more reliable and disinterested authority," whatever that may mean. The *Chronicle's* figures are not given for like periods with the *Gazette's*, and those referring to 1877–80 are said to be an average increase in cost of 1.88c. per pound, while figures are given going to show that in a like period, at New York, average prices declined .6⅔ of 1c. per pound. The *Chronicle* regards this as proof "to a demonstration that the grades imported after the treaty must have been higher than those imported before the treaty took effect. In short, the Honolulu *Gazette* has been misled by the sugar monopoly into a false statement." The main point suggested by these rival exhibits (to a disinterested observer) is to know the authority for each of the statistical exhibits presented—that furnished by the San Francisco as well as that by the Hawaiian journal. It would also be of interest to know why our records of imports of sugar from the Hawaiian kingdom do not correspond with those of exports of the same to this country on file at Honolulu. When these discrepancies are cleared there will be less trouble in making inferences from the statistics of trade between the two countries.

A Real Estate and Traders' Exchange has been opened in this city at No. 39 Broadway. The vice-president explains that the purpose of this new representative of a portion of the mercantile and trading community will be to not only deal in real estate but in miscellaneous share property and such unlisted securities as are not now dealt in on the Stock and Mining exchanges. It was added that the business of the Real Estate and Traders' Board will be confined solely to legitimate transactions, and that "no gambling is to be indulged in." If this proves true in practice (as it is now in purpose) it will be of exceeding interest to observe the growth of this institution. There is little doubt that the enormous real estate interests of this city and vicinity require the services of some such institution as this promises to be. In an address delivered at the opening it was pointed out that "the value of the real property in New York city is $1,400,000,000. For purposes of taxation it is assessed at $1,079,000,000, about 70 per cent. of its value. The value of real estate in Kings county is about $350,000,000." While treating of this, Mr. Algernon S. Sullivan touched on a matter of interest to every citizen in the subject of the cost of transferring titles. He said: "You will find that the cost of examining and transferring titles is a great burden upon land, and that it is practicable to reduce this to a very small cost. You will find that the delay under our present system of registration in making searches as to titles is another heavy burden, and that this delay can be avoided by a perfected system of registration."

The opening of the Vienna Electrical Exhibition, mentioned in BRADSTREET'S last week, took place August 16. European journals, just at hand, have been giving a good deal of space to descriptions of the exhibit, and agree in calling it a fair success. The number of visitors daily during the opening days was about 4,000. A Viennese cabman is declared to be the first to introduce electric lighting in cabs, and leads all competitors in Vienna, owing to his enterprise and the occasion. A small dynamo is attached to the wheel, and supplies more than enough current for two lamps. The surplus is stored and lights the cab while standing. England is declared to be poorly represented, and most of the British exhibitors are behindhand with their exhibits. The French department is quite complete and well arranged, and is the largest except the Austro-Hungarian. The rotunda, occupied mostly by Austria, is to be lighted by a luster of forty-eight incandescent lamps of Dr. Hollenbach's design, and by Swan lamps supplied by Ganz & Co., of Pesth, the current coming through accumulators of the Sellon-Volckmar system, supplied by the Electrical Power Storage Company of London. There is also shown the Southern Austrian Railway's new and as yet untried system of electrical carriage intercommunication from passengers to guard, and a carriage from the electrical railway from Mödling to Brühl, with the latest improvements for preventing sparking in stopping and starting. The Italian section is chiefly remarkable for the very beautiful telegraphic apparatus shown. In one of the columns at the entrance to the east transept is A. Freissler's electrical hotel elevator, one of the most interesting exhibits. The French section contains collections of microphones, phonographs, physiological cardiophones, arteriophones and other instruments (shown by Boudet) probably never surpassed for ingenuity and scientific refinement. Robertowitsch's phonophones are specially mentioned among the Russian exhibits. Germany excels mainly in its collection in the machinery department. The Weston machines are remarkable for their solid and workmanlike build. The Anglo-Austrian Brush Company would have completed their preparations but for the want of steam. Their exhibit will not fall far behind in interest. The big Ganz machine is nine feet in external diameter, and built along with the vertical engine driving it, the engine shaft being in one piece with that of the dynamo. The other more interesting exhibits here are those of the Paris-Edison Company, with modified Edison machines driven by Siemens-Armington engines, and those of Brückner, Ross & Consorten, of Vienna. The hall, hung with pictures by Austrian artists, is lighted by four arc lamps, after which comes a long series of "interiors," furnished in very elegant styles by Viennese upholsterers, and lighted by various kinds of incandescent lamps, "the Edison supplying the most brilliant light." The theater is lighted by incandescent lamps, the central luster by Hesse & Woolf, of Vienna, and the rest by Ganz & Co. Lamps for stage effects are furnished by Piette & Krizik, of Pilsen. A series of scientific lectures will be given in this theater. The first was to have been by Sir W. Siemens, and Sir William Thomson is expected to contribute one. Subjects are not yet known.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

Most of the week has been spent by the leaders on the bull side in the stock market in putting prices back after the sudden tumble they had last Saturday. Some one, and he must have been a large operator, was sufficiently frightened by the news of the frost in the corn belt, which came that day, to throw over a good deal of stock, and the room-traders and others were not slow to follow on the same tack, so that prices, by the close of the day, had marked a very decided drop. Nearly every trader in the room, it is said, went home that night short of stocks; and it is averred with great positiveness that Mr. Gould saw this and spent the Sunday in forming a little combination to put up the market on them on Monday. The advance which was made that day and since is declared to be entirely his work, and it is certain that nearly every day this week he has spent some hours in the office of Work, Strong & Co., of Broad street—a large house identified somewhat with the Vanderbilt interest. It is very unusual for Mr. Gould to be out of his own office, and the circumstance of his coming down to take personal direction, as it were, of the manipulation of the market at this time has attracted much attention and provoked a good deal of comment. "Gould's market," is the term by which the street describes the present state of affairs. The frost was an untimely one for his plans, for it came just when the plans for making a bull movement had been well matured and started into operation. It is generally understood also that some large operators who had been for many months operating on the bear side had turned to the other, and the prospects were good for a bull campaign when the unkindly cold wave from the northwest came along and gave a setback to the business. The basis of the movement was the growing crop of corn. The Northern Pacific stocks had been brought down to a safe level, where there was no danger of their being dumped on the market in a load when the bull movement was well under way, and, with this danger averted and a general low level of prices made by their fall, the prospects seemed good to start things up on the strength of the largest crop of corn ever grown in the country. While many of the operators were buying stocks they were also selling corn, and it said that it was due principally to the sales of Wall street men that corn fell where it did two weeks ago. To sell corn short and buy stocks was proper scientific speculation, where the basis of the bull movement in stocks was to be the enormous yield of this cereal. With the frost corn ran up to 50c., and prices of stocks suddenly dropped through some big man getting frightened and selling out.

Sunday came just in time to give an interval for new combinations to be made, as Wall street has often seen before. Mr. Gould did not let go his grip. He had too much at stake. He made public utterance to all who came to him that there was no occasion for alarm, for the bulk of the corn crop was secure; nevertheless, the vim seems to have gone out of things, as if the public had been quite scared by the condition of affairs in the west. It is rare that one sees so thorough a scare over crop news as this frost news effected. Usually the operation of news concerning the crops is gradual in its effects. This came with the suddenness of an alarm of fire, and had not Sunday intervened it is more than probable the drop in the market which followed the first publication of the reports would have been followed by another and more severe one. The market was held up by main force, mainly by the firmness with which Mr. Gould has supported his own stocks. There was a break on Tuesday afternoon, and it was said to be due mainly to the selling out of a line of stocks for the account of Mr. Charles Delmonico, who had been buying rather wildly, but had become so seriously indisposed as to make a complete closing out of his accounts a matter of prudence. After this break the market was steadied, and on Thursday there was enough of bull news to infuse courage into the general run of traders and induce them to buy. The weather was warmer in the west, and floods of telegrams were poured in from railroad men and others in that section denying that there had been any material injury done by the frosts. It was conceded that Wisconsin, Minnesota and Michigan had suffered, the reports from those states being of a character it was impossible to deny; but it was asserted that such damage as had been done there was of no account, while the corn sections from which the railroads derived large earnings were untouched. From London came the news that the Bank of England had reduced its discount rate from 4 to 3½ per cent., and upon this fact the changes were rung all day. It was quite amusing to hear the talk about it. It might be supposed that the whole future of speculation in this country hung on the discount rate of the Bank of England. The principal argument was that the reduction would hasten gold imports, and it would not be long now before gold would be moving this way in large quantities.

The obstacle to the decline of exchange rates to the gold-importing point has long been the scarcity of commercial bills; that is to say, we have not exported enough domestic produce to turn the balance of trade enough in our favor as to require payment to be made in coin. This scarcity continues. Our exports are light, but it is stated that grain and cotton will soon begin to move out in large volume, when the rates of exchange will decline and gold will come in. Some gold has been imported this week and more is on the way here; but, with exchange rates where they are, this importation was seen to be out of the regular course of trade, and there was much discussion as to the causes of the importation. It was French gold coin which came, and Mr. Baldwin, president of the Fourth National Bank, gave this explanation: "It seems to me there would be very considerable loss in importing gold from Europe at the present time unless the importation is the result of transactions which could not well be done by exchange. Some of our merchants export grain and other commodities to ports in the Mediterranean and at other points, where perhaps exchange could not be bought without sending gold to London or Berlin or some other financial center at a cost about as great as that of exporting it to America; so that it is cheaper by the cost of exchange to ship the gold directly to America. This has very likely been the cause of some of the recent importations."

The Western Union statement for the quarter ending September 30 was published this week, and much interest was felt in it, as it covered the period of the strike. Of the four quarters of the year, the third and fourth are those in which the largest earnings are made by the company. Its best quarter is the third, covering the period of the summer months, when that class of the public most using the wires are scattered through all the country at the various summer resorts, and maintaining communication with the business centers by telegraph. The net earnings of the Western Union Company for the third quarter of last year were reported at $2,289,000. The net earnings of the same quarter this year are estimated by the company at $1,650,000. Of course, they can at this time only be estimated, as the quarter does not end till the 30th inst.; but this is the customary form in which the quarterly statements are given, and in the subsequent quarter the actual net earnings of the previous one are presented. The estimate is generally pretty near the mark; but sometimes the actual figures fall short of the estimates. It is reasonable to suppose that the company has not made the mistake of an under estimate at this time, when there was the strongest possible incentive to make the best possible showing. Taking the company's figures as they stand for this quarter, and comparing them with the figures of the net earnings for the corresponding quarter last year, we see that the strike cost the company about $600,000. This is a pretty heavy loss, and one which the Western Union could not afford to indulge in very often. The indirect loss which Mr. Gould sustained through the prejudicial effect of the strike on the stock and the stock market generally it would be difficult to estimate, but it is safe to say that the sum of $600,000 would fall considerably short of representing it. The company's statement was considered, on the whole, to be favorable, as it showed that despite the strike something over the dividend had been earned for the quarter. There is a renewal of the talk about listing the stock in London, but it will be safe, in view of past experience, to believe it will be listed there only when the listing has been done. The next thing in order is the decision of the Court of Appeals on the appeal in the Williams case, involving the validity of the $15,000,000 of stock issued at the time of the consolidation. The court reconvenes next month, when the decision should be rendered. It will be looked for with keen interest in Wall street.

The Bank of England statement for the week, issued on Thursday, which accompanied the reduction of the discount rate, showed that the specie reserve is now 46¼ per cent. of the liabilities, which the bank directors evidently consider sufficient to meet any drain liable to be made upon it this fall. It should be said that in making the reduction the bank has merely met the open market rate, which for some time past has been 3 and 3½ per cent. Exchange rates here were reduced ½ per cent. to correspond with the reduction, and they are now (posted) at 4.82½ and 4.85½. The loan market has remained as easy as at any time for weeks past, call loans being at 2 and 2½ per cent., and abundant offerings at these figures. Concerning the movement of money outward from this center, which is late this year, the gentleman above quoted says: "The movement is toward the west in small degree, but most freely to the south, where the cotton crop is being marketed. It is about the time the western movement usually begins, but I see no indications of a heavy call yet. I think that money will rule at full rates this fall, but without any distress."

Governments are quiet, and the market presents no features calling for comment. The following were the closing quotations yesterday:

	Sept. 7,	Sept. 14,	
	bid.	bid.	asked.
U. S. 4½s 1891, registered	112¼	112⅜	112⅝
U. S. coupon	112¼	112⅜	112⅝
U. S. 4s 1907, registered	118⅜	118½	118⅝
U. S. 4s 1907, coupon	119⅜	119½	119⅝

The bank statement of last week showed, as expected, a reduction in the surplus reserve. It was, however, only $1,736,525. The following are the comparative totals of the statements of September 1 and September 8:

	Sept. 1.	Sept. 8.	Differences.	
Loans	$328,880,600	$327,590,300	Inc.	$1,709,700
Specie	59,951,200	59,528,600	Dec.	1,422,600
Legal-tenders	25,207,800	24,682,000	Dec.	525,800
Deposits	315,739,900	314,802,400	Dec.	847,500
Circulation	15,636,300	15,540,700	Dec.	95,600

The proportion of total reserve to liabilities is now 26.32, against 24.38 in the same week of 1882.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: Transactions in stocks are limited, and the market is heavy.

From New Orleans, La.: Money is in demand for long loans. Premium bonds are firm.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

The general commercial situation as reported to BRADSTREET'S by telegraph shows a continuance of the steady improvement mentioned a week ago. The full autumn trade movement has set in, and leading distributive centers are getting the benefit of it. Naturally enough the northwest and the west report the greatest activity, though in dry goods and other general lines, Boston, New York, Philadelphia and Baltimore all feel the influence. The general industrial situation of the country is healthful, and orders are being received quite in excess of what has been generally anticipated. This is clearly shown by special reports from 75 cities published in BRADSTREET'S to-day. The price of wheat has declined about 2½c., while that of Indian corn exhibits an advance of about 1c. as compared with Friday of last week. The advance in corn, due to the frost scare, has been lost in part, due to the fact that the loss of all the corn in the four northwestern states and in the northern belt of Ohio, Indiana and Illinois would not aggregate over 25 per cent. of the total corn crop. Wheat has gone abroad more slowly and has been accumulating. This, with the indifference with which it has been treated, has permitted a lower range of quotations. Provisions sympathized with corn to the extent of advancing with it; but when the reaction came, hog products went below quotations held just prior to the advance. Receipts of hogs continue heavy and legitimate trading slow. Petroleum has advanced, owing to the outstripping of production by consumption, to the extent of about 13,000 barrels daily (at present), and tends still higher. Ocean freights are firm, and there is a better demand, owing to increasing cotton charters at southern ports drawing vessels from New York. The production of coal is gaining on the total to a corresponding date in 1882, and approximates to 1,800,000 tons. There has been continued activity in long staple wools for use in the manufacture of worsted fabrics, but the general wool trade has been rather quieter. There were 136 failures in the United States reported to BRADSTREET'S during the past week, 6 less than the preceding week, 3 less than the corresponding week of 1882, and 48 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The fall trade movement has gained more voice in several branches, but the close manner in which buyers continue to operate causes some disappointment, as the volume of sales is not fully up to expectations. All feel, however, that business is now on a healthy basis, and that all the goods purchased will be paid for in due time. A gradual increase is confidently expected during this month, and many think that October will develop some strong features. In dry goods and clothing there has been more activity than last week. The sales of wool are larger than for three or four weeks past. The demand for money has increased, but the banks are in a position to meet the calls of their customers, and discount rates rule steady at 5½ to 6 per cent., with some exceptions above and below.

From Philadelphia, Pa.: A steadily improving trade is noted in all jobbing branches and a hopeful feeling finds expression in mercantile circles generally, although some anxiety has been occasioned this week by the unfavorable reports concerning the condition of the corn crop. Country orders for goods of all kinds are coming forward more freely, and the September movement to date is largely in excess of the corresponding period last year in many lines. Collections are generally satisfactory.

From Cleveland, Ohio: The condition of business during the past week presented no change from the previous one. Money is in active demand with a sufficient amount for legitimate wants. Prime short-time paper is quoted 7 to 8½ per cent.

From Cincinnati, Ohio: That confidence has been largely regained in money circles is evidenced by revived business. The recent check received by speculators has not been without some benefit, and a healthy trade for immediate consumption is the result.

From Dayton, Ohio: General trade is reported somewhat better than last week. Money in bank is scarce, with interest from 7 to 8 per cent.

From Chicago, Ill.: Money is quiet and easy at 6@7 per cent. on time and 5@6 per cent. on call. Exchange is 60c. discount. Collections are easy. General business is good.

From Peoria, Ill.: All lines of jobbing trade report a steady improvement and a healthy trade.

From Detroit, Mich.: General business in almost all departments is of good proportions. Collections are rather slow, but the general outlook is very satisfactory.

From Louisville, Ky.: The jobbing trade in staple branches is very active, and general fall business is brisk and satisfactory. Money in good demand and fair supply. Exchange is quiet.

From St. Louis, Mo.: General trade is in very good volume, with remarkably steady values through most lines. Collections continue easy. The weather is excellent, and fall wheat sowing is progressing rapidly. Corn is not injured in any near section. Money continues quite active. Prime commercial bills and New York exchange are par.

From Kansas City, Mo.: General trade continues quite active. Collections are good.

From Burlington, Iowa: Trade has been satisfactory during the week with a perceptible increase in volume of business all round.

From Sioux City, Iowa: Business is good, and the prospects for the fall trade are excellent.

From Minneapolis, Minn.: General trade shows increased activity. Dry goods are moving freely, and jobbing houses are crowded with orders as never before. Clothing, boots and shoes active, as are all classes of seasonable goods. Collections are improving, and trade generally is in a prosperous condition. The money market continues close, and considerable difficulty is experienced in getting money to move the wheat crop. The ruling figure is 8@10 per cent. for good paper. Eastern exchange is weak, par to 1/16c. discount.

From Topeka, Kan.: All branches of trade active, the state fair being held here, and trade is better than it would have been.

From Lawrence, Kan.: The general mercantile trade is quiet, owing to local reasons, but will doubtless revive during the next few days. The corn crop is in the very best condition, which, with the excellent wheat crop, insures a good trade for the coming year.

From Omaha, Neb.: Jobbers in all lines very hopeful, and are pushing business as never before. This year collections are greatly improved, and there appears to be an active demand in all lines.

From Baltimore, Md.: The past week has been very busy in all branches, and orders with many jobbers are said to be considerably ahead. Money is strong at 5@6 per cent.

From Richmond, Va.: Business in all lines is quite active.

From Wilmington, N. C.: General business is fairly active.

From Savannah, Ga.: Trade has continued even and steady in all lines. General business is satisfactory.

From Memphis, Tenn.: Trade in general improving.

From Nashville, Tenn.: The jobbing trade report orders coming in freely and the outlook good.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: All kinds of mechanics in this city are fully employed. In the manufacturing there are no idlers, and calls for more help are frequently made. No labor troubles are heard of in this vicinity.

BREADSTUFFS ABROAD.

The British markets for wheat have been weaker, but have had little opportunity to exert much if any influence on this side of the Atlantic during the past week. It was safe to assume that one-half of the English crop had been secured by the close of August, and the course of the weather since has not been of that character to appreciably affect the remainder. From numerous replies received by the *Mark Lane Express*, and which are corroborated by returns to other authorities, it is evident that the average production of wheat per acre in the English counties this year has been fractionally higher than 26 bushels per acre, which means about 8,500,000 quarters total crop—or, say 68,000,000, which, with the usual deductions for seed, etc., must leave 7,500,000 quarters, or 60,000,000 bushels of marketable grain. The weather and the supply of foreign grains in the British market also exercised a depressing influence. On the continent the harvest progressed rapidly under exceptionally favorable weather, and in France is about completed. Values for wheat and other descriptions of grain have been weaker, and, in some of the more important markets, lower. On Monday the English estimates (Beerbohm's) were received here that the world's wheat crop would fall 8,500,000 quarters (68,000,000 bushels) below the world's requirements for 1883 and 1884. In this estimate the shortage for California and Oregon crops is not specified. In case the recent reduced estimates for the Pacific coast prove true, and they have not been included in the calculation referred to, the total shortage will have to be increased about 10,000,000 bushels.

Grain on passage for Europe, reported by cable, September 13, 1883:

	Wheat. Qrs.	*Maize. Qrs.*
To the United Kingdom	1,850,000	250,000
To continent	480,000	85,000
Total quarters	2,330,000	335,000
Equal bushels	18,640,000	2,680,000
Compared with the previous week:		
To the United Kingdom	1,775,000	270,000
To continent	620,000	95,000
Total quarters	2,395,000	365,000
Equal bushels	19,160,000	2,920,000
Decrease, bushels	520,000	240,000

AMERICAN WHEAT MARKETS.

The earlier portion of the past week did not reveal much of importance to chronicle respecting the New York wheat market. Too much interest has been taken in Indian corn to leave any room for wheat manipulation. Naturally enough the advance in the price of corn during the first two days of the frost scare caused a sympathetic movement in prices of wheat, which was soon lost, and the course has since been steadily downward. Efforts have been made to advance quotations by reason of the decreasing receipts at the west, and on the other side to force prices down, owing to the decreased export movement, so that, on the whole, this cereal cut an inconsiderable figure, relatively speaking. The increased visible supply exerted an effect on prices on Thursday in favor of a lower level. On Friday the market was unsettled and prices were again lower, about 1c. per bushel on the near options. Speculation was light, and the movement abroad likewise.

The receipts of wheat at tide-water for the week ending September 8 increased to 2,833,568 bushels from September 1, when they were 2,470,257 bushels. The exports from the Atlantic ports for the week ended September 8 amounted to 1,433,775 bushels, against 1,337,542 bushels September 1.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended September 8 amounted to 3,028,351 bushels, against 2,909,574 bushels in the preceding week, and the shipments to 1,923,497 bushels, against 1,626,256 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) September 8, as against the preceding week, showed an increase of 2,110,194 bushels.

The course of the wheat market at New York and Chicago during the past week has been as follows:

	AT NEW YORK				AT CHICAGO	
	Sept.	*Oct.*	*Nov.*	*Dec.*	*Sept.*	*Oct*
Fri. Sept. 7	$1.16	$1.17⅜	$1.19¾	$1.21¼	$0.97½	$0.99⅜
Sat. Sept. 8	1.15⅝	1.17½	1.19½	1.21¼	.97½	.99⅜
Mon. Sept. 10	1.15⅛	1.16¾	1.18⅞	1.20⅞	.97½	.99¼
Tues. Sept. 11	1.14¾	1.16⅜	1.18½	1.20½	.96¼	.98
Wed. Sept. 12	1.14¾	1.15⅝	1.17⅞	1.20	.96	.97⅝
Thur. Sept. 13	1.14½	1.15¾	1.18⅛	1.20⅛	.96⅜	.98¼

At 1 P.M. on Friday, September 7, September wheat at Chicago was quoted at 95⅝c., and October at 96⅞c., against 97½c. and 99⅜c. on the preceding Friday.

INDIAN CORN.

This cereal has claimed more than its own share of attention owing to the occurrence of frosts in northern Ohio, Indiana, Illinois and portions of Michigan, Wisconsin and Minnesota. The present being a critical time in the maturing period of the corn plant, and one in which frosts must cause vital damage, the widely printed reports on Saturday afternoon, Sunday and Monday of cold weather in the regions specified sent prices of Indian corn up 2c. a bushel. For a day or two great alarm was felt, and this spread itself to numerous departments of commerce. Much had been counted on the previous prospectively excessive yield of Indian corn. The railroads were to have heavy freight bills owing to the bountiful harvest, and the financial condition of many farmers, who had lost a portion of their wheat crops was to be recovered through gains on Indian corn. The New York stock market felt the influence of course, and the general mercantile community began to discuss the probable damage done the fall trade owing to the supposed curtailing of farmers' resources. After two days time added data respecting the limits of the regions visited by frosts enabled thoughtful observers to reach the conclusion that the damage done had been greatly exaggerated. The crop had suffered of course, but far less than had been reported. The main injury must of course be found in the northern portion of the great corn-growing states, Ohio, Indiana and Illinois. Michigan, Wisconsin and Minnesota do not raise enough corn all told to create more than a moderate degree of uneasiness if it should be all frostbitten. In other words, the region in which is grown three-fourths of all the Indian corn raised in the country has suffered and can now suffer no loss from frosts whatever. For six years past the Indian corn crops of the country have been reported as follows:

Raised.	*Bushels.*	*Raised.*	*Bushels.*
In 1877	1,342,588,000	In 1880	1,717,400,000
In 1878	1,388,200,000	In 1881	1,194,916,000
In 1879	1,547,000,000	In 1882	1,617,025,000

The quantity raised by the states producing the bulk of the crop was as given in the years mentioned:

	Bushels.	
	1880.	1881.
Illinois	240,245,000	175,700,000
Iowa	200,192,000	173,290,000
Missouri	160,163,000	93,069,000
Ohio	119,940,000	79,760,000
Indiana	99,229,000	76,618,000
Kansas	106,218,000	73,377,000

These figures indicate plainly enough that the proportion of the grain north of Chicago is insignificant, and it must not be overlooked that the corn acreage this year had been increased, and that under favorable conditions a yield of possibly 2,000,000,000 bushels might have resulted. The total quantity of corn raised in Michigan, Minnesota, Nebraska, Wisconsin and Dakota last year was but 170,000,000 bushels, about one-tenth of the entire crop. The absolute destruction of the corn crop in those states would not, therefore, leave the country short of requirements. Including the heaviest estimates as to loss in northern Ohio, Indiana and Illinois, about 25 per cent. of the total in those states (and which may be overestimated), and the aggregate quantity of corn destroyed (including the five northwestern states named) would be about 480,000,000 bushels, or 25 per cent. of last year's reported crop. Including the increased production this year the outlook is for an average yield in any event—say, 1,600,000,000 bushels of Indian corn, and it may exceed that total.

This state of affairs left its mark on corn speculation during the week, The first two days' advances were, however, met by a subsequent weakness and decline, and a good share of the excitement disappeared. On Thursday renewed reports of lower temperature approaching the corn belt left an effect in favor of higher prices. On Friday corn declined about ¾c. per bushel under pressure to sell. Speculation light.

The receipts of Indian corn at the Atlantic ports for the week ended September 8 were 1,989,792 bushels, against 1,269,072 in the preceding week, while the exports from the same points amounted to 947,734, against 938,710 bushels. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, September 8 had increased 1,909,944 bushels as compared with September 1. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending September 8, were 3,665,155 bushels, against 3,681,306 the week preceding, and the shipments were 3,767,154 bushels, against 3,355,049 in the preceding week.

The closing prices at New York and at Chicago at 1 P. M. for the past week were:

	At New York.			*Chicago.*	
	Sept.	*Oct.*	*Nov.*	*Sept.*	*Oct.*
Friday, Sept. 7	.61⅝	.62	.61⅜	.49½	.48¾
Saturday, Sept 8	.62½	.63⅜	.63⅛	.50½	.50
Monday, Sept. 10	.62½	.63¾	.63½	.51⅜	.51⅜
Tuesday, Sept. 11	.63	.63⅜	.63¼	.50⅞	.50⅞
Wednesday, Sept. 12	.63	.64	.63	.51¼	.51¼
Thursday, Sept. 13	.63	.64	.63½	.51⅞	.51⅞

Corn at Chicago at 1 P.M. yesterday was for September 50⅞c. and for October 50⅞c., against 49½c., and 48¾c. for the options named on the preceding Friday.

The prices of breadstuffs in New York last evening, as against those of the Friday preceding, as compared with the same at a like date in 1882, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

	Sept. 7.	*Sept. 14.*
No. 2 flour	$2.60 @3.40	$2.50 @3.30

Barley	406,556	271,102	119,920	358,732
Rye	1,530,463	1,527,854	709,169	645,309

In addition to our regular telegrams from the wheat and corn growing regions there will be found below a number of special dispatches received from the districts particularly affected.

AMERICAN BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There has been a good speculative trade in grain options and a moderate home trade in flour at steady prices, but little or nothing doing for export. Corn has been excited and feverish all the week owing to the frost scare and other unfavorable reports concerning the growing crop. Wheat has fluctuated within narrow limits, and closes a shade lower than last week. Oats are more plentiful and lower on the spot, but deferred deliveries have been well supported.

From Cincinnati, Ohio: The flour market is without life; high grades are in fair demand. Wheat receipts are almost double those of last week; the market is easy. Corn has rallied owing to reports about frost; offerings are moderate.

From Chicago, Ill.: Wheat is weak and declining on adverse eastern and European advices. Receipts are free. Shipping demand is moderate and stocks are increasing. Corn is weak and declining on better crop reports. Shippers are buying fairly. Receipts are larger than anticipated. Oats are steady, with less demand from shippers.

From Louisville, Ky.: Grain is dull and easy, and the movement light. Flour in fair shipping demand. Provisions are quiet and weak.

From St. Louis, Mo.: Wheat has recovered value sharply this week in sympathy with corn, which advanced wildly on frost reports, though the market is now weaker and quiet for all grains. Flour is quiet with only local and southern demand.

From Minneapolis, Minn.: Minneapolis wheat market is dull and weak. No. 1 hard is quotable at $1@$1.05½, with more sellers than buyers; $1.02 is bid for October. The lower grades are weak and unsettled, buyers holding off. The flour market is inactive. The mills are not running to their full capacity; mainly on orders.

From Kansas City, Mo.: Wheat is quiet and weak.

From San Francisco, Cal.: Wheat is active at full rates. Freights are low.

From Baltimore, Md.: Speculation in wheat continues only fair, and the market rules quiet.

From Wilmington, N. C.: Grain and breadstuffs are firm. The growing crops were injured to some extent by the recent severe storms.

From Savannah, Ga.: Flour is in fair demand for fine quality. Corn and oats are steady.

From New Orleans, La.: Corn is dull at 56c. Wheat is dull at $1.12½. Receipts are moderate. The stock is 700,000 bushels. Flour is stronger at an improved demand for high grades.

From Memphis, Tenn.: Corn is firm and in fair demand. Oats are quiet and the supply large. Flour is steady. Cornmeal weak.

From Nashville, Tenn.: Wheat is quiet at lower prices. Corn is firm, with a good demand.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Dundee, Mich.: Corn injured one-third by frost; three weeks' warm weather are still required. Beans and buckwheat nearly a failure.

From Jackson, Mich.: In this vicinity the corn crop was fully over one-half destroyed by the recent frost, and buckwheat, beans, etc., were almost totally ruined.

From Lansing, Mich.: The Michigan corn crop is very light, and is seriously injured where not entirely destroyed by frost. White beans and clover seed are generally destroyed.

From Louisville, Ky.: The drouth in Kentucky has continued over six weeks. Pastures are dried up and the growth of vegetables is checked. Without heavy rains within a week all the late corn will fail to develop the grain on the cob. Northwestern Kentucky has had local rains, but in the remainder of the state the agricultural condition is being steadily lowered by the protracted drouth.

From Evansville, Ind.: There has been no damage here to crops from frost.

From Burlington, Iowa: The damage by frost is mostly in the northern and northwestern part of the state, and is estimated at 20 to 25 per cent. for the section named. Prospects are still considered favorable to a fair general yield.

From Davenport, Iowa: The corn crop has been injured about 10 per cent. Prospects are fair if there is no more frost for about three weeks.

From Des Moines, Iowa. In central Iowa the frost has not injured the corn crop save on low ground. That injured is so small as not to materially affect the aggregate yield. Frost and dry weather are maturing the crop rapidly. Prospect fair.

From Sioux City, Iowa: The condition of the corn crop in western Iowa is good. Very slight damage was done by the frost. The wheat and flax yield is larger than last year.

From Milwaukee, Wis.: Reports from the wheat fields of the northwest continue favorable, and the yield developed by the threshing machines is surprisingly large. The movement here is light, but hard spring arrives daily, and the supply of this grade promises to be unusually large. Farmers, however, are not marketing very freely since the decline in prices. The recent frost in the northwest, though not as destructive to corn as many suppose, has made farmers more bullish than ever. Vegetables in the northwest have suffered considerably, and corn in northern Wisconsin, Minnesota and Dakota will show a light yield, but the acreage is not large.

From Mankato, Minn.: Farmers and grain men estimate corn in Minnesota damaged 60 per cent.

From Minneapolis, Minn.: On the morning of the 8th a killing frost visited the entire northwest. Ice formed, and all tender vegetation was seriously injured. The loss in the corn crop was the most serious, but late vegetables were much damaged. The extent of the injury to corn cannot be definitely stated. Some fields were so far matured as not to suffer material damage. But fodder was nearly ruined. At least 75 per cent. of the crop was damaged to such an extent that but little sound corn will be gathered, and much of it is rendered worthless, except for immediate feeding. The result is likely to be a large deficiency in the state for local consumption. The weather has been mild since the cold wave passed and is favorable for threshing, which is progressing with good results as to yield. The average yield as shown so far by threshing is about 16 bushels per acre, giving Minnesota a crop of 40,000,000 bushels, and Dakota 12,000,000 to 15,000,000 (estimated).

From Lincoln, Neb.: There is no injury by frost here. The corn crop generally is first rate, and will be out of danger in a week.

From Omaha, Neb.: Reports from all parts of the state are very encouraging. No frost has appeared, and the corn crop is not injured in the least. The weather is now much warmer, and no fears are entertained. One week more of the present weather will assure a heavy crop. The probable yield is now placed at 100,000,000 bushels, and 500,000 bushels of last year's crop still remain in the state.

From Richmond, Va.: Fine rains during the past two days. The weather is warm and bright, and hopes are now entertained for late crops.

From Galveston, Tex.: The weather during the past week has been somewhat cooler. Have had but little rain.

PROVISIONS.

The interest in the safety of the Indian corn crop, under influence of reports of sharp frosts in the west and northwest, naturally extended itself to the provisions market, and lard advanced on Saturday and Monday in consequence. Trade had been slack and the receipt of country orders to buy, trusting to the frost scare to pull them through, enabled dealers to accomplish something while it lasted. But Tuesday brought less confidence in the extent of damage to corn by frosts, and with this and renewed receipts of hogs at western points prices again declined. On Wednesday the fall had gone below last Saturday's quotations. Legitimate dealings in hog products have not been better, and there is no other influence likely to be at work except manipulation. The export movement is slack, and prices are heavy and tending down. On Friday the market for pork was dull and heavy. Lard heavy. No bids for September. Exports of hog products from the following places for the week ending September 8, 1883, were:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	1,259	5,586,081	4,793,285
Boston	557	1,398,785	434,232
Portland	...	....	....
Montreal	1,661	680,000	1,138,220
Philadelphia	..	....	....
Baltimore	5	...	101,412
New Orleans	12	....	100
Totals	3,494	7,665,756	6,467,249
Previous week	4,241	7,270,373	7,172,207

The total export of hog product from the abovementioned places from November 1, 1882, to September 8, 1883, was as follows:

	1882-83, pounds.	*1881-82. pounds.*
Pork	40,547,200	43,214,000
Bacon	366,375,112	311,687,865
Lard	248,351,535	210,995,321
Totals	655,273,847	595,897,186

Prices of lard and mess pork at New York during the week were as follows:

	Lard, per lb., September.		*Pork, per bbl., spot mess.*	
	This week.	*Last week.*	*This week.*	*Last week.*
Saturday, Sept. 8	8.55c.	8.70c.	$13.00	$13.75
Monday, Sept. 10	8.62	8.74	13.00	13.75
Tuesday, Sept. 11	8.53	8.70	13.00	13.75
Wednesday, Sept, 12	8.45	8.50	13.00	13.50
Thursday, Sept. 13	....	8.40	13.00	13.50
Friday, Sept. 14	....	8.57	12.75	13.00

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: A brisk jobbing trade has been done in pork and bacon at very steady prices. Butter is active and 2c. higher in the fancy grades. Suene is again on the market and successfully competing with everything below extra creamery. Eggs are scarce and higher.

From Cincinnati, Ohio: Provisions have been dull, with little effort made to sell at present prices.

From Chicago, Ill.: Pork, lard and short-rib sides are weak and heavy at the lowest prices of the week. The shipping demand is small. Better reports regarding the condition of the corn shakes the confidence of the bulls. Hogs are firm and higher on small receipts.

From Peoria, Ill.: Receipts of live stock are good, and 4,000 head of cattle are feeding at the distilleries.

From St. Louis, Mo.: Provisions are sluggish and weak. Hogs have gradually declined, and are now weak but fairly active, with good receipts. Cattle have been somewhat downward, but are now firmer and active.

From Kansas City, Mo.: Cattle receipts are large and prices tend lower. The market is active. Hog receipts are heavy at a further decline of 10c. Provisions are active and prices steady.

From New Orleans, La.: Provisions are quiet, but firmer.

From Memphis, Tenn.: Meats and lard are in good demand, with prices firm.

From Nashville, Tenn.: The cattle market is active. Arrivals sell readily, with the supply short.

THE NEW YORK DRY GOODS MARKET.

Business for the week is pronounced satisfactory and of good proportions throughout all branches of the dry goods trade. A little falling off was perceptible on Wednesday and Thursday on account of the break in the weather. This was more noticeable with the commission houses than with the jobbers. With many of the latter a scarcely perceptible diminution of sales was experienced. A return of warm weather is more to be feared than rain, and it has shown an inclination that way toward the close of the week. If it continues so for a week or two the clothing trade especially will experience its effects. This would be rather discouraging after the season has opened so encouragingly.

The week's business has been of an improving nature for the commission agents, though it did fall off a trifle toward the close. The week opened well and prices have been firm and steady. The briskness of the jobbin trade continues, there being a constant stream of fresh buyers daily arriving to take the place of those who depart.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Dry goods are active and sales increasing.

From Boston, Mass.: There continues to be an active jobbing trade, and movements from first hands have increased a little. Orders are coming in quite freely from the New England towns, and while all keep closely within the line of actual wants, the volume of sales in the aggregate foot up well. Agents report a better demand for prints, popular makes of plain cotton and dress goods. Blankets, flannels and hosiery are also moving well. Late auction sales have not disturbed prices on blankets.

From Providence, R. I.: The print cloth market is firmer than last week, the amount of sales being fair; 64s are quoted at 3½c. cash and 56x60s at 3⅛c. There are about 125,000 pieces on hand.

From Philadelphia, Pa.: Business by personal selection has been somewhat retarded by unfavorable weather, but a good aggregate distribution has been effected on orders by mail and wire, and the situation presents many features of encouragement. Jobbers' sales are ahead of last September in many departments, and all are hopeful of a large fall trade.

From Pittsburgh, Pa.: The dry goods trade is active, and the volume of business is in excess of the same period last year. Fall trade seems to move along regularly. Collections about an average.

From Cincinnati, Ohio: The dry goods trade is excellent, and prices are without marked change.

From Cleveland, Ohio: The dry goods market continues active and very satisfactory thus far for the season.

From Columbus, Ohio: Trade in dry goods, and in fact in all jobbing lines, is reported fully up to the average, and the former, it is thought, exceeds that of the previous year considerably.

From Dayton, Ohio: The dry goods market is reported quiet, though there is said to be fair prospects for a good fall trade. Collections are reported fair.

From Chicago, Ill.: Dry goods, notions, millinery and fancy goods are very active. Jobbers appear delighted with trade. Many new customers reported from the far west and northwest, including Oregon and other pacific slope sections.

From Peoria, Ill.: The dry goods trade is good. Orders for winter goods are coming in freely.

From Detroit, Mich.: Dry goods jobbers report a very satisfactory business. Margins are smaller this season, but the volume of trade is larger.

From Louisville, Ky.: Dry goods jobbers have all the business they can handle. Many salesmen have been called in off the road to attend to the large numbers of buyers visiting the city.

From St. Louis, Mo.: Dry goods sales have considerably increased, with steady but firm values.

From Kansas City, Mo.: Dry goods sales very heavy, and the volume of fall business is steadily increasing.

From Burlington, Iowa: Dry goods trade improves steadily as the season advances. Collections reported fair to good. Weather warmer and steady.

From San Francisco, Cal.: There is little activity noticeable in dry goods. The business rivalry of Portland, Ore., is very apparent, buyers from Oregon being scarce. The completion of the Northern Pacific Railroad tends in the same direction. Prices are lower in prints.

From Baltimore, Md.: Sales in the dry goods trade were large, at least 5 per cent. in excess of last year at same period. Jobbers are very much encouraged, and are of the opinion that this season's business will be a very profitable one. Retail dealers are doing fairly well and no complaints are heard.

From Richmond, Va.: The dry goods trade is active and improving.

From Wilmington, N. C.: The dry goods jobbing trade is fair.

From Savannah, Ga.: Dry goods are steadily improving, and prices well maintained.

From Galveston, Tex.: The dry goods and general jobbing trade is only fair, and is reported somewhat less active than last week.

From Memphis, Tenn.: The dry goods business is improving in volume, but is by no means active.

CLOTHING.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The clothing trade is in a very satisfactory condition. Orders are coming in on a larger scale than was expected, and stocks are already broken up. There is every indication of a prosperous fall trade throughout the country. Clothiers have begun buying light-weight cloths for spring goods.

From Chicago, Ill.: Clothing and hats and caps are selling freely, as last week's frost scare concerning corn has had little effect on trade from the sections where the most damage is reported.

COTTON.

The market for spot cotton at New York for the week has been fairly active. Sales have been quite heavy and mostly to spinners. Quotations remained unchanged until Thursday, when there was an advance of ⅛c., which has been sustained, middling uplands closing last night at 10¼c., against 10⅛c. last week.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7 13-16c.	7 11-16c.	10 5-16c.
Strict ordinary	8¼	8⅛	10¾
Good ordinary	8 1-16	8 15-16	11 9-16
Strict good ordinary	9⅜	9½	12
Low middling	9⅞	9¾	12⅜
Strict low middling	10 1-16	9 15-16	12 9-16
Middling	10¼	10⅛	12 11-16
Good middling	10⅜	10½	13 1-16
Strict good middling	10⅞	10¾	13 5-16
Middling fair	11⅜	11¼	13 13-16
Fair	12⅞	12	14 9-16

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	7¼	7⅛	9 15-16
Strictly good ordinary	8 1-16	7 15-16	10¾
Low middling	8¾	8⅝	11 7-16
Middling	9 11-16	9 9-16	12⅜

The market for spot cotton closed steady.

The future market for the week has been easy and steady. There was no material change until Wednesday, when prices advanced about 11 points for near months and 14 for later ones. The upward movement is attributed to unfavorable weather reports from the south, and to unexpected strength developed at Liverpool. On Thursday and Friday prices continued to advance, and the closing quotations last night show a gain of 35 points for near months and 33 for later ones over those of last week.

The following table shows the closing quotations for futures at New York Friday evening, com-

pared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
September	10.40	10.10	12 31
October	10 53	10.20	11.75
November	10.65	10.29	11 54
December	10 75	10.40	11.49
January	10.85	10.51	11 55
February	10.98	10.64	11 65
March	11 10	10 78	11.76
April	11.21	10.90	11 87
May	11.32	11.03	11 99
June	11.42	11.12	12.10

The future market at the close was excited.

The Liverpool market for prompt delivery uplands has been firm and more active at slightly advanced prices. Middling uplands advanced a point on Thursday, and another on Friday, closing last night at 5 13/16d. The market for futures has been firm and steady at higher prices. The closing quotations show an average advance of 8 points for near months and 9 for later ones.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is steady and firm, sales being reported as fair. Middling uplands are worth 10¾c., and middling gulfs 11c. The stock on hand is fair.

From Philadelphia, Pa.: Trade has continued quiet, but prices have been steadily maintained. Yarns are a trifle more active.

From Cincinnati, Ohio The cotton market has improved and receipts have largely increased.

From Louisville, Ky.: Cotton offerings are small; the inquiry is good and the market firm.

From St. Louis, Mo.: Cotton has advanced some. Foreign buyers are here, but trading is quiet because of small receipts and light stocks.

From Baltimore, Md.: Cotton holders are more confident and the market is firm in tone.

From Wilmington, N. C.: The cotton market is firmer, the receipt and demand being good.

From Savannah, Ga.: The cotton market has strengthened, and the demand is more active at an advance, and disposed of upon arrival.

From New Orleans, La.: Cotton has been in good demand throughout the week. All offers were quickly taken and orders were plentiful. Spots advanced 3/16c. to 7/16c. since the close last week. Middling is quoted at 10⅛c. Futures advanced 24 to 35 points. Sales are large. Crop news is unfavorable, owing to their having been no rain. The market is firm and advancing.

THE GROWING COTTON CROP.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Accounts of the growing cotton crop have not improved, for the caterpillar is now destroying the new growth of cotton put on by the August rains.

WOOL.

The situation is substantially the same as a week ago, but the movement in the aggregate has been smaller. More activity is shown in the demand for combing and delaine wools than for any other description, and all receipts are promptly marketed as soon as graded. The popularity of worsted fabrics appears to be growing, and a good deal of machinery has recently been diverted from less fashionable goods to this class of production. Spinners cannot turn out yarns fast enough to supply the demand, and some mills running on stockinets, Jersey cloths and a few other attractive novelties are compelled to work night and day to keep pace with the demand. Long staple wools are consequently so closely sold up in all markets that manufacturers have lately been giving more attention to shorter fleeces for use in this branch of the trade, and a better trade has therefore been done in quarter-blood clothing wools, both washed and unwashed. The market is naturally hardening for this class of wool, but any material rise is prevented by the fear of opening the door to foreign competition. Other descriptions of wool are fairly steady in price, but there is no tendency to improvement except on some of the more desirable lots of fine Ohio and Pennsylvania clothing wools, which can be more readily placed now at the extremes asked and hardly obtainable a few weeks ago.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The demand for wool continues good, the sales of the week amounting to 3,165,000 pounds of all kinds, and prices remain quite steady, with a very firm feeling for all desirable lots of delaine and combing and choice fine fleeces. The sales of Ohio and Pennsylvania have been at 36@37½c. per pound for X and X and above, and 37@39½c. for XX and XX and above. The stock of choice fine fleece is light for the season. Michigan fleeces are held firm at 34@35c. for X, but buyers do not take hold freely at these prices. Combing and delaine fleeces are firm and in demand. The sales have not been to any extent on account of the small available supplies, but all lots offering are readily taken at 35@41c. for fine delaine and 42@45c. for fine and choice combing selections. Unwashed fleeces are in demand and the sales of Texas, territory and western have been to some extent at a wide range of prices, but indicating no change since last week. California wool is quiet and demand moderate. A lot of 100,000 pounds choice northern spring sold at 30c. per pound. Pulled wools are in demand and steady. Sales of choice eastern and Maine supers at 40@42c., and common to good supers at 20@30c. per pound as to quality. Foreign wool is in moderate demand. Sales of 98,000 pounds Australia at full prices, and some lots of Mediterranean carpet. The best carpet wools are held above the views of buyers.

From Philadelphia, Pa.: A good trade in combing and delaine fleeces has been done at firm prices. Other descriptions have sold fairly but have not been active. The week's sales foot up 1,125,000 pounds, as against 1,300,000 last week.

From Cincinnati, Ohio: Wool is unsettled. Sellers are unwilling to accept buyers' prices. Little has changed hands.

From Chicago, Ill.: Wool is more active on orders from manufacturers, who are taking fair supplies, but buying with intelligent conservatism.

From Savannah, Ga.: The wool market very dull and unsatisfactory.

IRON.

The pig iron market at New York is dull. The small orders, as dictated by requirements, continue, but this should be the busy season with dealers, and the absence of a marked improvement in the demand is not inspiriting. Notwithstanding this, lower prices are not looked for, so that the outlook cannot be regarded with disfavor. Prices are unchanged. Arrivals of Scotch pig were smaller than usual, about 500 or 600 tons, none of which were stored. Prices of Scotch are unchanged, but have shown a slight tendency to decline. From reliable sources it is learned that stocks of manufactured iron west are light, which must insure a revival in the demand within a short time. Mills at Pittsburgh are fully employed, and any delay in deliveries is followed by complaints. This indicates a healthful demand. Good judges would not be surprised at a sudden advance in prices in the event of a continuance of but the existing rate of production and consumption.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is dull, aside from small lots for pressing requirements. Offers are made for large lots, but at lower prices than sellers are disposed to accept. There is a good demand and firm market for plate, sheet and structural iron, but merchant bar is moving only in small lots, and shows a weakening tendency. A good deal of business in steel rails is under treaty at $36 to $37 at mill.

From Cleveland, Ohio: The iron market is still quiet, but firm at present market quotations.

From Cincinnati, Ohio: The demand for pig iron appears to be confined to immediate consumption, and the market presents no new features. Manufactured iron is active. Stocks are fair and prices unchanged.

From Chicago, Ill.: There is rather more demand for refined iron and nails. Pig iron is slow.

From Detroit, Mich.: The iron market is unchanged. There is a steady demand, but prices are not profitable.

From St. Louis, Mo.: Pig iron is firmer, at an improved demand. Manufactured iron is in good sale, at unchanged rates.

AMERICAN HARDWARE.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Hardware, metals, tinners' stock and heavy iron goods are about the same as last week.

COAL.

There is no special change in the state of the anthracite coal market beyond the fact that the excess of production is slowly but surely gaining as compared with the records of 1882. Domestic coals are in greatest demand, and stocks are moving rapidly. Prices are fair—about up to the level previously reported, but in few cases realizing the September schedule. The outlook for a full fall trade is considered very good indeed, which promises to maintain the present high rate of production. The total quantity of anthracite taken out of the Pennsylvania mines in 1883 to September 1 was 19,784,727 tons, as against 18,114,913 tons in a like portion of 1882, an excess in the past eight months amounting to 1,669,814 tons. The accumulation of coal at the coast is not large.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal market is steady and firm, and sales are fair. Prices remain at the advanced figures of last week. The stock on hand is fair.

From Cincinnati, Ohio: Low water and increased consumptive demand caused an advance of 2c. a bushel in coal. Stocks on hand are fair.

From Savannah, Ga.: Coal merchants have a fair stock left over from last season, but are now sending for a new supply to meet pressing wants.

PETROLEUM.

There has been a noteworthy advance in prices of certificates of crude oil, beginning on Monday and reaching the highest point on Wednesday, the net gain over the average for the past month and longer being about 8c. per barrel. Heavy sales to realize profits brought down figures a little, but the market continued strong and with an upward tendency. The immediate cause of the advance is believed to be the pipe-line company reports, which show a decrease in stocks, as compared with August 1, from 36,371,939 barrels to 36,103,923 barrels, thus indicating a marked gain in consumption over production.

On Friday the market continued steady, opening at $1.11⅞, closing at noon at $1.11⅝, and at 1.30 P.M. opened again at $1.11¾, whence it dropped to ⅝. A well or two overhung the market, but for which, apparently, prices would have gone higher. The bullish feeling is largely based on the fact that in addition to the loss of oil from tank to supply consumptive demand (as shown by the last pipe-line company reports) that the average daily deliveries (out of the regions) from September 1 to 12 inclusive, were 70,000 barrels, against an average daily receipt by the tanks (runs) from the wells of but 57,000 barrels in the same time. At the close last night certificates were $1.11⅜, as against $1.08 on Friday of last week, an increase of 3⅜c. on the week.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, September 8	1.08	1.08¾	1.08	1.08⅝
Monday, September 10	1.09	1.11⅞	1 09	1 11⅞
Tuesday, September 11	1.13	1 16	1.12⅛	1.15⅞
Wednesday, September 12	1.16⅛	1.16¾	1.11¾	1.12¼
Thursday, September 13	1.12⅜	1.12⅞	1.11⅝	1.11¾
Friday, September 14	1.11⅞	1.12½	1.11⅜	1.11⅞

The unusual firmness in the refined market during the past week showed itself in an advance of ½c. on Monday, and a like amount again on Tuesday, although the latter was lost on Thursday after the decline in certificates. Higher European prices also had an effect. The demand has been fair, as it has also for crude. Prices for petroleum and its products have been, with comparisons, as follows:

	Aug. 17.	*Aug. 24.*	*Aug. 31.*	*Sept. 7.*	*Sept. 14.*
Certifi's, crude	1.10	1.07½	1.08⅜	1.08	1.11⅜
Refined, 110°	7⅞	7½	7¾	8	8⅛
Refined, 70°	8	7⅝	7⅞	8⅛	8¼
Crude, in bbls	6⅞@7⅞	6⅞@7⅞	7¼@7⅞	7⅜@7⅞	7½@8
Case, plain	9⅜	9	9¼	9⅜	9⅝
Naphtha	5¼	5¼	5¼	5¼	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending Sept. 8, was 15,830,221 gallons, against 12,634,708 in the preceding week. The total export from the United States since January 1 was 436,540,858 gallons, against 442,705,933 gallons in the corresponding portion of 1882, a decline in the current year of 6,165,075 gallons. The total exported from New York city during the week ended Sept. 8 was 11,898,233, and during the year, to that date, 359,092,970, against 349,337,346 gallons in a like portion of 1882. This shows an increase in shipments on the year from New York alone, as compared with 1882, of 9,755,624 gallons (crude equivalent) as against a decline from the country at large of 6,165,075 gallons.

OCEAN FREIGHTS.

The scarcity of desirable vessels held up rates on Saturday last, though otherwise there was no sustaining feature to the market. Early in the present week there were numerous arrivals, most of which had been previously engaged, many of them to carry cotton from southern ports. The shipments of grain were not noticeably heavy. The customary assortments of miscellaneous produce were sent abroad by steam at full average rates. The advance in petroleum checked exports of that commodity.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: A light business has been done this week, and rates have not materially changed. Tonnage offerings are light. The inquiry for charters is better for petroleum than grain, but not brisk for either.

From Savannah, Ga.: The demand for coastwise vessels is increasing.

From Wilmington, N. C.: Freights—foreign are firm, and tonnage is wanted; coastwise are quiet.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Although the season is fast drawing to a close there is still considerable activity in the market, and the indications are that duplicate orders will run along quite late. Factories on heavy goods continue full of work, and speedy shipments are urgently called for. Shipments for the week run up to 76,491 cases, and have been exceeded only twice during the season and never before in any previous year.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Minneapolis, Minn.: There is little change in the lumber trade, but an increase is noticed in shipping orders, and the market rules steady. No change in the situation at the lumber mills. Water in the upper river is low, and logs come forward slowly.

From Wilmington, N. C.: Timber, lumber and shingles are firm.

From Savannah, Ga.: The lumber business is quiet. For the whole season the movement has been retarded by the scarcity of tonnage.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Whisky is unchanged.

From Louisville, Ky.: Whisky exchange reports sales for the week exceeding 2,000 barrels. Prices are firmer and the tone of the market has slightly improved.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: The tobacco market has improved some. The growing crop in this section does not appear to be injured by the frost.

From Louisville, Ky.: The leaf tobacco demand is spirited and the market strong and advancing. Stocks are light and receipts small. Drouth has stunted the growth of late planted tobacco and prematurely ripened the whole crop. The leaf will be small and the crop will weigh comparatively light.

From St. Louis, Mo.: Leaf tobacco is very firm. The public tobacco sales are slow, but private trading is active.

From Savannah, Ga.: Tobacco merchants report sales hardly as large as last season, but business on the whole is satisfactory.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine is easier. Rosin is steady. Tar and crude firm.

SPECIAL NEW ORLEANS TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar is in fair demand and steady. Molasses is dull. Rice is dull; fair to prime is 5¼c. to 5⅞c. Cottonseed is easy and unchanged. Crude oil is 27c. to 28c., refined 38c. to 40c. Coffee is unchanged and strong.

THE TOBACCO CROP OUTLOOK.

[Special Correspondence BRADSTREET'S.]

Richmond, Va., September 11.—The latest information respecting the growing crop of tobacco contains that which warrants serious inferences regarding the reported and probable damage. In many sections of North Carolina the wind has driven down the plant, making the outlook worse than ever. A day or two of rain and light temperature, it is believed, would prove of great benefit in repairing the damage done. In southwest Virginia frost has appeared slightly, though so far no serious damage is noted. From Kentucky the intelligence received is not so favorable, the cool nights and frost having nipped the plant to a considerable extent. The supply of suitable wrappers for plug goods is scarce, with indications of greater scarcity and enhanced values. At present some grades have appreciated as much as 100 per cent., with an upward tendency, as the demand seems urgent.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, September 12.—The activity noted in business last week has undergone a further development, and, although there is an absence of that rush or scramble that sometimes prevails, it is safe to say that never before was there a larger volume of legitimate trade. The banks report a fairly good supply of paper seeking accommodation; there is an improved call from interior bankers, who send us paper and ask to have it rediscounted, but funds are in

good supply, and loan market easy at 5@7 per cent. New York exchange is quoted at 60c. discount per $1,000. The shipments of funds to the interior are fully up to last week's average, and merchants say collections were never better; scarcely a house in the jobbing trade complains at the slowness of country remittances, and some establishments express surprise at the percentage of cash sales and the liberality with which customers are paying their bills. The jobbing houses in dry goods are working from early morning until nearly midnight, and even with such extra exertions they find it difficult to keep up with the demand. The millinery, notion, fancy and furnishing goods establishments report a large gain in sales over last week. Clothing, hats and caps are selling fully as well as last week, and an increased trade is reported in boots and shoes. Leather shows a little more activity, and the tone of the market is more satisfactory. Hardware, metals, tinners' stocks, heavy iron goods, and all classes of wagon-makers' materials are in active request. Bar, plate and angle iron is jobbing freely, with a prospect that the week's distribution will exceed the preceding one. Pig iron is scarcely so active, the takings by manufacturers being smaller, but as they are carrying light stocks and a majority are fairly if not actively employed jobbers are hopeful of an early revival of trade, and are not inclined to shade prices in order to call out bids. Coal is moving freely, and the tone of market confident. Nails show about the same activity noted last week. The lumber trade has slightly increased, and is in a fairly healthy condition, although it is generally conceded that manufacturers are getting the largest share of profits. The grocery trade continues active, but there is the customary complaint that profits are meager, and many establishments find that it requires close figuring to make a fair interest on their capital. Tobacco and all collateral goods are active, and stocks are held with more firmness.

The receipts of wheat continue to exceed the outward movement, the demand from shippers being moderate and mainly for winter, and the market is depressed by large and increasing stock coupled with adverse foreign cables and prospects of an early advance in lake freights and marine insurance, and the market closes to-day at nearly the lowest prices of the past week.

The receipts of corn have been very heavy, and stocks in store show a slight increase, with a prospect of a further augmentation at the close of the week, but the recent damage by frost in portions of Wisconsin, Iowa, northern Illinois, Minnesota, Michigan and Dakota has called out a good speculative demand, and trading in futures is active at a marked advance on the ruling prices of a week since; but the uncertainty as to the actual damage sustained keeps the market in a feverish condition, and many who profess great faith in higher prices in the near future, and buy freely on downward reactions, sell when they get a small advance. Oats are slightly higher in sympathy with corn. Rye meets an active shipping demand, but the receipts are very large. The increased receipts of hogs weakens the speculative faith in provisions, and trading in pork and lard is closely confined to scalping operations, neither the bulls nor bears showing a disposition to take large risks. Meats are meeting a good shipping demand, but prices are largely controlled by the first-named articles. The following shows the stocks of grain in Chicago on the dates named;

	Sept. 8, 1883. *bushels.*	*Sept.* 9, 1882. *bushels.*	*Sept.* 10, 1881. *bushels.*
Wheat	5,823,000	1,561,000	4,121,000
Corn	2,270,000	1,604,000	5,924,000
Oats	623,000	980,000	943,000
Barley	579,000	207,000	238,000
Rye	22,000	43,000	64,000
Totals	9,315,000	4,395,000	11,290,000

THE RAILWAY ERA IN MEXICO.

Monterey, August 28.—Mexico is about the size and a good deal the shape of that portion of the United States that lies east of the Mississippi and Ohio rivers. It is made up of twenty-seven states, a territory (Lower California) and a federal district, and it has a population, in round numbers, of 10,000,000. The government is modeled upon our own, but in several respects is an improvement upon the model—that is, in theory. The practice of government in Mexico—though much improved in late years—leaves a good deal to be desired. It approximates closely to a military despotism. Popular suffrage exists, but is a farce. The "slate" is made by the party in power, and the returns are manufactured to suit the requirements of the situation. The real strength of the executive is the army. It is only just to the party at present in power, of which the central figure is Porfirio Diaz, to say that, while it has used every irregular method known in the compendium of Mexican statecraft for its advancement to and maintenance at the head of affairs, it has administered the government with more ability, and with more benefit to the people governed, than any native government that has preceded it.

Diaz won his "election" to the presidency by heading the successful revolution against Lerdo—and Lerdo deserved to be overthrown; he maintained his position by force of his firm hold upon the army; he nominated and caused to be elected his successor, the present president, Gonzalez, who really is Diaz under another name; he appointed himself, through Gonzalez, chief justice, the legal successor to the presidency, so that the death or illness of Gonzalez still would leave him at the head of affairs, and he now is making his arrangements for his "election" again to the presidency, when, next year, the term of Gonzalez will expire. In minor matters also the Diaz government has been equally at odds with the letter and the spirit of the Mexican constitution and laws. And yet, judged by the standard of previous administrations, the government has done well by the country. Diaz has sense enough to perceive that the only way in which any government can be strong in Mexico is by giving the Mexicans some stable interests in life, by taking their attention away from the government altogether and fixing it on their own private affairs. His effort, therefore, and there has been statesmanship in it, has been to develop the resources of the country, and so to build up a strong commercial class that, better than an army, shall defend his interests in its zeal to defend its own. A good deal of the revolution in times past has been because the revolutionists have had nothing in particular to do, and have been in such circumstances that they had nothing to lose and a great deal to win. Diaz has set about creating a class that will oppose revolution resolutely and that will support almost any government, for the consideration that the government, in the main, will let it alone in its money-making.

It has been in pursuance of this scheme for setting up a trading class that shall be a bulwark against revolt that railway-building has been begun in Mexico. It is generally supposed that the Americans took the initiative in the railway work that now is covering Mexico with a network of lines. This, in common with some other popular beliefs concerning Mexico, is an error. The railway system now being created by the two great companies, the National and Central, and to be extended by other smaller companies, really is a system as a whole, and was planned as long ago as the time of Juarez, and work would have begun then on the very lines which are in course of building to-day had not the death of Juarez intervened. The statesmen of the Diaz party were wise enough to continue the work that Juarez had left unfinished, and the American railway builders were permitted to enter upon the land. But the fact is to be remembered that the several American companies are but carrying into execution the comprehensive and coherent plan that the Mexicans themselves devised. The railroads thus planned will drain the richest portions of Mexico—opening direct communication between regions of production and the market that awaits Mexican products in the United States. Conversely, they will open to the United States the Mexican market for manufactured goods. And, finally, they will serve as military highways over which troops can be rapidly transported in the event of outbreak or revolt. In this connection the fact is to be noted that the recent outbreak in the state of Tamaulipas came to nothing because the existence of the Mexican National line gave the government effective command of the garrisons at Nuevo Laredo and at Monterey—forces which without the railroad would have been useless. On the railroads, therefore, the existing government relies, and with reason, for its lease of life. They are creating the trading class that it needs to fix its stability; they are supplying transportation facilities which enable it to check revolutionary risings before such risings have time to gather strength.

The whole policy of the Diaz government—reform, progress, consolidation—has for its mainspring, it must be remembered, the self-interest of the men in power. Naturally, this policy has many bitter enemies. All of the political antagonists of Diaz of course oppose it. They perceive that it really is a force strong enough to reduce Mexico to order, and, therefore, themselves to nothingness, and they are the more eager to break it down because they know that with each day of peace and prosperity the possibility of returning to the epoch of revolution becomes the more difficult. The policy is opposed also by many of the great merchants of the interior. Under the old order of things these men completely controlled the trade of the country. Their large capital enabled them to remain out of pocket between purchases and sales indefinitely. Their orders, placed in Europe, were not much under a year in being filled; half a year or a whole year more might pass before they received the payment for the goods sold. Small dealers, under these conditions, had no option but to take their goods from the great importers. The railroads have changed this situation. The American commercial traveler has made himself known in Mexico, and the small dealers are taking advantage of the possibility which his presence and the new means of rapid transportation provide to order goods direct from the United States. Of course the importers resent the new departure heartily; but the fact remains that here is the fulfillment precisely of the main purpose for which the Diaz party sought the introduction of railroads. The commerce of the country is dropping out of the hands of the large dealers—who were most useful to the revolutionists for "bleeding" purposes, yet who were not numerous enough to hold revolution in check—and as it falls it is being caught by a crowd of small dealers, no one of whom will be rich enough to make bleeding him profitable, yet who together will have a powerful influence upon public opinion in favor of peace, and who will be sufficiently numerous effectively to oppose attempted revolution by force.

The railroads are having the further and anticipated effect of developing the productive power of the country. Until now the slow and costly methods of transportation in Mexico—mule-trains and freight-wagons—have been an effectual bar to the marketing of the products of the interior other than silver. Vast tracts of rich land are lying idle because to cultivate them would be to raise crops which never could be sold. It is the same situation that obtained in Minnesota, for instance, before the railroads came in and made wheat-growing possible. There is in Mexico, to be sure, still another bar to agriculture in the existing distribution of land in large holdings, an arrangement that goes a long way toward shutting out individual energy. This, however, is a minor matter, for such of the large landed proprietors as do not themselves turn their estates to profit inevitably must sell out to their countrymen or to foreigners under the pressure of economic necessity. Already the effect of the new order of things is seen in the shipments of Mexican products into the United States through Chihuahua, and still more markedly because the route eastward is several hundred miles shorter and because northeastern Mexico is a far richer agricultural country than is northwestern Mexico, through Monterey. Conversely through both cities there is a steady flow of manufactured goods into Mexico from the United States. Chihuahua has been in railway connection with the United States just one year. In that time a very remarkable change has come over the business interests of the city and dependent territory. More machinery for mining, for agriculture and for manufacturing has come in during the twelvemonth than previously existed in all northern Mexico. An extensive bullion refinery has been set in operation; a planing mill, together with wood-working machinery generally, has been set up; a chair and furniture factory has been started (a most profitable enterprise, the customs duties on imported furniture being near 60 per cent. ad valorem); and besides these enterprises, there have been started a twenty-five-stamp silver mill, two mineral water factories, two breweries, a distillery, a soap and candle factory and an ice factory, and great improvements have been made by the erection of handsome stores. Here are substantial evidences of what may be expected all over Mexico as the railroads advance.

What has been actually accomplished in the way of strengthening the government is best shown by a comparison of the revenues before the railway period and of the present time. The budget of 1877-78 showed a revenue from all sources of $19,838,699. The budget of 1882-83 shows a revenue (excluding $2,000,000 raised by new duties, stamps, etc., not in existence previously) of $25,100,000. Of this sum $15,000,000 is the estimated return from customs duties. In point of fact, the net receipts from customs for the year 1882-83, as exhibited by the recent report of General Miguel de la Peña, collector at Vera Cruz, have been $24,363,827.17—$9,000,000 more than was anticipated. The increase in revenue in five years, therefore, has been more than $14,500,000. In other words, the revenue has been nearly doubled.

Owing to this great increase, and in conformity with the government's policy of giving Mexico substantial strength, measures have been taken for retrieving the national credit, until recently at a very low ebb. An agreement has been entered into between Señor Rivas, specially charged with the adjustment of the foreign debt, and the English bondholders that reduces the national debt to a manageable condition, provided that the agreement is confirmed and executed. The agreement provides for the issue of bonds, to be called sterling consolidated debt of the Mexican republic, of the total nominal amount of £20,000,000, bearing interest at 3 per cent. per annum. Of this sum £15,300,000 are to be appropriated to the conversion of the existing external debt of the republic issued in London, the exchange to be effected "at rates to be arranged." The rates may not be entirely satisfactory to the bondholders, but on the half-a-loaf principle they doubtless will be accepted eagerly. Five years ago, before the beginning of the railway era, anything like an honest adjustment of the Mexican debt seemed to be as hopeless as an honest adjustment of the Turkish debt is hopeless now.

Meantime, the railroads, the cause of all this hopeful change, are advancing rapidly. The Central, on all its divisions, for it is building on all at once, has completed 854 miles. On the main line, from the north southward 390 miles are finished, opening trade nearly or quite through to Durango. From the south northward 307 miles are finished. Just at present a halt has been forced in order to wait for the completion of the bridge at Encarnacion. With the completion of the bridge a rapid advance will be made to Zacatecas, nearly all the grading from Encarnacion to Zacatecas being in readiness for the rails, and the rails and ties ready to go forward when the bridge is done. This leaves a gap of less than 300 miles between the north and south ends of the track. On the National work also is going forward steadily. In a few days the line will be opened through from the Texan port of Corpus Christi to Saltillo, a distance of 400 miles. From the southern end the line has been advanced to Celeya, about 200 miles north of the City of Mexico. Work on the southern portion of the National has been delayed by the exceeding roughness of the country through which the line runs. A detailed description of the line between the City of Mexico and Toluca was published in the *Diario Oficial* of August 3. The report gives an adequate presentment of the magnitude of the work on this section. The line crosses the Monte de las Cruces at an elevation of 3,041 meters above the sea level; is 801 meters above the level of the City of Mexico, and 404 meters above the level of Toluca; is carried over a large number of trestles and fills and through much cutting in rock, and all in a distance of less than forty-six miles. However, the worst of the work is now ended, and, so far as material obstacles are concerned, good time can be made in carrying the road to completion. At present the gap between the north and south ends of the track is a distance of about 400 miles. Work on the branch lines of the National also is going forward. The International has made the important start toward getting into Mexico of building its permanent iron bridge across the Rio Grande at Piedras Negras, and has completed forty miles of road on the Mexican side. The surveys for the line through the eastern coast region (Telefener concession) are being made, and 10,000 tons of railway material have been bought in England with which shortly construction will be begun.

On the whole, then, the purpose that the Diaz party aimed at is being accomplished. The country is taking a fresh start, and the probability of revolution is decreasing every day. From the standpoint of the United States, the interest attaching to the change is due to the possibilities of money-making which it has created. Mexico at present invites immigration and capital, not in the wholesale fashion that these are invited by the new regions in our own western country, but under conditions. Almost any man who goes west with pluck or with money is pretty sure to find an opening into which he will fit, and in which he can make more or less of a fortune in a relatively short time. If his capital consists of both pluck and money his future is sure. But in going to Mexico in search of a fortune, as a good many men are doing now, further and special requirements are needed in order to insure success. One of these is at least a working knowledge of Spanish; the other is the faculty of finding out understandingly Mexican ways, with the further faculty of adaptability to these ways when they are discovered. It is precisely because a large number of the Americans who have gone down to Monterey and Chihuahua have not realized the necessity of entering into the feeling of the country, or have been unable to enter into the feeling of the country, that they have come back disgusted by a failure that is due not to any lack on the part of Mexico, but to a lack in themselves of the reasonable requirements which Mexico places upon them as a preliminary to success.

T. A. J.

ELECTRICAL APPLIANCES ABROAD.

Foreign trade journals record a more rapid and various application of electricity abroad than has been noticed thus far in the United States. It is extremely doubtful if in this country, beyond its use in incandescent and arc illumination, much application has been made of it in the new harness which such men as Edison, Brush, Maxim and others have furnished. One hears of electric railways and electric motors for domestic and other small machinery, but thus far the use of the same has been limited. The use of the incandescent as well as the arc light for illuminating vessels, both harbor and transatlantic, is quite a feature at home as well as abroad. In the United Kingdom the largest contract for electric lighting that has been concluded for some time was made at Glasgow recently with the owners of the New Zealand Shipping Company's fleet by the Edison Company's branch in Scotland. Three fine steamers are to be lighted throughout with the incandescent light, and fitted with a duplicate set of Edison's marine dynamos and engines, one set being for reserve in case of emergency. It is remarked by a disinterested witness that these steamers, when finished, "will be the finest electrically-equipped vessels afloat." But to depart from the commonplace to the unique it remains only to be added that Baron Rothschild's carriage at Vienna is lighted by electric light. The apparatus is beneath the coachman's seat, and the light, which will burn one hundred hours, is placed within ordinary carriage lamps. This would attract attention in any city, but not less than would the conceit introduced by some fashionable ladies during the last London season—that of wearing "electric jewelry." In treating of this subject a foreign writer remarks that notwithstanding the brilliancy and beauty of this variety of personal ornamentation he prefers paste jewelry, and adds: "Apart from the effect, it is not pleasant to be in charge of a lady with an electric machine in her pocket—the thing might go wrong."

THE GRAIN TRADE OF BALTIMORE.

The Baltimore *Journal of Commerce*, in making a comparison of grain receipts at the Atlantic ports during the year to September 1, places emphasis on the statement that, notwithstanding free tolls on the Erie canal and cheap barge transportation on the Mississippi, neither New York or New Orleans have drawn away any of Baltimore's share of the grain trade. On the other hand it is asserted that Baltimore's grain receipts have made relatively a larger gain than those of any other Atlantic port. To show this the following table, showing receipts of wheat and corn at the cities named in eight months of 1882 and 1883, with gains, is furnished:

	Jan. 1 to Aug. 31, 1883, total receipts, bush.	*Jan. 1 to Aug. 31, 1882, total receipts, bush.*	*Increase, bush.*	*Percentage of increase*
New York...	38,114,471	32,457,201	5,657,270	17 3
Baltimore....	21,416,314	11,786,846	9,629,468	81.7
Philadelphia.	9,670,845	6,997,542	2,673,303	37.9
Boston.....	8,340,470	6,507,758	1,832,712	28.1
New Orleans.	10,326,250	4,730,607	5,595,643	118.2
Montreal ...	7,257,354	5,202,064	2,055,290	39.5
Totals.....	95,125,704	67,682,018	27,443,686	....

Notwithstanding the fact that New Orleans gained a larger percentage than any other port, that city still had less than one-half as large total receipts as Baltimore, and shows no more prospect of becoming a formidable rival to Baltimore than she did six or seven years ago. Comparing the receipts of wheat and corn separately, it is noted that New York's receipts of wheat decreased from January 1 to September 1, 1883, as compared with a like period in 1882, fully 8,600,000 bushels, while those at Baltimore gained 1,707,000 bushels. New York, since January 1, received 2,900,000 bushels more wheat than Baltimore, but from January 1 to August 31, 1882, the difference in favor of New York and against Baltimore was 13,200,000 bushels. The aggregate gain in Baltimore's corn receipts is less than New York's, yet the percentage of gain at Baltimore has been three or four times as great as at New York. At all the other ports there was a gain in the combined receipts of wheat and corn ranging in amount from 5,595,643 bushels at New Orleans to 1,832,712 bushels at Boston.

THE FREE NEGRO IN JAMAICA.

Recent statistics of the trade of Jamaica would seem to indicate that, notwithstanding allegations to the contrary, emancipation has had a distinct effect in promoting the progress of the negro in economic conditions. The total exports for the past financial year amount in value to over a million and a half sterling, an increase of more than £370,000 on the previous year, and of £205,000 on the average of the five years preceding. The imports show a decrease of £70,000, which was mainly owing to the largely increased production of ground provisions and other necessaries grown by the native population, the practical working body of which consists of negroes. Turning to details it appears that the exports of rum were the largest since 1839, and that the exports of sugar were the largest for forty years, with the exception of those in 1845 and 1847. Owing to drouth last year the coffee crop was a bad one, and exports fell off as compared with the preceding year. The prospect for this year's crop are thus far excellent. A very striking increase is noted in the fruit trade with America—a business almost entirely in the hands of small negro cultivators. In 1867, the exports of fruit to America (bananas and oranges) were valued at £725; last year the total value of the trade was £124,000. The export trade to England appears to be decreasing, while that to the United States and to Canada is increasing. The fact that the value of the foodstuffs imported has steadily decreased during the past few years testifies to a considerably increased home production. The population of the island is about half a million. The total number of holdings is 52,000, of which nearly 10,000 are less than one acre, and 26,000 are between one and three acres. The proportion of the small holdings under cultivation is much greater than the proportion of the larger estates, large proportions of which still remain in wild land. All these figures point to one fact, namely, that the free negroes in Jamaica are gradually progressing in habits of thrift and industry.

TRADE EMBARRASSMENTS.

There were 136 failures in the United States reported to BRADSTREET'S during the past week, 6 less than the preceding week, 3 less than the corresponding week of 1882, and 48 more than the same week of 1881. Compared with the previous week the middle states had 28, an increase of 4; New England states 23, a decrease of 5; southern states 18, a decrease of 1; western states 54, an increase of 6; Pacific states and territories 13, a decrease of 10; Canada and the Provinces 14, a decrease of 3. Among the firms reported embarrassed were John C. Ryle & Co., silk throwsters, and John P. Mackay, manufacturer of silk goods, Paterson, N. J.; Bacher & Dreyfoos, manufacturers of lace goods, and Gruber, Hoopes & Co., wholesale hats, Philadelphia, Pa.; E. & A. C. Manson, hotels, Augusta and Old Orchard, Me.; Hill, Nall & Co., manufacturers of barrels, and F. A. Reuss & Co., commission and grain, St. Louis, Mo.; Schulte, Hill & Nall, bankers, Fredericktown, Mo.; Ephraim Berlowitz, manufacturer of clothing, New York. In the principal trades they were as follows: General traders 21; grocers 18; clothing 14; liquors 11; manufacturers 9; hotels and restaurants 7; shoes 7; jewelry 6; hardware 5; dry goods 3; produce and provisions 3; millinery 2; hats 2; grain and flour 2; lumber 2; drugs 2; gents' furnishing goods 2; silk 2.

ALABAMA.

BIRMINGHAM.—R. H. Roberts & Co., hardware, offer 33 1-3 cents.

COALING.—Johnson & Co., general store, have failed.

COALING.—William B. Martin, saw mill, has failed.

CALIFORNIA.

ANTIOCH.—B. F. Kearney, hotel, has applied for relief in insolvency.

BAKERSFIELD.—J. J. Murphy, general store, has assigned.

LOS ANGELES.—George A. Vignolo, grocer, has assigned.

MANCHESTER.—Savage & Co., general store and mill, have called a meeting of creditors.

OAKLAND.—Caleb C. Terry, contractor, has filed a petition in insolvency.

SAN FRANCISCO.—Dallin Brothers, merchant tailors, have given a bill of sale to creditors.

SAN FRANCISCO.—L. Laviosa, hats, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—Alexander Mann, cigar manufacturer, has filed a petition in insolvency.

SAN FRANCISCO.—Joseph M. Morrossey, shoes, is reported to have failed.

SANTA ANA.—T. S. Harris, publisher, has assigned.

VISALIA.—John Golden & Son have filed a petition in insolvency.

WOODLAND.—C. D. Morin, hardware, has sold out and been attached.

COLORADO.

ALAMOSA.—W. R. Davis. drugs, has been attached for $800.

DENVER.—Matt. Finehart, saloon, is reported to have failed.

DENVER.—H. Ornauer, merchant tailor, is being closed by creditors.

DENVER.—H. T. Vandenberg & Co., wholesale liquors, have assigned. Liabilities $16,000; nominal assets $12,000.

DURANGO.—F. C. Lawrence, jeweler, has assigned to George W. Brown. Liabilities $1,000.

SOUTH PUEBLO.—A. R. Campbell, jeweler, assigned on the 11th inst.

DISTRICT OF COLUMBIA.

WASHINGTON.—G. E. America, grocer, has assigned.

GEORGIA.

AUGUSTA.—Thomas H. Henry, shoes, has assigned.

SAVANNAH.—Edward Selms, groceries and liquors, has assigned.

ILLINOIS.

BELLEVILLE.—F. A. Reuss & Co., millers, have assigned. See St. Louis for particulars.

CHICAGO.—John P. Eastman, grocer, has been closed by the sheriff.

CHICAGO.—Lehnberg & Broms, grocers, have assigned.

CHICAGO.—M. S. Nichols & Co., grain, have resumed.

CHICAGO.—H. L. Spangenberg, leather, has assigned. Liabilities about $10,000.

CHICAGO.—Upham & Purington, tailors, have been closed by the sheriff.

EL PASO.—Colton Brothers, agricultural implements, have assigned.

HEYWORTH.—T. J. Gardenhire, general store, has failed. Liabilities about $3,000.

MOLINE.—W. F. Hall, furniture, has been closed by the sheriff.

NEWTON.—Arbuthnot & Bishop, clothing, have failed and turned over the stock to A. S. Voorhesse, of Cincinnati, a creditor for $8,600.

ROCK ISLAND.—H. H. De Saito, drugs, has been closed by the sheriff.

INDIANA.

COLUMBUS.—C. F. Collins & Co., shoes, have assigned to John V. Stover. Liabilities about $15,000; assets $6,000.

IOWA.

CARROLL.—M. Olsen, general store, has mortgaged everything to creditors.

CEDAR RAPIDS.—Maxwell & Jones, tailors, have been closed on a chattel mortgage.

CENTERVILLE.—G. A. Henry, clothing, has assigned to B. F. Silknitter. Liabilities about $5,000; stock $8,000.

DUBUQUE.—Gottlieb Schollian, clothing and dry goods, gave chattel mortgages for $6,821 and assigned.

LUCAS.—Swanson & Berquist, grocers, have assigned.

ROCK RAPIDS.—Dunlap Brothers, general store, have been closed by the sheriff.

WYOMING.—Gilbert & Stuart, creamery, have assigned.

KANSAS.

LARNED.—S. B. Curlett, harness, has been closed out by creditors.

LOUISIANA.

EDGARD.—Lapeze & Berthelot, general store, have failed. Liabilities $2,000.

NEW ORLEANS.—Edward M. Ivens & Son, machinery, are asking an extension. They claim assets $56,000; liabilities $17,000.

MAINE.

AUGUSTA.—E. & A. C. Manson, hotel, have failed, with large liabilities. They also run the Ocean House at Old Orchard.

MECHANICS' FALLS (Minot).—John C. Walker, drugs, has been attached for $15,000 by the inhabitants of Minot.

PORTLAND.—At a meeting of the creditors of Phinney & Jackson, West India goods, Mr. Phinney offered 12½ cents cash or 15 cents on time, of which 5 cents would be at nine months, with interest, and to be relieved from responsibility. No action was taken.

READFIELD.—The Readfield Woolen Manufacturing Company has been attached for $10,000.

WESTBROOK (Saccarappa).—C. A. Anderson, hotel, is reported in insolvency.

WINTHROP.—M. Hall, furniture, owes $2,522; assets $700. Most of the creditors have agreed to accept 25 cents.

MARYLAND.

BALTIMORE.—Albert H. Bruggerman, tailor, has filed a petition in insolvency.

MASSACHUSETTS.

ATTLEBORO.—George A. Sweeney, hardware, offers 20 cents.

BOSTON.—C. B. Barrett & Co., wholesale liquors, have filed a petition in insolvency. The firm liabilities are $11,075; nominal assets $21,145. Liabilities of Mr. Barrett unsecured $31,324; secured by realty mortgages $115,000; nominal assets $178,504. Liabilities of A. A. Jenkins $10,450; assets small.

BOSTON.—E. B. Bellows, liquors, is in insolvency. Liabilities $2,627; no assets.

BOSTON.—Graves & Co., fruits, have failed, and offer 15 cents. Liabilities about $1,600. The firm goes out of business.

BOSTON.—J. L. Hammett, school supplies, has failed. Liabilities $31,625, of which $7,950 is secured by mortgage on real estate. The unencumbered assets consist of stock $1,200, accounts $360, cash $83, a note of $2,000, a claim for $3,658.

BOSTON.—W. J. Huse, tailor, has failed. He thinks he can pay 25 cents.

BOSTON.—Mendle Rothenberg, tailor, has failed and gone into insolvency. Liabilities $5,400; no assets.

BOSTON.—Walter S. McClure, produce, has failed and is in insolvency.

LOWELL.—I. B. Whittemore, grocer, is reported to have failed.

MARBLEHEAD.—S. E. Crowell, shoe manufacturer, has failed. Creditors are accepting 20 cents.

NEWTON.—The stock of James A. Derkin, grocer, was sold out by the sheriff for about $200. Claims for $3,000 were sued.

NORTH ABINGTON.—W. S. Wales, boot manufacturer, owes $10,000, mostly indorsements; no assets.

NORTH ADAMS.—W. J. Oatman & Co., printers, have been attached. Liabilities about $1,500; assets nominally the same.

NORTH ADAMS.—Robert Tobin, dry goods, has failed. Liabilities $4,000; assets nominally the same.

NORTH ATTLEBORO.—John Betz, tailor, says he is unable to meet maturing debts. He will take stock and advise with his creditors.

NORTH BROOKFIELD.—H. S. Lytle, grocer, has failed and is reported offering 35 cents.

REVERE.—W. P. Comee, hotel, has failed.

ROCKPORT (Pigeon Cove).—J. F. Sewell, hotel, has failed and will settle in insolvency.

SOMERVILLE.—S. Armstrong & Co., coopers, have failed. Liabilities about $21,000; available assets $13,000.

MICHIGAN.

ALPENA.—The Prentiss Lumber Company and George Prentiss, pine lands, have given a trust deed for $125,000 to George L. Malts. Other liabilities $50,000.

DETROIT.—W. B. Allison & Co., manufacturers of wire goods, have assigned to The National Wire & Iron Company.

LAKE VIEW.—O. B. Loveless, saloon, has sold out and is reported to have left town.

ST. JOSEPH.—Higman Brothers, lumber, have failed.

ST. LOUIS.—Hiram B. Giddings, grocer, has assigned.

MINNESOTA.

HOKAH.—W. F. Weber, agricultural implements, has assigned.

HOKAH.—Weber & Snure, general store, who recently assigned, owe $5,000; assets $3,000. It is thought they will pay about 25 cents.

ST. CLOUD.—John McNabb, saloon, has been closed on attachment.

MISSOURI.

ASH GROVE.—A. F. Vanpelt, saloon, has been closed by creditors.

CARTHAGE.—Emery & Mariner, agricultural implements, have assigned.

FREDERICKTOWN.—Hill & Nall, general store, have assigned on account of the embarrassment of Hill, Nall & Co., of St. Louis. The liabilities are $12,000; assets $35,000.

FREDERICKTOWN.—Schulte, Hill & Nall, bankers, have assigned on account of the embarrassment of Hill, Nall & Co., of St. Louis. A run was made on the bank caused by a rumor that the firm had lost $50,000 in futures, which the firm claim is false. Their liabilities are $90,000; assets $140,000.

HIGGINSVILLE.—L. C. Bagby, jeweler, has sold out to St. Louis creditors. Other liabilities are $1,000.

KANSAS CITY.—H. F. Davis & Co., commission produce, have given a forced bill of sale.

KANSAS CITY.—The Gate City Lumber Company has been closed by the sheriff.

ST. LOUIS.—Hill, Nall & Co., barrels, headings, etc., have become financially embarrassed. Their liabilities are about $117,000, of which $65,000 is due St. Louis banks, unsecured; $32,000 to Schulte, Hill & Nall, of Fredericktown, and the balance to merchandise creditors. The nominal assets are $145,000. Their new factory has just been completed. The business was established in 1878.

ST. LOUIS.—F. A. Reuss & Co., commission and foreign exchange, assigned on the 12th inst. to George Lang. Assets $27,000. The firm have been established about twenty-five years, and had flour mills at Belleville and Smithtown, Ill., and a grain elevator at Marissa, Ill.

NEBRASKA.

CENTRAL CITY.—J. E. Honsal, jewelry, is reported to have left town.

LIBERTY.—Thomas Shields, agricultural implements, has failed. He was burnt out, losing about $2,000, and being attached made an assignment.

SEWARD.—Newton & Duffy, plaster, are reported to have left town.

WOOD RIVER.—J. D. Ellis, grocer, has sold out.

NEW HAMPSHIRE.

CONCORD.—A. B. Sanborn, furnishing goods, is reported to have failed. Liabilities about $10,000; assets about $5,000.

MANCHESTER.—Borie & Chatel, grocers, are reported to have failed. Liabilities $3,600.

MANCHESTER.—George W. Newell & Co., grocers, are reported to have failed. Liabilities about $1,500.

NASHUA.—Robert Munroe, shoes, has been sold out by the sheriff.

PORTSMOUTH.—C. Sullivan & Co., fish, have assigned. Liabilities about $10,000; assets $3,000.

NEW JERSEY.

PATERSON.—John P. Mackay, manufacturer of silk goods, failed on the 11th inst. He purchased his material principally from John C. Ryle & Co., to whom it is said he is indebted to the extent of $75,000. His liabilities are estimated at $90,000, outside of advances. It is not thought the assets will pay 25 cents. His goods in New York have been attached.

PATERSON.—Nightingale Brothers, silk manufacturers, have obtained an extension of three years, the property to be placed in the hands of Mr. Dean, of Stoddard, Lovering & Co., of Boston, as trustee, until the notes are paid in full. The liabilities are about $70,000 to $80,000.

PATERSON.—John C. Ryle & Co., silk throwsters, failed on the 11th inst., their notes having gone to protest on account of the failure of John P. Mackay, who it is said owes them $75,000. Their liabilities are $99,477. The assets are nominally $144,000, consisting of machinery $15,000: accounts receivable J. P. Mackay $75,000; F. W. Alcock $54,000. A meeting of creditors has been called for the 15th inst.

WOODBURY.—M. Ware Scott, grocer, has assigned.

NEW MEXICO.

ALBUQUERQUE.—Anderson Brothers, merchant tailors, are reported to have left town.

NEW YORK.

BUFFALO.—Lester B. Smith, agent, restaurant, has assigned.

BUFFALO.—The schedules of William Wright, millinery, show liabilities $6,380; nominal assets $10,157; actual assets $5,777.

JAMESTOWN.—Charles H. Clark, successor to Clark, Parker & Co., plumbers, has assigned to Charles C. Clark, giving preferences for $1,500. Liabilities about $2,500; nominal assets about the same.

NEW YORK CITY.—Ephraim Berlowitz, manufacturer of clothing, assigned on the 13th inst. to Philip Bernstein, giving eight preferences for $8,120, the largest being to Max Berlowitz $2,147; Marcus Kronfeld $1,801; J. M. Valentine $1,090. The liabilities are reported at from $50,000 to $60,000. The failure is severely criticised by the creditors.

NEW YORK CITY.—Lucien F. Brigham, ship chandler, assigned on the 10th inst. to George W. Alexander, giving two preferences for $674. He failed in 1877, and compromised at 20 cents.

NEW YORK CITY.—Joseph J. Brown, fancy goods and millinery, assigned on the 13th inst. to Isidore Jacobs, giving four preferences for $2,036, of which $1,326 is to the assignee. He started here in April last, having previously been in business for eleven years at Paterson, N. J.

NEW YORK CITY.—John S. Cole, surviving partner of Roby & Cole, cardboard, assigned on the 14th inst. to John M. Reed.

NEW YORK CITY.—The schedules of William Dunbar, tailor, show liabilities $10,309; nominal assets $8,042; actual assets $2,843.

NEW YORK CITY.—Henry F. Hills & Co., straw goods, have compromised at 20 cents, 7½ cents cash, 7½ cents in six months, and 5 cents in nine months. The firm has dissolved, and Mr. Hills continues alone.

NEW YORK CITY.—Guiseppe Nerini, restaurant, assigned on the 12th inst. to Lorenzo Marino, giving preferences for $525.

NEW YORK CITY.—Maximilian M. Ruttenau, oil broker, assigned on the 12th inst. to George H. Kraus. He was caught short of oil and about 85,000 barrels were bought in for his account under the rule.

ROCHESTER.—George J. Wagner, Jr., grocer, has been attached.

UTICA.—Charles H. Thorn, gents' furnishing goods, has assigned to D. T. Everts, giving preferences for $3,217. It is thought the assets will not pay more than the preferences.

OHIO.

CLEVELAND.—Richard F. Ruth, grocer, has assigned.
NEWARK.—Mrs. S. M. Wallace, dry goods, has been closed by the sheriff.
NEW LISBON.—Joseph Estill, shoes, has assigned to Conrad Hune.
SOUTH CHARLESTON.—McMillen & Norton, grocers, have assigned.
SPRINGFIELD.—Phillips & Montgomery, tailors, have been closed by the sheriff.
SPRINGFIELD.—The Springfield Co-operative Company has been closed by the sheriff.
TOLEDO.—C. R. Howard, commission grain, has failed on account of losses in wheat operations. Liabilities $6,500.

OREGON.

PORTLAND.—John Kriskil, hotel, has been sold out by the sheriff.

PENNSYLVANIA.

FREELAND.—O. M. Miller, jeweler, has been closed by the sheriff.
LEHIGHTON.—George W. Snyder, baker, has been closed by the sheriff.
PHILADELPHIA.—Bacher & Dreyfoos, manufacturers of laces, are advertised to be sold out by the sheriff on the 18th inst. They confessed judgment for $23,690 in favor of Samuel Sternberger, of L. & S. Sternberger. Liabilities reported at from $40,009 to $60,000. It is thought the assets will not more than cover the judgment.
PHILADELPHIA.—Henry W. Bente, confectioner, against whom execution was issued on judgment for $700 in favor of J. G. R. McCorkell, was sold out by the sheriff. He is now managing the store for John McDevitt.
PHILADELPHIA.—George Bern, manufacturer of carpets, against whom execution was issued on judgment for $1,575 in favor of the National Security Bank, was sold out by the sheriff, and it is said his properties will be disposed of in the same manner. Liabilities about $4,000.
PHILADELPHIA.—Execution has been issued against Raphael Brunswick, agent, jeweler.
PHILADELPHIA.—Execution has been issued against John G. Fleck, liquors.
PHILADELPHIA.—Execution has been issued against Alfred Gibson, manufacturer of shoes.
PHILADELPHIA.—Gruber, Hoopes & Co., wholesale hats, caps, straw goods, furs, etc., suspended payment on the 8th inst., caused by depression in trade and their inability to collect outstanding accounts. Their liabilities are said to be about $35,000 to $40,000.
PHILADELPHIA.—Execution has been issued against Samuel M. Kitchman, dyer, on judgments for $2,400.
PHILADELPHIA.—The Peerless Manufacturing Company, manufacturer of Peerless gas machines, was advertised to be sold out by the sheriff. A judgment for $413 in favor of William J. Cunningham was filed on the 4th inst., on which execution was issued, returnable on the 17th inst.
PHILADELPHIA.—Tomlinson & Elliott, coal, have been sold out by the sheriff, realizing about $500.
PHILADELPHIA.—Jonathan P. Vandergrift, grocer, has been sold out by the sheriff.
PHILADELPHIA (Germantown).—Shore & Shaw, yarn spinners, have had execution issued against them on judgment for $8,566 in favor of M. A. Furbush.
PITTSBURGH.—The Ihmsen Glass Manufacturing Company has assigned to Edward Kelly, Jr.
PITTSBURGH.—Executions for $1,018 have been issued against W. H. Reihing, saloon.
PITTSBURGH.—J. P. Rex, saloon, has been closed by the sheriff.
PITTSTON.—Louis Daltroff, grocer, has been closed by the sheriff.
SUMMIT CITY.—Duffey & Higgins, grocers, have been closed by the sheriff.
TEN MILE.—Samuel Reese, general store, has been closed by the sheriff.

RHODE ISLAND.

PAWTUCKET.—N. W. Pierce, trading as N. W. Pierce & Co., manufacturers of cardigans, has assigned to Richard A. Gage.

TENNESSEE.

ALAMO.—E. Ellington, saloon, has been closed by the sheriff.
BROWNSVILLE.—Mrs. E. M. Chellis, millinery, has assigned to C. S. Talliferro.
CHICKAMAUGA.—S. J. Gilliland, general store, has assigned.
COLUMBIA.—W. H. Safford & Brother, general store, have assigned.
CROSSVILLE.—Atkinson & Dunbar, general store, have dissolved and been attached.

TEXAS.

ANDERSON.—W. P. Dashiel, general store, has been attached.
CALDWELL.—Clark & Douglass, general store, have been attached.
CORPUS CHRISTI.—E. H. Wheeler, shoes, is asking an extension.
HUTCHINS.—B. D. Atwill, general store, has assigned to A. S. Clark. Liabilities $4,000; assets $3,000.
WESLEY.—Joseph Mikiska, general store, has been attached.

UTAH.

GERMANIA.—Bamberger & Behrman, general store, have been attached for $9,130.

VERMONT.

BELLOWS FALLS.—The unsecured liabilities of George F. Woods, drugs, are $1,500. The stock, worth less than $2,000, is mortgaged for $2,500.

VIRGINIA.

GORDONSVILLE.—E. J. Falconer, general store, is dead, and the estate is in the hands of the sheriff.

WISCONSIN.

MILWAUKEE.—H. S. Benjamin, sewing machines and wagons, assigned on the 10th inst. to Charles Warner. Liabilities about $60,000; assets about the same.

MANITOBA.

BRANDON.—T. T. Atkinson, general store, has assigned.
REGINA (Northwest Territory).—J. J. Campbell & Co., general store, have assigned.
REGINA (Northwest Territory).—Moulton & Howson, hotel have assigned.
REGINA (Northwest Territory).—R. D. Prest, hotel, has assigned.
STONEWALL.—Carman Brothers, general store, have assigned.

NEW BRUNSWICK.

ST. JOHN.—Peters & Sutherland, shoes, owe about $25,000; assets $15,000. C. H. Peters holds a bill of sale on all stock, etc.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, SEPTEMBER 22, 1883.

NOTES OF THE WEEK.

The peculiar workings of the Pension Bureau have attracted attention before, and are likely to furnish matter for comment again. Last year the large estimates made by Commissioner Dudley regarding the probable expenses of his office furnished arguments to those who were laboring to put off the evil day of revenue reduction, and it is needless to say that they were made the most of. The appropriation with which the Commissioner finally contented himself, though a reduction upon his first estimates, was yet sufficiently high not to weaken very materially the arguments of the high-tariff men. Mr. Dudley's subsequent conduct was such as to strengthen the impression that his first estimates had produced. During the first quarter of the last fiscal year he drew nearly one-fourth of the whole amount appropriated for his bureau. Thereafter, upon his representations, the working force of his bureau was increased by about fifteen hundred clerks. An increase instead of a decrease of the expenses of the bureau was naturally expected, and it began to be feared that there might be a deficiency in the amount set apart for pensions. The fact, however, has been otherwise. Almost immediately after the appointment of the new clerical force the pension payments began to fall off in amount. The Commissioner now finds that he will be unable to disburse anything like the amount appropriated for him, and that he has to wait upon the mails to find employment for his clerks.

The position of affairs here outlined is a very peculiar one indeed, and suggests some pertinent reflections. It would, for instance, be very interesting to learn how the commissioner was led to make the extravagant estimates he did, and what influence, if any, the agitation of the tariff question had upon those estimates. That, however, is a matter of the past; the situation in the Pension Bureau is likely to be not without important consequences in the future. Commissioner Dudley has time and again succeeded in disturbing the estimates of the Treasury Department in regard to expenditures; the revelations of his office now bid fair to be an even greater source of trouble to the politicians who are trying to evade the tariff issue. Current indications point to a considerable surplus in the Pension Bureau, and if other conditions are favorable the surplus revenue may reach a very large amount. That would be a result for which the politicians referred to would be very ill-prepared. In the face of a large surplus their arguments, already well worn, would be of little avail. Some way for getting rid of at least a portion of the surplus must be found. The extreme protectionists of Pennsylvania, recognizing this, have of late devoted themselves to the advocacy of a project for distributing the surplus among the states. We have pointed out the absurdity of this scheme, but it is not necessary to insist further upon that point. The people are not likely to be deluded by the plans urged in favor of it. The outlook at present is for a further reduction of the revenue, and upon this point the extreme protectionists may as well make up their minds.

The subject of the possible competition of Russian petroleum with the American product in Russia and in other eastern European as well as western Asiatic markets has attracted considerable attention. BRADSTREET'S was one of the first to make an extended inquiry into the existing and probable future supplies of mineral oil in Russia and Roumania, the results of which were published about a year ago. The correspondent (at Vienna) concluded that while American petroleum has a higher illuminating quality, the very low rates at which Russian and other foreign oils can be produced and sold will, upon the completion of projected lines of transportation, offer a serious competition to the product of the Pennsylvania wells. Recent communications to the State Department at Washington, by American consuls, call attention to the fact that dealers in Asia Minor are selling Russian oil in American cases or imitations thereof. From this it has been argued that the Russians, being obliged to do this, acknowledge themselves beaten in a struggle between the oils of the old and of the new worlds, if compelled to abandon the use of American trade-marks. This hardly follows. Russian oil is going into consumption in the Asiatic-East in relatively large quantities, and possession of the markets, whether in disguise or not, means competition. Russian refining processes are being greatly improved. In a letter from London, published in this issue, it is stated that a lamp has been invented in which the heavier mineral oils will burn. Our correspondent also quotes from a report of the Chamber of Commerce of Breslau on the advance in the use made of Russian oil in Russia, Germany and other countries. But Russia not only aspires to supply the Orient and its neighbors with an illuminant in Baku petroleum, but is beginning to ship fresh meat to London. The live stock come from the "Russian steppes," where they are practically inexhaustible, are slaughtered on the shores of the Black sea, and sent to London in cold-air chambers.

The stock market during the past week has suffered another bad break from the same cause as made the last, viz., the extreme weakness in the Villard stocks. The decline in them has not been so sudden or so violent as it was on the former occasion, and the general market, having the entire support of Mr. Gould, has shown a good deal of stubborn strength under the weight thrown upon it; but nothing could entirely resist the demoralizing influence of the free selling out of stocks by people who had early information of the extremely unfavorable features of the Northern Pacific annual report, which was issued on Thursday. The bear combination in the street, which seems now to be unusually compact and well provided with money, appeared to have information as early as any one, and made use of it with great skill and effect.

So much attention has been given to the so-called dry goods district of New York city, in discussions concerning insurance, that the retail dry goods stores outside of that district have been little mentioned. It has been reported during the week that the underwriters have agreed upon an advance in rates upon these "outside" stores, the number to be affected principally varying from fifty to one hundred, and the customary resistance is excited. There are two facts that are indisputably clear—that fire insurance has not been properly remunerative, and yet that the insurance account is a heavy burden to nearly all business men, many of whom point, with continued grim humor and pathos of the pocket, to their continuous payments to the companies for terms of from ten years to half a lifetime without having asked for any payments in return. There is no moral but the worn one that all costs must lie on the consumer, and that severe premiums on one hand and meager margins for them on the other prove the risks too great for the premiums. From east to west, north to south, city to country and back again the charge of being taxed unduly to cover undue risks elsewhere is tossed, and the problem of distribution and redistribution of hazards is only so much nearer settlement as time and growing agitation bring it. If the dissatisfied storekeepers really believe self-insurance the cheaper, a trial of it will be a wholesome experiment; for self-insurance is another name for planned precaution, and to approach to that—and to the French plan embraced in it—of insuring only against fire starting outside, is desirable. But there can be no "cornering" in insurance, and nothing except a tightening of the screws on this mutual structure will discover where the unsoundest spot is. The process hurts, just as insolvency does, but we can only put faith in it as being the curative evolution.

A valued correspondent at Hearne, Tex., seems to think that we are disposed to discredit the unfavorable reports of our correspondents in the south regarding the condition of the cotton crop. We regret exceedingly that any one in the south should have that impression. Our constant publication, during a period of nearly three years, of the reports received by us from southern business men in relation to their most important crop is the best possible evidence of our unbiased position in the matter, and should suffice to free us from any imputation of the nature suggested by our correspondent. The letters which we print on another page recording the condition of the cotton crop at various points were sent to us in connection with our regular reports for the month of September, a summary of which we will present next week. These communications indicate that the injury done to the cotton crop by drouth, hard rains, etc., is serious, though it is as yet impossible to estimate the extent of the damage done.

In response to the invitation of Mayor Edson the Civil Service Commissioners of the state of New York have been conferring with him and with the heads of the city departments in regard to the adoption of the civil service reform law passed by the last legislature by the departments under the municipal government. It is to be hoped that the way will be found clear to a speedy and thorough application of reform principles to the municipal service. In no sphere of political action in this country have the doctrines and practices of the spoilsmen been more hurtful to the interests of the people than in the great cities, as the history of our municipalities abundantly shows, and in none will the effects of the reform be more permanently beneficial.

RECENT OPINION ON THE MUNICIPAL PROBLEM.

Sound opinion on the municipal question gains ground slowly. Mr. Grace, late mayor of New York city, has declared in a magazine article that the remedy for the political ills of the metropolis, so far as any exists, is to be found in a constitutional amendment securing to the city the right to regulate its own affairs without interference in detail from the legislature. Speaking from his experience as mayor, Mr. Grace said: "The continual meddling and muddling of the legislature at Albany throws the laws and regulations affecting cities into chaos. It really controls and directs expenditures to such an extent that the citizens have practically no power over them. * * * One of the worst consequences of this method of extraneous control is that it paralyzes the power of the citizens over their own affairs and destroys their active interest in them. They lose all public spirit when they find that its exhibition is useless." So far as he goes Mr. Grace is correct. A hard and fast line needs to be drawn between city and state. The views of Mr. John A. Kasson, of Iowa, are more radical than those of Mr. Grace. The former would have American cities governed on the basis of a limited suffrage. In other words, he would carry into actual legislation the plan of the New York Municipal Commission, which would put the finances of a city under the direction of a representative body elected by property-owners alone. The evil which Mr. Kasson would remedy through the device of limited suffrage he thus formulated:

> The constant element in municipal affairs is the unremitting desire of the politician to gather masses of votes, and of the contractors and placemen who furnish them to prey upon the city treasury. The people who do not pay are always ready to create debts against the people who must pay. They who do not pay the piper are ever ready to dance to his music. * * * The evil principle lies in this, that elected authority is nearly independent of proper responsibility. The party that creates the liability is not the party that supplies the funds. The party in real interest is not the party really in control. One disburses at will the money which the other is compelled to raise. It is an association of citizen stockholders, where the owners of a minority of the stock control the majority of ownership and interest. There would be little demand for shares in any insurance or banking company managed on that principle.

The attempt has been made by the New York *Herald* and other widely circulated journals to find in the fact of Mr. Kasson's holding such opinions evidence of a design on the part of the Republican leaders to attack manhood suffrage, the assumed birthright of freemen. It is very likely that more adherents to Mr. Kasson's principle would be found in the Republican than in the Democratic party of today, but it does not follow from this that there is any likelihood of the Republicans entering upon the advocacy of limited suffrage as a party measure.

These opinions have been differently received by some western newspapers. The Chicago *Times*, which has of late been charging the democratic principle with all manner of evil progeny, tells Mr. Grace that to get rid of legislative intermeddling will not be enough; that the limited suffrage prescription is the one corrective needed. The Chicago *Tribune* and St. Paul *Pioneer Press* discuss the propositions at length, the former assenting to the limited suffrage idea, while the latter is seemingly content with the prohibition of special state legislation regarding local affairs. The St. Paul journal argues that the west has been comparatively free from the ills of which Mr. Grace complains so loudly at New York.

The widespread reaching out after a treatment for the local government difficulty which will serve as a general specific is discouraging. There are few or no specifics in politics. To propose a limited suffrage as the cure-all for our municipal ills points to the substitution of a mere change in the number of directors for the practical wisdom which can only come from exhaustive study of our first century's experience in local government. This study has yet to be done. In the census statistics showing the magnitude of local debts Mr. Kasson finds evidence of the proletariat's evil work. A look beyond the statistics would show him that the most potent influence in the contraction of local debts has been the desire of property-owners to avoid present taxation by mortgaging the future. The local "boss" has held his place more than once through easing the burdens of the property-owner in the manner indicated. At no time in the progress of our leading cities to their present debt burdens have the non-taxpayers, as such, evinced a distinct tendency to plunder the property-holder. The Tweed business in New York was simply an abuse of credit unwisely granted—granted, be it remembered, at a time when the city's scheme of government rested on a limited suffrage. The Philadelphia stealings which have been brought to light during the last few years came to pass as the logical outcome of one of the most pernicious credit systems ever fastened upon an orderly community. We have just seen how during 1876–77 something like a million dollars of taxpayers' money was paid out on writs from the courts, while this same tax-paying class eagerly bought the interest-bearing warrants which took the place of the absent million. One of the main hindrances to the recent reforms in the financial system of Philadelphia was the liking of the small investors—a large class in Philadelphia—for the interest-bearing warrants which were to be done away with. It is safe to say that the tendency to lethargy which comes from the accumulation of property is a full offset to the impulse to political activity coming from the fear of tax bills. The chief difficulty of the hour in relation to this whole matter is, indeed, the unwillingness of the property-holding class to exercise that much-talked-of historic vigilance. It is, of course, possible that the time may come when the state as a whole, acting through the legislature, will be compelled to deprive its large cities of the exercise of self-government by erecting the large property-holders into a governing class. But to consider such a contingency is to us like discussing the complete breakdown of representative government itself, which we are a long way from doing.

"PROTECTING" AMERICAN ART.

Whatever may be the eventual result of the 30 per cent. duty levied upon works of art by foreign artists brought into this country, the immediate result is to lesson importations, to decrease sales and to unsettle the picture business. The actual effect of this ill-considered and discreditable piece of legislation will be felt less this season than later. The importations of pictures last year were unusually large, and a considerable stock was carried over, and the dealers made a point of hastening their importations this season so as to bring in new stock before July 1, when the duty became operative. Even under these conditions, however, there will be a shortage in the importations for the holiday sales, and much desirable work, especially in landscape, the fruit of the summer, will be lost. The feeling that the tax on foreign art is unwise, and therefore will not be maintained, unsettles the market, with results disadvantageous to native as well as to foreign artists. Picture buyers who want foreign pictures refrain for the present from buying, and the whole business sympathetically is dulled. Further, if the tax is maintained retaliatory measures on the part of foreign governments may be counted upon. Our consul at Naples (with a most astonishing promptness—for a consul) has informed the State Department that the Italian government has in contemplation a 30 per cent. export duty on the work of American artists. Should a similar duty be imposed by the governments of France, Belgium and Germany, as reasonably may be expected, American art—supposed to be "nursed" by this eccentric protective tariff—would come uncomfortably near to being strangled. The simple facts of the case are that the more American art is "protected" in this arbitrary fashion the more will it be injured. Art feeling cannot be created by act of Congress; it must grow, and to grow it must have food. Every good foreign picture brought into America is an educator, and its direct influence is to stimulate the purchase of good pictures. It is a standard, and the man who owns it and studies it gains knowledge that enables him to recognize other good pictures without regard to their signatures or place of manufacture. In a just proportion with the importation of good art work has art feeling grown, and with it the improvement of American painting and the increasing sale of paintings by American artists. The greatest "free importation" of good paintings in a single year was in 1876, when, for sale or for exhibition, the works of the greatest living and of many of the greatest dead artists were exhibited at Philadelphia. The stimulating effect which that exhibition has had upon art work and art love in America already is a matter of history. It was the beginning of an art era broadly beneficial because of its elevating educational influence; practically beneficial because it was attended by commercial success. And its good results in both directions must be checked and narrowed by this tax on foreign art works.

THE LAND QUESTION IN ENGLAND.

I.

The English Parliament has just passed an act, under the title of the Agricultural Holdings Act (1) England (2) Scotland, which purports to compensate the tenant on quitting his holding for such improvements as he has made in developing the fertility of his holding, and reduces the security of a landlord's rent from six years to one. It confers no advantage on the continuing, or, as he is called, the sitting tenant, but it leaves the landlord, who hitherto could safely give credit to his tenant for rent during a long period, without a remedy if he suffers the arrears to exceed that of a single year. The acts are the beginning of an economical revolution in the relations of landlord and tenant, and will assuredly be developed before long into fixity of tenure at arbitrated rents. As Americans may not be familiar with the peculiar and entirely anomalous circumstances under which land is ordinarily cultivated in England it may be worth while to state them.

Americans know that in the United Kingdom land-owners are few and occupiers are many, and that for centuries past the law has given every facility for the accumulation of land by putting almost insuperable difficulties on its alienation. Almost simultaneously with the last device by which land was accumulated the legislature imposed duties on the importation of corn when the price was below a certain amount, and subsequently bounties on the exportation of corn. The object of these enactments was to keep up the price of corn and to justify an exaltation of rent. During the prevalence of this system the farmer constantly suffered from what is called agricultural distress—that is, unremunerative prices. But it was believed that the legislature had done all that could be done to secure high prices, and that if losses did occur they were beyond the control of human agencies. At last, in 1846, the whole system was swept away, and the English people adopted free trade in food. From the doctrine of free trade it has never swerved. There was some talk a short time since about fair trade and reciprocity, but the discussion, always academical, never even reached the remotest confines of practical action, and was laughed out of memory in six months.

In 1846 it was supposed that the agricultural interest was ruined by free trade. But, strangely enough, rents increased largely, as is known by the income tax returns of farmers' rents, these being put under a special schedule, and the farmer being charged to income tax on half the amount of his rent. Certain political and economical causes contributed to this result. The two principal sources of foreign supply were Russia and the United States. But shortly after free trade was established the Crimean war ensued and the Russian supply was checked. Shortly after peace was restored in the East civil war broke out in the United States, and this source of supply was straitened. Within a short time another war broke out in Europe. But for the last twelve years there has been peace.

A country which has a large export trade may obtain great profits from its manufactures, even when it is at war, for during the war with Russia English manufacturers were very busy. But this activity was as nothing compared to the profits which were made after the peace which followed on the wars referred to. Up to 1874 English manufactures and trade progressed by "leaps and bounds." Now, activity of trade means high wages, and high wages increased power of consuming the secondary necessaries, or cheaper luxuries, and those who are nearest to the market for commodities in demand have naturally the best chance in dealing. Hence there was a great demand for the occupation of land, the price of every article of farm produce in England was greatly increased, rents rose, the expenditure of the farmer increased, and everything appeared to be prosperous. Nine years ago the English farmer was conceived to be in the most enviable condition, and the price and rent of land appeared likely to continually progress.

The pleasing delusion was gradually dis-

pelled. The first note of the change was the decreasing efficiency and the increasing cost of agricultural labor. There is hardly a rural parish in England which does not exhibit a considerable decrease in its population since 1861. The best hands have quitted the farm. Some have gone to towns, some have emigrated, more have got employment on public works. The thoroughly efficient farm-hand, who knew as much about tillage as the farmer himself, is a being of the past. Upon this increasing dearness of labor came a series of singularly unpropitious harvests. Of itself the badness of the seasons would not have induced ruin, nor foreign competition, for the price of most agricultural products is higher than it was when such prices made husbandry thriving. The result was mainly due to decreasing capital, increasing helplessness and a generally diminished tone in the farmer's energies, and lack of industry, thrift and forethought.

The average English farmer is the most ignorant and prejudiced man in the whole country. His relations to his landlord have made him a child in all that is needed for the struggle of life. He is constantly striving for the impossible; he does not understand the realities of his position, or strive to extricate himself from his difficulties. His rent is far beyond his means, and he waits on till ruin has reduced it. At present English landlords are getting less rent—as compared with what was cheerfully paid ten years ago—than Irish landlords get, and the prospect is becoming worse. For the first time in the history of English agriculture, agricultural skill is without capital, and in consequence rents are dwindling for want of the competition of occupiers. Taken all through, English land possesses more natural fertility and on the whole more advantages of climate than any soil in any civilized country. I say so advisedly, having seen and studied the agriculture of Europe and much of the United States. It will produce more weight and more nutriment by the acre than any district of equal size. But at present there is more good land out of cultivation in England than there has been for the last two centuries, and the outlook for the future is not reassuring.

The act to which reference has been made encourages the tenant to improve his holding by promising him the value of the improvement which he has effected. The landlords wished to limit his compensation to the outlay which he had made, but the government and the majority of the House of Commons insisted against the landlords and the Lords that this rule should stand. But to tell a man whose capital is wholly insufficient for ordinary agricultural operations that he shall be secured against loss if he lays out more capital than these operations require, seems a mockery. Whether the fact that he is to be secured against loss will give him the power of borrowing in order to improve remains to be seen. At present the prospect is not cheering. I see no rational means of meeting the difficulty except by the establishment of agricultural banks, and some means by which advances on land can be secured to the lenders. At present the banks in most districts have been the immediate cause of the collapse. They had to protect themselves against the landlord's lien, and so they called in their advances on the first symptoms of the difficulty.

The benefits of the act are limited to the outgoing tenant. Hence if a continuing tenant improves he has no security that his rent will not be raised at once on his improvements. In this way the most competent and hopeful agriculturist is put at a disadvantage. The government declared itself unable to meet the case, except by establishing judicial rents, for which it professed a holy horror. But in fact a continuing tenant is helpless. If his capital is, say £10 ($50) an acre, the least we are told with which land can be adequately cultivated, he knows perfectly well that on the determination of his holding he cannot extricate his capital without the loss of at least 10 per cent. on an arable farm. He therefore puts up with an exaction which he knows is a serious hindrance to him, and may be a final and fatal loss, because the immediate rise in rents is considerably less, at any rate in appearance, than the certain loss of his possession. He has, say two hundred acres of land and a capital of £2,000. If he goes out, he goes out with only £1,800. Now an additional shilling an acre is only an annual loss of £10. Capitalized at 4 per cent. it is a real loss of £250, but the farmer does not see it, or if he does see it he hopes to meet it by luck or thrift.

Up to the present time the landlord's rent has been a secured debt, ranking prior to all debts, except taxes and wages, and securable by distress for six years past. The act reduces the security and the distress to one year's rent only. The result of this change will be, as I am credibly informed, that hundreds of farmers will be speedily sold out by their landlords during the interval in which the arrears are recoverable and the period at which the new law comes into operation. If this result should ensue, the amount of unoccupied and uncultivated land will be enormous, and a revolution will soon take place in the status of those who exist on rent. For it is reckoned that fully three-fifths of agricultural rent in England is absorbed by mortgages and similar charges on land, and that if any serious reduction of rent takes place the residue will not suffice to meet the interest due, that mortgages will be foreclosed, innumerable estates will change hands, and hundreds of historical families will disappear. It is an open secret that many of those who have hitherto been reported to be opulent land-owners have been reduced to shifts of parsimony which would have been thought impossible and incredible a dozen years ago. If this state of things is continued the aristocratical system of English society will be shaken to its foundations, and the solid interests of the land-owners, hitherto so powerful in the conduct of public affairs in England, will be shattered. As yet, indeed, the farmers cling desperately to the land-owners, and make a common political cause with them. But they do so because they have a vague hope that Parliament will and must do something for them. It has done something already, for it has pointed out that the interests of the landlord and the tenant are divergent, and that the privileges of rent must be curtailed in the interest of the tenant himself and that of his creditors to say nothing of the general public.

JAMES E. THOROLD ROGERS.

Oxford, England, Sept. 7.

COTTON CROP OF 1882-83.

We give below a summary of the annual report of the National Cotton Exchange of the cotton crop of the United States for the year ending September 1, 1883, with comparisons for previous years. The present crop is the largest ever grown, and foots up 6,949,756 bales, against 5,456,048 last year, and 6,606,750 for 1880-81, showing a gain of 1,493,708 bales over last year, and 344,006 over 1880-81. The stocks at ports at the commencement of this year were 125,582 bales, against 217,031 last year, making the total supply, on September 1, 7,075,338 bales, against 5,673,079 last year. The following table shows the total receipts at the shipping ports for distribution to consumers as compared with last year:

	1882-83.	1881-82.
New Orleans	1,690,709	1,190,711
Galveston	893,104	442,860
Mobile	313,228	265,040
Charleston	564,289	497,421
Savannah	817,670	737,056
Wilmington	120,805	137,399
Norfolk	787,931	615,474
Baltimore	86,031	41,564
New York	152,184	165,692
Boston	191,298	226,9-9
Philadelphia	98,850	84,130
Providence	12,723	10,826
City Point, Richmond, etc., not included in Norfolk	226,344	180,379
Port Royal	19,521	22,736
Indianola	19,049	15,143
Other minor ports	30,876	51,694
Totals	6,009,612	4,688,037

The above figures show an increase of 1,321,575 bales this year over last.

The shipments overland to mills and eastern delivery ports, from southern outports, have fallen off greatly this year. The gross movement overland has been but little larger than last year, but owing to smaller deductions for shipments from southern outports the net gain is considerable, and the quantity sent to the mills direct is much greater than ever before, being 641,801 bales, against 489,170 last year and 508,327 the year before. The past year has not been as favorable for southern spinners as the previous, partly owing to low prices for goods, and although the increase in consumption is considerable it falls short of what was anticipated. Prospects are good for a larger increase next year. The following table shows the distribution to southern spinners by states as compared with 1880-81:

	1882-83.	1880-81.
North Carolina	47,843	45,013
South Carolina	65,919	58,516
Georgia	104,597	98,419
Florida	360	360
Alabama	22,231	21,711
Mississippi	12,413	12,447
Louisiana	9,397	3,811
Texas	962	908
Arkansas	2,023	735
Tennessee	22,210	19,044
Virginia	14,118	13,840
Missouri	6,736	7,413
Kentucky	4,584	4,737
Total taken by southern spinners during the year	313,393	286,954
Of which taken from delivery ports and counted in figures for same	15,050	8,113
Totals	298,343	278,841

The takings of northern spinners were 1,759,703 bales, an average of 33,849 a week, against 1,667,581, with an average of 32,261 bales a week, last year, and 1,713,626, with an average of 32,955 a week, the year previous. Southern mills have taken an average of 6,027 bales weekly, thus making a total average consumption of 39,876 bales each week for the United States.

The exports foot up 4,724,044 bales, against 3,551,075 last year, and are distributed, as compared with last year, as follows:

	1882-83.	1881-82.
Great Britain	2,885,904	2,294,560
France	438,808	379,915
Continent	*1,383,929	820,627
Channel	15,423	49,973

* Including 34,081 bales to Mexico.

The average weight of bales the past year was 489.95 pounds, against an average weight of 474.38 last year, and makes the total 3,405,070,410 pounds, against a total of 2,588,236,636 pounds last year, an excess of 816,833,774 pounds over the latter.

The total sea island crop is 36,709 bales, with an average weight of 355.30 pounds to a bale, against 37,862 last year, with an average weight of 344.64 pounds to a bale.

CONSULAR REPORTS.

The August number of reports of United States consuls on the "state of commerce and manufactures in their consular districts" does not appear to contain as much "live matter" as some of its predecessors. It might almost be said of it that a good share of the contents might have been more appropriately "held over" by the departmental editor. Elaborate directions how to entrap the well-to-do Belgian into purchasing a bottle of American patent medicine do not come up to the more elevated standards of duty for our consuls abroad. And it is a little strange also that our representatives in foreign countries think it incumbent upon them to compile histories of the nations to which they are accredited. Reports on charitable institutions of some city, which in no sense can be considered one of the world's markets, and rambling accounts of the topography of a South American country and the manners and customs of its people, can hardly meet the business man's desires for light respecting that quarter of the world—reports in which the cultivation of the cabbage and the cauliflower are referred to and in which the hog is described as "almost an exotic," because "nobody ever eats pork or bacon in Bogota."

It is also a fact that there are some reports in the August bundle which are worth examination. Consul Dockery, of Leeds, thinks that our new tariff will prove disastrous to the chief industry in his consular district—the woolen trade. It had been expected that light woolen goods of a low class would at least find a favorable market in the United States under the new rates of duty, but it is now evident that this is not so, and the woolen industry of Leeds is in a very depressed condition. It appears that the new duty on woolen goods, which has attracted so much attention at home, which has called for so much explanation and which has received so little that is generally satisfactory (except to home woolen goods makers), has led Mr. Consul Dockery into an amusing confession. He says concerning this compound system of ad valorem and specific duties, based on a sliding scale of prices: "While [British] merchants and manufacturers could, with a considerable amount of explanation, understand a simple ad valorem and specific duty imposed by a foreign nation, yet it passes their understanding that a foreign country should impose a duty of 35 per cent. ad valorem and also a specific duty of 35c. per pound on cloth valued at less than 80c. per yard and yet a higher ad valorem duty on cloth valued above 80c. per pound." Mr. Consul Dockery, who is at Leeds professedly to make clear the commercial path between the two countries, goes on to say: "Reputable shippers profess not to understand so complicated a schedule of duties, and I have been importuned to explain it and the effect it will have on certain kinds of cloth. But, naturally, I have said, if persons in the trade do not understand it I cannot be reasonably expected to enlighten them." Of course not. The same report states that the flax trade of Leeds will also be adversely affected by the new tariff.

Consul Henry Sterne, at Buda-Pesth, Austria, in noticing the fact that the export of flour from the United States is year by year assuming larger proportions, properly inferred that the milling interests in the United States would be interested to know that the production of the Hungarian millers last year was the largest on record, that the mills there all paid good dividends, and that the outlook June 14 (date of Mr. Sterne's report) was that 1883 would also prove a profitable year.

The following is a statistical report by the Chamber of Commerce on the quantity of flour produced by the eleven mills of Buda-Pesth during the years indicated.

	Cwt.		*Cwt.*
1870	5,000,000	1874	4,500,000
1871	5,700,000	1880	6,270,000
1872	4,000,000	1881	6,300,000
1873	4,850,000	1882	8,000,000

The years from 1874-80 are not reported, but the product in said years is said to have gradually increased again.

These mills consumed 13,700,000, 15,230,000, and 17,700,000 bushels of various kinds of grain during the years 1880, 1881 and 1882 respectively. There are other large mills scattered over the state, but those of Buda-Pesth are mentioned because they are more exclusively working for the export trade, and are, therefore, of more direct importance to competitors in the United States. The Austrian milling industry is specially favored by the state in the matter of transportation charges. Nearly all the flour exported goes out of the country by way of Fiume, at the head of the Adriatic. It is added that about 25 per cent. of the total product is exported. England takes the largest share, and of the finer grades, after which, in the order named, Hungary's customers for flour are France, Germany, Switzerland, Belgium, Holland and Brazil. Mr. Sterne's report is conspicuous among those contained in the August number. He appears to know what points are of interest, how to tell them in the fewest words, and that it is proper to stop when one has finished.

A report of value to almost every householder in this country is that made by Consul J. Stahel, at Osaka and Hiogo, Japan, on the tea trade of Japan. In BRADSTREET'S, some months ago, was printed an abstract of an article in the *Japan Gazette*, in which the deterioration of native Japanese teas was fully set forth and measures were suggested for overcoming the same. Mr. Stahel states that of late (his report bears date May 26 last) the Japanese tea trade has gone from bad to worse. This was due to the decline in prices in this country (where most of the surplus of Japanese teas go), consequent upon the quantity of colored and otherwise inferior grades of tea which were being shipped from Japan. It is added that the Japanese government is already directing the attention of tea-growers to the evil they have brought upon themselves, and is taking measures to see that their condition is

remedied. The report concludes with the statement that it will be difficult to effect any reform in Japan while consumers in America seem to prefer sophisticated tea of a wholly unnatural color, and that this movement will fail of success unless tea-drinkers in the United States can somehow be awakened to the fact that bluish-gray and broken leaf is not the natural and proper form of this precious commodity, and that colored teas are neither clean nor wholesome, whereas the natural leaf of Japan is both good and delicious.

The complaint made by Consul Eckstein, at Amsterdam, bearing date May 2, that merchants and manufacturers of the United States, notwithstanding their anxiety to secure an extension of foreign trade, failed to send exhibits to the exhibition opened at the Dutch capital last spring, now appears for the first time. Mr. Eckstein regrets to have to record the "stoical," the "inexplicably apathetic" manner of our people in regard to this exhibition. He adds that this indifference is inexcusable, and that the total number of exhibitors at Amsterdam from the United States is but 40, or thereabouts, as compared with 1,600 from France, a like number from Belgium, and 1,200 from Germany. England even had 400 or 500 of her leading houses represented. The remainder of the report is occupied with what might naturally be expected to follow the remark that "the opening day * * * will be one long to be remembered by the good people of Amsterdam."

Consul Duncan, at Naples, under date April 28 (the reader will recall that the consular reports under discussion are those published in September, 1883, and entitled the August number), acknowledges the receipt of the then newly adopted tariff act of the United States, and advises the State Department that the duties on some of the more important articles shipped from northern Italy will not be sensibly changed, and their importation here, therefore, not specially affected. Gloves, fruits, tartar, licorice, macaroni and silk are all either not changed appreciably as to duty charged for entering the United States or the rates are visibly reduced. Works of art, however, are not so fortunate, and the hint is thrown out that increased duties on imported works of art do not seem to be favorably regarded by American artists residing in Italy for the purpose of study and the exercise of their profession. All but one American artist in Rome were opposed to any duty at all on objects of art, and considered that the best encouragement our government could give American artists was to promote by free admission whatever tended to cultivate and educate the popular taste for art. These artists contemplated taking steps to make their views on the subject known publicly before the meeting of the new Congress this winter. In Italy every facility is afforded American artists for the prosecution of their studies, and they feel highly indignant that Congress "should act so illiberally towards Italian artists in return." The suggestion is not out of place that if this is the feeling among American artists—the very class Congress is supposed to have benefited—and like expressions of opinion have come from Paris and Munich as well as from our own chief city—what is the point or purpose of this higher duty on foreign works of art? Mr. Duncan asks this strange question.

There are a great many other reports in the August number of the State Department monthly, but most of them fall far short of what their purpose should be, or, for other reasons, deserve no place in the collection. A few which have not been noticed are not unworthy of commendation. When the plan of publishing these reports for the good of the public, commercial and otherwise, was begun, the hope was expressed that the documents received at Washington would come out in pamphlet form before old age had staled or passing events had rendered the same useless. The dates of many of those in the volume at hand do not encourage those who looked ahead to promptness in the departmental project as an element of success.

OCCASIONAL NOTES.

The *News* of Galveston and the *Constitution* of Atlanta do well to direct attention to the position of those persons in the north who "can see no evidence for supporting the current large popular estimates of damage to the cotton crop," and who propose to make prices on the basis of a large crop. The former of these journals admits that in past years, from one cause or another, unreliable reports from the south were circulated, and in many instances deceived and misled buyers of raw cotton. It points out, however, that very different conditions now prevail in the south from those that existed some years back. When there were few railroads or telegraph wires in the south, when travel was slow and restricted and when communication between one district and another was largely dependent on a tardy mail service there were, it will be perceived, many sources of error open which recent developments have removed. The cotton-growing districts are now largely covered by telegraph wires in regular use and are penetrated in many directions by railroad lines. The recent development of the south has attracted the attention of the whole country and has stimulated travel from the north. The leading journals of the south likewise have progressed in sympathy with the improvement of that section, and furnish much information regarding crop prospects among their items of general news. On the whole, the opportunities for error or deception are much fewer today than they were some years back, and crop news from the south is correspondingly more reliable.

In a letter printed in the last number of the Philadelphia *American* Mr. Dorman B. Eaton defends with much force the course pursued by the civil-service reformers in striving for the establishment of a system of competitive examinations before pressing for a repeal of the laws limiting the terms of officials. He says that in England, where there has been a system of permanent tenure for centuries, the greater part of the evils from which we suffer were developed to such enormous proportions that by one accord every English statesman of this generation has resorted to competitive examinations as the true and effective remedy for them. To say the least this is very strongly put, but something must be pardoned to excessive zeal in the cause of reform. What Mr. Eaton has to say regarding the expediency of the method followed by the reformers is of much more weight. He says that it was much easier in the outset to persuade the people of the United States to accept competitive examinations than to persuade them to repeal the four years' term of office, and that when such examinations are accepted it will be much less difficult to repeal the four years' term acts than it would have been to have repealed them as the first effort of reform. He makes the further point that once the system of competitive examinations is established most of the vicious inducements to make removals will be taken away. Nearly all the unjustifiable removals are made, not primarily to get an office-holder out but to get an office-seeker in, and under the new system not one in twenty of the political henchmen who seek office will be able to win a place. The reform will help itself along, too, since every official it brings into office will become an advocate of the system. The establishment of a stable tenure as the first step, on the other hand, would, according to Mr. Eaton, not only provide no means of bringing in better men or women in the future, but, while leaving all the partisan and corrupt opportunities unchecked, it would add vastly to the prizes of the old system by making permanent every place won as a part of the spoils of its victories.

Michoacan, just now brought into communication with the world at large by the opening of the Mexican National Railway to its capital city, Morelia, is the Pennsylvania of Mexico. Here, in close juxtaposition, are found iron and coal, and there eventually must be sources of substantial and lasting prosperity. Pending their development, the state has other resources which now become of immediate value. In it is one edge of the great lumber region of south Mexico, the region whence in future must be drawn the domestic supply of lumber for the whole country; in it are extensive silver workings, including the famous Coalcoman mines; in it copper, lead, sulphur, marble and lithographic stone are found; in it wheat, corn, barley, beans (a most important crop in Mexico), sugar-cane, cotton and coffee are grown; and in Morelia, a trim little city of 38,000 inhabitants, weaving and various small manufactures are carried on. These several products furnish a substantial basis for a brisk export trade, and promise a counterbalancing import trade from Europe and the United States. If the recent development of Chihuahua, where, practically, the only product is precious metal, is to be accepted as a standard, Michoacan shortly will blossom out into a place of importance. Indeed, even the Mexicans themselves at last seem to be inspired with some sort of confidence in the future of their country. Heretofore, with some few exceptions, they have maintained a position of observation, as a military person would put it, while the *Americanos* have been building railways and in other ways have been attempting to bring Mexico into profit. Apparently, now they are convinced that these ventures will pay, for that very rich and very conservative institution the Banco Mercantil—the old "Spanish Bank," the strongest in the country—has agreed to advance at once $500,000, against subsidy certificates owned by one of the American roads. It really begins to look as though the *Americanos* might succeed in waking Mexico up, after all.

It would appear that the British investor in railway securities is no better off than the American purchaser of railway shares in the matter of having access to a reliable body of information adapted to his particular needs. This point is brought into relief by the London *Times* in some comments upon the Board of Trade report on British railways for 1882, a summary of the statistics given in which has already appeared in our columns. The *Times* says concerning the report: "As an index to the general state of the country, and to the favorable or adverse movements in the home market, it is valuable and informing. To the railway proprietor it is no guide, even where the information it conveys is written down in the most detailed and precise figures. He may learn from it that railway property in the United Kingdom is on the whole a good investment for his money, and it will be of some help to him in making a rough sort of distinction between one line and another. But there are points on which the report is silent, and these, unfortunately, are just the points on which he most needs to be informed, and as to which it is most difficult for him to obtain trustworthy information from any quarter. What dividends a line has paid can be discovered easily enough, but how far its financial position is sound, how far a proper balance has been maintained between capital and revenue, and how far its seeming prosperity has been due to a mere confusion of accounts, are all matters on which the shrewdest and most practised heads have sometimes found themselves in fault, and about which the ordinary inquirer, who contents himself with the surface of things and with the rose-colored reports laid before him by his directors, is more likely than not to be misinformed."

The British Board of Trade Returns for the foreign trade of August show a slight increase in the exports over the previous month, though a decrease as compared with the same month last year. The imports exhibit an increase as compared with the preceding month, and a somewhat larger increase as compared with those for August of last year, the increase in the latter case amounting to 9.4 per cent. The imports for eight months of 1883, as compared with a like period in 1882, show an increase of £12,745,225, or 4.6 per cent. A like comparison in the case of exports exhibits a decrease in eight months of 1883 of £2,042,935, or 1.3 per cent. Turning to the details of the imports for August we find special increases in the items of oxen, bacon, timber and wool. A decrease of £800,000 in the imports of wheat is noticeable. This decrease was mainly in arrivals from America, the purchases from Russia and India showing an increase. The tables show a heavy decrease in the exports of pig, bar and railroad iron as compared with last year, the exports of pig for the month amounting to only £97,000, as against £253,000 in August of 1882. The shipments of cotton goods, on the other hand, show an increase.

The new-born zeal of France to enlarge her colonial possessions in the far east receives but moderate encouragement from her past experience in the colonial line. In the annual report of the Secretary of State upon the commercial relations of the United States with foreign countries, it is observed (p. 206): "The utility of colonial possessions as trade correspondents with the mother country is not more clearly exemplified by the British trade in Asia than it is by the unfavorable state of French trade in that portion of the world. France has no colonies of any commercial importance in Asia." Holland, Spain and Portugal have all thrived in trade by the possession of islands and strips of coast in the eastern seas, while the French possessions in the straits settlements, even with the aid of heavily subsidized steamers and large bounties on mercantile vessels, have been as yet but moderately developed. It is fair to state, however, that the imports of French goods into the straits settlements generally, and also into Cochin-China, seem to be steadily increasing, and the same is true as to exports. Still, the French exports to all the straits settlements last year did not exceed in value $1,000,000. Should France succeed in establishing her position at Tonquin on the terms sought by her, any important addition to her trade in this quarter for years to come would, to say the least, be problematical, unless she could secure commercial connection with the contiguous district of China, and against any attempt in this direction it is to be presumed the Chinese government would take effective preventive measures.

The *Journal of the Society of Arts* at hand contains a second lecture by Mr. Birch on the decorative treatment of metal in architecture. The lecture treats for the most part of medieval metal work, but the subject is one full of interest to the builders and artisans of to-day. The old metal workers were cunning in the application of art to industry, and their example is full of suggestion to their fellow-craftsmen of the present. The *Journal* also contains an interesting description of trawl-net fishing—a mode of fishing which furnishes nine-tenths of the whole fish supply of Great Britain, not including herrings and pilchards. This method of fishing has been objected to for the reason, among others, that the use of trawl-nets as at present generally constructed is destructive of enormous quantities of small fish. A partial estimate of the amount of fish destroyed in this way indicates a sacrifice of 7,000 tons of food fish per week. At the Fisheries Exhibition some improved trawl-nets were displayed, which were so constructed as to permit of the escape of the small fish, to which the nets in common use have proven so destructive. From the descriptions of them given in the article it would seem that the general adoption of some one or other of them would go far toward solving the question of the escape of immature fish.

SPECIAL CORRESPONDENCE.

THE COMMERCIAL SITUATION IN GERMANY.

Berlin, September 1.—The beginning of the school vacations, in the first week of July, is the signal for the rich and also for a part of the well-to-do middle classes to start for the country, the mountains, the seaside, or the medicinal springs; and so the commencement of school term, by the middle of August, is about the nick point of time when the wonted activity of trade is by degrees resumed; workshops, manufactories, mines and foundries employ again the full number of workmen and the full force of water, steam and electricity. The large warehouses and the shops are replenished with goods, and the customers likewise begin to appear. Even the aged Emperor has taken up his residence in Berlin again, after the summer recreation and the use of the mineral waters, and fulfils with customary punctuality and faithfulness his numerous duties and obligations, devoting his energies, as much as his venerable age will allow, especially to the impending grand military manœuvers; not to speak of the Crown Prince, himself no more a young man, who, as is usual with him since the establishment of the German empire, has hastened to all non-Prussian parts of the country to review the troops. Finally, the Reichstag (German parliament), and the Bundesrath (confederate council), which represents each individual German government, whose legislative work does not begin before the commencement of winter, or, at the earliest, in the latter part of autumn, have already, at this early period, been summoned to a special session to sanction the new trade and navigation treaty with Spain.

It might have been supposed that, when the full activity has everywhere been resumed, from the palace of the Emperor down to the smallest workshops, a new spirit of business would at last pervade also the stock exchanges after the long relaxation of the summer. This, however, is not the case. The Stock Exchange at Berlin, the gathering place and center of the German financial world, leads a quiet, contemplative life, as if it still were in the warmest season of summer. Some of the first financial men may yet be enjoying country life, but most of them are at their posts or are represented by their principal employés.

It is not to political scares that this remarkable inactivity is to be ascribed. The military reinforcements in Bulgaria, of late spoken of, excite indeed attention in political circles as well as in the mercantile world and the exchange, and produce some uneasiness, because in this incident the active hand and the intriguing plans of Russia are justly suspected; but notice is hardly taken of this for more than a day or two, one is so much accustomed to some sensational event, or some slight revolt having taken place somewhere in the East. This is merely what belongs to the regular occurrences and to the vital elements of Turkish dependencies. Nor are the reports received of Russian troops being advanced to the Austrian and German boundaries in numbers, sufficient to alarm the commercial world. Considering that the Emperor Alexander, accompanied by his consort and children, is paying a visit to his royal parents-in-law in Copenhagen, no such disquieting rumors need be taken to heart at this time of day. Such pleasure trips are not usually undertaken when the sovereign of so great an em-

pire meditates war. Even the recent harsh and imperious utterances of the Bismarck organ of this place against the characteristic tone of the French press could not effect a depression of the shares of the Discount Bank, the next largest bank institution to the "Reichsbank" (imperial bank), by more than 1¾ per cent., and another very important institution, the German Bank, fell only ¾ per cent. The shares of the Austrian "Credit Bank," one of the most speculative stocks at the exchange, went down, indeed, as much as $2, but the threatening article of the *Norddeutsche Allgemeine Zeitung* was not exclusively the reason of it, the suitable opportunity being taken advantage of to reduce somewhat the unreasonably forced value of this stock. So universal is the conviction that, as I mentioned in my letter of July 21 (see BRADSTREET'S, No. 267), whatever the future may have in store, war is not now impending. It is, therefore, not foreign politics that causes the inactivity of the stock exchanges here, as well as in the other more or less important German places. There are two essentially different reasons for this.

In the first place it is the harvest news coming in from our own country as well as from others which imposes restraint and precaution. The high expectations which were justified by the extremely favorable weather up till the beginning of the second week of July, the commencement of the rye harvest, had to be given up when for almost a fortnight together rains continued simultaneous with rather low temperature. This change of weather did not only endanger the gathering in of the rye, the chief species of grain in Germany, but also kept back the growth and ripening of wheat and other crops. Toward the close of the third week of July the weather seemed to improve, and with rising hope the prices fell as suddenly as they had a short time before risen. However, the hope entertained for some days soon proved deceitful. With the last week of July a period of rain commenced again, which lasted, with but a few interruptions, till about the middle of August in our country as well as in the whole center, and to a great extent in the rest of Europe. Grain prices naturally rose rapidly in the course of these three weeks. Fortunately for many millions of people the weather changed favorably in the second half of August, clear skies and the warmth of summer weather returned, repairing some of the damage caused by the rain. The result, however, is a harvest much below the average one anticipated; the percentage below, however, cannot at present be exactly estimated. The increased grain prices, especially for rye, which may be said to have suffered most, show, however, plainly that the deficiency is not thought inconsiderable. Besides the grain the root crops also have suffered from the continued rain, especially potatoes, which are so important to our household and agriculture in general, although it is reported that they are recovering from the disease occasioned by too much wet. Till lately the fear of the potatoes having become rotten had again thrown up the question concerning the use of Indian corn instead of potatoes for distilling. Originally the brisk demand for German potatoes on the part of England—as may here incidentally be remarked—had put forward that question. Besides this, the rain has to a great extent almost entirely spoiled part of the second mowing of the grass, which is the more deeply felt as the first hay harvest turned out but poorly in consequence of the great drouth in June. An unfavorable harvest naturally has always a depressing effect on the stock exchange, as an increased exodus of money into those countries blessed with abundant riches, in order to cover the greater deficiency at home, must be counted upon. In the year 1882, which did not yield a full though a pretty good average harvest of the principal grains, and even produced a very abundant potato crop, Germany imported (the figures given in 100 kilograms): wheat 6,838,000; rye 6,558,000; oats 2,748,500; barley 3,726,300; Indian corn 966,200; flour 445,600. As this year's harvest has proved much below the average, one can estimate about how much the importation of cereals from abroad for 1883-84 will have to exceed that of the past year. Besides the unfavorable result of the harvest in Germany, the exchange in Berlin must take into consideration the partly unsuccessful harvest in Austria-Hungary arising from the same causes as in our own country. We are closely allied to the Austrian-Hungarian monarchy, not only politically but also commercially. The Austrian-Hungarian government securities, shares and preference shares, of which the allied neighboring empire has as great an abundance as it has variety of nationalities, are, so to say, domiciled at the German exchanges. Many of these papers play the first fiddle here as well as in other German exchanges. It cannot be said that our financial world is exactly actuated by any excessive confidence in the Hapsburg securities and stocks; on the contrary, many a lucky owner of them may be troubled about the regularly returning deficit in the state budget of Cisleithania ever since 1876, and in Transleithania ever since 1870; but dear old habits, as also the demand of the exchange for speculative stock, bring it about that Austrian-Hungarian stock have acquired naturalization in our country to some measure. An abundant or scanty harvest in the neighboring country influences us, therefore, and especially the exchange in a high degree. Good judges value the capability of Austria-Hungary to export wheat—the figures given in meter hundredweights—at 5,000,000 to 5,500,000, including the stores of grain from last year, while it amounted to 13,000,000 or 14,000,000 in 1882. The monarchy is not thought capable of exporting rye; in the year 1882 it amounted to 2,000,000 to 2,500,000. It is the same in reference to oats, of which last year 2,500,000 were exported. The export of barley is figured at 3,000,000, against 5,000,000 to 6,000,000 in 1882. It is plainly seen by this that the national wealth of Austria-Hungary in the year 1883-84 is at a great disadvantage compared with last year; and the railways especially, part of the shares of which belong to the "high finance" of our country, will have to be prepared for a smaller income for freights. It is, therefore, no wonder that speculation at the exchange here on Austrian-Hungarian stocks, which compose so large an item on change, is very flat. This depression influences in some degree other prices.

There is, however, besides the unsatisfactory state of the harvest in Germany and the neighboring empire, another no less, if not still more, important reason for the present inactivity of our exchange. The shares of the German railways have always been favorable securities on the stock market here. Almost every banker had constantly a larger or smaller amount of them in store, as the merchant would have current staple goods. Why should he not have done so? On account of the average solidity and the comparative facility of controlling the condition and the revenues of the railways people were inclined to invest their savings in these values. The network of rails in Germany has been developed, for reasons not here to be touched upon, in such a way that the railways in Prussia were undertaken and executed to a far greater extent by companies, while in the other German states the railways were chiefly undertaken and executed by the governments concerned by means of state loans. There were, therefore, in the non-Prussian part of Germany either no railway shares at all or only very few. I, therefore, will merely speak of the Prussian railways. In 1846 Prussia had 1,368 miles of railways, of which only 186 belonged to the state. Five years later the state possessed as much as 497 miles of railways, the companies 1,804. In a like proportion between private and state enterprises the construction of the Prussian railways progressed in the following years: In 1876, 7,334 miles; of the then existing, 10,318 miles of railways belonged to companies and 2,984 to the state. Five years later, however, the proportion was essentially different. At the beginning of the year 1881 the state already possessed 7,086 miles, companies only possessing 5,283. The state achieved this enormous increase by the purchase of long lines of private railways commenced in 1879. These proceedings at that time puzzled the exchange greatly, for instead of the shares of the railways acquired by the state, which had been the object of trade and speculation at the stock market, consols appeared of the value of 1,392,34000 marks ($348,085,000), which were of very little importance as objects of speculation. The exchange knew no help, and was in the greatest embarrassment to find a substitute for shares of so high a value taken out of the market. Blunders could not be avoided, the state of the market being so much changed. The Minister of Railways, Mr. Maybach, has of late entered into negotiations with the managers of the principal yet existing private railways with a view to purchasing them. Should the railways under consideration accept the offers of the minister—which is hardly to be doubted—the market would again be deprived of a sum of shares at the value of 475,000,000 of marks ($119,000,000). The exchange would thus lose within three or four years an object of commerce to the amount of 1,867,339,885 marks ($466,834,971). It is, therefore, not to be wondered at that the exchange is, in some measure, at loss what to do, and out of fear lest there may be committed the same mistakes as in 1880 and 1881, when money, not finding sufficient employment in solid stock, was invested in rather dubious enterprises, remains hesitating and reserved.

These two above-mentioned instances, namely, the on the whole rather unsatisfactory harvest in Germany, as well as in Austria-Hungary, and the progressive conversion of private railways into state railways, are the causes of the comparative inactivity of the exchanges here as well as in other German places.

What use will be made of the abundance of ready cash? To judge from appearances it will be more employed for industrial enterprises than formerly.

L.

ST. LOUIS AS A COTTON MARKET.

St. Louis, September 17.—It is the ambition of the cotton dealers of this city to make St. Louis the great central cotton market of the country, and they are certainly recording a gratifying progress toward that end. The receipts here of this staple during the last cotton year aggregated 463,311 bales, which was largely in excess of receipts for any former year, saving the remarkable year of 1879-80. The growth of the business in ten years has been steady and immense. The total receipts for 1872-3 were but 59,709 bales. The phenomenal receipts of 1879-80 were due to the diversion of trade from Memphis and some other southern points by the yellow fever. Aside from this influence, our cotton trade can rightly claim that its growth through the decade has been so naturally steady that no serious backset can reasonably be feared.

There are three preponderating influences which combine to give St. Louis distinction as a cotton market, and neither would be of great force without the operation of the other two. First may be named the honorable spirit and thorough energy displayed by our cotton dealers in attracting consignments to this point. The second powerful factor is to be found in our railway connections with the cotton fields. Lastly are our very complete facilities for warehousing and compressing cotton. These influences are, of course, supplemented by the grand advantage of situation and of the character of the city as a great supply depot where—from mules and plantation machinery to provisions, breadstuffs, groceries, clothing or drugs—the planter or storekeeper can purchase all that he needs on better terms than in any other equally convenient market.

The last report of the St. Louis Cotton Exchange—an institution which dates its existence only from March, 1874—shows a membership of 298. The initiation fee has been advanced from $5 at the start to $1,000 now. This organization controls a building of model fitness for its business. Within a very few years it has become a great commercial power in the Mississippi valley. It regularly gathers buyers here from all the east where spindles rattle as well as from England and Europe. But its greatest work is, perhaps, inspiring planters to improved methods of business and a better economy in the division and handling of crops.

The old cotton-carrying railways, without which a heavy trade in the staple here would have been impossible, are the Iron Mountain, the San Francisco and the Missouri Pacific. For several years back these corporations have been pushing extensions more and more into the cotton districts, and have, in manifold and influential ways, encouraged the increase of cotton culture. What is peculiarly a cotton road is the Texas & St. Louis Narrow Gauge, which has quite recently been completed to Waco, and which for nearly 750 miles winds through much of the finest cotton land in Arkansas and Texas. It is confidently expected to carry fully 100,000 bales of cotton to this market during the current year.

Now, there is not a bale of cotton marketed here which is not handled by either one or the other of the two great compress companies, whose aggregate paid up capital stock amounts to $1,500,000. These companies have ten compresses and fifteen warehouses, each of which is either situated on the levee or on a railway, so that all the expense and waste of drayage is avoided. It is estimated that with these 650,000 bales per annum can be easily handled. There can be stored here in fireproof quarters 300,000 bales at a time, and 8,500 bales per day can here be compressed. The increase in storage capacity this season amounts to 40,000 bales.

Yet with all these favoring influences there would be small hope of the permanence of this market were it not for the great advantage of trunk-line competition eastward. The present rates per hundredweight are 61c. to Baltimore, 62c. to Philadelphia, 64c. to New York and 69c. to Boston. It is probably not generally known even in the trade, but it is a fact that the railways invariably pay all the expense of compressing cotton.

Immense capital is at the command of the cotton interest of St. Louis. Unlimited confidence is reposed in the permanence of the present direction of the trade and in the constancy of its growth. The above brief outline of the situation would seem to warrant this confidence.

The St. Louis Fair Association has been induced to adopt the policy of offering cotton premiums only to regular shippers of cotton to the St. Louis market. The premiums offered for the forthcoming fair aggregate $3,600, the most liberal premiums being offered for Arkansas and Texas cotton.

LETTERS TO THE EDITOR

A PHILADELPHIA OPINION ON THE IRON TRADE SITUATION.

To the Editor of BRADSTREET'S.

SIR—I observe in the journals representing the iron trade a great deal of complaint of low prices, dull demand, little or no profits, and a discouraging outlook. From my standpoint the picture is drawn too strongly, and I believe that the figures for the year, when gathered and published, will carry out this statement. Taking the anthracite and bituminous coal interests as a measure of industrial activity, we find that we are justified in pronouncing the bare statements of many manufacturers without much foundation. The production of anthracite coal, according to the statements to this date, is about 2,000,000 tons in excess of production for last year, and, according to the market reports of reputable journals, the demand is heavier at this season than at any other time during the year, and, in fact, as heavy as at any like season during the past four years. Especially is the demand for manufacturing requirements heavy. If business is so bad, what becomes of the coal? Domestic requirements are also very heavy, and the consumption is rapidly increasing in all markets reached by this fuel. This fact, standing alone, is an evidence of industrial activity greater than the same manufacturing interests seem willing to admit by their complaints of dullness. The bituminous coal interests show an increasing demand and a largely increased output, the output of one single region, the Cumberland, being nearly 1,000,000 tons in excess of last year. The third fact which goes to disprove the alleged unfavorable condition of the iron and steel industries is the heavy supplies of spiegeleisen, foreign ores and Bessemer pig, and the active demand for old material, which is not in supply, simply because of the high prices growing out of this demand. The fourth fact deserving consideration is the activity in the Bessemer steel rail interests. The capacity this year is larger than at any previous time, and the production is larger. Bessemer mills are largely, though not completely, sold up to the end of the year. According to the statements of some of the leading makers, the inquiries which have been under consideration for some weeks past aggregate between 75,000 and 100,000 tons, but so satisfactory is the condition of the trade that makers have been able to refuse offers made for most of this large quantity of business because the terms were too low, and they believe that they will be able to secure their own terms on account of the active demand and the absence of excessive competition. It would be of no use to particularize any one establishment; all of them have inquiries for large and small lots in excess of capacity. Prices, it is true, have declined from $55 and $40 to $37, but this decline has been made possible by four factors: First, the decline of about 33 per cent. in wages; second, the establishment of a multitude of minor economies in manufacturing; third, the competition growing out of the increased capacity, and, fourth, the declining demand for railway material, as shown in the falling off in mileage from 6,940 miles last year, to 3,584 miles this year. These causes, and perhaps three or four minor ones, account for the present decline, and outside causes account for the unwillingness of railway builders to prosecute construction on the same scale as was done last year. Nevertheless, the capacity is fully engaged and no complaints are made as to profits.

Passing to the fifth fact, viz., the condition of the pig iron interests, we find some room for complaint, but not sufficient to influence producers in reducing the output a single furnace. The production for the first half of this year was 2,352,019 tons, and, according to the best information obtainable, production for the last half will be very little, if any, below these figures. Profits, of course, are smaller, but still sufficient to maintain an average output. The consumption is heavy and absorbs the present output and is making gradual inroads into stocks—a fact which is indicated by the firmness of the prices for desirable brands. Furnaces blowing out are offset by furnances blowing in, and producers talk of a strong probability of improvement in prices and demand, and are acting according to this belief in refusing to sacrifice stocks in order to

sell. Buyers find it necessary to pay stiff prices for all the iron they purchase. The books of brokers and makers show no actual decline in prices obtained for months past excepting in low grades. The fact that mills are not anticipating their requirements but are buying for current wants only is no argument against a healthy condition of the trade, as the total consumption is as heavy as when requirements were anticipated. The improvements which have been made in furnaces during the past twelve months have considerably increased producing capacity, and even with this increase stocks accumulated less than 150,000 tons for the year, and yet this accumulation is declining slowly but sufficiently to show that the dangerous point has been passed.

The last factor in the problem is bar iron, and it is only in this particular that the trade has just cause for complaint, and even here demand is sufficient to engage fully three-fourths of the capacity, and at profits small but sufficient to induce manufacturers to continue production. There are no stocks in finished iron. Eastern mills are sold no less than thirty days ahead at an average, and western mills have been returning to work during the past two or three weeks, most of them with sufficient business and a sufficiently encouraging outlook to justify a belief in a permanent autumn and winter activity. Consumers are ordering freely for current wants, and inquiries are arriving for remote deliveries, but it is true that prices have declined to a limit which affords but meager profits, a result which is not to be avoided in view of the enormous producing capacity. The fact, however, still remains that nearly all mills are at work, making money. Of course, there is a lack of the booming demand which has been enjoyed so much of the time for the past four years. Farmers are chronic complainers of bad crops and bad seasons, and the iron interests seem to be taking pattern from them. Business is better than they admit, and, if the truth could be known, profits also are more satisfactory.

In the light of these facts it does not appear that the complaints to which such frequent expression is given rest on very good foundations. The fall trade has been backward, but it is making up for lost time. ARGUS.

Philadelphia, September 18.

RUSSIAN PETROLEUM AND FRESH MEAT INDUSTRIES.

To the Editor of BRADSTREET'S.

SIR—In a letter from Vienna I drew the attention of your readers to the immense natural resources which Russia possesses in her rich deposits of petroleum, not only in the Caucasus, but also in the district of Krasnowodsk, beyond the Caspian sea, and to the chance of the petroleum market in southern and eastern Europe being monopolized by the Russian and Roumanian oil to the exclusion of the American article. This hope of the Russians is gradually approaching fulfillment. At the time of writing the refineries were so inferior that they not only gave a very small proportion of illuminating oil, but that was of a very low quality. A lamp has been invented which will burn heavier mineral oils than the American kerosene, and by last accounts the quality of the refined Baku oil has been very much improved.

I translate the following from the annual report of the Chamber of Commerce at Breslau, the chief commercial city of eastern Prussia and a place which was formerly the great center of the land traffic between Germany and Russia.

"Russian petroleum not only supplies nearly all the demand of the home consumption, but is even advancing into Germany. It has a good prospect of success here, for the quality offered by the refinery of Nobel, in Baku, is equal to that imported from America, which it even excels in illuminating power. Tried by Abel's test it does not catch fire so readily, and is therefore safer. Its price, duty paid, in Breslau is about 8 per cent. lower than that of its American competitor. This difference in favor of the Russian oil will be much greater when the now completed railroads, Tiflis-Baku and Samtredi-Batum, are officially opened, and the railway and import tariffs duly settled. The Russians do not supply their petroleum in barrels like that imported from America, but in tank-wagons. Since the crude oil costs only 30c. per ton weight (!) in Baku, and the buyer saves the heavy cost of barrels, while the railroad freights are exceedingly low, we may expect a further reduction in the price of the Russian oil and its rapid introduction all through Germany."

At the Baltic port of Koenigsberg, also, which formerly imported large quantities of American oil and forwarded them overland to Russia, the Russian oil now rules the market. This oil is, pending the completion of the arrangements for carrying it over the Caucasian Railroad, sent in tank-ships, via the Caspian sea and Volga river, to Tsaritsin, whence it is distributed by rail and river all over Russia. That obtained in the Kuban district finds its way in a crude state, by sea, to Fiume, where large refineries, protected by the heavy Austrian duty on refined petroleum, are now completed; and in many other Mediterranean seaports preparations are being made to refine it also. The Danube offers this oil a cheap and safe route from the Black sea to the heart of Hungary, Austria and southern Germany, and it is probable that France and Spain, hitherto America's chief customers for crude oil, will soon turn their attention to this new source of supply.

But it is not in petroleum alone that Russia promises to release western Europe from her dependence on American monopolies. Since the Philadelphia Exhibition of 1876 many attempts have been made to bring fresh-killed meat from southeastern Europe in refrigerator cars to our western markets. One of these, inaugurated by Daniel Tallerman, in 1878, had overcome its early difficulties and was successful in bringing beef in about six days from Vienna to London, when the trade was stopped by a ukase of the German government forbidding the transport through Germany—avowedly on sanitary grounds, but really for the protection of German cattle feeders. Another company, started by the American Colonel Mann, built several refrigerator cars for the purpose of bringing Hungarian meat products via northern Italy to the French market, but no sooner did the Italians see that this scheme was likely to prove successful than they maliciously stopped the transport.

Now a Russian produce company has been formed in England, which buys the cattle of the Russian steppes at Romny, in the province of Pultawa, sends them about 700 miles by rail to Libau, the southernmost of the Russian Baltic seaports, there slaughters them and sends their fresh beef in refrigerating chambers by sea to London. The distance of about 1,000 miles is covered by the steamer in four days, and cold storage is provided in London, so that the beef can await a favorable market. The seventh cargo has arrived by this route, and the average price obtained in London was 11 cents the pound.

As the cattle herds of the Russian steppes are practically inexhaustible, and the journey (two days rail and four days sea) is much shorter than that from America or Australia, Russia will become a dangerous competitor of these two countries for the supply of our markets with animal food.

It is expected that other steamers devoted exclusively to the transport of fresh meat will run from Libau to Hull, Grimsby, Leith, and other eastern ports.

The effect of this trade, as well as of that in petroleum, cannot fail to be most favorable to the economical condition of southern Russia, and therefore to the interests of peace.

London, September 1. J. F.

PHOSPHATES IN NORTH CAROLINA.

To the Editor of BRADSTREET'S.

SIR—Large discoveries of phosphates have recently been made in this county. On August 2 Major W. L. Young, of this place, a gentleman of scientific attainments, announced through the newspapers that he had made large finds of phosphate in this section. Since this announcement the beds have been examined by several persons familiar with phosphate deposits, among them Professor Phillips, formerly of the United States Geological Survey, and have been found to be large and valuable. New discoveries are being made daily, and already the deposits are found to extend for nine miles. Major Young claims that the deposits will be found for a distance of thirty to forty miles on each side of the northeast branch of the Cape Fear river. E. D. PEARSALL.

Kenansville, Duplin county, N. C., Sept. 11.

THE COTTON CROP AND THE DROUTH.

To the Editor of BRADSTREET'S.

SIR—There seems to be a disposition not only on the part of yourself, Mr. Editor, but all other newspapers to discredit the reports of your correspondents as to the bad crops. I have tried to report to you faithfully and promptly the exact status of the crop in our county. I think yet, as I wrote you on July 25, that our county will not make over one-fourth of a cotton crop. All the upland cotton will be from the fields by the middle of October, and the lowlands will be pretty well cleared of the staple by November 1, a thing unheard of here in twenty years. The receipts are large, from the fact that cotton has all opened at once. Owing to the long continued drouth our people are rushing their cotton to market fast. L.

Hearne, Tex., September 13.

To the Editor of BRADSTREET'S.

SIR—The general opinion here is that the crop in this parish will be reduced two-thirds. Rains have caused the shedding of bolls, and caterpillars have devoured nearly every field. The yield of cotton lint per acre is about the same, as planters don't improve their lands. With proper manuring and better culture the yield would be more than double.

Vermillionville, La., September 12. R.

To the Editor of BRADSTREET'S.

SIR—The weather for the past two months has been very dry and has done great damage to cotton, causing it to shed very much. We will not get more than two-thirds of a crop at best. The quality is generally good, but we fear that some of the cotton opened prematurely owing to the dry and hot weather, and therefore injured the staple. We allude to the middle crop. All the cotton will be picked by the middle of next month if rain does not set in shortly. M.

Sugar Town, La., September 14.

To the Editor of BRADSTREET'S.

SIR—Up to June 1 our prospects were decidedly the best for cotton that we have ever had in this section. Then a drouth set in, with a good rain July 5, which made the cotton shed, since then very hot weather with high winds and no rain, except partial showers, has cut the crop down to the bottom crop, which will reduce it to about two-fifths of last year's yield. S.

Blanco, Tex., September 12.

To the Editor of BRADSTREET'S.

SIR—The drouth continues to date through the state of Texas, except a rain at Brownsville, Rio Grande. The county of Dallas and that section, which held out so well, has succumbed to the effects of the scorching sun and dry weather that sapped all the moisture from the cotton plant, and left it looking as if hot steam had been thrown upon it. I have lately traveled through the hills and plantations of the Brazos and Colorado rivers, rich bottom lands that stand a drouth better than any other lands or soil in America, and there I found cotton had greatly suffered, and had thrown off the larger part of the middle crop of forms and bolls, and there was no top crop whatever, and to place an average crop at 100, the yield this year will fall to about 50. The cotton crop raised in 1882 in Texas is by the best authorities placed at 1,515,000 bales. The total crop this year will certainly be less by 42 per cent., or about 900,000 bales, for the entire state. H.

Houston, Tex., September 4.

To the Editor of BRADSTREET'S.

SIR—Since August 17 weather has been dry and scorchingly hot. We had good rain September 8, but too late to be of any advantage to cotton, and it is really regarded as a disadvantage at this juncture. The yield as compared with last year will be about one-third; as compared with average years about one-half crop. Picking is progressing rapidly and will end about October 15. The quality is inferior to last year's. The yield per acre will be the smallest made in a number of years, but the increased acreage may pull the crop to respectable proportions.

Marlin, Tex., September 11. F.

To the Editor of BRADSTREET'S.

SIR—The weather has been hot and dry—very favorable for picking, and the farmers have taken advantage of it. For want of rain some weeks ago the prospect of a top crop is poor. S.

Sherman, Tex., September 11.

To the Editor of BRADSTREET'S.

SIR—The present crop is the poorest that this county has ever produced. The extreme cold and wet up to last week in June, and since then no rain at all, has given the plant no time to fruit. The average yield here is two-thirds of a bale to the acre. This year six acres to one bale is as good as can be expected. C.

Conway, Ark., September 12.

To the Editor of BRADSTREETS.

SIR—The drouth has not injured our cotton. In fact we have had very little dry weather this year, but on the contrary, rather too much rain, so much so that the weed is larger than for several years. Rust is doing some damage, but not very much. Worms, too, are injuring a few crops. We hear that cotton is not well bolled, that the bolls are too few and small; it is opening well, the weather being favorable. Should we have early frosts, there will be a poor crop, but with late frosts, we may have a crop equal to last year. On the whole, prospects are not flattering for a good crop. T.

Mountain Home, Ark., September 14.

To the Editor of BRADSTREET'S.

SIR—Hard rains early in the season prevented the cotton from coming up well. The drouth was very severe, and when it did rain the plant grew too rapidly and began shedding. A.

Turnersburg, N. C., September 14.

To the Editor of BRADSTREET'S.

SIR—In our county the drouth was general from July 9 to about the 1st of September, causing the cotton to shed all the young fruit that the plant could make during the last half of July and nearly the whole of August. Up to July 10 the crop was very promising, and had made fruit early, which was maturing rapidly, until the drouth came. Very little new fruit was made after the 20th of July that escaped the dry weather. I think the county can gather 60 per cent. of an average crop; most planters say 50 per cent. C.

Aikin, S. C., September 17.

To the Editor of BRADSTREET'S.

SIR—The weather has been good since last report. On last Wednesday we had heavy thunder showers, which did the cotton which had opened great injury and reduced the quality from two to three grades. On yesterday, 14th, we had a constant rain, which will injure cotton open and not picked from one to two grades. The dry weather in August has done more damage to cotton than any dry spell we ever have known of such short duration. The heat was very intense, and pretty much all the fruit that had started was shed off by the intense heat. We have known young cotton bolls nearly half grown to shed off in large quantities, and this seems to have been general. B.

Columbia, S. C., September 15.

To the Editor of BRADSTREET'S.

SIR—The weather has been extremely dry since last report. One man in our county has offered 300 acres cotton for three bales, taking 100 as a standard. Last year the crop was put at 125. It is now put at 50, and thought to be too high. G.

Guthriesville, S. C., September 13.

To the Editor of BRADSTREET'S.

SIR—Since my last report we have had no favorable weather for cotton. The drouth continued until about September 8, when we had considerable rain and wind, doing great damage to the crop throughout the county. The cotton acreage is about the same as that of recent years, with a slight improvement in this year's. M.

Kingstree, S. C., September 17.

To the Editor of BRADSTREET'S.

SIR—The outlook for a cotton crop has never been so gloomy in this section of country since the memorable dry year 1845. The most favored sections in the county cannot make half as much as last year, while the majority of farmers will do well if they get one-third as much as last season. Continued drouth, accompanied by hot winds, has for the most part caused the disaster. N.

Union, S. C., September 13.

To the Editor of BRADSTREET'S.

SIR—For the last month rust, worms and dry weather have injured the crop 50 per cent. The staple is not as good as last year, and it will take, I think, about four pounds of seed to make one pound of lint. C.

Blackshear, Ga., September 15.

To the Editor of BRADSTREET'S.

SIR—Yours of September 9 to hand, and I inclose herein my report, which, although bad, I feel, as I know you would were you to meet some of our largest planters and hear their lamentations, that I have been very conservative. That our crop is considerably short is a foregone conclusion; that it is ruined is equally so. To give you an idea: A planter friend, who usually makes large crops, has a "brag patch" of forty acres, on which he does not think that he will get one bale of cotton. This, of course, is not generally the case, but I could name several who are in like condition, and the cry from all of them is "half crop." W.

Columbus, Ga., September 15.

To the Editor of BRADSTREET'S.

SIR—The writer has just returned from a trip through several counties adjoining and has talked with many of our largest planters. I have seen many large crops, have been directly interested in the growth of cotton for twenty years, and I have never seen so fine a prospect for a cotton crop as we had thirty days ago nor have I ever seen a

crop so materially injured in so short a time. In this county the rust first caught our crop, and the extreme warm, dry weather followed; the two have left us nothing but the first, or bottom crop, and the balance has fallen off. In the adjoining counties worms, rust and drouth are all upon the crops, with most disastrous results. What is known as the black belt of Alabama will yield far below an average crop. The nights have been exceedingly cold and days very hot, all tending to injure the weed when other circumstances have not been against it. Corn crop is fair. Picking cotton is general, and the entire crop in this county will be gathered a month sooner than last year, as there will be no late crop to pick. B.

Clanton, Ala., September 11.

To the Editor of BRADSTREET'S.

SIR—In addition to questions answered, I will say that this section, and I can also state for counties adjoining, viz., Hall, Sumter, Pickens and Tuscaloosa, have not for years made a crop of cotton under circumstances so unfavorable as this. First, too much rain, then drouth, with its attendant evils, shedding and rust, and now worms are destroying all prospect for a late fall crop. The staple on account of imperfectly maturing bolls, is short, and it takes from 1,800 to 2,000 pounds of seed cotton to make a bale weighing 500 pounds. S.

Eutaw, Ala., September 11.

To the Editor of BRADSTREET'S.

SIR—The weather since August 10 has been excessively hot and dry, preventing further taking on of fruit. Bolls are opening prematurely, and the lint will not compare with last year, the staple being short. Picking is progressing rapidly. Blight, produced by the weed taking on too much in too short a time, so that it could not sustain itself, has caused much destruction. A.

Tallassee, Ala., September 10.

To the Editor of BRADSTREET'S.

SIR—We report the decrease of crop for this year at one-third less than last. We are satisfied that this is not large enough, but do not like to fall below the facts. Farmers from all parts of three counties trading here say that they expect not more than one-half of a crop, and some not so much as that. Fertilizers have been used more heavily than usual, and there would have been a large crop but for the bad season. Picking will soon be done. Estimates can now be considered reliable, since at least one-half of the present yield is gathered. H.

Troy, Ala., September 12.

To the Editor of BRADSTREET'S.

SIR—We are having a severe drouth, and farmers are complaining badly. In our last (August) report we estimated the injury to the cotton crop from all causes at 20 per cent. off from our July estimate, thus leaving receipts here about the same as last year. It now looks as if we would have to add 5 to 10 per cent. more damage; but we cannot say this until the drouth passes off and we see what kind of weather follows. We think that reports of injuries by drouth should be received with caution, as it has been our experience that at the time a drouth exists the damage is always overestimated, provided seasonable weather follows. Picking is general, and considerable cotton is coming in; the average grade is good, being middling or above. Yours truly, TULLIS.

Eufaula, Ala., September 10.

To the Editor of BRADSTREET'S.

SIR—I regret to say that since my August report I have never seen so great a falling off in the condition of our cotton. We have had no rain to do the plant any good since June 13, and what little has fallen has been of material injury rather than benefit. Worms have done but little damage, but rust has caused some injury, though nothing serious. All of the trouble has been from excessive dry, hot weather. To sum up the whole (and I speak from positive knowledge, having traversed this section thoroughly), the hill crops around me for twelve miles each way will not yield to exceed 30 per cent. of last year's crop, and but for the excessive heat picking would be finished by October 1; in fact, the bulk of the crop is now open, and as much picking as is possible is being done considering the hot weather. To illustrate my assertion as to the great falling off in yield, I would say that I am planting on a small scale, say about 250 acres, on the hills. One crop of 14 acres, on which I made 7 heavy bales last year, will not yield to exceed 2 bales this; and another field, of 130 acres, which made 68 bales last, will not yield me over 18 bales this year. And this is the case all around me. This is a bad showing, but it is no exaggeration. Respectfully, H.

Rocky Mount, La., September 7.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The *Reporter* has a note of the case of Winton vs. Freeman, recently decided by the Supreme Court of Pennsylvania, in which it was held that a promissory note, given fraudulently and collusively in order to hinder and delay creditors, was binding as between the parties thereto, and that the maker thereof could not set up as a defense either fraud or want of consideration against either the payee or his assignee, who took it with knowledge of the fraud.

The North Carolina Supreme Court recently decided that an attachment could only be had in support of a demand arising upon contract, the amount of which was ascertained or was susceptible of being ascertained by some certain standard referable to the contract itself. Where the plaintiff sought to recover compensation for the loss of profits alleged to have resulted from the failure of defendant to furnish certain goods which the plaintiff was to sell as his agent, the court held (Wilson vs. The Lewis Cook Manufacturing Company) that an attachment would not lie.

The case of Law vs. Brinker, recently decided by the Supreme Court of Colorado, was an action upon a bill of exchange brought by appellee against appellant and one Dickey. The appellee was the drawer of the bill and also the payee named therein. The appellant and Dickey were the drawees, and each indorsed on the bill his unconditional acceptance. The court held that by so doing the appellant and Dickey became severally liable for the payment of the bill, and that appellant, having voluntarily placed himself in this position, could not plead a want of consideration for his acceptance.

The case of Curl vs. The Chicago, Rock Island & Pacific Railroad Company, recently decided by the Supreme Court of Iowa, was a suit for damages for forcible ejection from one of defendant's trains. It appeared that the plaintiff, having failed to procure a ticket before entering the train, by reason of the absence of the ticket agent from the station, tendered the usual fare to the conductor, who demanded 10 cents extra fare. Some delay occurring before the plaintiff could borrow that amount from a fellow-passenger, the conductor rang the bell, stopped the train and forcibly ejected him. The Supreme Court, affirming the judgment of the trial court, held that the plaintiff was entitled to recover damages from the railroad company for such ejection.

The rule governing the liability of trustees for losses occurring in consequence of the investment of trust funds was considered by the South Carolina Supreme Court in the recent case of Pope et al. vs. Matthews, executor, et al. The court held that where there was no rule prescribing the classes of securities in which trust funds should be invested, or the preference to be given to one class over another, all that was required was that a trustee should invest the goods committed to his care upon good and sufficient security. This is the limit of his discretion, said the court, and if within this limit he manages the funds intrusted to him with the same care and diligence that a prudent and cautious man bestows upon his own affairs, he will not be liable, even though loss may ensue. But when a trustee goes beyond this limit, and invests trust funds without any security at all, he cannot escape liability for any loss that may ensue, even though he may be able to show that he has acted in good faith, for by failing to take security he substitutes himself as such, and must account accordingly.

It would seem that there is no law prohibiting a judge from pronouncing a dissertation upon such moral questions as are suggested by the incidents of the trial, provided the language used is without prejudice to either party. Such at least appears to be the point of the recent decision of the North Carolina Supreme Court in the case of Stilley vs. McCox, which was an action of replevin for a horse. The plaintiff excepted to a portion of the charge of the judge in the trial court, which seems to have been entirely harmless except in so far as the utterance of platitude from the bench may have prejudiced the result of a cause. The matter objected to was as follows: "The question of dollars and cents is of very small moment in this cause, but the greater and more momentous question is the character of the men who testify. This case involves more in its consequence than the value of fifty horses. A good character which a man has established is the most precious heritage he could leave his children."

BUSINESS NOTES.

The Minneapolis *Northwestern Miller* says that from the report of the receipts and shipments from that city during the past year it may be seen that 4 bushels 39½ pounds of wheat are required to produce a barrel of flour. This is the average of grinding over 18,000,000 bushels of wheat, and may be taken as a fair figure on spring wheat of medium quality as it ran during the year ending August 31 last.

The total number of failures in the United Kingdom and Ireland, during the week ended September 1, was 205 (as reported to *Kemp's Mercantile Gazette*, London), against 185 in the corresponding week in 1882 and 198 in the like week in 1881. The total in England and Wales was 189, against 169 and 120 respectively in the corresponding week in August in 1882 and 1881. The total in Scotland was 14, against 12 and 8, and in Ireland it was 2 against 4 and none in like weeks in last year and the year preceding.

The *British Trade Journal* of September 1 records the fact that in the last week in August the steamship Ionic, belonging to the New Zealand Shipping Company, and fitted with the Haslam dry air freezing machinery, arrived in London from New Zealand with a cargo of frozen meat and fish in splendid condition. This will be followed in December next by the further shipment of frozen meats and fish from New Zealand to the United Kingdom. In the meantime, however, this British colonial industry will not remain idle, as the New Zealand & Australian Land Company have chartered two sailing ships for three voyages each.

The health officer of Toledo, Ohio, Dr. Charles L. Van Pelt, sends to BRADSTREET'S the mortality report of that city for August, 1883. The total number of deaths recorded is 112, of which 52 were the result of zymotic diseases, 21 constitutional, 27 local, 5 developmental, and 7 were due to violence. There were 94 who were born in the United States, 17 who were foreign born and 1 unknown; of these 61 were males, 50 females and 1 unknown. Dr. Van Pelt should have included comparisons with August in preceding years, and based the whole on the population of Toledo at the dates considered, and so given an abiding value to the results of the work in which he is engaged.

The following from the British Board of Trade returns for August relates to the exports of iron and steel from Great Britain to the United States in the periods named:

		August. 1883.	*August,* 1882.	*July,* 1883.
Hardware and cutlery	£	33,666	58,986	40,547
Iron—				
Pig	tons	29,374	67,609	35,028
Bar, angle, rod, &c.	tons	305	1,477	314
Railroad, all	tons	9,683	13,385	5,719
Hoops, sheets, plates, etc.	tons	3,367	5,249	4,511
Tin plates	tons	21,114	20,749	20,158
Cast or wrought	tons	352	442	332
Old	tons	1,181	4,916	3,080
Steel, unwrought	tons	957	8,476	1,131
Lead, all sorts	tons	3	10	—
Steam engines	£	119	4,820	3,550
Other machinery, etc.	£	19,608	51,470	29,671
Tin, unwrought	cwt.	851	5,116	201
Special return—				
Iron rails	tons	120	200	—
Steel rails	tons	9,391	12,979	5,547

The immigration returns to the Secretary of the Treasury for August, from New York, showed 25,927 arrivals, against 30,537 in August in 1882. Baltimore had gained, the number being 3,027, against 2,750 in August last year. Philadelphia and Boston had declined, the former reporting 1,446 and the latter 2,904, against, respectively, 2,229 and 3,280 in August, 1882. New Orleans had but 106 arrivals, against 4 in August, 1882, and San Francisco had 116, against 146. The total receipts of immigrants per nationality for August and for two months ended therewith were:

	—*August,*— 1883.	1882.	—*Two months ended August,*— 1883.	1882.
England and Wales	6,310	6,977	13,881	13,876
Ireland	3,595	3,043	8,283	9,281
Scotland	830	1,212	2,726	2,323
Austria	685	758	1,895	1,93
Germany	13,808	16,010	27,071	32,731
Italy	625	676	1,481	1,794
Norway	1,353	2,052	3,790	5,318
Sweden	1,711	2,601	5,021	8,389
Dominion of Canada	4,383	4,441	8,866	11,723
All other countries	4,802	4,766	10,919	20,613
Totals	38,388	43,076	84,608	108,086

The question of harbor and coast defense in this country has been brought into prominence by the thus far successful experiment made with the new torpedo boat invented and constructed by Ericsson and tested in New York harbor. The feature of this boat is a submarine gun, the effect of which shall be to perforate the hull of a vessel and attack at a point below the water-line. Recent experiments appear to justify the eminent inventor's claims that the tossing of the vessel in rough water does not alter the course of the projectile; that the concussion does not damage the steam connections when the boat is under full boiler pressure, and that there is no danger of a premature explosion of the torpedo when, on being fired, it displaces the valve at the mouth of the gun.

The following national banks have been organized: The Second National Bank of Clarion, Pa.; capital $50,000; James T. Maffett president; N. Meyers cashier. The First National Bank of Shamokin, Pa.; capital $100,000; Conrad Græber president; George C. Græber cashier. The Hill County National Bank of Hillsboro, Tex.; capital $50,000; J. H. Bemis president; C. E. Phillips cashier. The First National Bank of Watkins, N. Y.; capital $50,000; Josiah D. Payne president; Edgar S. Payne cashier. The First National Bank of Griswold, Iowa; capital $50,000; Theodore H. Brown president; Frank L. Brown assistant cashier. The First National Bank of Cherokee, Iowa; capital $50,000; Nelson T. Burroughs president; Roderick H. Scribner cashier. The First National Bank of San Diego, Cal.; capital $50,000; Jacob Gruendike president; C. E. Thomas cashier. The Kansas City (Mo.) Savings Bank has been organized with an authorized capital of $10,000. The Adrian (Mo.) Banking Company has been incorporated with a capital stock of $10,000. John Jordan has retired as president of the Kahoka (Mo.) Savings Bank, and W. H. Bishop succeeds. The First National Bank of Kirksville, Mo., has elected John Caskey president in place of E. Darrow. The First National Bank of Plymouth, Mich., has elected George A. Starkweather president in place of E. J. Penniman. The South Pueblo (Col.) National Bank has elected M. Sheldon president in place of H. L. Holden.

The English labor market, as reported by the London *Labour News* of September 6, continued in a somewhat unsettled state owing to the existence of strikes and the promise of more. Notwithstanding this, however, the demand for labor continued to be excellent. Building operations continued brisk in London and the country, and railway and tramway work increased, and new contracts of an extensive character were being arranged. Ship-building was very brisk in all northern ports, and marine engineers were busy, except at Sunderland, where the apprentice difficulty still kept the strike in force. In colliery districts there was increased activity, and the North Staffordshire coalminers' strike had virtually collapsed, and the greater portion of the men had resumed work at reduced wages. The iron trade was signalized by low prices, but operators were fairly employed. In the pottery districts, work was partially at a standstill. In the textile trades but little change was apparent, and the weavers' strike in Lancashire continued, and at present there were no signs of a settlement, as the assistance from other parts was readily granted. At Leicester the hosiery workers were fairly busy, and elastic-web makers were more active. The Nottingham lace and hosiery operatives were short of work, and many machines were idle. In the hop gardens picking was in full movement, and demand was good for pickers. Emigration was up to the average.

The petroleum trade of the Pacific coast is assuming double significance. In addition to what the Standard Oil Company are doing in the way of shipping oil there for domestic consumption and for export, the southern California petroleum wells are quietly making a record for themselves which, at the present rate of increase, will, ere long, attract more than passing attention. Oil territory there is becoming quite valuable, and one piece has enjoyed the distinction of being guarded by force of arms. The San Francisco *Journal of Commerce* states that a pipe line 20 miles long has been constructed to carry oil to port. The production for a series of years has been as follows:

	Gallons.		*Gallons.*
1879	568,8.6	1881	4,194,102
1880	1,763,215	1882	4,993,920

With the successful establishment of a refining industry, markets will be available all along the Pacific coast, from Behring Straits to Cape Horn, and from Hobart Town to Tasmania. The quantity of petroleum which has been sold from San Francisco, year by year, of late, has been as follows:

	Gallons.		*Gallons.*
1882	3,943,350	1879	2,582,220
1881	4,317,340	1878	3,344,931
1880	2,000,000	1877	2,695,941

Besides this, about 500,000 gallons have been received yearly overland, at Sacramento chiefly, while southern California has been supplied in great part from the oil wells of that section. The annual consumption in California, Oregon, and Washington may be averaged at 4,000,000 gallons a year, and is increasing. The business of the coast is in the hands of a few houses—one of which has sold as much as 2,250,000 gallons in a year. During 1882 the Standard Oil Company has shipped petroleum to the Pacific coast very heavily. By August 1 last the price of 150° test had declined to 14 cents.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

About all there is to the stock market this week has been the Villard stocks, upon the movements of which nearly everthing has hinged, if we except a sharp advance in the usually dormant Pacific Mail, the reasons for which are still shrouded in mystery. This aside, the movement of prices has been with the Northern Pacific and Oregon Transcontinental stocks, and they have had another smashing much like the one which so utterly demoralized Wall street a few weeks ago. When they went then it was their first great crash from the high estate they had so long held, and the roar of their fall, when at last it did come, startled the street and produced wide-spread mischief. Since that time, though they recovered some of their first loss, they have been the targets for all attacks, for it was seen and well understood that the power of their supporters was crippled. They had exhausted themselves in a tremendous effort to sustain them, until at least the road should be opened, at prices which every one but oversanguine people considered far too high for the actual value of the property. When at last they broke down there was no saying where bottom would be touched, and it is just as difficult to reach a conclusion on that point now. Last week the situation in the market did not look unfavorable. The Villard stocks had been brought down to what seemed a tolerably safe level, and for almost the first time this year Mr. Gould had entered into an active campaign on the bull side. To be sure, the frosts gave the movement he had started a sharp setback, but after the first break he had pieced together the broken ends of the combination and when the market was expected to have dropped on Monday of last week, he put it up quite sharply, and kept prices pretty well on the advance through the week. Early this week, however, while the rest of the market was strong, the Northern Pacifics began to show signs of weakness again. It is said that their previous advance had been due to Mr. Gould's purchases, and that he found he was getting from some quarter or other altogether too much stock for comfort and weakened on it. His brokers then went to Lake Shore, and tried to stimulate the market by bidding up the price of that, but it was useless against the continued decline of the Villard stocks. This was the situation on Tuesday, and the result was not matter for much doubt. Here was a bull combination so circumstanced that the most it could do was to hold the general market, while the bear party were making what soon proved to be a fatal breach in the lines through the Northern Pacifics.

On Wednesday and Thursday there was a general smash, and on the latter day, when the Northern Pacific report for the year came out, the accounts being down to July 1, it was seen why the stocks should have been so unmercifully hammered. Of course, the "insiders" had seen the report several days before, and it was of a character to make a good many of them drop their holdings and run. It showed that the cost of the road had been greatly in excess of the estimates and nearly eight millions in excess of the provision made by the bonds sold to pay for construction, which again had not realized, deducting provision for interest, more than 80 cents on the dollar to the company. In consequence, the company having sold all its bonds, has now a floating debt of $7,900,000, which money has been borrowed from the Oregon Transcontinental Company on terms as yet unknown; it is supposed, of course, on 6 per cent. interest at least, and this debt and interest charge comes before the preferred stock. The gross earnings for the year were $7,855,459, an increase of $2,425,153; expenses $5,356,929, an increase of $1,764,089; net earnings $2,518,529; increase $661,064. The cost of the road has been about $30,000 per mile, while the bonds were put on it at the rate of $25,000 per mile, and then did not net, as before stated, more than 80 cents on the dollar. The road is yet far from being finished, and some estimates are made that the company will have to raise another twenty millions to pay its debts and finish it. The report was, as might be expected, most unfavorably commented on in the street, for it was much worse than people who had not special means of information ever expected, and some of the large houses which issue circular letters to their customers and others did not hesitate to say that the excuses given for the great cost of the road and the bad financial showing were unsatisfactory.

As is usual in Wall street, the prices of the stocks affected rose on the publication of the bad news, because it is on this that the people who have been selling short on inside information of what is coming go in to cover their sales by purchases. Still there was and is a great deal of uncertainty as to the final outcome of the matter. As showing the drift of opinion, one large house said, in its Thursday night's circular, that the situation seemed to favor the bulls a little, on the supposition that the bear party had covered, in which case they would help to put the market up again to sell on. "If the Northern Pacifics must go lower," said the circular, "people are disposed to think that they will be separated from the market, as they were last year, when the list declined, and they advanced. It is all manipulation, of course, but this appears to be the design of the manipulators." On the other hand, the circular of another house commented on the evident weakness of the rally which took place at the close of business that day, arguing no promise from it, and continued: "We think it evident that a strong bear combination is in the market, and consider the tendency toward lower prices." The bewilderment caused by the operations of the bears is well expressed in the quoted opinions of a prominent operator supposed to be rather closely identified with the Gould interests. "We thought the bears were discouraged," said he, "but they have shown astonishing vitality in the drive at the Northern Pacific stocks. I do not understand this attack. There are plenty of rumors afloat, but nothing definite. In my opinion, there is a strong bear combination backed by a good deal of money. They have for their objective point one or two rich men in the street, and under the present circumstances these men are so heavily loaded with certain stocks that they may find it difficult to resist the bear attack. The stock market seems to me to be in an incomprehensible condition. With all the conditions favorable for a good market—good crops, activity in all branches of trade, plenty of money—the market seems doubtful whether to go up or down. Every time the market has made an advance, something has happened to destroy confidence. First came the corn crop scare; then the failure of the Canadian bank had an unsettling effect, as it was feared that others would follow. There has been some little outside buying, but this attack on the Northern Pacifics seems to have driven the public out again. There are one or two doubtful points about this market which must be settled before we can get the public to come in." The opinion of this operator fairly sums up the present situation.

The loan market continues amazingly easy for this time of the year. Money is fairly a drug. It has ruled all the week at 2 and 2½ per cent. on call and has even been offered at 1 per cent., though this was doubtless done for effect. The bond calls of the Treasury have undoubtedly had something to do with this, but it is certain that the movement of money to the west this year comes very late, as indeed, the return movement of money to this center last spring was late. This case, when loanable funds are generally getting scarce and high, has made the task of those who have been trying to sustain the stock market considerably easier than it otherwise would have been. Exchange rates advanced this week, and the advance caused some little alarm, as any movement in them at this season should in the ordinary way be downward, especially after the Bank of England had reduced its discount rate. Scarcity of commercial bills was given as a reason, which would indicate an unusually light export trade at this time, and we know that the export grain trade is small enough. It was also said that some of the exchange loans on Northern Pacific stocks sixty days ago had to be met. The government bond market continues as quiet as usual. The following were the closing quotations yesterday:

	Sept. 14, bid.	*Sept. 21,* bid.	*Sept. 21,* asked
U. S. 4½s 1891, registered	112⅜	113¼	113⅜
U. S. coupon	112⅜	113¼	113⅜
U. S. 4s 1907, registered	118½	119¼	119⅜
U. S. 4s 1907, coupon	119½	120¼	120⅜

The bank statement of Saturday showed small changes of importance. There was a decrease in the surplus reserve of $749,075, leaving it at $3,738,425. The following are the comparative totals of the statements of September 8 and September 15:

	Sept. 8.	*Sept.* 15.	*Differences.*	
Loans	$327,590,300	$328,792,500	Inc.	$1,202,200
Specie	59,528,600	58,879,300	Inc.	350,700
Legal-tenders	24,682,000	24,337,000	Dec.	345,000
Deposits	314,892,400	317,911,500	Inc.	3,019,100
Circulation	15,540,700	15,533,400	Dec.	7,300

The proportion of total reserve to liabilities is now 26.18 per cent., against 24.67 per cent. at the same date last year.

An event outside of Wall street, but so nearly connected with its affairs as to make much talk there, was the appearance before the State Railroad Commissioners, at a hearing held at the Grand Central Depot—a curious place for it—of the representatives of the Vanderbilt and Erie systems of roads, to protest against the resolution recently adopted by the Commissioners requiring all roads in this state to make quarterly reports. This was really the first move made by the Commissioners which people versed in the ways of speculation knew to be one that would strike at some very gross abuses in railroad management. Readers of BRADSTREET'S will remember how often we have commented on the scandalous practice of boards of directors concealing the earnings of the roads they preside over for avowedly speculative purposes, and the constant circulation in Wall street, through brokers' offices, of partial and misleading statements of such earnings in order to affect the stock. A severe check would be given to these practices by the requirement of quarterly reports, and there was no surprise expressed in the street, but a good deal of unfavorable remark, when Messrs. Depew and Blanchard, representing the Erie and New York Central, were found making protests against such a requirement. The arguments they presented, if correctly outlined in the papers, were of the flimsiest description, and some of their statements, if true, represent a disgraceful looseness of management in their companies well calculated to make investors pause before buying any of their securities.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

The improvement in the general business situation of the country reported to BRADSTREET'S during the past two or three weeks has been continued. The shipments of general merchandise from the North Atlantic ports to the west have been very large. Those of dry goods have been especially heavy, not only from New York, but from Boston and Philadelphia as well. Low water in the New England streams has resulted in many of the mills having to cut down their production one-half, and it is not impossible, in the event of a continuance of this disturbance, that an advance in prices may result. At the west at leading distributive points the movement of merchandise to the interior continues to be heavy. Louisville is enjoying a large trade of this description. The orders received at the larger cities at the northwest and in the west are coming quite as rapidly as at any time during the past fortnight, and at most of those points the aggregate of the autumn's trade is in excess of that of 1882 from 10 to 15 per cent. Farmers in the northwest appear to be inclined to hold back their wheat. Money is going into the interior, but has not begun to show any symptoms of a return movement, not having gotten fully into farmers' hands, owing to the lateness of the season. During the earlier portion of the week wheat fell off over 2c. per bushel. On Thursday an upward turn was taken, owing to decreased receipts and heavy buying by those favoring higher prices. Friday witnessed a continuance of this, and at the close within one cent of the entire loss since the 14th had been recovered. Indian corn also fell off during the earlier portion of the week, though less, proportionately, than wheat. Wednesday witnessed a revival of quotations, and Thursday and Friday continued the same. Thursday's closing price equaled that of the preceding Friday, and last evening's advanced ¼c. and over per bushel, according to option. Provisions have been in sympathy with corn. They declined steadily until Wednesday, when a moderate advance took place. October lard leaves off at about 8.30c. per pound, against 8.27c. on Friday evening of last week. Anthracite coal is firm at August prices. September rates have been realized only in the case of a few special grades. The demand, however, is excellent, especially for domestic sizes. In the west there is continued firmness in the demand. Stocks at tide-water are decreasing. Petroleum certificates are advancing, owing to excess shipments out of the regions as compared with the quantity of oil received from the wells at the tanks as per the United Pipe Line figures. Refined is up ¼c. per gallon, and refiners have refused to sell even at these rates, 8⅜c. Ocean freights are quiet and steady. There has been a large business in wool in all markets, and values have ruled firm with an advancing tendency on combing and delaine fleeces, which are closely sold up. There were 177 failures in the United States reported to BRADSTREET'S during the past week, 41 more than the preceding week, 36 more than the corresponding week of 1882, and 81 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Money is easy. General trade is fair with a steady improvement.

From Boston, Mass.: There has been a satisfactory movement in all the leading branches of manufactures the past week, and the fall trade is now up to the usual proportions. The scarcity of water in the manufacturing districts has interfered materially with the running of machinery, and is likely to have an important influence on the market for goods and merchandise. All of the cotton mills on the Merrimack have been forced to reduce production, and some of them have stopped about half of their spindles. If the dry spell continues much longer all industries here are likely to be unfavorably affected. Aside from this, the outlook is quite encouraging. Orders are coming in freely from the interior for dry goods, clothing, crockery, furniture and other wares. The wool market has been very active and all kinds of grades are higher. The money market is steady, and legitimate borrowers find no trouble in getting accommodations at from 5 to 6 per cent.

From Philadelphia, Pa.: The general business situation continues to improve and a good feeling pervades most of the wholesale markets. Transactions in jobbing lines continue large in the aggregate, although there is little or no speculative feeling and individual purchases are gauged by actual requirements in most cases.

From Cleveland, Ohio: Increased activity is apparent in general trade. Collections continue backward, and banks report a steady demand for money from all branches of trade. Discounts uniform at 7 per cent. for prime paper.

From Cincinnati, Ohio: The volume of business has, during the last week, materially improved, though some lines still manifest dullness.

From Columbus, Ohio: Business still continues fairly active.

From Toledo, Ohio: In boots, shoes, groceries and hardware trade is satisfactory and the future promises well. Collections are fair.

From Chicago, Ill.: Money is active and firm at 5 @ 6 per cent. on call, and 6 @ 7 for time paper. New York exchange is firm at par. Collections are easy. General trade is good. Dry goods, millinery, notions, fancy goods, carpets, clothing, hats and caps, have seldom been so active. Hardware metals, tinners' supplies, refined iron and nails, are meeting a good average demand, and the tone of the market is healthy. Groceries are active, and stocks of sugars moderate.

From Peoria, Ill.: There is no change in business outlook. Business is steady.

From Evansville, Ind.: Trade is good and improving. There continues a full demand for money at the banks.

From Indianapolis, Ind.: Trade is good in most lines, but not rushing. Collections are somewhat slow. Manufacturing business is a little slack. Money lends at 8 per cent.

From Detroit, Mich.: General business is apparently in very healthy condition. Merchants generally busy. There are some complaints about collections, but as a rule they are improving considerably. The holding of the state fair here this week had brought a large influx of country merchants, with more profit, however, to retailers than jobbers.

From Louisville, Ky.: The largest fall business ever transacted here is now in progress. Jobbers have all the orders they can handle. An unusual number of southern buyers are visiting the city. The money market is comfortably active.

From St. Louis, Mo.: General trade shows an increased volume; prices as a rule are very steady. The weather is excellent for the crops and business. Transportation is in good shape. Money is active at 8 per cent., prime mercantile bills 50c. discount, New York exchange par.

From Burlington, Iowa: The volume of trade continues to increase steadily. All lines report satisfactory sales with good prospects.

From Milwaukee, Wis.: Business increasing steadily. Money in demand and supply reduced considerably.

From Topeka, Kan.: General business is rather quiet but is improving. Collections are good and money is easy.

From St. Paul, Minn.: The general merchandise trade, particularly in dry goods, is quite active, both personal and order. The fall season is fully open. For a week good numbers of country merchants have appeared. They buy cautiously and only in answer to real needs; as their bills are comparatively small they will come oftener, hence city merchants expect trade to continue later than usual for the season. The completion of the Northern Pacific Railroad has extended St. Paul's business territory, and the effect is already felt, though old sections are furnishing a good demand, with a volume of sales equal to that of last season if not a slight excess. Collections are a little slow, as the outflowing currency has not yet fully got into farmers' hands. Money is in active demand from all classes. The banks have reduced time on loan maturities, but meet wants of regular customers. The money market is close, but not stringent. Country balances are drawn down on account of large wheat movements in the interior.

From Omaha, Neb.: Jobbers in all lines of fall and winter goods report business brisk, and some houses are finding it difficult to keep their stocks replenished. Collections are good and sales largely increased.

From San Francisco, Cal.: A better tone generally prevails in business circles. Money is in demand at paying rates.

From Baltimore, Md.: General business continues brisk. The cool weather has had a good effect, and in such lines as hats, clothing and boots and shoes, has accelerated trade. Collections are a little slow. Money is in fair demand and quoted on call at 5 per cent.; discounts 6 per cent.

From Norfolk, Va.: Trade generally is progressing favorably. Boots and shoes, notions and hardware are actively employed. The general outlook is promising. Collections fair.

From Richmond, Va.: Business in all lines has improved over last week. The jobbing trade is active.

From Wilmington, N. C.: The weather is stormy and rains are copious. Jobbers are busy with country dealers. Provisions, grain and breadstuffs buyers are holding off, anticipating a light demand.

From Savannah, Ga.: Jobbing trade satisfactory and opening fairly well, though few buyers are here in person.

From Memphis, Tenn.: Business in all lines is improving.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Some factories are considering a reduction of pay of operatives.

From Baltimore, Md.: Manufacturers are working on full time and have no complaints to make.

BREADSTUFFS ABROAD.

Weaker cables and good harvesting weather reported abroad aided the declining market. The British cereal year of 1882–83, ending August 31, was of a most unusual character, recording, as it did, sudden and remarkable changes of temperature. It, however, closed well, and the current year begins under more favorable auspices than its predecessor, inasmuch as a large proportion of the harvest and a still larger proportion of the wheat crop had been harvested safely, and, although prices were low, it must have been a very material advantage to growers to be able to turn their crops into money at convenience. As reported last week, the current reports as to the total English production of wheat during the last twelve months has been given at 68,000,000 bushels. In reference to this the *Mark Lane Express* says that statements have been circulated of late to the effect that the crop was much larger than it had been represented to be, and that these statements had been corroborated by London millers. The opinion is advanced that this view arose owing to the greater number of sales returned. So far as the London consumptive trade is concerned, however, there are available data, and now that the cereal year 1882–83 has come to a close, it appears that the London receipts of native wheat have been 184,192 English and 1,546 Scotch, together 185,738 quarters, against 187,419 English, 2,608 Scotch and 1,080 Irish, together 191,107 quarters for the cereal year 1881–82. These figures are certainly not in support of the idea that the 1882 wheat crop was larger than it has been recorded. On the European continent the weather during the earlier portion of the month cleared up, and the grain markets immediately declined. A recent Calcutta telegram states that rain had fallen in all the northwest districts, but that more was wanted, and that a drouth was feared. Even as far south as Benares the crops have suffered and in some districts are actually withering. In the Delhi, Hissar, Umballa, Umritsir and Lahore divisions anxiety is felt regarding the grain crops. This, as might be inferred, should add strength to the market price of wheat, but it did not. The English estimate of the deficiency in the wheat supply for the coming year has been reported at 68,000,000 bushels. The statistician of the New York Produce Exchange reports it as approximately at 81,000,000 bushels and the opinion prevails, that prices must end by going higher. In the record made by M. B. Estienne, of the great Marseilles grain house, the latest estimate places the crop at over 10,000,000 quarters. Austria-Hungary's crop is "between middling and average." In Italy the wheat crop is good in quantity. All the reports on the Danube are satisfactory. Asia Minor, Syria and Cyprus have good harvests. The season in Russia has been everywhere extremely favorable for all the grain crops. In Germany wheat is of good quantity and quality Belgium had good wheat, and all over Spain the harvests have been exceptionally good, and her exports of wheat are expected to be heavy. Holland has a fair average harvest for all grains. While the wheat crop in India will not be up to the bountiful proportions of last year—the most abundant ever known—it will still be very good, and leave a large quantity for export.

The quantity of wheat and maize on passage, as per Beerbohm's London cablegram, September 20, 1883, was:

	Wheat. Qrs.	*Maize. Qrs.*
To the United Kingdom	1,825,000	290,000
To continent	520,000	90,000
Total quarters	2,345,000	380,000
Equal bushels	18,760,000	3,040,000
Compared with the previous week:		
To the United Kingdom	1,850,000	250,000
To continent	480,000	85,000
Total quarters	2,330,000	335,000
Equal bushels	18,640,000	2,680,000
Increase, bushels	120,000	360,000

AMERICAN WHEAT MARKETS.

The earlier portion of the past seven days recorded an almost steady decline. For the month ending September 18, the drop in wheat has amounted to fully 10c. per bushel. On the other side the lower average prices paid, as compared with previous years, are equally conspicuous. The decline from the closing price in New York on Friday to that on the succeeding day was over 1c. per bushel, while the concluding bid on Monday was $1.10⅝, or 2⅛c. under the final offer on Friday. On Tuesday there was a check in the downward movement. Receipts at the west were less, exporters' offers were more numerous, and on the theory that a stay was in order prices revived to $1.11, or ⅜c. per bushel. Thursday, however, saw the quotations let down again full ¼c. per bushel. On Thursday and Friday, however, there were made notable advances. That on Thursday was fully ½c., and on Friday quite as much, with trading active and exports fair.

Increased receipts at the Atlantic ports and decreased exports therefrom tended to produce the first effect on prices. Farmers at the west are apparently not inclined to send forward their grain liberally, yet the supplies received are evidently enough to keep eastern receipts in excess of shipments to foreign countries. Late in the week less confidence was felt in prices either way, and operators confined operations to those of a scalping order. While the current estimate of deficiencies of wheat and slack supplies favored higher prices, there appeared to be more wheat on hand than there is immediate demand for, and prices stubbornly refused to advance.

The receipts of wheat at tide-water for the week ending September 15 increased to 2,168,708 bushels from September 8, when they were 2,833,568 bushels. The exports from the Atlantic ports for the week ended September 15 amounted to 1,339,794 bushels, against 1,433,775 bushels September 1.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended September 15 amounted to 2,758,662 bushels, against 3,028,351 bushels in the preceding week, and the shipments to 1,748,716 bushels, against 1,923,497 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) September 15, as against the preceding week, showed an increase of 961,357 bushels.

The course of the wheat market at New York and Chicago during the past week has been as follows:

	AT NEW YORK				AT CHICAGO	
	Sept.	*Oct.*	*Nov.*	*Dec.*	*Sept.*	*Oct*
Fri. Sept. 14	$1 12¾	$1.14¼	$1.16⅝	$1.18¾	$0.95⅝	$0.96⅞
Sat. Sept. 15	1.11⅜	1.12¼	1.15	1.17⅛	.93¾	.95⅜
Mon. Sept. 17	1.10⅜	1.11⅜	1.13⅞	1.15⅞	.92¾	.94⅝
Tues. Sept. 18	1.11	1.11⅞	1.14	1.16½	.93½	.94⅞
Wed. Sept. 19	1.10⅜	1.11½	1.13¾	1.15⅞	.93⅜	.94⅛
Thur. Sept. 20	1 11¼	1.12	1.14½	1.16¾	.95	.97

At 1 P.M. on Friday, September 14, September wheat at Chicago was quoted at 95c., and October at 97c., against 95⅝c. and 96⅞c. on the preceding Friday.

INDIAN CORN.

Efforts have been made here by speculators in Indian corn to break down prices of the same to a level with that of wheat, but up to Wednesday evening they had signally failed, the net decline having amounted to but ⅞c. per bushel. The weather in the heavy corn-growing region during the week has been excellent, and the smaller estimates of the probable crop owing to the damage done by the frosts have been almost entirely abandoned. Conservative judges now incline to the belief that the yield will amount to fully 1,500,000,000 or 1,600,000,000 bushels. The latter figure is the minimum advanced by BRADSTREET'S of the 15th. A writer in the Chicago *Times* of late date, without naming this journal, goes out of his way to misunderstand BRADSTREET'S comment as to the probable damage done the Indian corn crop by the late frosts, by intimating that our calculations point to a total yield of 1,200,000,000 bushels. Inasmuch as BRADSTREET'S of a week ago not only specifically stated that its data pointed to a 1,600,000,000 bushel yield and upward, and gave substantial reasons therefor, the conclusion is forced that the *Times* writer either did not read the whole of our report or he was for some other reason incapacitated to deal fairly with its conclusions. Decreasing receipts during the week prevented the bears from securing the advantage which they had hoped to gain.

The receipts of Indian corn at the Atlantic ports for the week ended September 15 were 2,152,328 bushels, against 1,989,792 in the preceding week, while the exports from the same points amounted to 1,169,804, against 947,734 bushels. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, September 15 had increased 1,100,035 bushels as compared with September 8. The total receipts of corn at Chicago, Mil-

waukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending September 15, were 3,398,118 bushels, against 3,655,155 the week preceding, and the shipments were 3,297,437 bushels, against 3,767,154 in the preceding week.

The closing prices at New York and at Chicago at 1 P. M. for the past week were:

	At New York			Chicago.	
	Sept.	Oct.	Nov.	Sept	Oct.
Friday, Sept. 14	.61⅞	.63⅛	.62¼	.50⅞	.50⅝
Saturday, Sept. 15	.61⅝	.62½	.62⅛	.49½	.49½
Monday, Sept 17	.61⅝	.62	.61½	.49¼	.49⅛
Tuesday, Sept. 18	.61	.62	.61½	.48⅝	.48⅞
Wednesday, Sept 19	.61¼	.61⅝	.61⅛	.49	.48⅞
Thursday, Sept. 20	.62	.62⅜	.62⅛	....	.50⅜

Corn at Chicago at 1 P.M. yesterday was for October 50⅜c. and for November 49⅝c., against 50⅞c., and 50⅞c. for the options named on the preceding Friday.

The prices of breadstuffs in New York last evening, as against those of the Friday preceding, as compared with the same at a like date in 1882, were as follows:

The prices of breadstuffs in New York last evening, as against those of the Friday preceding, as compared with the same at a like date in 1882, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

	Sept 14	Sept. 21.

Total bushels	46,868,490	44,176,834	27,419,806	52,600,871

AMERICAN BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Flour is dull, and winters are weak under free offerings, but the stock of fresh old spring wheats is small, and as new is not yet on the market to any extent prices rule firm. Wheat has declined 3c. on a slow demand, but closes firm, with an improving tendency, influenced by a lighter movement from the interior and a general feeling that a reaction is probable after the late sharp decline. Corn is dull and lower. There is more export inquiry, but shippers' limits are still under the market on most orders, and but little business has been done within the week. Oats are active and stronger.

From Cincinnati, Ohio: Flour has shown no improvement; demand is confined to medium grades. Arrivals here are light and prices unchanged. Grain has been without marked change.

From Toledo, Ohio: The large receipts of wheat has produced a downward tendency in prices.

From Chicago, Ill.: Wheat is firm, more active on speculative account. There is no demand for No. 2. From shipping receipts stocks are increasing and the advance is 2c. on the lowest price this week. Corn is active and has advanced 2½c. Large shippers are buying and the shorts are frightened by predictions of frost and are covering trades. Oats are quiet and the demand is fair. Rye is in large supply and firm in sympathy with corn.

From Louisville, Ky.: Wheat market stagnant. Dealers here were paying more than seaboard prices to supply the milling demand. This has now ceased. Country dealers are holding back, and the movement has dropped off. Western oats are in good demand and free in movement.

From Burlington, Iowa: Crops are moving, and money in good demand at the banks. The weather favors the crops and business.

From St. Louis, Mo.: All grains are feverish and unsettled, but in a rather large movement. Flour is higher and in improved demand.

From Topeka, Kan.: The wheat trade is good, and flour is in brisk demand.

From San Francisco, Cal.: Wheat is strong at $1.70 per cental.

From Baltimore, Md.: Speculation in wheat has been weak, the inquiry small. Both southern and western markets rule dull. Prices have a lower tendency. Flour is in fair demand at the late decline, and the market is quoted steady with moderate offerings. The inquiry for corn has improved, and prices are firm.

From New Orleans, La.: Flour firm. Fancy grades are in demand. Grain is quiet. Receipts are moderate, and prices unchanged.

From Memphis, Tenn.: Flour is quiet. Cornmeal is steady.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Evansville, Ind.: The crops are suffering from a severe drouth, and late corn and potatoes will be cut short unless good rains intervene. Preparations for fall seeding are also retarded by the dry weather.

From Indianapolis, Ind.: Favorable weather the past few weeks has been of much advantage to the corn, which promises a large yield.

From Louisville, Ky.: The agricultural interests report drouth still prevailing in most parts of the state. The season is so far advanced, however, that but little additional damage can be done.

From Milwaukee, Wis.: Wisconsin farmers are generally stacking their wheat, prices being unsatisfactory, and the movement is light. Reports from threshing machines vary, and the yield ranges from 8 to 30 bushels. The quality is generally good, though in some localities poor; a prominent receiver estimates the Wisconsin and Iowa yield at 20 per cent. larger and in quality 10 per cent. better than last year. There are some complaints of smut. Dakota ranges from ten to thirty bushels, generally hard. Oats will yield from 50 to 100 bushels per acre. Corn in northern Wisconsin, Minnesota and Dakota is badly frosted.

From Omaha, Neb.: Nebraska crop reports are still of the best. A slight frost was reported from Potts county Sunday night last, but no damage was done, and the grain is now too dry to admit of any serious damage from frosts.

THE HOP CROP.

Recent advices from the hop-growing regions of the United States do not warrant a belief in a repetition of the short crop of last year, which caused prices to advance from about 27c. per pound May 19, 1882, to 35c. June 16, to 37c. on July 14, to 50c. August 11, to 57c. September 15, to 70c. on October 13, to 85c. October 27, to $1.05 on November 3, and $1.10 per pound on November 10. From the date last named prices declined on an average about 5c. per pound until the opening week in January, 1883. At that time there was another advance and $1 per pound was touched. Beginning about February 1 another decline took place, which continued until August 3 last, when 28c. was offered. At the close of the season, August 31 last, the ruling quotation at New York was 33c. In special dispatches to BRADSTREET'S, published below, a sale at 20c. per pound is recorded, which sufficiently characterizes the outlook for this year. One year ago the quotation was about 57c. The acreage to hops has been increased this year, which is natural following a season of restricted yield and high prices. Lice and mold have been extensively reported, and some damage has been done. The increased acreage in New York state, where three-fourths of the domestic crop is raised, is given at about 10 per cent. The Pacific coast is coming into considerable prominence as a hop producer, and the season's yield there was telegraphed to BRADSTREET'S a week ago as promising an excess of 15,000 bales as against the total product in 1882. California, Oregon and Washington Territory together produced nearly one-quarter of the domestic crop of hops, and the area cultivated is annually being extended. With a crop of about 160,000 bales in the United States last year, it is fair to expect a total product the present season in excess of 175,000 bales. The English hop crop for 1883 stands on 68,027 acres, an increase of 2,408 acres, or 3.7 per cent. over the acreage of 1882.

THE HOP CROP.

[By Telegraph to BRADSTREET'S.]

From Waterville, N. Y.: Hop picking is nearly finished. There is a small increase in quantity over last year, but the quality is injured. Generally, much damage is being done by mold and frost. Dealers are talking lower prices, but many growers are holding for higher. A small percentage of the acreage will not be harvested.

From Waterville, N. Y.: The condition of the crop is one-fourth choice, one-half medium, one-fourth very poor, and one-sixteenth of the crop lost. Buying is at 20c., and the tendency is downward. The crop harvested will exceed last year's 10 per cent.

From Watertown, N. Y.: The crop harvested will yield about the same as last year. The quality is not quite so good.

From Malone, N. Y.: The hop crop in Franklin county is all harvested, and, except that picked earliest, is in fine condition. Not a single yard had to be abandoned, and all were picked clear. The quality of the entire crop averages high. Owing to the increased acreage the crop is 25 per cent. larger than last year. About 500 bales of new sold this week at 20c. per pound.

PROVISIONS.

On Saturday and Monday the provisions market was severely hammered by the bears, and a heavy decline, in harmony with corn, and particularly with wheat, was the result. The receipts of hogs at the west continuing large warranted this, inasmuch as the home and particularly the foreign demand continued to be very limited. Tuesday witnessed a check and a slight advance, the reaction being in part a natural reaction from the continued drop in quotations which has been recorded for the past ten days. The advance made enabled buyers to make a small profit, when another decline was begun. Meanwhile, more strength was observed, owing to a revival in the demand abroad—a natural result of the low range of prices. The gain made in consequence was observable as well in a fractional increase in prices for hogs at the west. During the remainder of the week a further slight gain in prices was noted. Exports of hog products from the following places for the week ending September 15, 1883, were:

	Pork, barrels.	Bacon, pounds.	Lard, pounds.
New York	2,643	3,455,752	3,437,944
Boston	200	1,039,084	261,338
Portland	...	....	...
Montreal	134	2,017,000	1,010,320
Philadelphia	..	2,215,000	793,000
Baltimore	..	..	5,369
New Orleans	148	2,820	860
Totals	3,125	8,729,656	5,505,831
Previous week	3,494	7,665,373	7,172,297

The total export of hog product from the abovementioned places from November 1, 1882, to September 15, 1883, was as follows:

	1882-83, pounds.	1881-82. pounds.
Pork	41,172,200	43,621,600
Bacon and hams	375,104,768	314,836,964
Lard	253,857,366	215,584,870
Totals	670,134,334	604,046,434

Prices of lard and mess pork at New York during the week were as follows:

	Lard, per lb., October:—		Pork, per bbl., spot mess.—	
	This week.	Last week.	This week.	Last week.
Saturday, Sept. 15	8.27c.	8 53c.	$12.75	$13 00
Monday, Sept. 17	8.16	8.62	12.25	13 00
Tuesday, Sept. 18	8.34	8 48	12 25	13 00
Wednesday, Sept. 19	8.25	8.15	12.00	13 00
Thursday, Sept. 20	8 33	8 51	12.25	13.00
Friday, Sept. 21	8.32	8.37	12.00	12.75

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Provisions are dull and exceedingly quiet.

From Chicago, Ill.: Pork, lard and short-rib sides are firm in sympathy with grain. The demand is mainly from scalpers and to fill short sales. Hogs are weak and a shade lower. Cattle are in large supply and good demand.

From Louisville, Ky.: Provisions are steadier, with a moderate demand for current consumption, Produce shipments are large.

From St. Louis, Mo.: Provisions are in healthy tone and excellent movement at steady values. Cattle have declined all the week and the market is dull and unsteady. Hogs keep up well and are active, though values break away some at times.

From Baltimore, Md.: Provisions are reported quiet and lower, with a fair jobbing demand at the decline.

From Memphis, Tenn.: Meats and lard are firm. Live stock receipts are light. The past week prices have advanced fully ¼c. On different grades the market may be reported bare.

THE NEW YORK DRY GOODS MARKET.

The prevailing mildness of weather during the past week has had its expected effect on some branches of the dry goods trade; the clothing manufacturers more especially notice a falling off in the volume of business transacted, still it is of good proportions and satisfactory. The commission houses report a very good business for the week, there being a steady reassortment demand already set in; prices are very firm, and many makes of popular staples are sold well ahead. Importing houses and jobbers of dry goods have suffered but little from the continued mildness, though it is noticeable in the aggregate of the week's business; still the jobbing trade is of good proportions, active and encouraging. Cooler weather is predicted for next week, and it will doubtless be welcomed by the trade in general.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Dry goods are not so active as last week.

From Boston, Mass.: The jobbing trade in dry goods continues in full force, and a large distribution is already assured. Movements from first hands have increased, and agents report a better demand for plain cottons than for some time past. Prices have gained strength, and there are indications of a general advance in cotton fabrics, owing to the curtailed production caused by scarcity of water.

From Providence, R. I.: The print cloth market is very firm, the amount of sales being fair; 64s are quoted at 3 11/16c. cash and 56x60s at 3 5/16c. cash. There are about 115,000 pieces in the hands of manufacturers.

From Philadelphia, Pa.: Commission houses are doing a good general trade on orders for miscellaneous assortments, as the brisk demand from retailers has caused a considerable depletion of jobbers' stocks. The distributive trade continues active, and the prospects are excellent for the balance of the season. The general market is stronger.

From Pittsburgh, Pa.: The dry goods trade continues active, and an improvement in collections is reported.

From Cincinnati, Ohio: Dry goods and clothing trade are apparently doing well. Many buyers are here in person.

From Cleveland, Ohio: Dry goods are moving in a satisfactory manner, and an increase over last September is certain.

From Columbus, Ohio: There has been no marked change in the condition of dry goods.

From Toledo, Ohio: Sales of dry goods so far this month are twenty per cent. in excess of last year. In dry goods there is no change to report except that rains have facilitated trade some.

From Detroit, Mich.: Dry goods jobbers report business for the week of good proportions, and sales for September thus far 12 to 15 per cent. ahead of last year's.

From Evansville, Ind.: The dry goods trade is good—in fact, quite satisfactory.

From Louisville, Ky.: Dry goods houses are crowded with business. Bills average the usual amounts, and the increase is trade from new sections. The southern exposition has attracted many customers.

From St. Louis, Mo.: Dry goods show increased activity. Prices are firm but not quotably changed.

From Burlington, Iowa: Dry goods are in demand in liberal quantities, covering a general line.

From Topeka, Kan.: The dry goods trade is rapidly improving. Sales are now double what they were a month ago.

From San Francisco, Cal.: Dry goods have shown a satisfactory activity. Heavy orders are coming from commercial travelers.

From Baltimore, Md.: In dry goods the principal demand is for prints and dress goods. Country orders are coming in far better than the most sanguine jobber hoped for, and it now looks as if the sales this fall will be as large if not larger than last year's. Retail dealers are doing something, and the general feeling in the trade is good.

From Norfolk, Va.: The dry goods jobbers are doing a fair business.

From Savannah, Ga.: Stocks of dry goods full in all lines. Sales continue brisk and the tone of the market is good.

From Galveston, Tex.: Dry goods and general jobbing trade less active, and may be considered only moderate.

From Memphis, Tenn.: Dry goods jobbers report business satisfactory, with an encouraging outoutlook.

CLOTHING.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There is an active movement in clothing, and manufacturers have all the business they can well attend to. September's sales promise to be fully as large as for the same month last year, if not larger, and there is every indication of a successful season.

From Savannah, Ga.: The demand for clothing is steady and the jobbing trade is busy.

COTTON.

The market for spot cotton at New York for the week has been quiet and steady. Transactions have been generally light with the exception of Wednesday and Friday, when the sales were heavy, aggregating nearly 9,000 bales. Quotations for middling uplands have advanced ¼c., closing at 10½c. last night. The total sales for the week have been as follows: For export 2,457 bales, for consumption 6,456, and for speculation 4,180, making a total of

13,093 bales. Deliveries on contract amount to 1,800 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	8 1 16c.	7 13-16c.	9 15-16c.
Strict ordinary	8½	8¼	10⅜
Good ordinary	9 5-16	9 1-16	11 3-16
Strict good ordinary	9⅜	9⅛	11⅝
Low middling	10⅛	9⅞	12
Strict low middling	10 5-16	10 1-16	12 3-16
Middling	10½	10¼	12 5-16
Good middling	10⅝	10⅜	12 11-16
Strict good middling	11⅛	10⅞	12 15-16
Middling fair	11⅝	11⅜	13 7-16
Fair	12⅜	12⅛	14 3-16

STAINS.

	This week.	*Last week.*	*Last year.*
Good ordinary	7½	7¼	9 9-16
Strictly good ordinary	8 15-16	8 1-16	10⅜
Low middling	9	8¾	11 1-16
Middling	9 15-16	9 11-16	12

The market for spot cotton closed steady.

The future market has been steady; dealings have been very heavy, the sales on Saturday reaching 233,900 bales, the largest for any day this year. Prices have not changed very materially during the week. The closing quotations to-night show an average advance of 2 points for near months and 1 for later ones over those of Friday last week. The sales for the week foot up 832,300 bales against 576,700 last week.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
September	10.50	10.40	12 06
October	10.52	10.53	11.63
November	10.63	10.65	11.39
December	10.74	10 75	11.38
January	10.85	10.85	11.43
February	10.99	10.98	11 53
March	11.13	11 10	11.05
April	11.24	11.21	11.75
May	11.35	11.32	11.86
June	11.46	11.42	11.95

The market for futures closed steady.

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
Galveston	8,114	10⅛	11¾
New Orleans	7,400	10¼	12⅛
Mobile	1,500	10⅛	11¾
Savannah	10,250	9 15-16	11½
Charleston	6,100	10⅛	11⅜
Norfolk	1,706	10⅛	11⅛
Baltimore	1,056	10⅜	12⅛

The total receipts of cotton at the ports since September 1 are 193,919 bales, against 141,830 last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	46,277	44,279
New Orleans	32,326	15,342
Mobile	6,784	7,645
Savannah	49,170	41,767
Charleston	30,208	27,536
Wilmington	4,123	2,870
Norfolk	9,688	7,413
Baltimore	739	274
New York	276	1,065
Boston	321	1,117
Philadelphia	1,708	1,126

Below will be found the receipts for each day of the week ending September 21, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	3,316	6,844	1,440	3,279	3,525	3,036
New Orleans	1,013	4,188	2,178	3,727	1,068	5,244
Mobile	392	1,636	814	437	571	605
Savannah	3,319	4,056	3,611	3,839	4,611	4,801
Charleston	2,954	3,726	2,442	2,830	3,110	2,931
Wilmington	101	629	316	365	234	286
Norfolk	537	742	696	826	963	1,141
Baltimore	....	2	61	447	....	....
New York	....	....	....	....	....	29
Boston	....	48	....	67	1	126
Philadelphia	110	....	263	25	4	69
Totals	11,742	21,878	11,821	15,642	14,087	18,271
This day last week	8,143	13,925	9,499	8,038	9,669	13,170
This day last year	8,063	10,700	9,600	12,733	13,039	14,377

The total receipts at the ports for the week were 96,398 bales, against 64,300 last week and 76,920 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 43,323 bales, against 26,779 bales last week and 30,281 bales for the corresponding week last year. The shipments for the week were 30,177 bales, against 20,501 bales last week and 24,089 bales for the corresponding week last year. The stocks for the week were 55,195 bales, against 43,197 last week and 19,557 for the same week last year.

The Liverpool market for prompt delivery uplands has been steady. Quotations have been higher, having advanced from $5^{11}/_{16}$d. to $5^{13}/_{16}$d. on Saturday, at which latter figure they have since remained unchanged.

The future market has been dull and steady. The closing quotations show an advance of about 3 points for both the near and later months over those of Friday last.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
September	5 51-64d.	5 52-64d.	6 58-64
September-October	5 53-64	5 52-64	6 48-64
October-November	5 52-64	5 49-64	6 38-64
November-December	5 51-64	5 49-64	....
December-January	5 53-64	5 50-64	....
January-February	5 56 64	5 52-64	6 32-64
February-March	5 52-64	5 56-64	....

The market for futures closed quiet.

The sales for the week at Liverpool were 66,000 bales (of which 40,000 were American), against 40,500 (of which 26,500 were American) last year. The sales for export were 7,500 bales, against 4,800 bales last year. The sales for speculation were 9,000 bales, against 450 bales last year. The amount forwarded was 5,300 bales, against 4,600 bales last year. The stock in port is 765,000 bales (of which 481,000 are American), against 539,000 bales (of which 229,000 were American) last year. The total imports for the week were 43,500 bales (of which 12,000 were American), against 27,000 bales (of which 24,500 were American) last year, and the amount afloat 81,000 bales (of which 30,000 are American), against 157,000 bales (of which 35,000 were American) last year.

The Manchester market closed easier.

The Havre market closed quiet and steady.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is firm, and sales are fair. Middling uplands are worth 10¾ @10⅞c., and middling gulfs 11⅛c. The stock on hand is very light.

From Philadelphia, Pa.: Spots have advanced ¼c. since last report, and the improvement is well sustained, but the demand continues moderate.

From Cincinnati, Ohio: Cotton is in better demand, and dealers say that the chances are favorable for Cincinnati doing more trade this year than last.

From St. Louis, Mo.: Cotton tends upward a little, and the market is as active as stocks warrant.

From Baltimore, Md.: Cotton "spot" offerings are light, but "new" to arrive is offered freely. The market is quiet and firm. Recent sales of about 270 bales was at 10¼ to 10½ cents.

From Savannah, Ga.: Cotton is coming in more freely, but trade is quiet. Buyers are offering lower prices, buyers and sellers being apart. Country opinions state that only one-third of average crop of cotton and corn will be made.

From New Orleans, La.: The cotton movement has been fair during the week and all desirable lots have been taken upon European orders. Spots advanced all the week till Wednesday, when they reacted slightly, but on Thursday were again firm but quiet; compared with last week prices are one-eighth to three-sixteenths higher. Futures advanced heavily in the beginning of the week, causing a large bear firm to fail. Toward the end of the week they reacted slightly and closed steady. The movement is heavy and receipts are increasing. Rain is reported in many sections and there are indications of more; crops slightly benefited.

THE GROWING COTTON CROP.

[By Telegraph to BRADSTREET'S.]

From Galveston, Tex.: The weather since last report has been dry and hot, but on Thursday received a good rain.

WOOL.

There has been a good trade in wool in all the seaboard markets during the past week, and the general position and outlook are more satisfactory. An advance of 1@1½c. has been realized on some grades of combing fleeces, and all descriptions have been confidently held at firm prices. Long staple wools continue to lead in the interest of buyers, owing to the general activity in the worsted yarn and manufacturing trades. These wools are now from 1c. to 3c. up from the lowest rates of the season, and are closely sold up in all markets. Other branches of woolen goods production are rather more active, and in view of the activity in the clothing trade and the improved condition and surroundings of general business manufacturers are buying the raw material with more freedom and confidence. While the whole market is stronger there is no material change in prices aside from the improvement above noted in worsted wools, but fine washed fleeces are bringing former asking rates more readily, and the general tendency of values is more in favor of sellers than of buyers. At the East India auctions in Liverpool this week there has been but moderate competition among buyers, and medium to best grades show a decline of a farthing from July prices. Other descriptions are unchanged.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The demand for wool has been quite active this week, and a better feeling very generally prevails. The sales of the week have been 3,926,900 pounds of all kinds. Prices of washed fleeces have advanced 1@2c. per pound, the most marked improvement having taken place in fine Ohio and Pennsylvania, as manufacturers are running largely on this grade. The sales of Ohio and Pennsylvania have been at 36@38c. for X, and 39@42c. for XX and XXX, but good average XX fleeces are now generally held at 42c. per pound. In Michigan fleeces there have been sales at 34@35c. for X, and good average lots are now firm at 35c. Combing and delaine selections have been in demand and are higher. Fine Michigan and Ohio delaine have been sold at 39@43c., and fine and No. 1 combing at 43@45c. per pound. Unwashed wools have been in demand, and considerable sales of Texas, territory and western fleeces at full prices. There is more doing in California wool, and sales of 300,000 spring at 22@29c. per pound. A lot of 100,000 pounds valley Oregon sold at 27c., and 100,000 pounds eastern Oregon at 26c. per pound. Pulled wools have been in fair demand, and sales of choice supers at 40@42c. and common to good at 25@38c. per pound. The sales of foreign have not been to any extent, and comprise small lots of New Zealand, Montevideo and carpet wools at unchanged prices.

From Philadelphia, Pa.: The consumptive demand has been active and the sales larger than those of last week by over 700,000 pounds, the total this week reaching upward of 18,000,000 pounds. Worsted spinners and manufacturers have been the principal buyers, and in some instances have paid 1@1½c. advance for quarter-blood wools. All descriptions are strongly held.

From Baltimore, Md.: All desirable lots of wool find buyers, and prices are steady.

IRON.

While the iron and steel trade of the United States has presented no feature of genuine novelty during the past week there has been a promised improvement in the feeling among western manufacturers and buyers. More inquiries have been received in New York during the past week from western cities, new orders for pig iron and other varieties of the products under discussion have come to hand, and while all requests have been strictly of the character known as "for immediate requirements only," still the very steady buying in small lots is found by dealers here to aggregate a sum quite equal to and in cases in excess of the total sales at a corresponding period last year. The pig iron dealers in this city look for no boom in the current year. It is probable that a better demand may be experienced somewhere between October 1 and November, consequent upon orders by interior mill owners who will desire to receive their stock before the close of navigation. In the meantime prices are firm and unchanged. Steel rail mills are full of orders, some of them being engaged as far ahead as the middle of November. Dealers in finished iron find the market fairly satisfactory, and dealers in bar, while not fully satisfied with the demand and current prices (owing to competition), are willing to admit that the position of this branch of the iron industry is better than it has been before during the year. Scotch pig iron is firm and unchanged. Prices recently weakened on the other side to the extent of 1s. per ton, consequent upon the unfavorable returns of the Board of Trade on the British iron trade during August. Sales on this side, however, have gained a little. Arrivals have amounted to about 1,300 tons, and sales have been in excess of those for any week for some time. No Scotch iron has been reported as stored here on arrival for a number of weeks.

IRON MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is dull and weak, with few sales reported. Muck bars are moderately active. Merchant iron is selling fairly in retail lots at unchanged prices. Nails are less active, as the busy season is over, and there is a prospect of overproduction. Pipes and tubes meet with ready sale. Plate and tank active and mills crowded with orders. Structural shapes are in good demand. Steel rails continue quiet. Prices firm on small lots, but weakening on large lots. Old material is in active request. Scrap is active.

From Pittsburgh, Pa.: The iron market is reported very much improved. A canvass of the mills shows that all are very busy, and many sold up to November 1. While there has been no material change in prices, there has been a much better feeling during the past week. Nails are in brisk demand, and an order for leading sizes has to wait its turn. Prices are unchanged and firm. A stoppage of mills from November 5 to December 3 has been decided upon by the Western Nail Association. The pig-iron market continues very dull, with but little inquiry.

From Detroit, Mich.: In iron there are no new developments. The demand is steady. Prices are unchanged.

From Chicago, Ill.: Pig iron is steadily held. The jobbing demand is fair, and stocks are under good control.

From Cleveland, Ohio: The iron market is firmer but the supply none too large for the anticipated demand. Receipts of ore will undoubtedly decrease largely, owing to the advance from $1.15 to $1.75 per ton on freight from Marquette, and better prices are looked for in consequence.

From Cincinnati, Ohio: Iron is improving slightly, and dealers in pig iron speak hopefully of the market. Manufactured iron is in good demand; prices unchanged.

From Louisville, Ky.: Pig iron is steady and stocks light. Merchant iron is in active movement.

From St. Louis, Mo.: The pig iron demand only moderate, and for immediate needs. Manufactured iron is quite active, and no concessions are made.

AMERICAN HARDWARE.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: The hardware trade is active.

From Savannah, Ga.: Hardware is active with orders ahead. This trade is generally satisfactory.

From Cleveland, Ohio: Hardware sales are fully 10 per cent. in excess of last year.

COAL.

The trade in anthracite coal has visibly improved. The report is made that the demand for nut and stove is so heavy as to necessitate the breaking up of larger sizes. Manufacturing sizes have also been in improved request both here and at the west. Stocks have been steadily reduced, and production has approximated almost 2,000,000 tons in excess of a like period in 1882. The official report of the anthracite coal tonnage of all the carrying companies for August shows that the total tonnage for the month was 3,324,711 tons, an increase of 130,008 tons as compared with the corresponding month of last year. The tonnage of the different companies was as follows: Philadelphia & Reading Railroad 1,317,954 tons; Lehigh Valley Railroad 615,611 tons; Delaware, Lackawanna & Western Railroad 357,487 tons; Delaware & Hudson Canal Company 361,281 tons; Pennsylvania Railroad 266,533 tons; Pennsylvania Coal Company 167,685 tons; New York, Lake Erie & Western Railroad 38,158 tons. At the end of August the increase in production in 1883, as compared with the preceding year, amounted to 1,731,361 tons. The stock of coal on hand at tidewater shipping points August 31, 1883, was 576,132 tons; on July 31, 1883, 502,159 tons; increase 73,973 tons. At the west coal is steady; anthracite is firm and the demand holds well up to anticipations in view of the new demand in that region. There is a dispute between the railroad coal miners and the mine owners in the Pittsburgh district as to the rate of wages to be paid. The operators want the present rate of 3¼c. per bushel continued until November 1, and the miners want a ½c. advance October 1. A strike is threatened.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal market is active for the retail trade. Sales are fair and prices remain unchanged. There is a fair average stock on hand.

From Chicago, Ill.: Coal is active, anthracite being firm.

PETROLEUM.

Two new wells of importance appeared last week, but the bullish feeling on 'change continued to be pronounced. On Saturday the jump in prices was 4c. from the opening to the highest point reached that day. This was caused, of course, largely by the hurry of the short interest to cover, as few cared to go home on Saturday with a long line of short oil. The possibilities in the way of news from the regions were too many. Monday, Tuesday and Wednesday showed far less activity, and prices sagged back. On Thursday the movement of prices was more animated, and dealings were more frequent.

On Friday pipe line certificates opened at $1.14¾, and under the influence of an active buying market advanced rapidly to $1.16⅛ at the close, at noon. At 1.30 p.m. bids were made at $1.16½, whence they advanced to $1.16⅝. Shortly before the close there was a break in prices, caused by the very general desire to realize. The boom appeared to be based solely on the apparent excess of consumption over production, as shown by the daily reports respecting the quantity of oil drawn off from wells and that shipped and piped out of the regions.

Well news yesterday did not appear to have any special vitality, so far as affecting the market is con-

cerned. A heavy flowing well in the Balltown district came in on Thursday and another was reported yesterday morning without the slightest effect having been observable on prices. These wells produce from 600 to 1,000 barrels daily (so reported). At the close yesterday the price bid for pipe line certicates was $1.15¾, against $1.11⅜ at the close on Friday of last week, an increase of 4⅜c. on the week. The total clearances of the week as reported at the New York Exchange amounted to 33,500,000 barrels.

The shipments of petroleum from the regions continued to exceed the runs (from wells to tanks) about 13,000 barrels daily, according to the Pipe Line Company's report.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, September 15.....	1.11⅜	1.15⅜	1.11⅜	1.14⅞
Monday, September 17.....	1.15⅜	1.15¾	1.13¾	1 14⅜
Tuesday, September 18.....	1.14⅜	1.15⅜	1.13⅞	1.14¾
Wednesday, September 19	1.14¾	1.14⅞	1.14⅛	1.14¼
Thursday, September 20....	1.14⅛	1.15	1.13⅞	1.14⅞
Friday, September 21.....	1.14¾	1.17¼	1.14¾	1.15¾

The marked advance in the price of certificates of crude on Saturday was reflected in the price of refined for export, which advanced at once to 8⅜c. 70° Abel test, a gain of ⅛c. per gallon. Refiners at New York remained out of the market and refused to sell at any price, quotations continuing nominally at the figure given. The demand for crude in barrels, which had been fairly active early in the week, fell away later. Prices sustained no change.

Prices for petroleum and its products, with comparisons, have been as follows:

	Aug. 24.	*Aug.* 31.	*Sept.* 7.	*Sept.* 14.	*Sept.* 21.
Certifi's, crude..	1.07½	1.08⅜	1.08	1.11⅜	1.15¾
Refined, 110°.....	7½	7¾	8	8⅛	8¼
Refined, 70°.....	7⅞	7⅞	8⅛	8¼	8⅜
Crude, in bbls...	6⅞@7⅛	7¼@7⅜	7⅜@7⅝	7½@8	7½@8
Case, plain.....	9	9¼	9⅜	9⅝	9⅝
Naphtha.....	5¼	5¼	5¼	5¼	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending Sept. 15, was 14,473,599 gallons, against 15,830,221 in the preceding week. The total export from the United States since January 1 was 451,014,457 gallons, against 454,868,445 gallons in the corresponding portion of 1882, a decline in the current year of 3,853,988 gallons. The total exported from New York city during the week ended Sept. 15 was 12,335,437, and during the year, to that date, 371,428,407, against 359,883,431 gallons in a like portion of 1882. This shows an increase in shipments on the year from New York alone, as compared with 1882, of 11,544,976 gallons (crude equivalent) as against a decline from the country at large of 3,853,988 gallons.

OCEAN FREIGHTS.

The ocean freights market at New York has been quiet during the week. Charters have been restricted. This has been due in part to the attitude of refiners of petroleum who remained out of the market, even with prices at 8⅜c. per gallon for 70° Abel test. Foreign buyers of wheat have also been apathetic, and the consequence has been that on the whole the demand has been below the supply. A few grain charters have gone abroad only. At the berth, the average quantity of grain, provisions, cheese, etc., has been disposed of. Dates for charters have been moderately steady, despite the lessened demand. Berth rates have been practically unchanged. Some grain has been shipped from Baltimore. At Philadelphia there has been a comparative dearth of vessels, which has gone far to sustain rates.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Grain freights are strong and a shade higher, but quiet. Oil tonnage in fair demand, and rates firm. Tonnage offerings moderate. Liverpool grain room, by steam, is held ½d. higher.

From Baltimore, Md.: The freight market has again quieted down, and rates are nominal.

From Wilmington, N. C.: Freights are low. Rates north react here. The wheat crop is promising.

From Savannah, Ga.: Tonnage is scarce and wanted for coastwise and foreign shipment.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Trade is holding out well with jobbers, and stocks are clearing up close. Manufacturers are getting a few duplicates, but are nearing the end of their contracts, and the fall season will close about the end of this month. Salesmen with samples of spring work are prepared to solicit orders. Shipments are beginning to fall off, but are steadily running ahead of last year. For the past week shipments foot up 67,000 cases.

From Evansville, Ind.: The boot and shoe dealers say trade is very good.

From Savannah, Ga.: Boots and shoes are in good demand, and heavy shipments are made every week. Retail trade shows increased sales.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: The leather business is active, with an increase in the demand for good sole and rough; also light southern harness grades is noted.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Leaf tobacco is firm and active. A count of warehouse stocks shows 8,200 hogsheads. The growing tobacco crop has suffered from the drouth, but at this stage rains are not wanted. About one-fourth of the crop has been cut.

From St. Louis, Mo.: Tobacco has been dull but heavy. Sales have started at firm values.

From Cincinnati, Ohio: The tobacco market is unchanged. The plant is being cut, and reports say that it is equal to any year yet.

From Baltimore, Md.: There is a general demand from shippers for good grades of Maryland tobacco, and prices have an advancing tendency. Ohio is also in steady demand.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Evansville, Ind.: Wholesale dealers in liquors report a considerable improvement, but still trade is only fair.

From St. Louis, Mo.: Whisky is in better demand. Kentuckies are bringing a better price than last week, and while a few lots have been thrown upon the market by holders of maturing paper, such have been bought up by speculators who are prepared to hold for advance.

From Louisville, Ky.: Whisky is steady to firm and trade improving.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Lumber is decidedly more active.

From Wilmington, N. C.: In lumber there is a good local trade for building.

From Savannah, Ga.: Lumber is quiet, except for home consumption.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Naval stores are somewhat dull.

NORTH CAROLINA PEANUTS AND RICE.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Rice has been injured both in quantity and quality. The peanut (estimated) crop will be 150,000 bushels.

SPECIAL NEW ORLEANS TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: There is no stock of sugar in first hands, and the market is nominal. Molasses is inactive. Rice is dull and unchanged. Cottonseed oil is unchanged. Oil cake is $24; crude oil 30c. to 33c., and refined oil 40c. Coffee is firm and unchanged.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, September 19.—The condition of business in financial, mercantile, and industrial circles is most satisfactory; money is in good demand, the banks as a rule are carrying full lines of discounts, and rates are steady at 5@6 per cent. on call and 6@7 on time paper, and the prospect for a continued activity in the demand for money is encouraging. New York exchange is in good demand, nearly all the western bankers being free buyers here, and the market is 25c. discount to par between banks, and country collections by merchants easy. The movement of money to the interior is free, and the balances of interior bankers are closely drawn. The jobbing trade in dry goods maintains the large proportions noted last week, and some establishments are unable to bill and pack goods as fast as sold. A corresponding activity is reported in hats, ready-made clothing and general furnishing goods. The millinery houses, or at least the leading establishments, are swarming with customers, and the mail orders were never exceeded in number. Boots and shoes are actively called for, and a fair trade is reported in leather, stocks of which are well under control. Hardware, metals and tinners' goods are selling fully up to any previous time this season, and a corresponding trade is reported in bar, plate, angle iron and nails. Pig iron is selling fairly in job lots as wanted by manufacturers, who generally buy after a hand-to-mouth fashion, but stocks are light, and there is no disposition to press sales by offering to shade quotations. Nor is it likely that any moderation that jobbers could consistently make would increase buying. Groceries are moving freely on orders, and the volume of sales are fully up to any corresponding period. Drugs, chemicals and druggists' sundries are selling freely. The furniture trade is fairly active. Coal is active and the trade more satisfactory than at the opening of the month. Lumber is meeting a good sale, and stocks here and in the interior are passing into consumption more freely. Wool is meeting a very good demand from eastern and middle state manufacturers, but there is no excitement, and the takings are generally on a basis of current or near future wants. Hides are moving a little more freely, some of the tanneries being disposed to put in more stock, but there is no change in prices.

The grain markets are active, but the course of prices very irregular. Wheat is arriving more freely; liberal receipts are also reported at other northwestern markets tributary to the spring wheat districts. Stocks are large. The shipping demand fails to develop with the inward movement, and, although prices are relatively low and the quality superior, there is an absence of confidence sufficient to induce large and strong operators to either buy on speculation or ship, and trading is closely confined to what are known as scalping deals between brokers. The certainty of increasing stocks and higher rates for freight and insurance as the season advances also aggravates the situation, and closing prices to-day are about the lowest of the year, and 26c. below the highest figures last spring, when the market was manipulated by a clique whom, it is gratifying to know, lost over $1,200,000 in an attempt to force values above figures justified by the laws of supply and demand. Corn continues to come forward freely, but there is a large shipping movement to New England and Canada, and, although the scare regarding frost damages has materially subsided, the grain is regarded with confidence, and in spite of the efforts of the bears the market shows great elasticity, and each downward movement is followed by a sharp advance. The provision trade fails to show any signs of health. Pork and lard are scarcely called for by distributors to the consuming sections, and prices are down to the lowest figures of the year, the decline in pork from the highest prices last May being $10 per barrel and lard about 5c. per pound. Meats are meeting a fair consumptive demand, but prices sympathize with pork and lard, and short ribs are correspondingly low, the decline in prices since early in May being 50 per cent., and at this great shrinkage there is a lack of confidence among buyers and lower prices are predicted.

Stocks of grain in Chicago on dates named were:

	Sept. 15, 1883, *bush.*	*Sept.* 16, 1882, *bush.*	*Sept.* 17, 1881, *bush.*	*Sept.* 16, 1880, *bush.*
Wheat.....	6,103,000	1,687,000	3,557,000	1,306,000
Corn.....	2,785,000	1,742,000	6,241,000	4,315,000
Oats.....	522,000	944,000	732,000	96,000
Rye	698,000	159,000	248,000	50,000
Barley.....	43,000	64,000	84,000	56,000
Totals	10,151,000	4,595,000	10,862,000	5,823,000

RUSSIA'S TRADE IN BEEF.

The *Pall Mall Gazette* of recent date says:

"The last four months have witnessed the development of a considerable importation of dead meat to this country from Russia, and during July £10,000 worth of fresh beef reached England from the Baltic port of Libau. It is stated that the meat, which arrived in good condition and met with a ready sale, was not frozen, nor even refrigerated, after the fashion of American beef, having been killed only six days before it reached the London salesman. To keep it in good condition it was only found necessary to preserve a temperature chilled to a point ranging from 38° to 42° Fahrenheit. If this importation of Russian beef develops into a great dead meat trade between the continent and England, a satisfactory solution will be found to the much-vexed question of the disease bred in our herds by live importation. Hitherto attempts to supply our dead meat markets from abroad have been commercial failures. The company, for instance, organized to export Australian mutton met with disaster, in spite of the fact that their meat readily fetched sixpence a pound in London—an advance, that is to say, of more than 100 per cent. over the price current in Adelaide. This immense profit was, however, more than counterbalanced by the enormous outlay incurred in the purchase of refrigerators and other kinds of machinery and in paying a heavy freightage. That the importer of dead meat is at a disadvantage as compared to the importer of live stock is, indeed, self-evident. The adverse conditions are, of course, very much modified in favor of the importer when he ships his meat from continental ports within easy access of our shores."

BORDEAUX WINES AND THEIR PRICES.

The British consul at Bordeaux says in his last report: "Low-priced genuine Bordeaux wines must be regarded as non-existing. Whenever therefore anybody sees price-lists containing the well known names of Bordeaux wines with the same prices affixed to them as used to be charged for the same ten to fifteen years ago, or in times of exceptional abundance, he may be quite sure that such wines are not the growth of the vineyard under the name of which they are offered for sale. The prices even of the commonest class of Medoc wines ('vin ordinaire') have increased 75 to 100 per cent. during the last decade. Any one who wishes at present to buy pure genuine Medoc or other well known wines of this district should consequently not only be prepared to pay a far higher price than he may have paid ten years ago for the same kind, but he should take the requisite steps to make sure that the wine he is buying has passed through the hands only of honest dealers, both in France itself and also in other countries. The quantity of adulterated and falsified (so-called) 'Bordeaux wine' exported at present annually is very considerable. With regard to the quality of the 1882 vintage no general definite opinion seems at this date to have yet been arrived at, and the views of connoisseurs are still quite at variance. Some of the latter appear to think that the 1882 wines show much softness, with sufficient body and color; others, though allowing that they possess a certain 'finesse,' regard them as inferior to the 1881 vintage; but all opinions agree that during the last two or three months the 1882 wines have certainly developed themselves in a remarkable manner. Prices for superior classes are stated to have been as much as 35 per cent. below those obtained by 1881 wines."

DRAWBACKS TO FRENCH TRADE.

The difficulties in the way of the expansion of French commerce are clearly put in the *Economiste Francais*. It is asserted, first, that England and Germany are able now to imitate and produce goods with the art and taste of which France had once a practical monopoly. The rise of art schools abroad has done this. Secondly, French artisans demand higher wages than in Germany, Belgium or Italy, while in England, if the rate of wages is higher, a longer day's work is given by work-people. This on the authority of M. Leroy-Beaulieu. The writer goes on to say that the behavior of workmen in France to small masters is such as to drive them out of their trade as soon as the smallest accumulation of savings enables them to retire. Further, that France, in disseminating the protectionist ideas of which M. Thiers was the apostle, has converted Italy, Austria, Germany, Russia, the United States, and other countries, with the effect of closing foreign ports to French goods. More stress than on anything else is, however, laid on the system of military service, which ruthlessly recalls young men from promising occupations abroad and cuts short many useful commercial careers.

THE COCHINEAL TRADE OF TENERIFFE.

The following is taken from the London *Times* of recent date: "The old proverb that 'What is one man's meat is another man's poison' was never better exemplified than in the cochineal trade, which has been nearly ruined since the discovery of aniline dyes. Until very recently this trade was the mainstay of the island of Teneriffe, the cochineal depending upon the cultivation of the cactus plant (*Opunta Ficus Indica*), which, since the supersession of the trade by aniline, is no longer the remunerative business that it formerly was.

Cochineal consists of several kinds and qualities, the first and second qualities being called black *aconchada*, the others being *madres buenos*, and *plateada*. The export trade is principally in the latter kinds, the first being less abundant and having to be more carefully picked and sorted. The *madres buenos* is seldom exported, but is principally used for propagating the cochineal insect by sprinkling them on the thick fleshy leaves of the plant, which flourishes equally well in indifferent and rocky soil, and requires little or no care or irrigation. The sowing or sprinkling season of the insect is during the month of May or June and the gathering is made in October, when the commercial operations commence and continue until the following May. During 1882 the shipments of cochineal were 4,840,316 pounds, showing a diminution of 791,339 pounds on the export of the previous year. Of this quantity England took 2,715,983 pounds, America 868,813 pounds, and France 952,460 pounds, the remainder going to Germany, Spain and Morocco. That the trade was of great value is shown by the price in 1880 of 2s. 4d. per pound in England and 3f. the kilo in France,

which produced a return of £600,000, or four-fifths of the whole trade of the Canary Islands. The trade might have continued in a better state, had not the cochineal farmers glutted the markets, and refused to see the necessity of lowering their prices, in consequence of the discoveries of fresh coloring matter. Consul Dupuis says that the failure of the trade has affected all classes of society, and has brought great distress not only into the homes of the workingmen, but of the wealthier residents, who were all more or less interested in cochineal. It is now proposed to limit the growth of the cactus and to substitute that of the sugar cane, for the cultivation of which, and of abacco, the island is extremely well fitted.

TRADE EMBARRASSMENTS.

There were 177 failures in the United States reported to BRADSTREET'S during the past week, 41 more than the preceding week, 36 more than the corresponding week of 1882, and 81 more than the same week of 1881. Compared with the previous week the middle states had 38, an increase of 10; New England states 37, a increase of 14; southern states 21, an increase of 3; western states 52, a decrease of 2; Pacific states and territories 29, an increase of 16; Canada and the Provinces 26, an increase of 12. Among those reported embarrassed were A. & E. Wallach, importers of notions; Abraham S. Herman, knitting works, and J. S. Ludington, lumber, New York; Young, Thayer & Co., tanners' extracts, and Farrington & Hunnewell, silverware manufacturers, Boston; Storer, Bolster & Co., wholesale dry goods, Portland, Me.; Henry A. Ramsey & Co., engine works, Baltimore; Anthony & Kuhn Brewing Company, St. Louis. In the principal trades the failures were as follows: Grocers 34; general traders 14; liquors 13; manufacturers 13; clothing 7; lumber 7; furniture 7; jewelry 6; shoes 5; dry goods 5; fancy goods 5; produce and provisions 5; drugs 5; bakers and confectioners 4; hats 4; hardware 4; grain and flour 3; hotels and restaurants 3; harness 2; commission 2; oil 2; gents' furnishing goods 2; stationers 2; tobacco and cigars 2; millinery 2.

CALIFORNIA.

CAPAY.—H. Aronson, dry goods, has assigned.

GREENVILLE.—R. L. McGill, saloon, has filed a petition in insolvency.

LOS ANGELES.—Isaac C. Goff, commission fruits, has filed a petition in insolvency.

OAKLAND.—J. J. Damon, saloon, is in insolvency.

OAKLAND.—Lynch, Maloney & Co., coal and wood, have filed a petition in insolvency.

OAKLAND.—William A. Slocum, publisher, is in insolvency.

SAN BERNARDINO.—Charles A. Ferguson, agricultural implements, is in insolvency.

SAN BERNARDINO.—J. E. McCrystie, tailor, has failed and left town.

SAN FRANCISCO.—A. Asmann, produce, has been closed by attachment.

SAN FRANCISCO.—Douglas, Stevens & Co., grocers, have sold out and been attached.

SAN FRANCISCO.—Edward F. Hall, Jr., stock broker, has failed.

SAN FRANCISCO.—Henry Matschke, hotel, has been attached.

SAN FRANCISCO.—J. Nunan, restaurant, has been closed by the sheriff.

SAN FRANCISCO.—P. H. Owens, merchant, has been closed by attachment.

SAN FRANCISCO.—E. Rimassa, shoes, has been closed by attachment.

SAN FRANCISCO.—A. Ungrott, saloon, has been sold out by the sheriff.

SAN FRANCISCO.—Frank B. Veirs has filed a petition in insolvency.

STOCKTON.—James McDonald, fancy goods, has assigned.

COLORADO.

DEER TRAIL.—Payne & Dillon, general store, gave a chattel mortgage for $6,000, sold out and were attached for $1,793.

LEADVILLE.—George C. Steele & Co., gents' furnishing goods, have assigned and been attached.

RICO.—B. E. Ladd, Jr., saloon, has been closed by the sheriff.

CONNECTICUT.

BETHEL.—Judd & Judson, hat manufacturers, have failed.

DANBURY.—Green Brothers, grocers, have been closed by the sheriff.

NEW HAVEN.—Albert T. Candee, hats, has failed.

WATERBURY.—Henry L. Noble has assigned.

DAKOTA.

CHAMBERLAIN.—Dickinson & Humphrey, general store, have failed.

VALLEY CITY.—James D. Allen, jeweler, has been closed by the sheriff on an attachment in favor of Warner & Co., of Minneapolis.

FLORIDA.

PENSACOLA.—J. J. Grant, grocer, has assigned to James Largue.

GEORGIA.

SAVANNAH.—S. Gerstman & Co., wholesale groceries and produce, have been attached.

SAVANNAH.—John Hoyt, saloon, has been closed by the sheriff.

SAVANNAH.—L. C. Tebeau, carriages, has assigned to Jordan F. Brooks.

WORTHVILLE.—W. T. McMillan & Co., general store, have failed.

ILLINOIS.

CAMBRIDGE.—E. Dashiell & Co., clothing, have been closed by the sheriff.

CHICAGO.—Augustin Brothers, manufacturers of lasts and dies, have been closed by the sheriff.

CHICAGO.—Childs & Spencer, proprietors of the Kingman Manufacturing Company, have assigned to Frank R. Groves. Liabilities $9,338; assets $5,892.

CHICAGO.—Adam Craig, trading as Adam Craig & Co., printers, has assigned.

CHICAGO.—Receiver Bentley, for Peter McGeoch, grain, who failed three months ago, was discharged on the 18th inst., having closed up accounts. He paid out to the unsecured creditors $789,140.

CHICAGO.—Application has been made for a receiver for the Sigwalt Sewing Machine Company. The liabilities are reported at about $70,000.

DANVILLE.—J. A. Webster & Co., grocers, have been attached.

HINCKLEY.—H. M. Maltbie & Co., grain, have failed.

JACKSONVILLE.—E. C. Lax, agricultural implements, gave a judgment for $9,587. The branch store at Ashland, under the style of E. C. Lax & Co., has been closed by the sheriff.

KANKAKEE.—Beauchamp & Babel, drugs, have assigned.

INDIANA.

FARMLAND.—Isaiah Jay, general store, has assigned.

LAFAYETTE.—J. H. & W. L. Ward, carpets, are reported to have assigned. W. L. Ward, furniture, has assigned.

SHELBYVILLE.—John Newcomb, notions, is reported to have left town.

SHERIDAN.—Rodman & Walker, general store, have compromised at 75 cents.

THORNTOWN.—A receiver has been appointed for the Hopkins Improved Scale Company.

IOWA.

CEDAR RAPIDS.—A. Andrews, furniture, has assigned to Warren Harmon.

CHARITON.—Swanson, Berquist & Co., grocers, have assigned.

DUBUQUE.—Frilk Brothers, painters, have assigned to J. G. Brown.

MARSHALLTOWN.—DeWitt Dean, grocer, has been closed by the sheriff.

KANSAS.

TOPEKA.—Meyer Brothers, bakers and confectioners, have had a mortgage foreclosed.

KENTUCKY.

COVINGTON.—L. B. Culbertson, Hope Pump Works, has called a meeting of creditors.

PADUCAH.—F. J. Dossett, grocer, has failed, and paid nothing.

MAINE.

BELFAST.—Edwin A. Staples, fish, is in insolvency.

BIDDEFORD.—Frank M. Cotton, drugs, is reported to have failed. Liabilities $5,500; nominal assets $2,000.

BLUE HILL.—Andrew Staples, grocer, is reported offering 40 cents.

DEXTER.—W. J. Hazeltine, harness, has failed.

LA GRANGE.—F. L. Hackett, general store, offers 10 cents. Liabilities $9,000; actual assets about $1,500.

MECHANICS FALLS.—The Dennison Paper Manufacturing Company has been attached for $4,000

PORTLAND.—A meeting of the creditors of Storer Brothers & Co. and their successors, Storer, Bolster & Co., wholesale dry goods, was held on the 19th inst. The total liabilities to outside creditors are $324,625 and nominal assets about $223,000. Storer, Bolster & Co. owe $118,000, of which $83,600 is to Storer Brothers & Co., and net assets $74,000. A committee was appointed, and Hon. R. M. Richardson was continued as trustee of the funds of the firm. Storer Brothers & Co. were succeeded by Storer, Bolster & Co. in July, and a month later the latter sold out their stock to Deering, Milliken & Co. In winding up their affairs the firm found that their assets were not sufficient to pay in full.

RAYMOND.—Alvin E. Plummer, trader, has been attached.

SKOWHEGAN.—W. C. Pearson, jeweler, is offering 40 cents. Liabilities over $4,000; assets about $3,000.

MARYLAND.

BALTIMORE.—Henry A. Ramsey, trading as Henry A. Ramsey & Co., Vulcan Steam Engine Works, assigned on the 18th inst. to William Reed and C. Dugan. He was attached in St. Louis, where he had a contract to build the water-works. His property in Baltimore is largely mortgaged.

MASSACHUSETTS.

BOSTON.—Benjamin Burgess & Son, commission, who recently failed, have assigned to William C. Rogers and Franklin Haven, Jr. The liabilities it is thought will approximate $1,400,000, of which less than $170,000 is acceptances. The principal assets for the unsecured creditors are claims for about $900,000 against parties in Cuba.

BOSTON.—C. W. Clements, wholesale boots and shoes, offers 30 cents, 25 cents in six months and 5 cents in one year, at 6 per cent. interest.

BOSTON.—James E. Cook, provisions, has failed and gone into insolvency. Liabilities about $650; assets nominal.

BOSTON.—Fred. V. Dizney, jeweler, has failed.

BOSTON.—Farrington & Hunnewell, silverware manufacturers, have failed. They had indorsed accommodation paper for several years for Young, Thayer & Co., the amount now outstanding being placed at about $65,000. Some of this has gone to protest. The firm have been in business forty-five years, and their failure is attributed solely to their accommodations.

BOSTON.—The liabilities of W. J. Huse, tailor, are about $2,000.

BOSTON.—J. F. Lamson, flour and grain, has failed. Liabilities, unsecured $24,000; secured $27,000, of which $18,500 is secured by realty mortgages and the balance by hypothecated grain; the equity in real estate is called worth $7,000; overplus on hypothecated grain $1,000; and there is personal property $4,000, making the total nominal assets for the unsecured creditors $12,000. A committee of creditors has been appointed.

BOSTON.—W. D. Lewis & Co., wholesale lumber, are in insolvency.

BOSTON.—Young, Thayer & Co., tanners' extracts and dye manufacturers, have failed and called a meeting of creditors for the 27th inst. They had considerable capital locked up, had to borrow largely, and facilities for obtaining money were cut off. Their liabilities are said to be nearly all on notes discounted, being estimated at about $85,000. In a recent statement they claimed nominal assets $214,000, of which $125,000 was plant and equipment in Canada. They have a branch at Liverpool, England.

COTTAGE CITY.—Lloyd Abbott, hotel, has failed. Liabilities $4,275; nominal assets $1,500. He will settle in insolvency.

EAST WEYMOUTH.—Reed & Hawes, shoe manufacturers, are reported to have assigned. Liabilities $46,000; assets $12,000.

FLORENCE.—Charles L. Hyde, fish, has assigned. Liabilities $1,200; assets $300.

LOWELL.—George S. Kittridge, belt maker, has failed. Liabilities $4,630; assets about $2,000 in accounts.

MARBLEHEAD.—The liabilities of S. E. Crowell & Co., shoe manufacturers, are about $11,000.

NORTHAMPTON.—Roland Lewes & Son, grocers, have called a meeting of creditors and offer 40 cents. Liabilities about $3,600; assets $2,000.

ROCKPORT (Pigeon Cove).—John F. Swett, hotel, owes $10,000; assets $500.

SPRINGFIELD.—J. E. Robinson, grocer, has assigned.

SPRINGFIELD.—B. R. Stephens, grocer, is reported settling with creditors at 40 cents.

WALPOLE.—Bradford Lewis & Son, cotton waste and cardboard manufacturers, have suspended. Liabilities about $55,000.

WORCESTER.—L. P. Ballou, grocer, has settled at 50 cents. Liabilities $1,800.

WORCESTER.—William T. Ewell, cabinetmaker, is in insolvency. Liabilities $1,000; no assets.

MICHIGAN.

CEDAR SPRINGS.—John Emerson, beer bottler, has sold out and is reported to have no assets.

GRAND RAPIDS.—W. C. Dennis, printer, has been attached. He has chattel mortgages against him for $6,300.

GRAND RAPIDS.—Peter Osterhout, lumber, has failed. Liabilities about $11,000.

GREENVILLE.—A. Z. Tompkins, grocer, has been closed under a chattel mortgage.

LUDINGTON.—Henry Konicke, saloon, has been attached.

PONTIAC.—E. S. Brown, confectioner, has given a bill of sale.

MINNESOTA.

BRAINARD.—George Lord, saloon, has assigned.

BRAINARD.—W. E. Martin, saloon, has assigned.

MINNEAPOLIS.—The International Ditching Company has been attached.

MISSOURI.

DIEHLSTADT.—Worrell & Burnett, grocers, are reported to have failed.

KANSAS CITY.—W. H. Robertson & Co., wholesale cigars, have assigned.

ST. LOUIS.—The Anthony & Kuhn Brewing Company succeeded Anthony & Kuhn, brewers, on the 15th inst. with a capital stock of $150,000. In taking the necessary legal steps it was found the assets were not as large as supposed, and the attorney advised the partners to submit their affairs to the creditors. The liabilities are $350,000 and assets $400,000. The business was established in 1867 and was very extensive.

MONTANA.

BILLINGS.—Marks & Soule, general store, have assigned.

MILES CITY.—D. Horagan, shoes, has assigned.

NEBRASKA.

KEARNEY.—Williams & Young, millinery, have been closed out by creditors.

ODELL.—John Postlewait & Co., general store, have been closed by the sheriff on an attachment for $3,500.

OMAHA.—Lewis Brash, clothing, has assigned. The banks hold mortgages on real estate for $6,350.

NEVADA.

EUREKA.—H. Kind, grocer, has failed.

NEW HAMPSHIRE.

MANCHESTER.—Furness Brothers, produce, have failed. Liabilities $4,000; nominal assets $1,000. They offer 10 cents.

MANCHESTER.—Goodwin Brothers, wheel manufacturers, are reported to have failed. Liabilities $3,000.

MANCHESTER.—A. G. Pratt, grocer, is reported to have failed. Liabilities $1,300; assets light.

PORTSMOUTH.—Bessie S. Connell, millinery, has been attached.

PORTSMOUTH.—C. Sullivan & Co., fish, offer 20 cents. Liabilities about $13,000; assets $2,500.

TILTON.—George A. Stevens, drugs, has failed. Liabilities about $6,000; nominal assets about $4,000.

NEW JERSEY.

NEWARK.—Hiram Cation, grocer, has failed.

WORTENDYKE.—The report of The Wortendykn Manufacturing Company, silk goods, shows liabilities, exclusive of capital stock, $434,915, of which $205,634 are on notes and $213,950 bonds and mortgages. The assets are $317,997, consisting of machinery and products in process of manufacture $92,873; mill property and other real estate $212,700; bills receivable $12,424; bad and doubtful $48,393.

NEW MEXICO.

WATROUS.—John O'Laughlin, saloon, has been closed by the sheriff.

NEW YORK.

ALBANY.—Leonard & Weeks, printers, have been protested, and creditors representing over $4,000 are seeking a settlement.

BATAVIA.—John K. Giddings, cigar manufacturer, has assigned.

BELLONA.—Rippey & Barnes, general store, have assigned to Samuel McBlain. Liabilities about $5,000; assets nearly as large.

BROOKLYN.—John C. Brown, furniture, assigned on the 17th inst. to William J. Gaynor, giving preferences for $14,231. The liabilities are reported at about $29,000. He started The Artistic Carpet and Furniture Company last March.

BUFFALO.—Charles H. Baker, paper hangings, has assigned.

BUFFALO.—Tobias Campion, grocer, has assigned.

BUFFALO.—The liabilities of L. M. Knauber, planing mill, are $5,800; nominal assets $7,000; actual assets $5,000; preferences $5,200.

BUFFALO.—L. C. Wood, painter, has failed and is out of business. Liabilities about $4,000; no assets.

NEW YORK CITY.—The schedules of Edward Barr, iron pipe, show liabilities $62,352; nominal assets $135,420; actual assets $3,931.

NEW YORK CITY.—The schedules of Buchow & Brandau, wholesale wines, show liabilities $11,594; nominal assets $6,754; actual assets $4,099.

NEW YORK CITY.—James A. Cunningham, petroleum broker, suspended on the 20th inst., short of 65,000 barrels of oil, which were closed out under the rule for his account.

NEW YORK CITY.—Abraham S. Herman, New York Knitting Works, assigned on the 18th inst. to Joseph F. Cullman, giving preferences to Rice, Stix & Co. $7,150; H. S. Mack & Co. $3,255; J. M. Herman $998; Louis Stix $14,423; total $25,827.

NEW YORK CITY.—William Rese, fancy goods, assigned on the 18th inst. to Isaac Trisdorfer, giving preferences for $918.

NEW YORK CITY.—James S. Ludington, hardwood and lumber, assigned on the 17th inst. to Benjamin F. Finley, giving him a preference for $4,559. He has been in business twenty-three years, and received a discharge in bankruptcy in 1875.

NEW YORK CITY.—Charles E. McBride, paints, assigned on the 19th inst. to John C. Freeman, giving a preference for $80.

NEW YORK CITY.—A. & E. Wallach, importers of notions and manufacturers of fancy leather goods, assigned on the 18th inst. to Frederick Lewis, giving preferences aggregating $119,835. All the New York creditors, with two exceptions, were preferred. Among the preferences were the following: Elinore Wallach $81,462; Joseph D. Plant $14,275; Joseph Wallach $4,204; National Pahquioque Bank of Danbury, Ct., $5,000. The liabilities are reported at about $325,000, of which about $200,000 is due in Europe. The actual value of the assets has not been determined; they consist of a large stock of fancy goods, book accounts, notes, and some real estate. The failure is attributed to the effect of losses by fire in December, 1881, depreciation in values, depression in trade, and losses in trying to establish the leather goods branch of the business. The business was established about thirty-two years ago by Abraham Wallach, and his brother became a partner in 1866.

NEW YORK CITY.—Stephen Weickert, shoes, assigned on the 17th inst. to Jacob A. Cantor, preferring Philip Stein $450.

NEW YORK CITY.—H. Wolff, petroleum broker, has suspended. He was short of oil.

PORT JERVIS.—William A. Taft, grocer, has assigned to William A. Crane, giving preferences for $1,127. Liabilities $2,093; nominal assets $917; actual assets $766.

POUGHKEEPSIE.—Thomas Connelly, grocer, has assigned to George W. Pratt.

RIPLEY.—Hiram Eddy, meat market, has assigned.

TULLY.—The liabilities of Cately & Crofoot, wagons, are about $6,000; assets about $3,000.

YONKERS.—Jacob E. Parsons, lumber, has assigned to Robert P. Getly.

NORTH CAROLINA.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, SEPTEMBER 29, 1883.

NOTES OF THE WEEK.

The stock market has rallied this week, as was expected after so severe a depression, though the turn came at a moment when it was least looked for, being immediately following the announcement of the heavy failures in this city. The first effort to rally was not a success, but a renewed attempt on Wednesday did the business. The operation is credited in the street mainly to Mr. Gould. The Villard stocks led the way upward on the rebound, this being the usual course of things; the Vanderbilt stocks were also strongly stimulated, apparently to create the impression that the Vanderbilt party were buying. It is all manipulation in this market, the operations being almost wholly restricted to the work of professionals.

The first day's session of the Bankers' Convention, which is to meet at Louisville, Ky., on the 10th and 11th of October, will be devoted to discussions regarding the currency, including the subject of the silver coinage and the question as to the basis of banknote circulation. Various suggestions for improving our banking system and extending its advantages, especially in such localities as are most deficient in banking facilities, will be also considered on that day. On the second day the industrial progress of the southern states will have the first place on the programme, and several papers will be presented on the best methods of improving mercantile and general credit, for enlarging the supplies of capital available for agricultural, manufacturing and mining development, and for reducing the general rate of interest by appropriate legislation and other means. The legislation referred to is understood to contemplate additional facilities for collecting debts and preventing the excessive or unjust exemption from the payment thereof common in some localities. The subject of a general bankruptcy law will also be discussed. Subordinate topics will receive attention in committee.

The bankers have before them a very fruitful field for investigation and discussion. As we have repeatedly pointed out, there is still room for a wide circulation of judicious and temperate views regarding the true office of the banks as facilitating the complicated exchanges of the day, and as supporting the existing credit system, and it should be the duty of the convention to bring views of this character clearly into relief. But besides this, financial questions of pressing moment are likely soon to engage the attention of Congress and of the country. The currency question of most importance, namely, how to find a substitute for the present basis of bank circulation, which will before long be swept away by the rapid process of debt reduction, or, failing that, how to avoid a contraction of the currency as a result of the redemption of the bonds is one which must soon be met. The proceedings of the convention should throw some light on this important question, and should aid materially in informing and guiding the judgment of Congress in relation to it. It is to be hoped that in this respect at least the outcome of the convention will not be disappointing.

A San Francisco correspondent says that while the retail traders and the bulk of the people generally on the Pacific coast favor the passage of a national bankrupt law, the wholesale dealers are opposed to any such measure, because under the state insolvency laws they have the power of attachment and of satisfying their demands before outside creditors can come in. This merely illustrates our statement, repeatedly made, that the opposition to a uniform bankruptcy law will be found to be confined mainly to those who in one way or another derive a profit from confusion. The ground upon which wholesalers oppose a bankrupt law constitutes one of the principal reasons why the enactment of such a measure should no longer be delayed. A system which inures to the advantage of the powerful and the well-placed to the detriment of the weak should be reformed as speedily as possible.

The Montreal *Shareholder* asks us to give "chapter and book" in support of our statement of the law of New York in regard to the liability for false representations made to mercantile agencies. This it gives us pleasure to do. If the editor of the *Shareholder* will turn to the 11th volume of the New York Weekly Digest, on page 234, he will find the case of The Eaton, Cole & Burnham Co. vs. Avery, decided by the New York Court of Appeals on November 30, 1880, which was the authority we had in mind when we penned the statement which the *Shareholder* seems inclined to question. The case referred to was one in which false representations were made by the defendant and appellant to a mercantile agency, and communicated by it to the plaintiff, who, relying upon them, sold goods on credit to the defendant. Shortly afterward the defendant's firm went into bankruptcy, leaving the greater part of the debt contracted as above mentioned unpaid. The court, speaking by Rapallo, J., all concurring, held that the "courts can take judicial notice of the business and office of mercantile agencies," and that "if a merchant furnishes to such an agency a wilfully false statement of his circumstances or pecuniary ability with intent to obtain a standing and credit to which he knows he is not entitled, and credit is extended to him in reliance thereon, he is as liable to any party defrauded as if he had made the false representation directly to him." We quote the words of the report.

A correspondent in Philadelphia, whose experience has given him an informed judgment, sends us a communication, which we print elsewhere, regarding the present condition of the organization known as the Knights of Labor. This letter will be found to be of particular interest in view of the prominence into which the question of the relations of capital and labor has lately been brought. Our correspondent says that the vast membership which the organization acquired during the last twelve years has been falling off of late. The hope for an amelioration of their condition which led many to join the body has been, it seems, in great part disappointed, and the fact of this disappointment is now recognized by the organization itself. The managers of the body are now endeavoring to restore the membership which the lack of accomplished results has frittered away. Not only has there been a diminution in the membership, but there are, it appears, elements of discord within the association itself which threaten its dissolution. Not to mention the difference of opinion upon the tariff, which is beginning to be manifested, it appears that a large number of the members inclined to socialistic views have become dissatisfied with the conservative element in the order, and have withdrawn, and that others are likely to follow.

The declarations of recent state conventions upon the tariff are not particularly noteworthy, the disposition of the politicians, generally speaking, being to evade the issue of revenue reform. Conventions of the dominant national party have been held during the last two weeks in the states of New York, Massachusetts, Maryland and New Jersey. In the latter state the convention insisted upon "a tariff so adjusted as to give full protection to home labor and industry." The New York Republicans adopted a declaration somewhat more vague in terms, but amounting to the same thing. The Massachusetts platform of this party is also evasive, declaring at once in favor of "a largely reduced taxation" and advocating "wise and well-matured laws to protect and develop American industry and enterprise." In Maryland a protectionist platform was adopted by the Republicans, one of the resolutions declaring that the policy of protection followed by the Republican party "established" the sympathy of that party with the interests of labor, and warning the people that the policy of the Democrats tends to reduce wages and degrade the American workman to the lower level of the foreign workshop. The Republican declarations, as will be seen, are all more or less definitely in favor of protection.

During the same period platforms have been put forth by the opposition party in each of the above states with the exception of New Jersey. The Democrats in Massachusetts, who have just renominated Governor Butler, have put themselves on record in an unequivocal way. Their declaration is "in favor of a tariff limited in amount to the sum necessary and adequate for revenue." The New York Democrats reaffirm the platform adopted by the last convention of the party in that state, which vaguely advocated a reform in the tariff. They denounce particularly the proposition put forward by the Pennsylvania protectionists that the people should be taxed to raise a surplus fund to be distributed among the states. For the rest the convention "points with pride" to the record of the party in the state. The Democratic convention in Maryland has adopted a declaration which reads like an attempt to suit men of all shades of opinion on the tariff question. It complains that the Republican party has not in its tariff legislation given "that just and equal protection to the industries of the country which it ought to have afforded," and a little further on demands that "national taxation in all its forms shall be limited to such amounts as are necessary for the economical administration of the government, for the payment of interest upon the public debt, and for the redemption in each year of a fixed and reasonable proportion of that debt." These latter declarations, it will be perceived, incline in the direction of free trade, but the party as a whole does not appear to have the courage of its convictions to a sufficient degree to hazard a conflict on a direct issue.

THE SEPTEMBER COTTON REPORT.

The cotton report to BRADSTREET'S for September comprises 1,140 mail replies from correspondents in the immediate cotton-growing regions. The gradual increase in the number and thoroughness of the replies entering into these monthly reports testifies to the confidence of the men of business in the south in our endeavor to give the actual state of the crop at regular intervals throughout the season. Thanks to greatly improved means of communication it is now possible to get at any given date a full and trustworthy report of the condition of the whole crop. Such journals and individuals as are accustomed to dismiss reports of general injury to the crop, by drouth or otherwise, as untrustworthy, apparently forget that the day has gone by when reports were a matter of general talk—in the air so to speak, instead of in the region of hard fact. Our own experience is that the men who know in the cotton regions are far too intelligent to consciously distort facts. Our present list of correspondents is made up of such men, and it is safe to say that their joint report, given herewith, is the most searching crop report of any kind ever brought together. There are 794 cotton-producing counties in the south. Of these, as we have previously indicated, 657 grow more than 500 acres of cotton each. From these 657 only we undertake to get reports. The 1,148 replies summarized below come from 623 counties, or an average of about 1 4-5 replies per county. The counties reported comprise 98 per cent. of the cotton-growing regions. The report shows conclusively that the present crop has suffered from a drouth scarcely less hurtful than that of 1881, when an expected big crop was cut down to 5,456,000 bales. It is too soon to expect reports indicating approximately the actual outturn of the crop in bales, as the weather for the next six weeks as affecting the picking will have much influence as regards the ultimate yield. Generally the plant has been so injured by the drouth that a top crop is out of the question, but, with favorable weather, a top crop may be gathered in localities. It should be borne in mind in connection with this, as with other reports, that returns are given as received from correspondents without adding to or taking away. Our energies have been directed toward securing competent and trustworthy correspondents rather than toward the impossible task of eliminating error from individual replies. The mode of analyzing and making up the report, as will be seen, consists first in presenting a general table giving the tenor of the replies by states, and second, according to locality in particular states. Beyond this interesting and pointed memoranda are made up from our mail advices, and finally comprehensive telegraphic correspondence giving the progress of the crop since the middle of the month. About one-fourth of the correspondents send pointed memoranda in addition to answering the formal questions. It is, of course, impossible to use more than a small portion of these, the endeavor being to give those having most significance. As illustrating the tenor of many memoranda received, the following from a trustworthy correspondent, dated at Meridian, Miss., September 25, is worth giving in this connection:

The counties of Lauderdale, Clarke and Jasper, in central Mississippi, have suffered as much if not more than our neighbors in Alabama. It will take five acres in the best sections of these counties to make a bale, and I know of many farms where it will take six to eight acres to produce one bale. Two showers of rain have fallen since the 13th of June. The leaves of the cotton plant are crisped and browned by the hot sun, and have become incorporated with the cotton and will be seen in the supplies soon to arrive. Many will make one-third of a crop here, and the best not more than one-half. Picking in the above counties will be finished by the first of November.

Following is our customary general table, the average date of replies being September 13:

CONDITION OF THE COTTON CROP ON SEPTEMBER 13, 1883.

States.	Cotton counties of over 500 acres	Number of counties reported	Number of replies received	Percentage of area reported	Condition of weather. Good	Fair	Bad	Condition as compa'd with Aug. report. Better	Worse	Same	Prospects for average crop. Good	Fair	Bad
North Carolina	63	62	126	100	10	28	88	14	15	97	..	35	91
South Carolina	32	30	67	100	1	11	55	..	9	58	..	2	65
Georgia	122	116	198	98	22	39	137	18	36	144	1	25	172
Florida	29	18	24	95	12	11	1	2	..	18	3	8	13
Alabama	64	63	125	99	8	21	96	4	27	94	1	17	107
Mississippi	70	67	128	97	7	20	101	1	19	108	..	15	113
Louisiana	46	44	80	100	8	7	65	1	10	69	..	2	78
Texas	121	114	209	97	11	25	173	7	24	178	5	27	177
Arkansas	73	66	104	94	10	14	80	6	12	86	8	17	79
Tennessee	37	34	69	99	11	14	34	11	10	38	7	26	26
Virginia, Missouri and Indian Territory	..	9	18	100	4	4	10	3	2	13	1	7	10
Totals	657	623	1,148	98	104	194	840	67	164	903	26	181	931
Totals from August report	657	610	1,048	98	181	320	547	..	..	..	145	424	479

As will be seen from the above 74 per cent. of the replies make the weather bad for the month, while but 52 per cent. reported bad weather in the August report. Turning to the "prospects for average crop" it will be seen that 82 per cent. of the correspondents report bad, while in the August report only 46 per cent. made the outlook bad. A month ago the possibility of favorable weather and a consequent revival of the plant had to be taken into account in judging of the prospect for average yield. A month afterward no weather however favorable could repair the damage inflicted. Hence the relatively greater falling off in prospects.

Picking in all of the cotton states with, perhaps, the exception of Tennessee and Virginia (where it is only just beginning), is much further advanced than in average years, owing to the drouth which prevailed over nearly the whole of the cotton belt, causing the crop to ripen and open prematurely. Should the weather continue favorable for picking it is thought that by far the larger part of the crop will be picked by November 1, some sections being nearly finished already.

The table following gives the tenor of replies from 14 large counties of North Carolina, containing 52 per cent. of the cotton area of the state. The average of the replies as to decrease of yield in each county is given:

CONDITION OF COTTON IN THE LARGER COUNTIES OF NORTH CAROLINA ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year	Weather since Aug. 17	Condition as comp'red with Aug. report	Prospects for average crop.
Anson	2	27,000	50	Bad.	Same.	Bad.
Edgecombe	3	55,000	10	Good.	Same.	Bad.
Franklin	3	28,000	28	Bad.	Same.	Bad.
Halifax	3	37,000	17	Bad.	Same.	Bad.
Johnson	3	28,000	25	Bad.	Same.	Bad.
Lenoir	2	34,000	22	Bad.	Same.	Bad.
Mecklenburg	3	40,000	29	Bad.	Same.	Bad.
Northampton	3	38,000	20	Fair.	Same.	Fair.
Pitt	3	33,000	22	Bad.	Worse.	Bad.
Richmond	3	30,000	37	Bad.	Same.	Bad.
Robeson	1	37,900	50	Bad.	Same.	Bad.
Wake	3	50,000	20	Fair.	Same.	Fair.
Wayne	2	30,000	36	Fair.	Same.	Bad.
Wilson	3	24,000	22	Bad.	Worse.	Fair.

There are 58 other counties of North Carolina having less than 25,000 and more than 500 acres of cotton each. From these we have 89 replies, which place the injury by drouth, etc., as affecting the ultimate yield, compared with last year, at about 25 per cent.

The 13 counties of South Carolina named in the following table represent 62 per cent. of the cotton area of the state:

CONDITION OF COTTON IN THE LARGER COUNTIES OF SOUTH CAROLINA ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year	Weath'r since Aug. 17	Condition as comp'red with Aug. report	Prospects for average crop.
Abbeville	2	90,500	55	Bad.	Same.	Bad.
Anderson	3	73,000	40	Bad.	Same.	Bad.
Barnwell	2	85,000	45	Fair.	Same.	Bad.
Darlington	3	66,500	49	Bad.	Same.	Bad.
Edgefield	3	93,500	48	Bad.	Same.	Bad.
Fairfield	3	77,000	42	Bad.	Same.	Bad.
Laurens	2	68,000	42	Bad.	Same.	Bad.
Newberry	3	65,000	43	Bad.	Same.	Bad.
Orangeburg	3	62,000	38	Bad.	Same.	Bad.
Spartanburg	2	80,500	46	Fair.	Same.	Bad.
Sumter	1	80,000	35	Bad.	Same.	Bad.
Union	5	59,000	45	Bad.	Same.	Bad.
York	3	63,500	50	Bad.	Same.	Bad.

We have 32 replies from the remaining counties of South Carolina. These do not indicate any better condition than in the large counties above named.

The 22 large counties of Georgia named in the following table, represent 37 per cent. of the total cotton area of the state:

CONDITION OF COTTON IN THE LARGER COUNTIES OF GEORGIA ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year	Weath'r since Aug. 17	Condition as comp'red with Aug. report	Prospects for average crop.
Burke	3	83,000	50	Bad.	Same.	Bad.
Coweta	2	49,000	26	Bad.	Same.	Bad.
Dooley	2	44,000	50	Bad.	Same.	Bad.
Dougherty	2	44,000	52	Bad.	Worse.	Bad.
Greene	2	40,000	50	Bad.	Same.	Bad.
Hancock	2	46,000	39	Bad.	Same.	Bad.
Harris	2	46,000	46	Bad.	Same.	Bad.
Henry	1	35,000	33	Bad.	Same.	Bad.
Houston	2	69,500	50	Bad.	Same.	Bad.
Jefferson	2	37,000	47	Bad.	Worse.	Bad.
Meriwether	2	51,000	42	Fair.	Same.	Bad.
Monroe	2	48,500	19	Bad.	Same.	Bad.
Morgan	2	39,000	17	Fair.	Same.	Fair.
Ogelthorpe	2	35,000	45	Bad.	Same.	Bad.
Putnam	2	35,500	27	Fair.	Same.	Bad.
Randolph	2	39,000	43	Bad.	Worse.	Bad.
Stewart	1	44,500	30	Bad.	Same.	Bad.
Sumter	2	39,000	31	Bad.	Worse.	Bad.
Talbot	2	40,000	29	Bad.	Worse.	Bad.
Thomas	2	36,500	18	Fair.	Same.	Fair.
Troup	3	61,000	38	Bad.	Same.	Bad.
Washington	2	73,500	30	Bad.	Same.	Bad.

Beyond those above named Georgia has 96 counties containing less than 35,000 and over 500 acres of cotton each. From those 96 counties we have 154 replies which unite in placing the outlook far below that of last year. The drouth in Georgia is reported by many correspondents as the worst in the history of the state.

The counties of Florida named in the following table represent 88 per cent. of the state's cotton area:

CONDITION OF COTTON IN THE LARGER COUNTIES OF FLORIDA ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year	Weather since Aug. 17	Condition as comp'red with Aug. report	Prospects for average crop.
Alachua	1	16,000	20	Fair.	Same.	Fair.
Columbia	1	17,000	30	Good.	Same.	Bad.
Gadsden	1	21,500	20	Fair.	Same.	Bad.
Hamilton	1	12,500	30	Good.	Same.	Bad.
Jackson	1	30,000	17	Fair.	Same.	Bad.
Jefferson	1	39,000	25	Good.	Same.	Bad.
Leon	2	41,500	46	Fair.	Same.	Bad.
Madison	2	27,500	29	Good.	Same.	Bad.
Marion	2	14,500	Same	Good.	Same.	Good
Suwanee	1	8,000	30	Bad.	Same	Bad.

The small counties of less than 12,000 acres represent only 12 per cent. of the total area, and the replies received from them show the condition in the same proportion as the larger counties in the table. It is thought necessary to summarize Florida separately.

The 16 counties of Alabama named below represent 55 per cent. of the state's cotton area:

CONDITION OF COTTON IN THE LARGER COUNTIES OF ALABAMA ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year	Weath'r since Aug. 17	Condition as comp'red with Aug. report	Prospects for average crop.
Barbour	2	110,000	45	Bad.	Same.	Bad.
Bullock	2	77,000	30	Bad.	Same.	Bad.
Chambers	3	72,000	30	Bad.	Worse.	Bad.
Dallas	4	126,000	35	Bad.	Same.	Bad.
Greene	1	68,000	40	Bad.	Same.	Bad.
Hale	2	79,000	42	Bad.	Same.	Bad.
Henry	2	60,000	43	Bad.	Worse.	Bad.
Lowndes	3	110,000	41	Bad.	Same.	Bad.
Macon	2	63,500	33	Bad.	Same.	Bad.
Madison	3	81,000	25	Bad.	Worse.	Bad.
Marengo	3	83,000	50	Bad.	Same.	Bad.
Montgomery	3	113,000	34	Bad.	Worse.	Bad.
Perry	2	81,000	28	Bad.	Same.	Bad.
Russell	1	93,000	30	Bad.	Same.	Bad.
Sumter	3	86,000	45	Fair.	Same.	Bad.
Wilcox	3	87,000	58	Bad.	Same.	Bad.

The smaller counties of Alabama, 48 in number, with an acreage of less than 60,000 and more than 500, and sending us 86 replies, tell the story of great injury by drouth in about the same proportion as given by the larger counties in tabulation.

The 16 counties of Mississippi named below represent 45 per cent. of the state's cotton area:

CONDITION OF COTTON IN THE LARGER COUNTIES OF MISSISSIPPI ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year	Weath'r since Aug. 17	Condition as comp'red with Aug. report	Prospects for average crop.
Carroll	1	40,500	20	Bad.	Same.	Bad.
Claw	3	42,500	32	Fair.	Same.	Bad.
Copiah	2	55,000	43	Bad.	Same.	Bad.
De Soto	3	68,500	48	Bad.	Same.	Bad.
Hinds	2	76,000	25	Bad.	Same.	Bad.
Holmes	3	62,000	38	Bad.	Same.	Bad.
Lee	1	41,000	20	Bad.	Same.	Bad.
Lowndes	2	58,500	42	Bad.	Same.	Bad.
Madison	2	54,000	34	Bad.	Same.	Bad.
Marshall	3	64,000	37	Bad.	Same.	Bad.
Monroe	3	70,000	30	Fair.	Same.	Bad.
Noxubee	2	70,000	58	Bad.	Same.	Bad.
Panola	3	69,500	45	Bad.	Same.	Bad.
Tate	3	49,000	42	Bad.	Same.	Bad.
Washington	2	56,000	15	Fair.	Same.	Fair.
Yazoo	2	78,200	36	Bad.	Same.	Bad.

Mississippi has 51 counties of less than 40,000 and more than 500 acres, from which we have 91 replies giving the condition as very unfavorable in about the same proportion as is shown by the table above.

The 22 counties of Texas named below represent 39 per cent. of the state's total cotton area:

CONDITION OF COTTON IN THE LARGER COUNTIES OF TEXAS ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year	Weath'r since Aug. 17	Condition as comp'red with Aug. report	Prospects for average crop.
Bastrop	3	42,000	57	Bad.	Same.	Bad.
Bell	2	40,000	50	Bad.	Same.	Bad.
Collin	3	47,000	35	Fair.	Same.	Bad.
Colorado	1	41,500	50	Fair.	Same.	Bad.
Dallas	3	42,000	25	Fair.	Same.	Fair.
Denton	1	40,000	40	Bad.	Same.	Bad.

Limestone	2	40,000	50	Bad.	Worse.	Bad.
McLennan	4	60,500	35	Bad.	Same.	Bad.
Milam	3	40,000	45	Bad.	Same.	Bad.
Navarro	2	65,000	45	Bad.	Same.	Bad.
Robertson	2	50,000	55	Bad.	Same.	Bad.
Smith	1	51,000	50	Fair.	Same.	Bad.
Washington	1	66,500	33	Fair.	Same.	Bad.

Texas has 92 cotton counties of less than 40,000 and more than 500 acres, from which we have 159 replies, which unite in making the crop to be much less than last year, showing that nearly all of Texas has suffered extremely from dry weather.

The following table gives the situation in 13 parishes of Louisiana, representing 55 per cent. of the state's cotton area:

CONDITION OF COTTON IN THE LARGER PARISHES OF LOUISIANA ON SEPTEMBER 13.

Parishes.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year	Weath'r since Aug. 17	Condition as comp'red with Aug. report	Prospects for average crop.
Bossier	1	37,500	60	Bad.	Worse.	Bad.
Caddo	2	47,000	29	Fair.	Same.	Bad.
Claiborne	2	47,000	58	Bad.	Worse.	Bad.
Concordia	2	42,000	17	Fair.	Same.	Bad.
East Feliciana	2	38,500	50	Bad.	Same.	Bad.
Madison	2	25,000	35	Fair.	Same.	Bad.
Morehouse	1	25,000	45	Bad.	Same.	Bad.
Natchitoches	2	30,000	50	Fair.	Same.	Bad.
Ouachita	2	26,000	40	Bad.	Same.	Bad.
Point Coupee	2	30,000	15	Fair.	Better.	Bad.
St. Landry	2	46,000	58	Bad.	Same.	Bad.
Tensas	1	50,000	30	Bad.	Same.	Bad.
Union	2	32,000	37	Bad.	Worse.	Bad.

The condition in the smaller parishes of Louisiana is undeniably bad, and the reports of injury are about as shown in the table above. Worms, with drouth and shedding, have caused the falling off. The

number of parishes of less than 25,000 and over 500 acres are 31, and these send us 57 replies.

The following named 15 counties of Arkansas represent 39 per cent. of the state's cotton area:

CONDITION OF COTTON IN THE LARGER COUNTIES OF ARKANSAS ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year....	Weath'r since Aug. 17.....	Condition as comp'red with Aug. report..	Prospects for average crop..
Chico	1	29,000	40	Bad.	Same.	Bad.
Clark	2	25,000	50	Bad.	Same.	Bad.
Columbia	2	31,000	54	Bad.	Same.	Bad.
Crittenden	1	24,000	25	Good.	Same.	Fair.
Hempstead	1	28,500	25	Good.	Same.	Fair.
Jefferson	1	41,000	20	Bad.	Same.	Bad.
Lee	2	35,000	42	Bad.	Same.	Bad.
Lincoln	1	25,000	25	Bad.	Same.	Bad.
Lonoke	1	25,000	25	Bad.	Same.	Bad.
Nevada	2	25,500	42	Bad.	Same.	Bad.
Ouachita	2	26,000	57	Bad.	Same.	Bad.
Phillips	1	40,000	40	Bad.	Same.	Bad.
Pulaski	1	40,000	15	Bad.	Same.	Bad.
Sebastian	2	26,000	22	Bad.	Same.	Fair.
Union	2	31,000	63	Bad.	Same.	Bad.

Arkansas has 51 counties of less than 25,000 and more than 500 acres, and which send us 82 replies. These show the prospects for an average crop to be indeed poor. Great injury has been done since last report by the protracted drouth.

The 13 counties of Tennessee named represent 74 per cent. of the state's cotton area:

CONDITION OF COTTON IN THE LARGER COUNTIES OF TENNESSEE ON SEPTEMBER 13.

Counties.	No. of replies.	Acre'ge 1883-4	P. cent. decr'se in yield from last year....	Weather since Aug. 17.....	Condition as comp'red with Aug. report..	Prospects for average crop..
Carroll	4	33,000	13	Fair.	Same.	Fair.
Fayette	3	87,500	14	Bad.	Same.	Fair.
Gibson	3	48,000	20	Bad.	Worse.	Bad.
Giles	2	28,000	21	Bad.	Worse.	Bad.

McNairy	1	25,000	5	Fair.	Same.	Fair.
Madison	1	30,000	10	Fair.	Same.	Fair.
Rutherford	2	34,500	2	Bad.	Better.	Bad.
Shelby	2	95,500	17	Bad.	Same.	Bad.
Tipton	2	42,000	33	Bad.	Worse.	Bad.

Tennessee has 21 counties of less than 25,000 and more than 500 acres. These send us 41 replies, showing an average decrease in yield as compared with last year of 15 to 20 per cent. The condition of the crop in Tennessee is better than in any other state.

The following dispatches were received yesterday by BRADSTREET'S regarding the weather since September 13, and the present condition of the cotton crop:

From Lumberton, N. C.: The weather since September 13 has been very bad—rain and storms up to the 25th, but fine now. The cotton crop was badly injured by storm on the 10th inst. Not more than half the crop will be made.

From Mount Olive, N. C.: The weather was excessively wet from the 13th to the 24th, and damaged crop 10 per cent. by rot and 15 per cent. on value of the staple now open. The last three days have been fair.

From Raleigh, N. C.: We have had heavy rains and storms since the 13th, which have considerably injured the quality and quantity of the cotton crop. The weather is now clear.

From Tarboro, N. C.: We have had constant rainy, warm and damp weather since the 10th inst., but it is now clear. Seed has sprouted in bolls. The crop is fully 25 per cent. short of average.

From Wilmington, N. C.: The cotton yield will be off from last year 25 per cent.

From Aiken, S. C.: The weather to the 22d was wet, but since good. Sixty per cent. now considered high estimate of yield as compared with last year.

From Charleston, S. C.: For the state at large the weather has been bad. We have had constant rains, and prospect is less favorable.

From Columbia, S. C.: The weather is fine for picking. There is no change in the general prospects. We estimate three-quarters of a crop.

From Greenwood, S. C.: The weather has been dry and favorable for picking. There is no improvement in crop prospects. About one-third of last year's yield will be gathered.

From Spartanburg, S. C.: Rain since the 13th has injured cotton to some extent. Prospects are no better.

From Albany, Ga.: The weather since the 13th has been favorable for picking. There is no improvement in prospects.

From Columbus, Ga.: The weather has been generally good for saving the crop. The yield will be fully 40 per cent. short of last year's. The bulk of the crop will be gathered by November 1.

From Atlanta, Ga.: The weather has been fine; prospects are unchanged since the 13th. The outlook is bad.

From Macon, Ga.: The weather has been favorable. Crop prospects are unchanged.

From Montezuma, Ga.: The weather has been dry, and cotton has opened rapidly and is about all picked; not over half a crop will be made.

From Rome, Ga.: The weather is clear and warm, and the cotton crop will be about one-third short here.

From Sandersville, Ga.: The weather has been very favorable for picking since the 13th. We had a heavy rainstorm on the 17th doing, slight damage. Receipts at the railroad depots in the country to date are heavier than last year. Very little top crop is visible, and only a two-third crop will be made.

From Madison, Fla.: The weather has been good since 13th inst. The cotton crop is estimated at 20 per cent. less than last year in this section.

From Monticello, Fla.: The weather has been good and crop is almost gathered and will make five-eighths of an average.

From Demopolis, Ala.: The weather is excessively dry. On uplands the outside estimate is only half of an average crop.

From Eufaula, Ala.: The weather since the 13th inst. has been favorable for picking cotton. The crop is short at least 25 per cent.

From Montgomery, Ala.: We have had no rain since June 22, and two-thirds of the crop is already gathered; not more than one-half of a crop will be made.

From Prattsville, Ala.: The weather continues dry. Have had no rain since the last report. The cotton crop is 50 per cent. less than last year.

From Seale, Ala.: The weather has been very cool and unfavorable for cotton. We will not make more than two-thirds of a crop in Russell county.

From Selma, Ala.: No change in the crop since the 13th; weather is clear and temperature warm.

From Columbus, Miss.: There has been no material change in the condition of the crop; have had no rain since the 13th. The weather is very favorable for gathering, and all the crop made will be saved.

From Durant, Miss.: Have had very dry weather since September 13, and the crop is from 33 to 35 per cent. short of last season in this section.

From Jackson, Miss.: Drouth still continues and stock water is becoming very scarce. The cotton crop in this vicinity is estimated at one-fourth to one-third less than last year.

From Meridian, Miss.: The weather has been very dry, and three-fourths of the crop is picked. Accounts are discouraging. There has been no new growth.

From Natchez, Miss.: Since September 13 the weather has been fine for gathering. Crop reports from the country are worse every day. No more than a half crop is expected.

From Port Gibson, Miss.: Weather has been good. Cotton is all open. The prospects are somewhat improved in bottoms, but hills are generally very poor. Crop is estimated at two-thirds of an average crop.

From Baton Rouge, La.: The weather since the 13th has been very favorable, and the cotton prospect for a good crop is one-third short, but will soon be gathered. No rain for five weeks.

From Bayou Sara, La.: The weather has been dry and cool. Prospects are for one-half of last year's yield.

From Clinton, La.: There is no improvement in the crop since last report. The weather is very dry and the outlook not so good.

From Shreveport, La.: The weather is favorable for picking. It rained on the 15th and 16th. Late picking will close by 15th prox. on hills, and by November 1 in bottoms. The yield will be one-half last year on upland and two-thirds in bottom lands.

From Calvert, Tex.: We had a good rain on the 20th, too late to benefit cotton prospects. The yield is still 50 per cent. below last year.

From Corsicana, Tex.: The weather since the 13th has been generally dry and fine for picking; the light rains have done neither good nor harm. Prospects slightly more favorable than promised a month ago.

From Fort Worth, Tex.: The weather has been cool and dry and picking is progressing finely. The yield will be some better than was expected two weeks ago. Cotton is coming in to market quite freely.

From Marshall, Tex.: The weather has been fine for picking, with but little rain. The crop will be about one-half that of last season and about two-thirds of an average crop.

From McKinney, Tex.: The prospects for gathering the crop are good as the weather is dry, but will make only one-fourth of a crop in this county.

From Savoy, Tex.: The weather has been very dry, and cotton is two-thirds picked and will all be in market by the last of November.

From Terrell, Tex.: The weather is clear and cool and fine for picking. The crop is estimated at one-half, but may exceed that a little.

From Arkadelphia, Ark.: The weather has been good and the cotton prospect is fair.

From Helena, Ark.: The drouth cut early cotton short. Weather is now dry and favorable for picking, but too cool to freely mature late cotton. Decrease in yield from last year is estimated at from one-quarter to one-third.

From Little Rock, Ark.: The weather has been very fine for picking, and an average crop will be gathered.

From Pine Bluff, Ark.: The weather is clear, warm and pleasant and exceedingly good for picking. There is no improvement in prospects and indications point to 30 per cent. shortage from last year at same date.

From Van Buren, Ark.: We have had no rain for several weeks and cotton is opening fast. We estimate the crop to be one-half short.

From Collierville, Tenn.: The weather has been very dry, and crop prospects since September 13 have been failing rapidly. Bolls are opening prematurely.

From Murfreesboro, Tenn.: The weather has been cool; cotton is late, and an early frost will cut the crop short, but with late frost we will make an average crop.

THE VIRGINIA DEBT QUESTION.

The recent decision of Judge Bond, of the United States Circuit Court in Virginia, has again drawn attention to the present condition of the debt of Virginia, and the prospects of the bondholders for securing an ultimate victory in their struggle with the dominant party in that state. To fully understand the scope and importance of that decision it will be necessary to refer particularly to the history of the legislation of the state respecting the debt during the last twelve years, while for a comprehension of the debt question in all its bearings it will be necessary to take a longer retrospect. This is essential for the reason that the subject has been obscured and confused by the introduction into the controversy of political considerations having no proper connection therewith.

In the year 1820 the state of Virginia, then comprising within its limits the present state together with the territory which has since been formed into the state of West Virginia, began to borrow money for the purpose of creating works of internal improvement. The total borrowings of the state up to January 1, 1861, amounted to $38,710,857.22, for which she had given her bonds bearing 6 per cent. interest. She has borrowed nothing since then. The money so borrowed was spent in the erection of canals, railroads, turnpikes, asylums, and various other works of public utility. As a matter of fact, every railroad in the state but two was in the main constructed with the money thus borrowed. Interest on the debt was regularly paid until the coming on of the war. After the beginning of the war, the debt being owned mainly abroad and in the northern states, but little more interest was paid upon it. During the war the state was divided and a portion of the old state, containing about one-third of its territory and population, was converted into the new state of West Virginia.

By the year 1871 public attention in the state was aroused to the necessity of making some provision for the payment of the debt. It was considered that as the debt had been contracted by the old state composed of the existing states of Virginia and West Virginia, and had been spent for the advantage of both, the latter state should pay a ratable proportion of the debt. This proportion was assumed, on the basis of the prior division of territory and population, to be one-third of the whole. These considerations led to the passage by the legislature of Virginia of the funding act of 1871, which, in return for the surrender of the bonds, offered to allow the creditors to fund two-thirds of the amount of these bonds and of the interest due thereon in 6 per cent. coupon or registered bonds of the state having thirty-four years to run. As an inducement to the bondholders, the coupons were made payable semi-annually, and receivable at and after maturity for all taxes, dues and demands due the state. For the remaining one-third of the amount of the bonds it was provided that certificates should be issued to the creditors, setting forth the amount thereof with interest, and that their payment should be provided for in accordance with such settlement as might subsequently be made between the states of Virginia and West Virginia. The principal debt and the accumulated interest thereon amounted at that time to about $45,000,000.

The offer thus made by the state was very generally accepted by the creditors. Funding went on rapidly under the act, and within a few months there were issued about $20,000,000 worth of new bonds bearing tax-receivable coupons, in return for surrendered bonds to the amount of about $30,000,000. At this point of time the legislature re-assembled and repealed the funding act so far as to forbid the issuance of any more bonds bearing coupons receivable in payment for taxes, and enacted a law forbidding the collectors of taxes to receive the coupons in payment thereof. The validity of this latter act was questioned by the bondholders, and was declared void by the state court of last resort, which held that the provisions of the funding act constituted a contract founded upon valuable considerations and binding upon the state. The same conclusion was reached by the Supreme Court of the United States at the October term in 1880.
